E-mail: ministry@gcu.edu
Accreditation

The University holds many accreditations for the University, some colleges, and some programs. Accreditation is desirable as it speaks to the quality of the institution, acknowledged by university peer institutions. In choosing a university, parents and students should pay close attention to whether their university of choice is regionally accredited or not.

Regional accreditation in higher education originated almost a century ago as an American process conferred by a nongovernmental agency. It provides quality assurance and ensures institutional program improvement. The agency has visited Grand Canyon University and all reviews on accreditation have been made by expert and trained peers. During the visit, educational activities, administration, financial stability, admissions and student personnel services, resources, student academic achievement, organizational effectiveness, and relationships with outside constituencies are reviewed.

Six regional agencies provide institutional accreditation on a geographical basis — Middle States, New England, North Central, Northwest, Southern, and Western. While independent of one another, the six regional associations cooperate extensively and recognize one another's accreditation.

The Higher Learning Commission and its predecessor have continually accredited Grand Canyon University since 1968, providing GCU with its most recent 10-year reaccreditation in 2007. The Arizona State Board for Private Postsecondary Education licenses GCU in Arizona. In addition, the University obtained the following specialized accreditations and approvals for its core program offerings:

**Higher Learning Commission**
The Higher Learning Commission (member of North Central Association of Colleges and Schools) accredits Grand Canyon University.

The Higher Learning Commission  
North Central Association of Colleges and Schools  
30 North LaSalle Street, Suite 2400  
Chicago, IL 60602-2504  
Phone: 312-263-0456  
Toll-free: 800-621-7440  

**Arizona State Private Post-Secondary Education**
Grand Canyon University is licensed in Arizona by the Arizona State Board for Private Postsecondary Education.

Arizona State Board for Private Postsecondary Education  
1400 West Washington, Room 260  
Phoenix, AZ 85007  
Phone: 602-542-5709  
[http://azpps.e.state.az.us](http://azpps.e.state.az.us)

**Veteran's Administration**
Grand Canyon University is approved for the education and training of veterans under the provisions of Title 10 and 38, United States Code. Grand Canyon University accepts Chapter 30, 31, 32, 35, 1606, 1607 recipients. Veterans are approved for benefits for numerous programs. For more information regarding using your VA benefits at GCU, please e-mail [VaBenefits@gcu.edu](mailto:VaBenefits@gcu.edu) or visit [http://my.gcu.edu](http://my.gcu.edu) – Student Services, Military Information, Veteran Affairs Benefits.

**Ken Blanchard College of Business**
The Association of Collegiate Business Schools and Programs (7007 College Boulevard, Suite 420, Overland Park, KS 66211; 913-339-9356) accredits the following programs of the Ken Blanchard College of Business: Bachelor of Science in Accounting, Bachelor of Science in Marketing, Bachelor of Science in Business Administration, Bachelor of Science in Entrepreneurial Studies, Master of Business Administration, and Executive Master of Business Administration.

**College of Education**
The Grand Canyon University College of Education is approved by the Arizona State Board of Education and the Arizona Department of Education to offer Institution Recommendations (credentials) for the certification of elementary, secondary, and special education teachers, and administrators.

**College of Nursing and Health Sciences**
The Commission on Collegiate Nursing Education (One DuPont Circle NW, Suite 530, Washington, DC 20036; 202-887-6791) and the Arizona State Board of Nursing accredit the University for the Bachelor of Science in Nursing and Master of Science in Nursing degrees.

The Commission on Accreditation of Athletic Training Education (CAATE) (2201 Double Creek Drive, Suite 5006, Round Rock, TX 78664) accredits the Athletic Training Education Program.
Intercollegiate Athletics

Intercollegiate athletics function under the guidelines of the National Collegiate Athletic Association (NCAA)—Division II (1802 Alonzo Watford Sr. Drive, Indianapolis, IN 46202), regarding eligibility to participate in intercollegiate sports.

Authorizations

Alabama

Grand Canyon University has been granted authorization by the State of Alabama under Ala. Code 16-5-10 (14) (1975) to offer the academic degree programs described herein. Since credentials earned through the College of Education do not automatically qualify for teacher certification, endorsement, and/or salary benefits within the State of Alabama, prospective students are advised to contact the Alabama State Superintendent of Education.

Arkansas

Arkansas Higher Education Coordinating Board certification does not constitute an endorsement of any institution or program. Such certification merely indicates that certain criteria have been met as required under the rules and regulations implementing institutional and program certification as defined in Arkansas Code §6-61-301.

Indiana

This institution is regulated by The Indiana Commission on Proprietary Education, 302 West Washington Street, Room E 201, Indianapolis, IN 46204-2767. (Toll Free Indiana Number: 1-800-227-5695 or 317-232-1320)

Minnesota

Grand Canyon University is registered as a private institution with the Minnesota Office of Higher Education pursuant to sections 136A.61 to 136A.71. Registration is not an endorsement of the institution. Credits earned at the institution may not transfer to all other institutions.

Ohio

Grand Canyon University is approved by the Ohio Board of Career Colleges and Schools and any Ohio residents who have a complaint can file a complaint with the Ohio Board of Career Colleges and Schools (35 East Gay Street, Suite 403, Columbus, OH, 43215; 614-466-2752 or toll free 877-275-4219).

Pennsylvania

Teacher education programs have not been reviewed or approved by Pennsylvania. Candidates will have to apply for certification and meet requirements for certification as out-of-state candidates.

South Carolina

Licensed by the South Carolina Commission on Higher Education (1333 Main Street, Suite 200, Columbia, SC 29201; 803-737-2260). Licensure indicates only that minimum standards have been met; it is not an endorsement of quality. Licensure is not equivalent to or synonymous with accreditation by an accrediting agency recognized by the U.S. Department of Education.

Tennessee

Grand Canyon University is authorized for operation as a postsecondary education institution by the Tennessee Higher Education Commission. In order to view detailed job placement and graduation information on the programs offered by Grand Canyon University, visit www.state.tn.us/thec, and click on the Authorized Institutions Data button.

This authorization must be renewed each year and is based on an evaluation by minimum standards concerning quality of education, ethical business practices, health and safety, and fiscal responsibility. A student may appeal an academically related University policy or decision, including tuition, fees, and code of conduct or academic dishonesty charges when extreme extenuating circumstances merit and where supporting documentation exists. Such grievances may involve, but are not limited to, final grades, discrimination, or harassment.

The appeal process is designed to offer the student two opportunities to be heard. Students should be aware that appeals in which policy or process was not followed, in which extenuating circumstances are not existent, are unlikely to be approved.

To initiate an appeal, students must contact their Academic Counselor. The Academic Counselor will gather the information and route it to the appropriate parties at the University. All supporting documentation should clearly and explicitly describe the appeal (including the actual policy being appealed), demonstrating that the student attempted in good faith to resolve the issues with the involved parties. Students are strongly encouraged to discuss the intended appeal with an Academic Counselor prior to submission.

Under extenuating circumstance, if the student believes the first-level decision is unjust, the student may escalate the appeal to the second level by submitting another. Not liking the first-level decision is not justification for filing a second appeal. A second appeal decision requires additional documentation to justify a resubmission of the grievance. The second level of appeal decision is the final decision of the University.
If a complaint is not settled at the institutional level, the student may contact the Tennessee Higher Education Commission (404 James Robertson Parkway, Suite 1900, Nashville, TN 37243-0830; 615-741-5293).

Transferability of Credits for Tennessee Students

Credits earned at Grand Canyon University may not transfer to another educational institution. Credits earned at another educational institution may not be accepted by Grand Canyon University. You should obtain confirmation that Grand Canyon University will accept any credits you have earned at another educational institution before you execute an enrollment contract or agreement. You should also contact any educational institutions to which you may want to transfer credits earned at Grand Canyon University to determine if such institutions will accept credits earned at Grand Canyon University prior to executing an enrollment contract or agreement. The ability to transfer credits from Grand Canyon University to another educational institution may be very limited. Your credits may not transfer and you may have to repeat courses previously taken at Grand Canyon University if you enroll in another educational institution. You should never assume that credits will transfer to or from any educational institution. It is highly recommended and you are advised to make certain that you know the transfer of credit policy of Grand Canyon University and of any other educational institutions to which you may in the future want to transfer the credits earned at Grand Canyon University before you execute an enrollment contract or agreement.

Washington

Grand Canyon University is authorized by the Washington Higher Education Coordinating Board (HECB) and meets the requirements and minimum educational standards established for degree-granting institutions under the Degree Authorization Act. This authorization is valid until July 15th, 2012, and authorizes Grand Canyon University to advertise and recruit for the following degree programs offered via distance learning: Master of Arts in Teaching; Master of Education in Curriculum and Instruction: Reading; Master of Education in Curriculum and Instruction: Technology; Master of Education in Education Administration; and Master of Education in Special Education for Certified Special Educators. Any person desiring information about the requirements of the Act or the applicability of those requirements to the institution may contact the HECB (P.O. Box 43430, Olympia, WA 98504-3430).

Prospective Washington state students are advised to contact the Office of the Superintendent of Public Instruction (360-725-6320 or profed@k12.wa.us) to determine whether this education program is approved for teacher certification or endorsements in Washington state. Additionally, teachers are advised to contact their individual school district as to whether this program may qualify for salary advancement.
About Grand Canyon University

Vision
Grand Canyon University is the premier Christian University educating people to lead and serve.

Mission Statement
Grand Canyon University prepares learners to become global citizens, critical thinkers, effective communicators, and responsible leaders by providing an academically challenging, values-based curriculum from the context of our Christian heritage.

Historical Sketch
Grand Canyon College was born in the wake of World War II as the realization of a dream long held dear by the tiny congregations of Southern Baptists that called the Arizona mission frontier their home. In the fall of 1946, the Baptist General Convention of Arizona voted to organize a college. A few months later, the Convention selected the first trustees for the college, who soon secured an abandoned armory building in Prescott, Arizona, as Grand Canyon’s first campus.

The College was chartered on August 1, 1949, with 16 faculty and approximately 100 students, many of them veterans. In 1951 the College put up its first permanent buildings on a 90-acre tract in west Phoenix. Grand Canyon College was fully accredited in 1968 by the Commission on Institutions of Higher Education, North Central Association of Colleges and Schools, 30 North LaSalle Street, Suite 2400, Chicago, IL 60602-2504 (312-263-0456 or 800-621-7440).

The College was first considered primarily a school for preachers, but its reputation expanded rapidly. Grand Canyon College became famous early on for its teacher education program and soon developed outstanding programs in the sciences, nursing, business, music, and the arts, while maintaining its excellence in Christian studies.

During planning for the change in institutional organization and status from Grand Canyon College to Grand Canyon University, the institution identified several landmark events that had been and would be pivotal during this transition. These included, but were not limited to, the organization of programs and departments into multiple colleges, the offering of graduate degree programs, the formation of the Grand Canyon University Foundation, and the generosity of several individuals who pledged or gave unrestricted gifts valued at one million dollars or more to launch the University into the next decade and century. In May of 1984, the College trustees voted to prepare for transition to University status on the school’s 40th anniversary in 1989. Another landmark event occurred at the turn of the century that moved the University away from being owned and operated by the Arizona Southern Baptists Convention to being self-owned by the Board of Trustees. Four years later, in 2004, the University’s ownership once again changed when it was purchased by Significant Education, LLC. At this time, the University became a for-profit institution with a vision for maintaining the strength of its campus-based programs, as well as a strong emphasis on online program offerings.

In May 2008, Significant Education changed its name to Grand Canyon Education, Inc. to align with the name of the University. On November 20, 2008, Grand Canyon University became a publicly traded company on NASDAQ under the symbol LOPE.

University Board of Directors

- Tell Science Building: Mr. and Mrs. Andrew P. Tell
- Williams Building: Dr. Bill and Shirley Williams
- Hegel Hall: Dr. Joni Hegel

University Seal

When the Grand Canyon College seal was adopted in 1950, two of its major components were the cactus and the cross. The saguaro cactus rises from its desert setting to signify the intellectual opportunity for Grand Canyon University students, counteracting the arid mental state of uneducated man. The cross stands prominently on the horizon as a guide for spiritual enlightenment. Between the outer circle representing the earth and the inner circle representing the wheel of progress, the name of the University and its location are inscribed. The use of the seal is permitted only with approval of the Chief Executive Officer of the University.

University Mascot and Colors

The University mascot is the antelope. Antelope are native to the region surrounding Prescott, Arizona, near the college's first campus. The mascot reminds us of our heritage and humble beginnings. School colors are purple, black, and white. Students, employees, or contractors of the University shall not use the Grand Canyon University name, logo, or mascot in connection with any commercial venture without written approval of the Chief Executive Officer.
Degrees Offered

The University offers curricula leading to the degrees of Doctor of Education, Master of Arts in Teaching, Master of Arts in Christian Studies, Master of Education, Master of Business Administration, Master of Public Administration, Master of Public Health, Master of Science, Bachelor of Arts, and Bachelor of Science, as well as offering graduate and undergraduate certificates.

Doctoral Programs

Doctor of Education Degree in Organizational Leadership

The Doctor of Education Degree (EdD) in Organizational Leadership program is delivered through a combination of online courses and face-to-face residencies. The program’s curriculum and instruction is shared by the College of Education and the Ken Blanchard College of Education, meeting the needs of master’s-prepared professionals seeking a terminal degree in leadership.

Grand Canyon University offers the following emphases for this degree:

- Behavioral Health (Online)
- Education and Effective Schools (Online)
- Instructional Leadership (Online)
- Higher Education Leadership (Online)
- Organizational Development (Online)

Graduate Programs

Master of Arts in Teaching

The Master of Arts in Teaching degree is in the online format and has been designed to promote a high-quality graduate education experience in the convenience of a community or school without residency requirements. This program meets the needs of the practitioner in the field who does not intend to pursue further degrees. Rather, the primary focus is upon improving the quality of instruction for the certified teacher.

Grand Canyon University offers the following emphases for this degree:

- Professional Learning Communities (Online/Ground)
- Teacher Leadership (Online/Ground)

Master of Arts in Christian Studies

The Master of Arts in Christian Studies degree is granted to majors who complete all requirements in one of the following areas:

- Emphasis in Christian Leadership (Online)
- Emphasis in Pastoral Ministry (Online)
- Emphasis in Urban Ministry (Online)
- Emphasis in Youth Ministry (Online)

Master of Education

The Master of Education degree is designed for students who have previously completed a bachelor’s degree at an accredited, GCU-approved institution and may be seeking certification at the elementary or secondary level. An advanced Program of Study is included in that preparation or can be obtained after certification requirements are completed. This degree is available in the following specialized areas:

- Curriculum and Instruction (Online/Ground)
  - Reading* (Online/Ground)
    - Emphasis in Elementary Education (Online/Ground)
    - Emphasis in Secondary Education (Online/Ground)
  - Technology* (Online/Ground)
- Early Childhood Education* (Online/Ground)
- Educational Administration* (Online/Ground)
- Educational Leadership* (Online/Ground)
- Elementary Education* (Online/Ground)
- Secondary Education* (Online/Ground)
- Special Education: Cross Categorical* (Online/Ground)
- Special Education for Certified Special Educators* (Online/Ground)
- Teaching English to Speakers of Other Languages* (Online/Ground)

* Eligible for Institutional Recommendation/Credential
* Not Eligible for Institutional Recommendation/Non-Credential

Master of Business Administration

The Master of Business Administration is designed for those students who have previously completed a bachelor’s degree at an accredited, GCU-approved institution.

- Emphasizes in:
  - Accounting (Online/Ground)
  - Finance (Online/Ground)
  - Health Systems Management (Online/Ground)
  - Leadership (Online/Ground)
  - Marketing (Online/Ground)
  - Strategic Human Resource Management (Online/Ground)
MBA/MS in Leadership (Dual Degree) (Online/Ground)
MBA/MS in Nursing (Dual Degree) (Online/Ground)

Additional Degree Programs
- Corporate Master of Business Administration (Population-Specific) (Online)
- Executive Master of Business Administration (Online/Ground)

Master of Public Administration
The Master of Public Administration is designed for those students who have previously completed a bachelor’s degree at an accredited, GCU-approved institution.
- Emphases in:
  - Government and Policy (Online/Ground)
  - Health Care Management (Online/Ground)

Master of Public Health (Online/Ground)
The Master of Public Health is designed for those students who have previously completed a bachelor’s degree at an accredited, GCU-approved institution.

Master of Science
The Master of Science is granted to those students who have completed a bachelor’s degree at an accredited, GCU-approved institution and are seeking a Master of Science degree.
- Accounting (Online/Ground)
- Addiction Counseling (Online)
- Criminal Justice (Online)
  - Emphasis in Law Enforcement (Online)
  - Emphasis in Legal Studies (Online)
- Health Care Administration (Online/Ground)
- Health Care Informatics (Online/Ground)
- Leadership (Online/Ground)
  - Emphasis in Disaster Preparedness and Executive Fire Leadership (Online/Ground)
- Marriage and Family Therapy (Online)
- Nursing
  - Acute Care Nurse Practitioner (Ground)
  - Adult Clinical Nurse Specialist (Ground)
  - Adult Clinical Nurse Specialist with Education Focus (Ground)
  - Family Nurse Practitioner (Ground)
  - Registered Nurse to Master of Science in Nursing (Online/Ground)
  - Emphasis in Nursing Education (Online/Ground)
  - Emphasis in Nursing Leadership in Health Care Systems (Online/Ground)
  - Professional Counseling (Online/Ground)
- Psychology (Online)
  - Emphasis in General Psychology (Online)
  - Emphasis in Industrial and Organizational Psychology (Online)

Undergraduate Programs

Bachelor of Arts
The Bachelor of Arts degree is granted to majors who complete all requirements in one of the following areas:
- Christian Studies (Online/Ground)
- Communications (Online/Ground)
- Dance Education (Ground)
- Digital Film (Ground)
  - Emphasis in Production (Ground)
  - Emphasis in Screenwriting (Ground)
- English Literature (Online/Ground)
- History (Online/Ground)
- Interdisciplinary Studies (Online/Ground)
- Music (Ground)
  - Emphasis in Piano (Ground)
  - Emphasis in Voice (Ground)
- Music Education (Ground)
- Theatre and Drama (Ground)

Bachelor of Science
The Bachelor of Science degree is granted to majors who complete all requirements in one of the following areas:
- Accounting (Online/Ground)
- Addiction Counseling (Population-Specific) (Online)
- Applied Management (Online/Ground)
- Athletic Training (Ground)
- Biology (Ground)
  - Emphasis in Pre-Medicine (Ground)
  - Emphasis in Pre-Pharmacy (Ground)
  - Emphasis in Pre-Physician Assistant (Ground)
- Business Administration (Online/Ground)
- Counseling (Online/Ground)
  - Emphasis in Addiction, Chemical Dependency, and Substance Abuse (Online/Ground)
- Early Childhood Education* (Online/Ground)
- Elementary Education (Online/Ground)
  - Emphasis in Early Childhood Education* (Online/Ground)

  - Emphasis in Math* (Online/Ground)
  - Emphasis in Science* (Online/Ground)
- Elementary Education/Special Education (Dual Major)* (Online/Ground)
- Entrepreneurial Studies (Online/Ground)
- Exercise Science (Ground)
  - Emphasis in Athletic Coaching (Ground)
  - Emphasis in Health Education (Ground)
  - Emphasis in Physical Education (Ground)
  - Emphasis in Pre-Physical Therapy (Ground)
- Finance and Economics (Online/Ground)
- Health Care Administration (Online/Ground)
- Health Sciences: Professional Development and Advanced Patient Care (Online/Ground)
- Justice Studies (Online/Ground)
- Marketing (Online/Ground)
- Medical Imaging Sciences (Online/Ground)
- Nursing
  - Pre-Licensure Program (Ground)
  - Registered Nurse to Bachelor of Science in Nursing (RN to BSN) (Online/Ground)
- Psychology (Online/Ground)
- Public Safety Administration (Population-Specific) (Online)
- Public Safety and Emergency Management (Online/Ground)
- Respiratory Care (Online/Ground)

- Secondary Education
  - Emphasis in Biology* (Ground)
  - Emphasis in Business Education* (Online/Ground)
  - Emphasis in Chemistry* (Ground)
  - Emphasis in English* (Online/Ground)
  - Emphasis in Math* (Online/Ground)
  - Emphasis in Physical Education* (Ground)
  - Emphasis in Social Studies* (Online/Ground)
- Sociology (Online/Ground)
- Sports Management (Online/Ground)

*Eligible for Institutional Recommendation/Credential

Graduate and Undergraduate Certificates

Counseling – Certificate of Completion

- Advanced Graduate Studies in Addiction Counseling (Online/Ground)

Post Master of Science – Nursing Certificates

- Family Nurse Practitioner (Ground)
- Clinical Nurse Specialist (Ground)
- Clinical Nurse Specialist with Education Focus (Ground)
- Nursing Education (Online/Ground)
General Education Requirements

Overview

General Education coursework prepares Grand Canyon University graduates to think critically, communicate clearly, live responsibly in a diverse world, and thoughtfully integrate their faith and ethical convictions into all dimensions of life. These competencies, essential to an effective and satisfying life, are outlined in the General Education Learner Outcomes. General Education courses embody the breadth of human understanding and creativity contained in the liberal arts and sciences tradition. Students take an array of foundational knowledge courses that promote expanded knowledge, insight, and the outcomes identified in the University’s General Education Competencies. The knowledge and skills students acquire through these courses serve as a foundation for successful careers and lifelong journeys of growing understanding and wisdom.

<tbody>
<tr>
<td>University Foundations</td>
<td>Graduates of Grand Canyon University will complete one of the following UNV Foundational courses: UNV 103 for students entering with under 36 credit hours or UNV 303 for students transferring 36 or more credit hours.</td>
<td>• UNV 103/303 University Success, 4 credits</td>
<td>4</td>
</tr>
<tr>
<td>Effective Communication</td>
<td>Graduates of Grand Canyon University will be able to construct rhetorically effective communications appropriate to diverse audiences, purposes, and occasions (English composition, communication, critical reading, foreign language, sign language, etc.). Students are required to take 3 credits of English grammar or composition.</td>
<td>• ENG 105 English Composition I, 4 credits</td>
<td>9-12</td>
</tr>
<tr>
<td>Christian Worldview</td>
<td>Graduates of Grand Canyon University will be able to express aspects of Christian heritage and worldview. Students are required to take CWV 101.</td>
<td>• CWV 101 Christian Worldview, 4 credits</td>
<td>4</td>
</tr>
<tr>
<td>Critical Thinking</td>
<td>Graduates of Grand Canyon University will be able to use various analytic and problem-solving skills to examine, evaluate, and/or challenge ideas and arguments (mathematics, biology, chemistry, physics, geology, astronomy, physical geography, ecology, economics, theology, logic, philosophy, technology, statistics, accounting, etc.). Students are required to take 3 credits of college-level mathematics.</td>
<td>• MAT 134 Applications of Algebra, 4 credits, • PHI 103 , Introduction to Philosophy and Ethics, 4 credits, • BIO 100 &amp; Lab, Biology Concepts, 4 credits</td>
<td>11-12</td>
</tr>
<tr>
<td>Global Awareness, Perspectives, and Ethics</td>
<td>Graduates of Grand Canyon University will be able to demonstrate awareness and appreciation of and empathy for differences in arts and culture, values, experiences, historical perspectives, and other aspects of life (psychology, sociology, government, Christian studies, Bible, geography, anthropology, economics, political science, child and family studies, law, ethics, cross-cultural studies, history, art, music, dance, theater, applied arts, literature, health, etc.).</td>
<td>• HIS 221 Themes in U. S. History, 4 credits, • PSY 102, General Psychology, 4 credits, • SOC 102 Introduction to Sociology, 4 credits (Psychology students avoid PSY 102. Sociology students avoid SOC 102.)</td>
<td>6-8</td>
</tr>
</tbody>
</table>
Assessed Placement in Mathematics and English Classes

Students enrolling in Applications of Algebra (MAT 134) or College Algebra and Trigonometry (MAT 250) may take a mathematics placement test. Students enrolling in English Composition I (ENG 105) may take a writing placement test. Being placed in the course that is appropriate for students’ experience and knowledge is important for success. Students who enroll in a course that is more advanced than the course recommended by the placement exam risk earning substandard grades.

Students should take placement tests before the start of classes and within the appropriate time window for a given semester (see below). Students who wish to use a placement test to help them determine which math or English class would be appropriate to enter should contact their Academic Counselor.

Degree Emphasis

Undergraduate students are required to select one subject area, a major, in which they must earn at least 30 semester hours of acceptable credit. At least 15 credits of the major must be upper division. In certain areas of study, the number of credits required for a major exceeds 30. Transfer students should consult the University Policy Handbook for information concerning Minimum Residence. Students must also have a cumulative 2.00 GPA in their major. Courses with a grade below 2.0 are not permitted to count toward the major.

A student may elect to complete a second major. A student who chooses to complete two majors will earn only one baccalaureate degree. If two baccalaureate degrees are sought, refer to the information on Double/Dual Degrees in the University Policy Handbook. No course may count toward the credits required for the completion of both majors if pursuing a second major.
The Ken Blanchard College of Business

College of Business Description

The Ken Blanchard College of Business (KBCOB) focuses on providing cutting-edge and innovative courses designed to meet students’ career needs. The College offers Programs of Study for those who desire the traditional four-year baccalaureate degree, accelerated degree-completion programs for working adults, and graduate degrees for working professionals. The College’s academically qualified faculty has relevant business and teaching experience and is committed to providing an excellent business education through the primacy of teaching, offering small class sizes, and building student-faculty relationships that foster the student’s academic and professional growth.

College Mission

Ken Blanchard College of Business challenges and inspires students to be servant leaders with the business skills and values necessary to drive organizational success and positively impact society.

College Features

The Ken Blanchard College of Business is comprised of two academic schools. Each school serves a unique set of students and offers quality programs to meet specific students’ career needs.

School of Business Studies

The School of Business Studies exists to serve both undergraduates who are preparing to initiate careers and working professionals who are seeking to develop their careers further. All programs within the School of Business Studies are developed in accordance with the accreditation standards of the Association of Collegiate Business Schools and Programs (ACBSP), which requires that a program be in existence for two or more years before it receives accreditation. Programs in the School of Business Studies that have reached this threshold and received ACBSP accreditation include the Bachelor of Science in Accounting, Bachelor of Science in Business Administration, Bachelor of Science in Entrepreneurial Studies, Bachelor of Science in Marketing, Executive Master of Business Administration, and Master of Business Administration.

In addition to its degree offerings, the Ken Blanchard College of Business offers students the opportunity to be members of three student organizations:

- Institute of Management Accountants (IMA) Student Chapter, is open to any student interested in business, is affiliated with the Phoenix Chapter of the IMA. Primary activities include sponsoring guest speakers, visiting area businesses, performing community service projects, and participating in Phoenix Chapter IMA events.
- Delta Mu Delta, a national honor society, is open to both graduate and undergraduate students by invitation only based primarily upon scholastic achievement.
- Alpha Sigma Lambda, a national honor society, is open to undergraduate students who are working professionals and achieve academic excellence.

School of Business Studies: Undergraduate Programs

The School of Business Studies offers a Bachelor of Science (BS) degree with majors in Accounting, Business Administration, Entrepreneurial Studies, Finance and Economics, Marketing, and Sports Management. The accounting major and the finance and economics major are designed to prepare students for professional practice in corporate accounting and finance or for management positions in business. Completing the requirements for the accounting major qualifies students to sit for the Certified Management Accountant (CMA) examination and for the Certified Public Accountant (CPA) exam in most states. The entrepreneurship major is designed for students who desire to start their own business, or be a change agent for innovation within larger organizations. The business administration major is a broadly-based degree that emphasizes technical, human, and conceptual skills that encompass all functional areas of business. The marketing major combines a strong business core with special emphasis in market forces, marketing strategy, and sales management. The sports management major prepares students to become professional managers in areas such as sports marketing, sports media, amateur and professional athletics, and sports and entertainment event planning.

Bachelor of Science in Accounting (Online/Ground)

Grand Canyon University’s Bachelor of Science in Accounting program addresses the areas of servant leadership, innovation, entrepreneurial spirit, and business skills in order to develop the global citizens, critical thinkers, effective communicators, and responsible leaders required in today’s global economy. The program prepares students for professional practice in corporate accounting, corporate finance, or public accounting. Completing the requirements for the accounting major qualifies students to sit for the Certified Management Accountant (CMA) exam and the Certified Public Accountant (CPA) exam in most states.

Internship Guidelines

Unless specifically required by the student’s program of study, internships are not a requirement for graduation. Students who desire to do an internship for elective credit are responsible for arranging the internship with a potential employer, based on the following guidelines.

Guidelines for a Business Internship

Internships are limited to students who have completed at least two years of college work.

A maximum of two semesters of internships may be taken. The second semester should be taken with a different organization than the first.

A maximum of 6 credits can be awarded. Depending on the number of hours worked, internships may be for 1-4 credits per semester. Interns are expected to complete a minimum of 45 hours of documented work for each academic credit earned.

No academic credit will be granted for performing duties in the student’s current job. An internship with a student’s past or current employer must be for a special internship assignment and not be a part of the student’s regular job assignment. In no case will academic credit be granted for work done in the past.

A reflection paper is required of all interns. Normally, this is written at the end of the internship experience. It should include the intern’s self-evaluation of whether the internship goals were met and an explanation of how they were achieved. It should also include a discussion of how the skills needed to succeed in the internship compare with those developed within the coursework included in the student’s academic program. The Director of the Internship Program will grade reflection papers.

At the end of the semester, interns will receive a grade of either credit (CR) or non-credit (U). The Director of the Internship Program will make this determination based on the quality of the intern’s reflection paper and the written evaluation of the intern’s supervisor in the employing organization.

Arrangements for internships should be arranged with the Director of the Internship Program at the Ken Blanchard College of Business. International students must also obtain the approval of the Center of International Studies.

School of Business Studies: Graduate Programs

The Ken Blanchard College of Business offers the Master of Business Administration (MBA) program provides emphases in Accounting, Finance, Health Systems Management, Leadership, Marketing, and Strategic Human Resource Management. The Master of Business Administration (MBA) degree is designed for working professionals who desire to complete their graduate degree without interrupting their professional careers. The program consists of 39-51 graduate credit hours. It affords students the opportunity to develop cross-functional business-management skills, preparing business practitioners for advanced management and executive positions. Students have the option of completing two emphasis areas as part of their MBA degree.

Students with the necessary academic or professional background who complete two courses per semester on a trimester basis will be able to complete the MBA program in just over two years. The Ken Blanchard College of Business MBA Program is fully accredited by the Association of Collegiate Business Schools and Programs (ACBSP).

The Master of Science in Accounting program prepares students to sit for the CPA exam and provides opportunities for current CPAs and accountants to advance their skills in theory, practice, and research.

Additional Graduate Business Admission Requirements

Students must have the equivalent of two years full-time professional work experience prior to entering the MBA program. GMAT scores are not required but are considered if submitted. Students with a GPA above 2.0 but below 2.8 and/or a non-business undergraduate degree may be admitted on a probationary basis but must successfully complete the four MBA Fundamentals courses with a cumulative GPA of 3.0 or higher.

Students of the Ken Blanchard Executive Master of Business Administration program must have, at least, 5 to 7 years of management experience at or above the Director level. They must also have corporate sponsorship and successfully complete a pre-admission interview with the Program Director.
Executive Master of Business Administration (Online/Ground)

The Ken Blanchard Executive Master of Business Administration is designed to equip competent executives and high-potential senior managers with the skills needed to lead organizations to performance excellence by creating dynamic organizations, passionate employees, devoted customers, satisfied investors, and grateful communities.

School of Professional Studies

For working adults seeking an undergraduate degree, the School of Professional Studies offers the following undergraduate degree programs:

- Bachelor of Science in Applied Management
- Bachelor of Science in Public Safety and Emergency Management
- Bachelor of Science in Public Safety Administration (available to members of the military only)

All undergraduate-level Professional Studies programs are open to students that have satisfied the basic standards for admission, regardless of credit level. Students that begin a Professional Studies program at a Freshman or Sophomore level must complete the General Education and/or elective requirements before they will be permitted to begin the core coursework. Students at a Junior level or above can go directly into the core coursework.

The School of Professional Studies also offers the following graduate-level degree programs:

- Master of Public Administration with Emphases in
  - Government and Policy
  - Health Care Management
- Master of Science in Leadership
- Master of Science in Leadership with an Emphasis in Disaster Preparedness and Executive Fire Leadership

In addition to its degree offerings, the Ken Blanchard College of Business offers students the opportunity to be a member of Alpha Sigma Lambda. Alphas Sigma Lambda is a national honor society open to both graduate and undergraduate students by invitation only, based primarily upon scholastic achievement.

Bachelor of Science in Public Safety and Emergency Management (Online/Ground)

Grand Canyon University’s Bachelor of Science in Public Safety and Emergency Management program is a bachelor’s degree completion program that provides a theoretical and applied approach to the professional education of students, while ensuring relevance to the homeland security and public safety industries. The program emphasizes the fundamentals of emergency management while providing an interdisciplinary course of study in the skills and practices of emergency planning and management. Candidates for the degree include those working in or desirous of working in one of several fields, including emergency management, fire protection, emergency medical response, law enforcement, environmental health and safety, and other related fields. The program highlights the application of research methodology; the utilization of communication skills at the personal, professional, and public level; and the development of professional skills and knowledge in the fields of public safety and emergency management.

Master of Public Administration with an Emphasis in Government and Policy (Online/Ground)

Grand Canyon University’s Master of Public Administration prepares students for careers in the public sector. The program is targeted at individuals working or desirous of finding employment in all levels of government, health care administration, and other quasi- and/or non-governmental organizations. The coursework gives students the opportunity to apply administrative skills in the areas of leadership, human capital development, policy, and governance within a public sector environment. Students will be challenged to identify and provide solutions for the unique issues facing public sector organizations today. This program offers two emphasis areas...
from which students can choose: health care management and government and policy.

Total Master of Public Administration with an Emphasis in Government and Policy 36 credits

**Master of Public Administration with an Emphasis in Health Care Management**

(Online/Ground)

Grand Canyon University’s Master of Public Administration prepares students for careers in the public sector. The program is targeted at individuals working or desirous of finding employment in all levels of government, health care administration, and other quasi- and/or non-governmental organizations. The coursework gives students the opportunity to apply administrative skills in the areas of leadership, human capital development, policy, and governance within a public sector environment. Students will be challenged to identify and provide solutions for the unique issues facing public sector organizations today. This program offers two emphasis areas from which students can choose: health care management and government and policy.

**Master of Science in Leadership**

(Online/Ground)

Grand Canyon University’s Master of Science in Leadership program provides students with the skills to develop professionally and gain self-confidence in their own leadership styles. Students learn to integrate a conceptual foundation for an executive leadership role that emphasizes the immediate application of ethical and practical leadership skills as well as the ability to create, communicate, and influence decisions using critical thinking and problem-solving skills that are grounded in theory and research. The program emphasizes establishing and maintaining relationships based on intrapersonal and interpersonal communication skills in order to lead diverse and global organizations.

**Master of Science in Leadership with an Emphasis in Disaster Preparedness and Executive Fire Leadership**

(Online/Ground)

Grand Canyon University’s Master of Science in Leadership with an Emphasis in Disaster Preparedness and Executive Fire Leadership provides students with the skills to develop professionally and gain self-confidence in their own leadership styles. The program offers an opportunity for graduates of the National Fire Academy’s Executive Fire Officer Program (NFA-EEOP) to complete a graduate degree. Students learn to integrate a conceptual foundation for an executive leadership role that emphasizes the immediate application of ethical and practical leadership skills as well as disaster preparation and crisis management. Environmental issues directly related to leadership skills development and content required of leaders in the area of emergency public safety and disaster preparedness will also be addressed.

The College of Doctoral Studies

College of Doctoral Studies Description

The College of Doctoral Studies provides planning, administration, and evaluation of GCU doctoral programs. The College is responsible for operations concerning doctoral learners including screening applications, assessing students’ needs for support services, interfacing with Enrollment, planning and participating in residencies, helping to develop course materials, and providing support throughout the doctoral process. The College provides oversight to the selection of doctoral faculty and contributes to faculty training and evaluation.

College Mission
The College develops expert practitioners and researchers who become leaders in the disciplines and communities they serve.

College Vision
Through innovative uses of technology, collaboration, and learning communities, the College of Doctoral Studies will be the premier provider of online doctoral education.

College Features
Innovative programs in the College of Doctoral Studies are designed to develop scholars through instruction in theory and research, and through practitioners’ knowledge. These activities prepare learners to produce scholarly literature, solve problems, and enhance performance in professional roles. The doctoral programs leverage the knowledge and expertise of faculty, learners, and experts external to the University through learning communities specific to the issues, concepts, and methods of a given discipline. Furthermore, the College of Doctoral Studies emphasizes that graduates apply their professional knowledge and services to the benefit of the community.

Doctoral Program Goals
The College of Doctoral Studies expects its graduates to:

- Be experts in the concepts and methods of their disciplines.
- Create new ways to explain, predict, and improve performance within their areas of expertise.
- Conduct scholarly research that creates knowledge and leads to effective actions.
- Exercise ethical and effective leadership.
- Lead through critical analysis and creative solutions.

Doctoral Program Goals

Doctoral Programs

Doctor of Education in Organizational Leadership with an Emphasis in Behavioral Health (Online)

The Doctor of Education in Organizational Leadership with an Emphasis in Behavioral Health program is designed specifically for practicing behavioral health professionals, including licensed professional counselors, licensed marriage and family therapists, licensed social workers, school counselors, psychiatric nurses, and behavioral health agency managers. Students must hold a master’s degree in a behavioral health-related field to participate in this program, which assists students with their development into behavioral health servant leaders who are ethical agents of change with diverse populations in a wide variety of behavioral health organizational settings.

The Doctor of Education in Organizational Leadership program develops leaders capable of generating new knowledge and responsibly applying knowledge to achieve organizational outcomes. Students will study the major bodies of literature in leadership, will reflect critically on existing theory, and will identify appropriate applications of theory in educational, business, and other organizational environments. Students will develop academic and organizational research expertise through the study of research methodology. The program of study is consistent with Grand Canyon University's mission to develop students who are global citizens, critical thinkers, effective communicators, and responsible leaders.

The Doctor of Education in Organizational Leadership with an Emphasis in Education and Effective Schools program ensures that educational leaders apply leadership theory and practice to topics of interest and issues transforming the current educational system. The program provides the knowledge and skills that educational leaders need to conceive new strategies of practice by forecasting the future of the educational system, the institutions, and the constituencies they serve.

Doctor of Education in Organizational Leadership with an Emphasis in Instructional Leadership (Online)

The Doctor of Education in Organizational Leadership program develops leaders capable of generating new knowledge and responsibly applying knowledge to achieve organizational outcomes. Students will study the major bodies of literature in leadership, will reflect critically on existing theory, and will identify appropriate applications of theory in educational, business, and other organizational environments. Students will develop academic and organizational research expertise through the study of research methodology. The program of study is consistent with Grand Canyon University's mission to develop students who are global citizens, critical thinkers, effective communicators, and responsible leaders.

The Doctor of Education in Organizational Leadership with an Emphasis in Instructional Leadership program is designed for students interested in the Pre-K-12 arena. This program is focused on addressing real-world challenges and opportunities facing school leaders in the 21st century and is designed to develop the skills required to translate theory into effective, innovative leadership practices and to sustain continuous school improvement measures. The specialization is designed to be completed within three years, with all courses taken in sequence, allowing students to learn and build professional relationships with the same cohort of colleagues. Students also have the opportunity to develop an applied research project (dissertation) that contributes to the solution of a recognized problem in the field.

Doctor of Education in Organizational Leadership with an Emphasis in Higher Education Leadership (Online)

The Doctor of Education in Organizational Leadership program develops leaders capable of generating new knowledge and responsibly applying knowledge to achieve organizational outcomes. Students will study the major bodies of literature in leadership, will reflect critically on existing theory, and will identify appropriate applications of theory in educational, business, and other organizational environments. Students will develop academic and organizational research expertise through the study of research methodology. The program of study is consistent with Grand Canyon University's mission to develop students who are global citizens, critical thinkers, effective communicators, and responsible leaders.

The Doctor of Education in Organizational Leadership with an Emphasis in Higher Education Leadership program prepares graduates to lead a higher education institution through strategy, financial management, and planning, both of the physical plant and of the human resources within the organization. Students learn about the foundation and history, organizational needs, and learning environment of higher education in order to lead the institutions of today and plan for the institutions of tomorrow.

The College of Education

College of Education Description

The preparation of teachers and administrators for the public and private schools of this nation is a significant responsibility for the College of Education. The programs seek to ensure the highest level of professional and academic competence of the graduate in the classroom. Consequently, most education courses require a certain number of practicum hours. For more detailed information, please refer to the College of Education Web site at: http://my.gcu.edu/education.

College Mission

Professional education programs at Grand Canyon University are designed to support and promote the university’s mission to prepare learners to become global citizens, critical thinkers, effective communicators, and responsible leaders from the context of its Christian heritage. The College of Education inspires excellence in pedagogy and scholarship; advances reflective, innovative, and collaborative teaching practices to maximize student learning and achievement; promotes servant leadership in educational communities; and engages a diverse and global community of learners with purpose and passion.

The College of Education operates as a unit of Grand Canyon University. As such, its mission statement reflects the obligation of the College to support and promote the University’s mission as well as to guide its own operations. Within its learners, the College inspires excellence in the art and science of teaching; within its faculty, it does so through their scholarly enterprises. Via its professional education programs, the College teaches learners that all learners can learn and that focused teaching practice can maximize that learning and achievement. The culture and Christian heritage of the University promote a spirit of servant leadership within the College of Education’s faculty, staff, and learners so they can serve people within the broader educational community.

The College of Education provides learners with special program features. Practical classroom experience begins as early as the freshman year with a minimum of 100+ hours in the K-12 classroom prior to student teaching. Student teaching is offered in semester-long courses.

Faculty have significant experience in the K-12 school system and many adjunct faculty hold concurrent employment in the classroom and administrative positions.

The courses in education are planned to provide curricula for certification of elementary teachers, secondary teachers, special education teachers, and educational administrators. The learner is strongly advised to contact the College of Education and/or the Arizona State Department of Education regarding certification information. The Grand Canyon University College of Education is approved by the Arizona State Board of Education to offer Institution Recommendations for the certification of elementary, secondary, special education teachers, and administrators. The Arizona state approved programs lead to Arizona certification and eligibility for an Arizona Institution Recommendation. Learners in the College of Education are responsible for contacting their state Department of Education or Licensing Department for certification requirements and program approval.

College of Education Policies

Fingerprint Clearance

In most programs of study, the practicum/field experience begins as early as the third course. Prior to participation in any practicum/field experience, and in accordance with Arizona State Statute A.R.S. § 15-106, learners must have submitted a copy of an official Arizona Fingerprint Clearance Card or the official results of their federal fingerprint background clearance from their state Department of Public Safety or comparable agency, or have one already on file with Grand Canyon University. Copies

*Campus/Off-site only | *Writing-intensive course | *Fulfills General Education requirement |
of this documentation should be faxed or scanned/e-mailed to the Teacher Education Specialists.

If learners are seeking an Arizona Institutional Recommendation, they must have an Arizona Fingerprint Clearance Card, in addition to their own state’s fingerprint or background clearance documentation.

**Benchmarks**

Based upon requirements established by the Arizona State Board of Education, all teacher candidates, (i.e., COE learners who are in teacher-education programs), will have to demonstrate competency with essential knowledge, skills, and dispositions that are based upon the Arizona Professional Teaching Standards (APTS). Consequently, certain critical assignments in each course will be developed as benchmarks that serve as check points of learner competencies. Some of the benchmarks will be practicum-based, and others will not. Benchmark rubrics inform learners and instructors of the pre-established levels of competency performance for benchmark assignments.

**Practicum/Field Experiences**

Practicum experiences are field-based learning opportunities that focus on observation, application, and reflection. Practicum experiences require the COE learner to spend a prescribed amount of time in real-life classroom settings in order to demonstrate competency with predetermined activities that are aligned to professional standards in the field of education. Learners in any course requiring practicum hours are required to have fingerprint clearance on file with their Teacher Education Specialist.

**Basic Skills and Content Area Exams**

College of Education learners enrolled in Teacher Education Programs (with institutional recommendation (IR)) beginning with the 2009-2010 Academic Catalog must pass their state-mandated basic skills and content area exams or Praxis I® (Basic Skills) and Praxis II® (Content Area) prior to student teaching. Arizona residents will be required to take the Arizona Educator Proficiency Assessments (AEPA). Teacher candidates residing in states that do not have state-specific mandated basic and/or content exams will be required to take the AEPA exams or the Praxis series®.

Teacher candidates requiring Arizona certification in application for their local state licensure will need to complete the appropriate AEPA exams prior to receiving an Arizona IR. For content areas outside the approved AEPA areas, teacher candidates seeking Arizona certification will be required to hold 24 units in the certification content area.

**Required Testing for Certification**

Prior to certification, the Arizona Department of Education requires a passing score on the professional knowledge portion of the Arizona Educator Proficiency Assessment (AEPA) and a passing score on the subject knowledge (content area) portion of the AEPA. To receive an Institutional Recommendation, learners must take and pass the AEPA for Arizona certification. Learners should check with their own state department of education for applicable teacher certification guidelines.

**Student Teaching**

Taken at the conclusion of all course work; 16 consecutive weeks; an unpaid, full-time placement with a COE approved cooperating mentor teacher; the cooperating mentor teacher must be certified in the area in which the student teacher is teaching; cannot be done over the summer months; required for an IR.

**Eligibility for Student Teaching**

- Complete all coursework within the program of study.
- Pass the state-specified basic skills and content area exams or Praxis I® (Basic Skills) and Praxis II® (Content Area) prior to student teaching.
- Maintain a minimum GPA of 2.8 for undergraduate students and 3.0 for graduate students.
- Work with the appropriate departments to remove any academic and/or financial holds on account to ensure that the academic counselor is able to complete the required registration process.
- View program evaluations via the Web Advisor feature located on the MyGCU Web site. The academic counselor and the Teacher Education Specialist are also available to discuss program progression and academic eligibility.
- Possess a current Fingerprint Clearance Card or background check. Arizona residents must have an Arizona Department of Public Safety Fingerprint Clearance Card.
- Learners are not allowed to enroll in any course containing a practicum requirement including student teaching until documentation has been received and verified by the Teacher Education Specialist.

**Application for Student Teaching**

The student teaching application can be found on the College of Education Web site at [http://coe.gcu.edu/index.php?page=Field-Experience](http://coe.gcu.edu/index.php?page=Field-Experience) Deadlines for applying for student teaching are as follows:

- For Fall Student Teaching – February 1
- For Spring Student Teaching – September 1

No exceptions will be made to these deadlines, as placing learners in appropriate settings is a lengthy process. Please consult Academic Counseling to determine academic eligibility for student teaching.

Student teaching may only be repeated once.

**Internship**

Educational Administration Internships are taken as the last two courses of the program for 16 consecutive weeks. They are unpaid, require half-time placement with an approved COE mentor administrator, and are required for an institutional recommendation (IR).
Institutional Recommendation

All College of Education learners seeking an Arizona teaching or administrative credential or an Institutional Recommendation (IR) must complete program requirements for their degree program which include verification of fingerprint clearance and a supervised student teaching or internship component after all coursework has been completed. For information on program requirements contact an academic advisor.

Prospective Arizona teachers may be required to take and pass the appropriate Arizona Educator Proficiency Assessments (AEPA) for Arizona licensure. Learners can access information on the AEPA at http://www.aepa.neesinc.com. It is the learner’s responsibility to determine what, if any, testing is necessary for their individual state.

For information on program requirements contact an academic advisor. For information on field experience requirements including: practicum, student teaching, and internships, contact the College of Education Office of Field Experience.

Undergraduate Programs

Learners are given the choice of study in the areas of early childhood education (birth to grade 3), elementary education (grades K-8), secondary education (grades 7-12) with a second major in an academic area, and special education in cross-categorical.

Additional Undergraduate College of Education Admission Requirements

Application procedures and policies, specific to the College of Education, are available through the College of Education. It is the learner’s responsibility to enroll in the proper courses and to follow the policies and procedures of the University and the College of Education, regardless of the year of the Academic Catalog under which the learner is enrolled. Admission to and continuance in the College of Education Teacher Education Program includes an evaluative component based upon the professional view of the College of Education faculty and their collective opinion of one’s potential for success in the K-12 classroom.

Learners are responsible for any follow-up necessary for completing their College of Education files. Any College of Education student file not completed prior to enrolling in EDU 310 will be put in hold status. Learners will be notified in writing of the action taken on their applications by the dean representing the College of Education faculty, subject to grievance to the College of Education Dean and the Vice President for Academic Affairs.

All candidates must submit a copy of their Fingerprint Clearance Card from their state Department of Public Safety or comparable agency prior to enrolling in any field experience or practicum course, generally the third course of the declared program. Copies of the Fingerprint Clearance Card should be sent to your Academic Counselor or your Teacher Education Specialist.

The teacher education program of Grand Canyon University is approved by the Arizona State Board of Education. All Elementary Education, Special Education, and Secondary Certification majors must meet the requirements for the Grand Canyon University state-approved certification program prior to graduation. If state certification requirements change, learners must meet the new requirements regardless of the Academic Catalog under which they will be graduating.

Additional COE Graduation Requirements

COE learners are required to complete an e-Portfolio throughout the Program of Study. The e-Portfolio is an assessment component to meet standards appropriate for the Program of Study. Learners must use the e-Portfolio product supported/used by GCU. Resources on the process and requirements can be found at the COE Web site and the Student Success Center for the College of Education.

Endorsements

Grand Canyon University does not issue endorsements.

Several different types of endorsements are made available through the various State Departments of Education. Learners should contact their respective state agency to determine the range and requirements of endorsements that are offered.

For learners seeking certification in Arizona, the College of Education offers the following courses for teacher candidates to obtain a full Arizona SEI Endorsement:

- Provisional Structured English Immersion – ESL 423N-SEI
- English Language Teaching: Foundations and Methodologies
- Full Structured English Immersion – ESL 433N-Advanced Methodologies and Assessments of Structured English Immersion

College of Education offers the following courses for practicing teachers to obtain a full Arizona SEI Endorsement:

- Provisional Structured English Immersion – ESL 523N- SEI
- English Language Teaching: Foundations and Methodologies
- Full Structured English Immersion – ESL 533N- Advanced Methodologies and Assessments of Structured English Immersion

Required Testing for Certification

Prior to certification, the Arizona Department of Education requires a passing score on the professional knowledge portion of the Arizona Educator Proficiency Assessment (AEPA) and a passing score on the subject knowledge portion of the AEPA. The College of Education recommends that the professional knowledge portion of the AEPA be completed at the same time as the subject knowledge exam required prior to student teaching. To receive Institutional Recommendation a learner must take and pass the AEPA for Arizona certification. Learners should check with their state department of education for their own state teacher certification guidelines.
Bachelor of Science in Early Childhood Education (Online/Ground)
(Leads to Credential)

The Bachelor of Science in Early Childhood Education (Leads to Credential) is a degree for students seeking knowledge and expertise in the field of early childhood development and teaching. The curriculum includes instructional strategies, teaching methodologies, assessment techniques, theories of early childhood growth and development, and the impact of family and cultural diversity on early childhood. The degree program has embedded practicum experiences throughout the coursework, requires a student teaching component, and, upon approval, will lead to a teaching credential in Arizona.

Degree Requirements
Total General Education 34-40 credits
Total Early Childhood Education Major 80 credits
Total Electives 0-6 credits
Total Bachelor of Science in Early Childhood Education (Leads to Credential) 120 credits
Total Practicum 125 hours

Early Childhood Education Major

EDU 310 Exploring Education as a Profession 4 credits
EDU 215 Education Foundations and Framework 4 credits
ECH 125 Foundations of Early Childhood 4 credits
EDU 230 Cultural Diversity in the Classroom 4 credits
ECH 135 Child Guidance, Management, and the Environment 4 credits
ECH 225 Introduction to the Exceptional Learner 4 credits
ESL 233N SEI English Language Teaching: Foundations and Methodologies 3 credits
EDU 313N Educational Psychology 3 credits
ECH 235 Child Growth and Development: Health, Safety, Nutrition, and Fitness 4 credits
ECH 325 Child, Family, Community, and Culture 4 credits
EDU 225 Instructional Technology 4 credits
POS 301 Arizona and Federal Government 2 credits
ECH 335 Instructional Teaching Methodologies: Language, Math, Science, Social Studies, and the Arts 4 credits
SPE 226* Educating the Exceptional Learner 4 credits
PSY 354 Child Psychology 4 credits
ECH 425 Early Literacy Development 4 credits

EDU 450 Classroom Engagement and Management 4 credits
ECH 435 Developmental and Functional Assessment: Birth to Age 8 4 credits

Student teaching must be the last course a student takes in the program.

ECH 480 Student Teaching: Birth to Pre-School 6 credits
ECH 485 Student Teaching: K-3 6 credits

Total Early Childhood Education Major 80 credits

The Arizona Department of Education requires all individuals applying for certification in the state of Arizona to take a US/Arizona Constitution course (POS 301) and pass the professional knowledge test of the Arizona Education Proficiency Assessment. The Arizona Department of Education requires all individuals applying for certification in the state of Arizona to take 6 credits of Structured English Immersion.

ESL 433N Advanced Methodologies of Structured English Immersion 3 credits

Bachelor of Science in Elementary/Special Education (Dual Major)
(Online/Ground)
(Eligible for Institutional Recommendation)

The Bachelor of Science in Elementary/Special Education (Dual Major) (Eligible for Institutional Recommendation) is a degree designed for students who seek an elementary or cross-categorical teaching certificate to teach children with special needs in the K-12 classroom setting. The format and courses of this regionally accredited and Arizona-approved program are designed to maximize the content knowledge that the teacher candidate will possess upon graduation. Courses are taught by experts in their respective fields who share knowledge and experience in areas of learning disabilities, emotional and behavioral disabilities, and other physical and cognitive impairments. Opportunities are provided to apply concepts, theories, and research throughout the program. Assignments within each course guide students through observational and practice-based experiences. Teacher candidates must have access to a K-12 special education classroom to complete the program assignments. Graduates of the program are prepared to work with special needs populations and implement individualized educational plans to accommodate the students’ various learning, behavioral, and social needs. Teacher candidates must be prepared to complete a full-time, 16-week student teaching component at the end of the program. Eight weeks of student teaching is completed in a regular education setting and 8 weeks is completed in a resource room, self-contained class, or in a special school for students with disabilities. These special

*Campus/Off-site only | *Writing-intensive course | *Fulfills General Education requirement |
education settings must include at least three or more of the following disability categories: mental retardation, learning disabilities, emotional disabilities, physical/health impairments, and they must be completed with a certified special educator. Teacher candidates are responsible for contacting their state department of education for certification requirements and program approval. Teacher candidates should consult the Grand Canyon University Catalog, the University Policy Handbook, and an academic advisor to obtain information regarding current policies and procedures inherent in a teacher credentialing program.

Bachelor of Science in Secondary Education with an Emphasis in Chemistry (Ground)
(Eligible for Institutional Recommendation)

The Bachelor of Science in Secondary Education with an Emphasis in Chemistry (Eligible for Institutional Recommendation) is a degree offered by the College of Education in conjunction with the College of Liberal Arts for students desiring to prepare for a career in teaching grades 7-12. The format and courses of this regionally accredited and Arizona-approved program are designed to maximize the content knowledge that the teacher candidate will possess upon graduation. The Secondary Education program is designed to prepare students for careers in middle schools and high schools. Students/applicants are responsible for contacting their state department of education for certification requirements and program approval. The student/applicant should consult the Grand Canyon University Catalog, the University Policy Handbook, and an academic advisor to obtain information regarding current policies and procedures inherent in a teacher credentialing program. Courses are taught by experts in their respective fields who share knowledge and experiences in the areas of educational psychology, reading strategies, teaching methods, assessment, classroom management, and curriculum development. All courses are directly aligned with the Arizona Professional Teacher Standards and the Interstate New Teacher Support and Assessment Consortium Standards. Opportunities are provided to apply concepts, theories, and research throughout the teacher preparation program. Assignments within many of the courses guide students through observational and practice-based experiences, and the final semester of the program includes a full-time, 16-week student teaching component. Students may transfer up to 28 hours of electives for their content area credits provided they have passed the AEPA or Praxis content area exam.

Degree Requirements

Total General Education 34-40 credits
A number of courses in the major will satisfy General Education competencies. Students should talk with their Academic Counselors for more specific information.

Total Secondary Education Major 88 credits
Total Bachelor of Science in Secondary Education with an Emphasis in Chemistry (Eligible for Institutional Recommendation) 120 credits
Total Practicum 135 hours

Graduate Degree Requirements

The graduate program is based upon a framework that provides for the professional growth of the teacher practitioner. This framework includes a cyclical process of inquiry, reflection, application, evaluation, and additional reflection. These five elements are incorporated into activities and assignments in each course of the program through a combination of collaborative and individual work. Graduate programs in education are provided in two learning formats; both online and traditional campus courses are available to the learner.

Graduate Programs

Once the student is accepted into the graduate program, the candidate has five years to complete the Program of Study. Upon acceptance into the graduate program, the student will receive an Official Program of Study. In order for the Program of Study to remain valid, the student must be continuously enrolled in the program. All graduate students must maintain a 3.0 GPA.

Additional Graduate Education Admission Requirements

In addition to the general Graduate Admission Requirements listed in the Admission Policy and Procedure section, all candidates for graduate programs at GCU must submit the following information:

All candidates must submit a copy of their Fingerprint Clearance Card from their state Department of Public Safety or comparable agency prior to enrolling in any field experience practicum course, generally the third course of the declared program. Copies of the Fingerprint Clearance Card should be sent to your Academic Counselor or your Teacher Education Specialist.

Graduate Transfer Restrictions

The first course of the graduate Programs of Study cannot be satisfied by transferred credits.

Eligibility for Teaching Certification

Additional information is required for the following degrees:

- Master of Arts in Teaching: A copy of current teaching certificate
- Master of Education in Special Education for Currently Certified Teachers: A copy of current teaching certificate
- Master of Education in Secondary Education: A certifiable major in secondary education content area. This major is any course of study commonly taught in grades 7-12 in public schools.

Additional Graduate Graduation Requirements

COE students are required to complete an assessment e-Portfolio. The e-Portfolio is the final assessment of students in each program, and is contributed to throughout the Program of Study. Final submission of the e-Portfolio is required to be eligible for graduation and must use the e-Portfolio product supported/used by GCU. If state certification requirements change, students must meet the new requirements regardless of the Academic Catalog under which they will be graduating.

Master of Arts in Teaching with an Emphasis in Professional Learning Communities (Online/Ground) (Not Eligible for Institutional Recommendation)

The Master of Arts in Teaching with an Emphasis in Professional Learning Communities (Not Eligible for Institutional Recommendation) program is designed for certified elementary and secondary teachers interested in advanced studies in education. Coursework in this program may assist in a teacher’s quest for National Board Certification, but does not guarantee that certification. The format and courses of this regionally accredited program are tailored to meet the needs of adult learners and to maximize strengths that students already possess. Opportunities are provided to apply concepts, theories, and research throughout the program. Assignments within each course guide students through observational and practice-based experiences. Students must have access to a K-12 classroom to complete the program assignments. Graduates of this program are prepared to become informed educators who meet the needs of

Master of Education in Early Childhood Education (Online/Ground)

(Leads to Credential)

The Master of Education in Early Childhood Education (Leads to Credential) is a degree for students seeking knowledge and expertise in the field of early childhood development and teaching. The curriculum includes instructional strategies, teaching methodologies, assessment techniques, theories of early childhood growth and development, and the impact of family and cultural diversity on early childhood. The degree program has embedded practicum experiences throughout the coursework, requires a student teaching component, and, upon approval, will lead to a teaching credential in Arizona.

**Master of Education in Educational Administration (Online/Ground)** *(Eligible for Institutional Recommendation)*

Grand Canyon University’s Master of Education in Educational Administration (Eligible for Institutional Recommendation) program is designed for individuals interested in educational administration in the K-12 setting and seeking an administrative certificate. The Interstate School Leaders Licensure Consortium (ISLLC) and the Educational Leadership Constituent Council (ELCC) standards form the foundation of this regionally accredited and Arizona-approved program of study. Courses are taught by expert practitioners in their respective fields who share knowledge and experience in areas of school leadership, administrative foundations, organizational theory, K-12 legal issues, public school finance, curriculum development, and instructional leadership. As an opportunity to apply theory to practice, field experience/practicum hours are embedded throughout the program. The Action Inquiry process frames these experiences. Benchmark assessments within each course guide students through observation, practice, and hands-on leadership experiences. Students must be prepared to complete a 16-week administrative internship component at the end of the program. Graduates of the program are well-prepared to be informed educational administrators in public and private schools and other settings requiring an administrative credential. Students must have a teaching certificate and documentation of 3 years of certified teaching experience to be admitted into this program.

**Master of Education in Educational Leadership (Online/Ground)** *(Not Eligible for Institutional Recommendation)*

Grand Canyon University’s Master of Education in Educational Leadership (Not Eligible for Institutional Recommendation) program is designed for individuals interested in educational administration in the PK-12 setting and social services settings for children, but who must postpone a school site-based administrative internship or do not choose to seek a K-12 administrative certificate. The Interstate School Leaders
Licensure Consortium (ISLLC) and the Educational Leadership Constituent Council (ELCC) standards form the foundation of this program of study. Courses are taught by expert practitioners in their respective fields who share knowledge and experience in areas of school and business leadership, administrative foundations, organizational theory and culture, PK-12 legal issues, public school finance, curriculum development, and instructional and team leadership. As an opportunity to apply theory to practice, field experience/practicum hours are embedded throughout the program. The Action Inquiry process frames these experiences. Benchmark assessments within each course guide students through observation, practice, and hands-on leadership experiences. Graduates of the program are prepared to become educational leaders in the home, church, private schools, and other settings not requiring an administrative credential. The students are also prepared to move into an administrative internship/credentialing component with Grand Canyon University at a later date. To be admitted into this program, 3 years of teaching experience is strongly recommended.

Master of Education in Elementary Education (IR) (Online/Ground)

(Eligible for Institutional Recommendation)

The Master of Education in Elementary Education (Eligible for Institutional Recommendation) program is designed for any individual interested in the education of children in Grades K-8 who is seeking teacher certification. The format and courses of this regionally accredited and Arizona-approved program are tailored to meet the needs of the adult learner and to maximize the content knowledge that the teacher candidate will possess upon graduation. Courses are taught by experts in their respective fields who share knowledge and experience in areas of educational psychology, philosophy, methodology, and curriculum development. All courses are directly aligned with the Arizona Professional Teacher Standards and the Interstate New Teacher Support and Assessment Consortium Standards. Opportunities are provided to apply concepts, theories, and research throughout the program. Assignments within many of the courses guide students through more than 100 hours of observational and practice-based experiences, and the final semester of the program includes a full-time, 16-week student teaching component. These educational settings must be state-certified environments and mentor teachers must be fully certified. Teacher candidates are responsible for contacting their state department of education for certification requirements and program approval. Furthermore, teacher candidates should consult the Academic Catalog, University Policy Handbook, and an academic counselor to obtain information regarding current policies and procedures inherent in a teacher credentialing program. Graduates of the Master of Education in Elementary Education program are prepared to become informed educators in public and private schools and other settings requiring a teaching credential.

(Not Eligible for Institutional Recommendation)

The Master of Education (M.Ed.) in Curriculum and Instruction: Reading with an Emphasis in Elementary Education (Not Eligible for Institutional Recommendation) program is designed for educators who wish to apply theory and educational best practices to the delivery of curriculum, instruction, and assessment in order to improve the reading abilities of their students. The format and courses of this regionally accredited program are tailored to meet the needs of the adult learner and to maximize strengths that students already possess. Courses are taught by experts in their respective fields who share knowledge and experience in areas of curriculum and instruction, cognition, emergent literature, linguistics, phonics, and developmental and corrective reading processes. Opportunities are provided to apply concepts, theories, and research throughout the program. Assignments within each course guide students through observational and practice-based experiences. Students must have access to a K-8 classroom to complete the practicum course and program assignments. Graduates of this program are prepared to become informed educators who meet the reading needs of schools and student populations. Educators must hold a current teaching certificate or have K-8 teaching experience.

Master of Education in Special Education: Cross-Categorical (IR)

(Online/On-ground)

(Eligible for Institutional Recommendation)

The Master of Education in Special Education (Eligible for Institutional Recommendation) is a cross-categorical program. It is designed for any individual interested in the education of children with special needs in the K-12 setting who also wish to seek a teaching certificate. The format and courses of this regionally accredited and Arizona-approved program are tailored to meet the needs of adult learners and to maximize strengths that teacher candidates already possess. Courses are taught by experts in their respective fields who share knowledge and experience in areas of learning disabilities, emotional and behavioral disabilities, and other physical and cognitive impairments. All courses are directly aligned with the Arizona Professional Teacher Standards, the Interstate New Teacher Support and Assessment Consortium Standards, and the Council for Exceptional Children Standards. Opportunities are provided to apply concepts, theories, and research throughout the program. Assignments within each course guide teacher candidates through observational and practice-based experiences. Teacher candidates must have access to a K-12 special education classroom to complete the program assignments. The classroom setting must have at least three of the five following disability categories represented: emotional disability, learning disability, mental retardation, physical impairment, and/or health impairment. Graduates of the program are prepared to work with special needs populations and implement individualized educational plans to accommodate the teacher candidates’ various learning needs. Teacher candidates must be prepared to complete a full-time, 16-week student teaching component at the end of the program that must be completed with a certified special educator. Teacher candidates/applicants are responsible for contacting their state department of education for certification requirements and program approval. The teacher candidate/applicant should consult the Grand Canyon Academic Catalog, the University Policy Handbook, and an academic advisor to obtain information regarding current policies and procedures inherent in a teacher credentialing program.

**Master of Education in Special Education: Cross-Categorical (Non-IR) (Online/Ground)**

*(Not Eligible for Institutional Recommendation)*

The Master of Education in Special Education (Eligible for Institutional Recommendation) is a cross-categorical program. It is designed for any individual interested in the education of children with special needs in the K-12 setting who also wish to seek a teaching certificate. The format and courses of this regionally accredited and Arizona-approved program are tailored to meet the needs of adult learners and to maximize strengths that teacher candidates already possess. Courses are taught by experts in their respective fields who share knowledge and experience in areas of learning disabilities, emotional and behavioral disabilities, and other physical and cognitive impairments. All courses are directly aligned with the Arizona Professional Teacher Standards, the Interstate New Teacher Support and Assessment Consortium Standards, and the Council for Exceptional Children Standards. Opportunities are provided to apply concepts, theories, and research throughout the program. Assignments within each course guide teacher candidates through observational and practice-based experiences. Teacher candidates must have access to a K-12 special education classroom to complete the program assignments. The classroom setting must have at least three of the five following disability categories represented: emotional disability, learning disability, mental retardation, physical impairment, and/or health impairment. Graduates of the program are prepared to work with special needs populations and implement individualized educational plans to accommodate the teacher candidates’ various learning needs. Teacher candidates must be prepared to complete a full-time, 16-week student teaching component at the end of the program that must be completed with a certified special educator. Teacher candidates/applicants are responsible for contacting their state department of education for certification requirements and program approval. The teacher candidate/applicant should consult the Grand Canyon Academic Catalog, the University Policy Handbook, and an academic advisor to obtain information regarding current policies and procedures inherent in a teacher credentialing program.

**Population-Specific Programs**

College of Education Population-Specific Programs are available to Arizona residents only.

**Master of Education in Elementary Education: Arizona Teaching Intern Certification Program (Online/Ground)**

*(Eligible for Institutional Recommendation)*

The Master of Education in Elementary Education: Arizona Teaching Intern Certification Program (Eligible for Institutional Recommendation) is designed for any individual interested in the education of children in Grades K-8 who is seeking teacher certification. The format and courses of this regionally accredited and Arizona-approved program are tailored to meet the needs of the adult learner and to maximize the content knowledge that the teacher candidate will possess upon graduation. Courses are taught by experts in their respective fields who share knowledge and experience in areas of educational psychology, philosophy, methodology, and curriculum development. All courses are directly aligned with the Arizona Professional Teacher Standards and the Interstate New Teacher Support and Assessment Consortium Standards. Opportunities are provided to apply concepts, theories, and research throughout the program.

Assignments within each course guide teacher candidates through observational and practice-based experiences. This certification program contains the same courses as those in standard Master of Education in Elementary Education (IR) program. However, the sequence in which the courses are taken for this certification is different in order to meet the student teaching requirement that has been adopted by the Arizona Department of Education.

**Additional Admission Requirements**

This program has additional admission requirements. Refer to the University Policy Handbook for specific admission requirements for this program.

The College of Nursing

College of Nursing Description

A quarter of a century after the College of Nursing was founded, the college continues to educate nurses through rigorous academic and clinical preparation in a tradition of values-based Christian education. The Bachelor of Science in Nursing (BSN) degree is offered through three programs: pre-licensure (traditional and fast track) and degree completion for already licensed and registered nurses. The pre-licensure curriculum is designed to help students assess the individual, the family, and communities; utilize functional health patterns within a variety of clinical settings; formulate nursing diagnoses; plan and evaluate nursing interventions; and function as professionals within the health care team. The fast-track BSN program allows students who have fulfilled all prerequisites and co-requisites to complete a degree in approximately 20 months. Building on the baccalaureate degree, the College offers a bridge degree for already licensed and registered nurses (RN-MSN) as well as the Master of Science in Nursing (MSN) featuring six concentrations and a dual major: Acute Care Nurse Practitioner, Family Nurse Practitioner, Nursing Leadership in the Health Care System, Clinical Nurse Specialist, Nursing Education, Clinical Nurse Specialist with Education Focus, and Master of Business Administration/Master of Science in Nursing: Nurse Leadership.

College Mission

The mission of the College of Nursing is to provide an academically challenging professional nursing education based on a liberal arts foundation to students from diverse backgrounds within an environment of Christian values and with a commitment to the enhancement of health and wellness in society.

College Features

The College of Nursing (CON) offers both quality undergraduate and graduate degree programs that meet specific students’ career and academic needs. The College of Nursing faculty hold a master’s or doctoral degree. Recognition of the spiritual needs of all persons is an integral part of caring for one’s self and others. The spiritual dimension is integrated into each nursing course throughout the undergraduate and graduate curriculum.

Pre-licensure students begin their supervised clinical experiences during the first semester of the nursing curriculum. Students spend up to 18 hours per week in an assigned clinical practice area learning to apply theory in direct patient care situations. Pre-licensure students complete a practicum in nursing as their last course in the curriculum. This course is designed to assist students in role transition and in gaining confidence in their practice.

Graduates of the College of Nursing have a record of success on the National Council Licensure Examination – RN. Development of a resume and interview skills are part of the senior studies. In today’s rapidly changing health care environment, the student will value the opportunity to explore the trends in an individual capstone project.

College Philosophy

In concert with the mission of the University, the College of Nursing faculty affirms belief in educating nurses within a dedicated and supportive community of Christian values. The nursing programs prepare graduates to provide excellent, holistic care while encouraging a passion for achievement, a lifelong curiosity for knowledge, and pursuit of advanced professional degrees.

The American Association of Colleges of Nursing (AACN) Essentials of Baccalaureate Education for Professional Nursing Practice guides the curriculum for the baccalaureate program. The AACN The Essentials of Master’s Education for Advanced Nursing Practice, Advanced Nursing Practice: Curriculum Guidelines and Program Standards for Nurse Practitioner Education, National Organization of Nurse Practitioner Faculties (NONPF) and AACN Nursing Practitioner Primary Care Competencies in Specialty Areas, NONPF Domains and Competencies of Nurse Practitioner Practice, NACNS Statement on Clinical Nurse Specialist Practice and Education, and the National League for Nursing Competencies for Nurse Educators provide structure for the curriculum content of the graduate-level programs.

The College of Nursing curriculum is designed to facilitate the students’ abilities to creatively respond to continuously changing health care systems throughout the world. Educational experiences are planned to meet the needs of and to empower both students and clients. Professionalism, ethical decision-making, accountability, critical thinking, and effective communication are emphasized. This is achieved through the application of liberal arts constructs, science, health and nursing theories, and the values of the Christian faith within the scope of nursing knowledge and evidence-based practice. Nursing practice promotes human dignity through compassionate caring for all human beings, without consideration of their gender, age, color, creed, lifestyle, cultural background, and other visible or invisible boundaries between students, faculty, and clients.

The faculty of the College of Nursing is accountable for the quality of the educational programs and for the promotion of safe and effective nursing through teaching, service, and collaboration with other professionals and consumers of care. The following statements reflect the philosophical beliefs of the faculty in relation to the concepts of health, environment, person, and nursing.
HEALTH
Health is the central focus of nursing. Health is a dynamic aspect of being which incorporates physical, emotional, intellectual, spiritual, and social dimensions.

ENVIRONMENT
All humans interact with the physical, emotional, intellectual, spiritual, and social environments in which they work, play, and live. The nursing role is to help provide healthy and safe environments so that persons may live in optimal health.

PERSON
We believe that all people are accepted and loved unconditionally, as children of God. Clients are considered to be individuals, families, groups, communities, and populations. Human diversity is cherished. Spirituality is conceived as vertical and horizontal relationships with God and with humanity. These relationships give hope and meaning in life now and in the future.

NURSING
Baccalaureate nursing practice incorporates the roles of assessing, critical thinking, communicating, providing care, teaching, and leading. The caring professional approach includes the values of autonomy, altruism, human dignity, integrity and social justice with unconditional regard for all people. Nursing practice includes health promotion, disease prevention, early detection of health deviations, prompt and adequate treatment of the human response to acute and chronic illness, and compassionate care for those experiencing death.

Masters nursing practice expands upon baccalaureate nursing concepts to include primary care practice knowledge and advanced leadership with a focus on research and quality assurance, spirituality, diversity, critical thinking, caring, and learning. The advanced professional nursing role relies on best practices and evidence-based research with a focus on evaluation of health outcomes and process.

NURSING EDUCATION is theory driven. Theories are derived from the humanities, sciences, and biblical concepts. Nursing knowledge, theory, research, and health promotion are influenced by spiritual perspectives, ethical, legal, political, historical, and social influences. The faculty values excellence in teaching with an individual focus on the learner. Teaching includes a variety of methods, learning modalities, and practice situations. The faculty provides opportunities for students to give comprehensive care to diverse client populations.

LEARNING environment is created and arranged to meet individual learning outcomes that are consistent with College of Nursing program outcomes. The College of Nursing supports life-long learning endeavors and fosters an appreciation of diversity among traditional and non-traditional learners. Students are educated to provide, direct and evaluate client-centered care while focusing on the person as an integrated whole.

College of Nursing Policies
CPR Requirements
Students must be certified in CPR for Health Care Providers through the American Heart Association or American Red Cross and are required to maintain certification throughout the program. Graduate students may also obtain CPR certification for the Professional Rescuer from American Red Cross. Information as to the availability of courses may be obtained by calling either the American Heart Association, or American Red Cross. CPR for Bystanders or the community will not fulfill this requirement. CPR instruction teaches skill of airway management and external cardiac compression for the adult and pediatric victim.

Students who do not have a current CPR certification card will not be permitted to participate in clinical experiences. In addition, Graduate students need to meet the certification requirements of the respective agency in which they perform clinical.

Policy for Student Drug and Alcohol Screening
The practice of professional nursing demands that the clinician be free from the influence of any substance that would impair judgment and thinking ability. As a result, health care agencies are requiring new employees to undergo drug screening. Nursing students must also be free from impairing substances. Health care agencies and College of Nursing require drug screening of nursing students prior to their first clinical experience. In addition, College of Nursing students are subject to screening if either the faculty or preceptor suspects that the student is impaired at any time on campus, or during any health care experience or any other university or work-related activity. Any student whose test is deemed positive may not be able to enroll or continue in nursing courses for a minimum period of 1 year.

The policy is designed to identify the procedures to be followed for both types of testing as well as to outline the appeal and readmission to the program.

Initial Randomly Scheduled Drug and Alcohol Screening
1. First level and new transfer students will be randomly given a drug screen authorization form and timeframe to submit to a urine drug screen at one of the Sonora Quest lab location options provided, where the drug screening will be performed for the initial screening.
2. Students will be required to show picture identification. A driver’s license, student ID, or passport are acceptable forms of identification.
3. The cost for all screening and medical review (if deemed necessary) are the student’s responsibility.
4. A screen with questionable results will be sent by the lab for a medical review. Costs for review and retest will be the responsibility of the student.
5. A negative report is necessary to continue in the program of study in the College of Nursing.
6. This screen need not be repeated as long as the student maintains continuous enrollment, except under the circumstances described below. Continuous enrollment is defined as enrollment in nursing classes during all consecutive semesters until graduation.

Drug and Alcohol Screening – Suspicion of Drug and Alcohol Use

College of Nursing students are subject to screening if either the faculty or preceptor suspects that the student is impaired at any time on campus, or during any health care experience or any other university or clinical related activity.

If impairment is suspected, the student may be removed from clinical assignment or classroom activity pending the results of the screening and medical review, if necessary.

Documentation of all aspects of the testing incident will be treated as confidential, consistent with the interests of safety and reasonableness.

Follow-Up Action

Negative Screen

1. Students whose drug screens are negative will meet with the Associate Dean to discuss the perceptions of impaired behavior, the implications, and the steps to avoid similar situations in the future.

2. A medical referral for documentation of any medical condition or treatment may be requested.

3. Students will not be counted as absent from clinical during this evaluation process. However, students will be expected to meet the clinical objectives.

4. A reasonable suspicion/cause drug screen that is positive but deemed negative by a medical review officer will follow these guidelines:
   a. The student will meet with the Dean.
   b. The Dean may require the student to undergo, at the student’s expense, an evaluation for drug use/prescription drug use/impairment by a neuropsychiatrist recommended by the Arizona State Board of Nursing.
   c. The student will follow other recommendations deemed necessary by the Dean.
   d. The student will be required to provide a negative drug screen prior to returning to clinicals and be subject to periodic drug screens at the student’s expense.
   e. More than one incident of a reasonable suspicion/cause drug screen that is positive but deemed negative by a medical review officer may result in withdrawal from the nursing program for a minimum of 12 months. The student will follow the positive drug screening guidelines.

Positive Screen

1. Positive drug screens (including medical review) may result in withdrawal from the nursing program for a minimum of 12 months. After this 12-month period, the student may apply for re-admission under general guidelines stated in the University Policy Handbook, provided there is submission of evidence of satisfactory participation in a rehabilitation program for alcohol/substance abuse.

2. Sources of evidence include:
   a. Documentation of completed program of rehabilitation.
   b. Acknowledgement of continuance in a 12-step or after-care program.
   c. Letter from therapist or program director stating the student is now able to function safely in a clinical facility.
   d. The student must have a negative screen prior to being readmitted to the nursing program. The screen will be done at the direction of College of Nursing and may be periodic while the student is in a College of Nursing program.
   e. The student is responsible for all costs of screening.

3. The decision to readmit will be made by the College of Nursing faculty after review of submitted materials. As with other applications for readmission, space availability may be a determining factor for that particular semester.

4. A report will be filed with the Arizona State Board of Nursing upon withdrawal from the program consistent with the rules and regulations of the State Board of Nursing.

5. Any student who screens positive after one readmission may be permanently dismissed from the nursing program.

Students Who Refuse Drug Screening

1. Students who refuse to participate in screening will be required to leave the clinical area and make an appointment with the Dean of Nursing or the Dean’s designee. The student will be transported home and remain out of the clinical area until an investigation has been done and a recommendation has been made by the Dean or the Dean’s designee. Students who refuse screening may be subject to dismissal from the College of Nursing.

2. The student who refuses to participate in the aforementioned rehabilitation program will not be allowed into clinical courses; therefore the student cannot complete the nursing program.

Drugs Included in Screens

Using Sonora Lab, this would be referred to as the “Standard Plus II” screen, which is the screen commonly used for health care facilities and professionals in the medical field. In addition, if indicated, a student may be screened for alcohol.

*Campus/Off-site only | Writing-intensive course | Fulfills General Education requirement |
As health care providers, one of the covered entities, nurses must be knowledgeable about the various aspects of the Health Insurance Portability and Accountability Act of 1996 (HIPAA). The College of Nursing offers this guidance below for those persons to ensure compliance with those requirements and asks that all students sign the HIPAA confidentiality Agreement.

**Students Are Required to Do the Following:**
- Sign the College of Nursing Faculty/Staff/Student Confidentiality Agreement before any involvement in a clinical agency.
- Attend College of Nursing training or in-classroom clinical instruction on requirements relating to patient privacy.
- Know and adhere to a clinical site’s privacy and procedures before undertaking any activities at the site.
- Maintain at all times the confidentiality of any patient information, regardless of whether the identifiers listed in the “Do not” section of these guidelines have been removed.
- Promptly report any violation of those procedures, applicable law, or the College of Nursing’s confidentiality agreement by , a College of Nursing student, faculty or staff member to the appropriate College of Nursing clinical instructor or faculty member.
- Understand that a violation of the clinical site’s policies and procedures, of applicable law, or the College of Nursing’s confidentiality agreement will subject the student to disciplinary action.

**Students Are Not to Do the Following:**
- Discuss, use or disclose any patient information while in the clinical setting unless it is part of the clinical setting.
- Remove any record from the clinical site without the prior written authorization of that site.
- Disclose any information about a patient during the clinical assignment to anyone other than the health-care staff of the clinical site.
- Use patient information in the context of a learning experience, classroom case presentation, class assignment, or research without attempting to exclude as much of the following information as possible:
  - Names
  - Geographical subdivisions smaller than a state
  - Dates of birth, admission, discharge, death
  - Telephone and fax numbers
  - E-mail addresses
  - Social security numbers
  - Medical records or account numbers
  - Certificate/license numbers
  - Vehicle or device numbers
  - Web locators/Internet protocols
  - Biometric identifiers
  - Full face identifiers
  - Any other unique identifying number, characteristic, or code
  - All ages over 89

**Pre-Licensure Bachelor of Science in Nursing (Ground)**

**Additional Admission Requirements**
This program has additional admission requirements. Refer to the University Policy Handbook for specific admission requirements for this program.

**Undergraduate Retention and Progression**
Students who have been accepted into the nursing program may remain as nursing students if they adhere to the following criteria:

1. Maintain continuous registration for nursing courses in the major. Traditional students: continuous registration is from Fall/Spring only, while fast-track BSN students must also maintain registration in the summer.
3. Pass all portions (test, theory, and clinical) of each nursing course with a 76% or greater average. Students must attain 76% or greater overall to complete the course successfully.
4. Maintain a 2.5 cumulative GPA on 4.0 scale in all nursing major courses. GPA will be calculated after the completion of each semester.
5. Maintain a cumulative GPA of 2.5 to graduate.

**Health and Immunization Requirements for Pre-Licensure Students**
Nursing students are expected to take measures to maintain their personal health so as not to jeopardize themselves or any patient with which they come in contact. Therefore, students who are accepted into the nursing program must show evidence of the College of Nursing required immunizations and diagnostic procedures as required by the clinical agencies utilized. At anytime, a student may be required to receive a medical examination if deemed necessary by the faculty for the wellbeing of the student and/or the patients/clients.

Students are responsible for updating CPR, TB screening, and Tetanus booster when needed. Students will not be allowed to participate in clinical experiences without all agency requirements being current. Missing clinical may jeopardize a student being successful in the program. As nursing students are in contact with clients in a variety of health situations, it is imperative that students maintain protection against...
communicable illnesses. In addition, students must meet agency health requirements to enter clinical course work.

The charts below indicate the specific health requirements for undergraduate admission and continuing enrollment. Guidelines are based on the Center for Disease Control guidelines, Morbidity Mortality Weekly Report.

<table>
<thead>
<tr>
<th>Test</th>
<th>Requirements for Admission</th>
</tr>
</thead>
<tbody>
<tr>
<td>Tuberculosis (TB)</td>
<td>TB skin testing is required. Initially, two-step testing will be required for all incoming students. Two-step testing is useful for the initial skin testing of adults who are going to be retested periodically, such as health care workers or nursing home residents. This two-step approach can reduce the likelihood that a boosted reaction to a subsequent Tuberculin Skin Test (TST) will be misinterpreted as a recent infection. Two-step testing is a strategy used in TB screening programs to distinguish a boosted reaction (caused by TB infection that occurred many years before the skin test) from a reaction caused by recent infection. If a person has a negative reaction to an initial skin test, a second test is given 1 to 3 weeks later; a positive reaction to the second test probably represents a boosted reaction, not recent infection. An exemption from two-step testing may be granted by the College of Nursing if the student submits documentation showing a history of annual TB testing. For positive skin tests, a health department clearance is required. Evaluation will be made on an individual basis for the student who has been out of the major for at least one rotation.</td>
</tr>
<tr>
<td>MMR (rubeola/measles, mumps, rubella)</td>
<td>Students must show one of the following: Lab evidence (titer) of immunity MMR (two doses) Physician documented evidence of disease (not accepted for Rubella)</td>
</tr>
<tr>
<td>Varicella Zoster (VZV)</td>
<td>Students must show one of the following: Proof of immunity Documented evidence of disease 2 vaccines, at least 8 weeks apart</td>
</tr>
<tr>
<td>Tetanus-Diphtheria (TD)</td>
<td>Evidence of current status is needed every 10 years.</td>

Drug Screen
Students may be tested. See Drug Testing Policy.

Influenza
Recommended yearly; documentation to be on file

Clinical Participation and Safety Guidelines for Pre-Licensure Programs

1. Participation in clinical experience is essential to meet the objectives for all clinical nursing major courses. Students are responsible for all materials covered while student is absent.

2. Clinical absences may result in clinical probation. Students who are too ill to perform safely in clinical should seek medical attention and contact nursing faculty prior to missing clinical lab.

3. Any student who has experienced an Emergency Department visit or hospitalization or an acute illness, trauma, surgery or pregnancy/delivery will need a health care provider’s release to return to clinical. Such a release should provide information that attests to the fact that the student is physically and emotionally able to provide direct patient care.

4. Students who must miss clinical due to pregnancy or extended illness may not be able to complete clinical objectives. Students must contact the course instructor to discuss options. The College of Nursing is not obligated to provide makeup clinical opportunities for students unable to complete clinical during the normal academic calendar. Any make-up clinical opportunity will be at the student’s expense and subject to faculty availability, clinical site availability, and approval of the Dean of the College of Nursing.

Standard Precautions
Student nurses are not to care for patients with active TB unless ultrafiltration masks or individually fitted masks are available. Student nurses will adhere to all guidelines for Standard Precautions within the clinical agencies.

Protocol for Puncture Wounds and Exposure to Blood or Bodily Fluids
Incidents involving any type of needle stick or body-fluid exposure must be reported to the Preceptor/Clinical Facility immediately!

All faculty and student should observe the protocol for safe needle usage when practicing or performing parental injections, IV starts, blood draws or using syringes as part of a skills check off. The faculty/student should follow the protocol for needle usage at the agency where clinicals are being held.

Uncontaminated Needle Stick
If a student accidentally punctures him/herself with an uncontaminated needle or is exposed to blood or bodily fluid that is an intact skin exposure should:

- Wash the area immediately and thoroughly with soap and water
- Follow-up with the Cooke Health and Wellness Center or own Primary Care Provider who will make a determination of Tetanus immunization status and give appropriate prophylaxis or referral for appropriate prophylaxis.
- Complete a student nurse puncture wound incident report (Available from the College of Nursing) to be filled out by the student and the supervising faculty or instructor who was present during incident. A copy of this report will be given to the Associate Dean and placed in the student’s file.
- Counseling referral and other referrals can be arranged through the health center.

Contaminated Needle Stick
If the exposure is via a contaminated needle or if a bodily fluid exposure to non-intact skin, the student should continue with the following:

- Follow-up in an Emergency Department within two hours
- Student nurse puncture wound incident report will be filled out by the student and the faculty or instructor who was present during incident. A copy of this report will be given to the Associate Dean to be placed in the student’s file.

Financial responsibility for testing and recommended care following an exposure rests solely with the student nurse. This could include testing, evaluation, treatment, and counseling.

Tuberculosis Exposure Plan
Tuberculosis (TB) exposure potential is defined as any exposure to the exhaled or expired air of a person with suspected or confirmed TB disease. A high hazard procedure involving an individual with suspected or confirmed TB disease are those that have the potential to generate potentially infectious airborne respiratory secretions such as aerosolized medication treatment, bronchoscopy, sputum induction, endotracheal intubation, and suctioning.

Workplaces with inherent exposure potential to TB disease:

- Health care facilities
- Corrections facilities
- Homeless shelters/clinics for homeless
- Long term health facilities
- Drug treatment centers

Post-Exposure Procedure
- When a Tuberculosis (TB) exposure occurs, the involved student will report the incident to the clinical instructor and the appropriate administrative staff at the involved institution or agency.
- The student will be counseled immediately and referred to his or her personal health care provider, the Maricopa County Health Department, or the Cooke Health Center. A baseline Tuberculosis Skin Test (TST) should be administered as soon as possible after the exposure.
Faculty members may request mandatory advisement sessions when student behavior appears below professional standards. When students are in clinical or academic jeopardy, and/or when student behavior is nonprofessional, students may be placed on clinical probation or removed from the course. Examples of probationary actions:

1. Unsafe practice in the clinical area
2. Insufficient preparation for clinical experience
3. Failure to follow faculty/staff guidance in clinical
4. Failure to notify faculty/staff of tardiness or absences in clinical
5. Causing patient to experience unnecessary suffering
6. Inappropriate performance specific to level expectations
7. Unprofessional communication to faculty, staff, or patient
8. Non-adherence to student uniform attire

Re-Entry to Nursing Major Courses

Students who fail a course in the Fast Track and apply for re-entry will be considered for the traditional BSN program. Exceptions are made on an individual basis.

Students who have failed courses in the nursing major must submit a re-entry application to the College of Nursing to be considered for re-entry into the program. Students must apply for re-entry to the nursing major under the following conditions

1. Student has been out of the nursing major (for at least one clinical course).
   a. Student receives a failure in nursing course. Failure of a course occurs when the student receives below a 76% in the final grade calculation of theory and clinical. Failure removes the student from the nursing major and the student must reapply to the nursing program to be considered for reinstatement into the program.
b. Student has been administratively withdrawn from the nursing major course.

2. The student must complete an “Application to Re-enter the Nursing Major” form and submit it to the Associate Dean. The student must meet the designated application deadline. The student who wishes to be readmitted following a failure or administrative withdrawal from a course in the nursing major must submit a request to the College of Nursing to do one of the following:
   a. Repeat the failed or uncompleted course.
   b. Continue to the next nursing major course if the failed course is not a prerequisite.
   c. Withdraw from the next rotation and reapply for readmission to the following semester.

3. Re-entry to the major is not assured simply because the student was previously enrolled in nursing courses or was previously accepted. The decision will be based on the evidence showing that the student is ready to continue, has potential to complete the program, and is in compliance with University regulations and standards of behavior. All decisions to readmit are also contingent upon clinical space availability. The student must meet all admission requirements to be considered for re-entry into the program.

4. Only one failed nursing course may be repeated once based on acceptance of the student by the reapplication process to the major. Subsequent course failures constitute administrative withdrawal from the nursing college.

Student Uniform Attire
The student uniform should be worn only for specific scheduled clinical or classroom activities.

The uniform consists of:

1. Purple scrub pants or a skirt below the knees that is purple or white
2. Purple scrub tops with modest neckline
3. White lab jacket
   a. A white lab jacket must be worn if appropriate street clothes are worn in place of the uniform for patient selection. Shorts, very short skirts, jeans, tank tops, tube tops, see-through clothing, exercise clothes (sweats), and open-toed shoes are not acceptable attire in any clinical agency.
   b. A white lab jacket is now optional for Level 4. Uniform will be as required by clinical agency.
   c. Scrubs and white lab jackets may be purchased through the College of Nursing Student Nurses Association (SNA).
4. Optional, white cotton tee shirts, crew neck or turtleneck, may be worn under uniforms for warmth or modesty. A scrub jacket may be worn in the clinical setting for warmth.
5. Name pin, available at the University Bookstore. The name pin (first name, SN) must be worn while attending any clinical activity. Name pins will not be worn outside of the clinical agency. The name pin should show your first name, SN (“SN” stands for Student Nurse.)
6. Grand Canyon University Nursing Student Photo Name Badge, available through Student Life office. The photo name badge must display your first name, last initial, and “Nursing Student.” An optional name pin is available at the University Bookstore. The name pin will list your first name, SN (“SN” stands for “Student Nurse”). The name badge or name pin must be worn while attending any clinical activity. Name badge or pin will not be worn outside of the clinical agency.
7. White or neutral socks or hose are to be worn with the uniform.
8. Shoes are to be predominantly white duty, leather shoes with predominantly white soles and closed heels or predominantly white, clean athletic shoes. Shoelaces must also be white.
9. Undergarments will not be visible through the uniform.
10. Additional items to be part of the uniform are:
   a. Stethoscope with a bell and diaphragm head
   b. Penlight
   c. Bandages scissors
   d. Black and Red pens
   e. Goggles/Protective eye wear
   f. If a belt organizer is used, it must be white or purple.
   g. Watch with a second hand.

Professional Appearance
1. When applicable, the clinical facility’s ID must be worn whenever in that facility. Students who do not wear this ID may be asked to leave the facility.
2. Hair should be short, pulled back and styled neatly. Beards or mustaches, if worn, should be neatly trimmed.
3. Fingernails should be neatly trimmed and free of cracked nail polish. Only clear or neutral nail polish may be used if desired. Acrylic nails or any other nail enhancements are not permitted.
4. Permitted jewelry is: one pair of studded earrings, a watch, a plain ring band. No other visible jewelry is acceptable including tongue rings or other facial jewelry. Tattoos and any other body art should be covered where possible. (Students are directed to follow the agency guidelines when in specified areas such as nursery, labor and delivery, and operating room).
5. Perfume, after-shave lotion, and heavy makeup are not acceptable in the clinical area.
6. Gum chewing is not acceptable.
7. Clothing worn in course activities not requiring student uniform should adhere to professional standards.
8. Cell phone use is not permitted in the classroom or clinical setting.
Please remember that students also represent Grand Canyon University. Look clean, neat, and professional.

**Professional Attire for Formal Presentations**  
(Applies to Pre-Licensure, RN-BSN, RN-MSN and MSN)

Business casual is acceptable which can be interpreted as:

1. Women: slacks (dress pants), skirts (mid-calf to about two inches above the knee), blouses, shells, cardigans, blazers, dresses.
2. Men: dress pants, button down shirts, polo shirts (short sleeved shirts with a collar), blazers.

**Assessment Technology Institute (ATI) Exams**

Students are required to complete a minimum of one Assessment Technologies Institute, LLC (ATI) exam in each of the five levels of nursing courses.

- On the first attempt, two (2) points are awarded for students who achieve a score at or above the Level 2 proficiency, or as otherwise assigned by the College of Nursing Faculty.
- If the assigned benchmark is not met during the first attempt, ATI recommended remediation based on areas of weakness is required.
- Following remediation, a second attempt to meet the assigned benchmark is required. If this proficiency is met, 1 point is earned.
- If the benchmark is not met on the second attempt, remediation is required and no points are awarded.
- Failure to complete the assigned ATI exams and remediation as needed will result in a grade of incomplete for the course until materials are completed (following the Incomplete Policy at GCU). Incomplete grades may prevent students from graduating.

**Math Requirement**

A medication math exam is given at the beginning of the semester and new math content must be passed with a score of 90% or better prior to administering medications in the clinical setting. Two minutes are allotted per math question.

- A retake exam is administered outside of class time for those individuals who fail the first exam.
- Students who fail the retake exam are referred to the College of Nursing math committee for remediation and reexamination.
- Failure to achieve 90% or better on the third attempt will result in an inability to pass medications in the clinical setting, which may result in a clinical failure to graduate from the program.

**Licensure Examination**

In order to be eligible to take the National Council of State Boards of Nursing Examination for Professional Licensure after graduation, students must have completed the BSN program of study and hold a diploma. No exceptions are made to this policy. Students are responsible for applying to take the National Council License Examination – Registered Nurse (NCLEX-RN) exam for professional licensure through the State Board of Nursing.

**Graduation Requirements for the Pre-Licensure Bachelor of Science in Nursing Degree**

The registered nurse licensing requirements are the exclusive responsibility of the State Board of Nursing (Nurse Practice Act, A.R.S.. Sections 36-1601 et. seq.) and must be satisfied independently of any requirements for graduation from the University. Historically, College of Nursing graduates have been successful on the licensure examination. Satisfactory performance on the licensure examination is the responsibility of the graduate and not guaranteed by the College of Nursing.

**Professional Nurse Qualifications**

Section 32-1632 of the Arizona State Board of Nursing Statutes, Chapter 15, Article 2 – Licensing states:

“An applicant for a license to practice as a graduate, professional or registered nurse shall file with the board a verified written application accompanied by the prescribed fee and shall submit satisfactory proof that the applicant:

*Campus/Off-site only | Writing-intensive course | Fulfills General Education requirement |
1. Has completed the basic professional curriculum in approved professional nursing program and holds a diploma or degree from that program.

2. If convicted of one or more felonies, has received an absolute discharge from the sentences for all felony convictions five or more years prior to the date filing an application pursuant to this chapter.

Nursing students are expected to be clear of any felony convictions at the time of admission into the College of Nursing and to remain free of felony convictions for the duration of the program. If the prospective student or student is charged with a felony either before admission or during the program, he/she must speak with the Associate Dean immediately.

Undergraduate Programs

Bachelor of Science in Nursing (BSN)

Pre-Licensure (Ground)

The Bachelor of Science in Nursing (BSN) Pre-Licensure program prepares students to function as professionals within the health care team by providing holistic, safe, and quality care for individuals, families, and communities in diverse settings. The program includes an emphasis on spirituality, communication, health promotion, and disease prevention throughout the lifespan.

Degree Requirements

Total General Education: 33-40 credits

A number of courses in the major will satisfy General Education competencies. Students should talk with their Academic Counselors for more specific information.

Total Nursing: Pre-Licensure Major: 123 credits

Nursing: Pre-Licensure Major

Total Bachelor of Science in Nursing (BSN) Pre-Licensure: 123 credits

Registered Nurse to Bachelor of Science in Nursing (RN-BSN) (Online/Ground)

Additional Admission Requirements

This program has additional admission requirements. Refer to the University Policy Handbook for specific admission requirements for this program.

Retention and Progression

Students who have been accepted into the nursing program may remain in the program if they adhere to the following criteria:

1. Maintain continuous registration for nursing courses in the major: Summer, Fall, and Spring.

*Campus/Off-site only | Writing-intensive course | Fulfills General Education requirement |
3. Maintain a 2.5 cumulative GPA on 4.0 scale in all nursing major courses. GPA will be calculated after the completion of each semester.
4. Maintain a cumulative GPA of 2.5 to graduate.

**Attendance**

The courses offered in the RN to BSN program are concentrated seminars. Attendance is a prerequisite for student learning in the courses and the personal and small group relationships facilitated in class sessions. For these reasons, no “free” or “automatic” absences exist.

Sometimes unavoidable absences may occur. These absences must be discussed with the instructor of the course, preferably before the class session meets. If the absence is completely unavoidable and the professor is informed, the following guidelines apply:

1. One absence, for whatever reason, requires a make-up assignment. Even with the make-up assignment, some grade reduction will occur. An “I” (incomplete) grade may be requested by the student within the guidelines of the grading system. (See Grading Information.) Make-up assignments may consist of two options:
   a. Attendance in an identical session of the course, albeit held on another class night that week, if class is available that week. This attendance must be coordinated with instructor to be recorded effective.
   b. A written assignment, covering the content missed in the class, as approved by the instructor.
2. Absences for two consecutive or non-consecutive classes in a course results in a grade of “F.” Furthermore, a conference may be arranged with the student, the instructor, and the Director of the RN to BSN program to determine continuance in the program. If the student is allowed to remain in the program after failing one course, the course must be repeated and other stipulations for continuation may be delineated.
3. A student repeating a course is charged the tuition rate for the semester that the student repeats the course.
4. A student who fails two courses in the program will be administratively withdrawn from the program.

**Class Scheduling**

Upon enrolling in the College of Nursing RN to BSN program, students are assigned to specific evening or cohort group. Because of the synergistic, developmental, cooperative learning nature of the classes, it is recommended that learners remain with the group of students with whom they began and that they complete the courses in the sequence delineated on the course schedule. If extenuating circumstances exist, the student may discuss options for changing cohorts with the Director of the RN to BSN program or the Dean of the College of Nursing.

**Registered Nurse to Bachelor of Science in Nursing (RN-BSN) (Online/Ground)**

The RN to BSN program is designed for registered nurses with an associate’s degree or diploma in nursing. The format and courses of the regionally accredited program are tailored to meet the needs of the adult learner RN, and to maximize strengths that the working RN possesses. A bridge course facilitates the transition of the working RN into the baccalaureate program. Courses are taught by experts in their respective fields who share knowledge and experience in areas of clinical patient care, health care management, and professional nursing practice and leadership. Opportunities are provided to apply concepts, theories, and research in the RN’s clinical practice. Both the science and art of nursing are integral components of the program and are woven throughout. Graduates of the program are prepared to become leaders in the nursing profession.

Bridge to Master of Science in Nursing (Online/Ground)

The Bridge to Master of Science in Nursing program is designed for registered nurses with a bachelor's degree in health sciences or other related fields. The program is intended to meet the needs of adult learners who already possess a bachelor's degree and an RN license who desire to pursue a graduate degree in nursing. Courses in the bridge program are a blending of RN to BSN core courses that are considered essential requisites to graduate study. Upon completion of bridge courses from the BSN core, students enter one of five emphases offered for the Master of Science in Nursing or the Master of Business Administration and Master of Science in Nursing: Nursing Leadership in Health Care Systems (Dual-Degree).

Additional Admission Requirements

This program has additional admission requirements. Refer to the University Policy Handbook for specific admission requirements for this program.

Graduate Degree Requirements

Additional Graduate Nursing Admission Requirements

In addition to the general Graduate Admission Requirements listed in the Admission Policy and Procedure section, all College of Nursing graduate program candidates must hold an Associates/Bachelor's degree in nursing from a NLNAC/CCNE accredited program, reflecting a cumulative and science course grade point average of 3.0 or above (on a 4.0 scale). Graduate students must have had courses in statistics, research (ACNP, FNP, CNS, NEd, and N-L), and health assessment (ACNP, FNP, CNS, NEd (ACNP, FNP, CNS, NEd) (courses must be shown on official transcripts or a letter must be written by the student to identify which courses contained the content and provide an official course description). Students must also present a valid unrestricted and unencumbered U.S. RN license with no history of discipline in the state of practice. Computer skills are required for this Web-enhanced program. Interviews and writing samples may also be required depending on the program.

Upon admission, the following will be required to:

- Contact the State Board of Nursing Variance in state of residence to determine the requirements for certification of nurse practitioner/advanced practice

RN Licensure Requirement

The graduate nursing student is required to have a current unencumbered license in their state of residence upon admission to the program and for the duration of study. A current license must also be maintained in any state the student is completing clinical requirements. A copy of the current license must be on file at the College of Nursing upon admission to the program and updated as necessary. The student is responsible for notifying the Associate Dean of the College of Nursing immediately in the event the RN license becomes encumbered or is under investigation during their course of study. Resulting consequences will be determined on a case-by-case basis based on the threat to public safety after review by the College of Nursing Graduate Committee.

Malpractice Coverage

Student-Self Coverage:

Students carry their own professional liability insurance. The coverage is a minimum of $1 million per event/$3 million total coverage. Proof of insurance must be submitted upon request by the College of Nursing.

University Coverage:

College of Nursing carries Medical Professional Liability Insurance on all students in the Masters/FNP/CNS/NEd program programs. The coverage is $2,000,000 each incident or occurrence and $4,000,000 in the aggregate through the following company:

Parker Smith & Feek, Inc.
Bellevue (425-709-3600)
2233 112th Avenue NE
Bellevue, WA 98004
Certificate number: MFL019309

Policy for Student Drug Screening

Graduate students (NP/CNS) will participate in random drug screening prior to their first clinical course in accordance with the College of Nursing Policy for Student Drug Screening stated earlier in this catalog. In addition, students with any type of clinical practicum (NP, CNS, N.ED) will be required to undergo a background check (utilizing GCU’s provider) as well as any other security clearance required by the clinical agency prior to their practicum experience. The cost of any required screenings is the student's responsibility.

*Campus/Off-site only | Writing-intensive course | Fulfills General Education requirement |
Graduate Clinical Requirements

- Upon admission, the following will be required for the ACNP, FNP, CNS, and CNS-NEd programs:
  - State Board of Nursing Variance
  - Clinical Placement
    - All FNP, CNS, and CNS-NEd students are required to submit the appropriate immunization, health insurance, and other documentation to the college prior to registering for the first clinical course. Students are required to maintain current records at the college in order to continue in the clinical setting each semester.
  - ACNP and FNP students are required to submit a Student Clinical Placement Application for each semester when clinical credits are being taken, regardless of whether the college or the student determines the clinical assignment. CNS students may submit the Student Clinical Placement Application for clinical placement assistance; they should be communicating with the CNS Faculty Lead for further direction regarding clinical placement. The College of Nursing will give priority to assigning clinical placements to those students who have submitted the application and all required documentation by the appropriate deadline.

- Prior to registration for NUR 671, NUR 675, NUR 675C, NUR 665E or NUR 655, the following are required to be on file with the College of Nursing for the ACNP, FNP, NEd, CNS, and CNS-NEd programs:
  - Required Liability Insurance
  - Evidence of Professional Nursing Liability Insurance $1 million per event and $3 million total coverage
  - Evidence of Health Insurance
  - Health/Safety Requirements:
    - Health History/Note from PCP stating that student is healthy to participate in clinical activities
    - Current immunization records – Tetanus (Td) booster within past 10 years, Hepatitis B series, Measles, Mumps and Rubella, Varicella immunization or evidence of immunity, and TB screen within the last year.
    - CPR certification current for the Health Care Provider from American Heart Association or CPR for the Professional Rescuer from American Red Cross
  - Drug Screen – negative
  - Signed HIPAA Confidentiality Agreement form

Mandatory Advisement

Faculty members may request mandatory advisement sessions when students are in clinical or academic jeopardy, and/or when student behavior appears below professional standards. Satisfactory academics and/or behavioral changes must be accomplished by the end of the course in order to progress in the nursing program. It is important to maintain continuous progress and a sound knowledge base to be successful throughout the program.

Electively Repeating a Course

A grade of B- or lower earned at Grand Canyon University may be replaced in a graduate student’s GPA when the identical course is retaken. This does not apply to those students already on program probation. Graduate students must repeat any program-specific prerequisite courses completed in which a grade of less than C was earned. Students may attempt the same course once for graduate nursing programs. Attempts include any course with an issued grade, including withdrawn courses. Any attempts thereafter will need approval. All attempts will be documented on the official transcript. A course in a Program of Study may not be repeated after the degree has been awarded. The student should note that graduate schools or other institutions may calculate grades in an alternate fashion. This policy does not apply to special topics and independent study courses, which may consist of varying content depending on the timeframe in which it was offered.

Graduate Programs

Registered Nurse to Master of Science in Nursing (Online/Ground)

This program is a blend of the existing Registered Nurse to Bachelor of Science in Nursing and Master of Science in Nursing programs. The RN to BSN curriculum will be truncated by several courses whose content will be covered in the Master’s materials. After the third semester in the course of study below, students will be eligible to transfer into any existing M.S. in Nursing concentration.

Additional Admission Requirements

This program has additional admission requirements. Refer to the University Policy Handbook for specific admission requirements for this program.

Program Prerequisites (see course descriptions)

Choose one of the following pathophysiology courses:

- **BIO 483** Pathophysiology 4 credits
- **BIO 308** Pathophysiology 3 credits

RN/MSN Undergraduate Core

- **NRS 430V** Professional Dynamics 3 credits
- **NRS 429V** Family Centered Health Promotion 3 credits
**Master of Science in Nursing (MSN)**

The six concentrations offered for the Master of Science in Nursing are the following:

- Acute Care Nurse Practitioner (ACNP)
- Family Nurse Practitioner (FNP)
- Adult Clinical Nurse Specialist (CNS)
- Adult Clinical Nurse Specialist with Education Focus (CNS-Ed)
- Nursing Education (NEd)
- Nursing Leadership in Health Care Systems (NL)

The following dual degree is also offered:

- Master of Business Administration and Master of Science in Nursing: Nursing Leadership in Health Care Systems

See the Graduate Student Handbook as well as program-specific manuals for additional policies and information.

**Master of Science in Nursing: Acute Care Nurse Practitioner (Ground)**

The Master of Science in Nursing: Acute Care Nurse Practitioner program prepares experienced registered nurses to provide competent advanced practice nursing care in complex, acute, and critical care settings through an evidence-based program of study. Graduates are eligible for certification as acute care nurse practitioners (ACNPs) from the American Nurses Credentialing Center (ANCC) or the American Association of Critical Care Nurses (AACN). The program combines courses in advanced health assessment, clinical diagnosis, procedural skill acquisition, and care management of acute and chronically ill adults. Clinical experiences emphasize the physiological and psychosocial impact of acute and critical illness on the patient, family, and community, and prepare the ACNP in the diagnosis and management of acute and life-threatening health problems. The 46-credit hour program includes 500 hours of directly supervised clinical practice with ACNP and/or physician preceptors in nationally known care facilities.

**Additional Admission Requirements**

This program has additional admission requirements. Refer to the University Policy Handbook for specific admission requirements for this program, as well as for information on graduate retention and progression.

**Master of Science in Nursing: Adult Clinical Nurse Specialist (Ground)**

The Master of Science in Nursing: Adult Clinical Nurse Specialist program incorporates the advanced roles of clinician, researcher, learner/educator/coach, leader, community advocate, manager of systems, collaborator, and consultant. The master’s prepared nurse requires clinical and organizational decision-making skills based on critical thinking, evidence-based research, and diagnostic reasoning. The nurse prepared at the advanced level synthesizes elements of caring into the nurse-client relationship within practice based on advocacy, as well as ethical, social, legal, political, and historical perspectives. Emphases are placed on client empowerment with unconditional regard for all. The advanced practice role includes an advanced clinical component such as nurse practitioner or the clinical nurse specialist (CNS). The nursing role specialty includes a continuation of nursing knowledge in nursing leadership or nursing education.

**Additional Admission Requirements**

This program has additional admission requirements. Refer to the University Policy Handbook for specific admission requirements.
for this program, as well as for information on graduate retention and progression.

Total Master of Science in Nursing: Clinical Nurse Specialist with Education Focus | 49 credits

Total Clinical Hours | 500 hours

Master of Science in Nursing: Family Nurse Practitioner (Ground)

The Master of Science in Nursing: Family Nurse Practitioner program prepares experienced professional nurses for advance practice as primary care providers. The family nurse practitioner (FNP) makes independent critical judgments in all levels of prevention, including health promotion; illness prevention; and diagnosis and management for individuals, families, communities, and populations. The FNP performs comprehensive health assessments, diagnoses illness, and prescribes pharmacologic and nonpharmacologic treatments to manage acute and chronic health problems to achieve quality cost-effective outcomes in a culturally sensitive context. The role of the nurse practitioner includes educating, consulting and collaborating, using research to make practice decisions, and influencing professional and public policies. Within various practice settings, the FNP provides health care for clients across the lifespan.

Master of Science in Nursing with an Emphasis in Nursing Education (Online/Ground)
The Master of Science in Nursing with an Emphasis in Nursing Education program provides an educational experience to prepare advanced-professional nurses to address the ever changing and expanding educational needs of the nursing profession. The track is designed for those students in the Master of Science in Nursing program who are interested in pursuing or advancing in a position in nursing education. Graduates of this track will be prepared for a variety of roles in nursing education, either as clinical educators or academic educators in both traditional and nontraditional settings in nursing education. A post-master’s certificate program is available to those nurses who already have a Master of Science in Nursing degree.

Master of Science in Nursing with an Emphasis in Nursing Leadership in Health Care Systems (Online/Ground)
The Nursing Leadership in Health Care Systems program prepares nurses for leadership roles in today’s rapidly changing health care delivery systems. The program is a part-time or full-time course of study consisting of graduate nursing core courses and leadership courses taken with Master of Science Leadership (MSL) program. From the graduate nursing core courses, students gain the knowledge, values, and skills needed for advanced generalist practice in an evolving health care system. The coursework in leadership provides an overview of leadership styles and the functioning of organizations with an emphasis on communication skills required to establish and maintain effective relationships.

Master of Business Administration and Master of Science in Nursing: Nursing Leadership in Health Care Systems (Dual-Degree) (Online/Ground)

Refer to the Ken Blanchard College of Business section of the catalog for specific degree requirements and course sequence information on this program. The Master of Business Administration and Master of Science in Nursing: Nursing Leadership in Health Care Systems Dual-Degree.

Post-Master in Nursing Certificates

Post-Master in Nursing Certificates are available in each of the following areas:

- Family Nurse Practitioner (FNP) (Ground)
- Adult Clinical Nurse Specialist (CNS) (Ground)
- Adult Clinical Nurse Specialist (CNS) with Education Focus (Ground)
- Nursing Education (NEd) (Online/Ground)

Certificate requirements, including the possession of a graduate nursing degree, are noted within the degree programs.
The College of Health Sciences

College of Health Sciences Description

The College of Health Sciences was created in 2007 to address a rapidly growing need in the health care industry for increased workforce and educational opportunities that support advancement. The Pre-Medicine, Pre-Pharmacy, Pre-Physical Therapy, and Pre-Physician Assistant programs prepare students to be the best possible applicants for graduate study and eventual entrance into some of the highest paying and most prestigious positions in the health care industry. Programs such as Athletic Training, Exercise Science, Health Care Administration, Public Health, Health Care Informatics, and Counseling provide students with the necessary skills, knowledge, and experience to seek licensure (if necessary) and begin practice in their disciplines immediately following graduation. Degree completion programs in the areas of Addiction Counseling, Health Sciences, Medical Imaging, and Respiratory Care provide associate-degree-prepared practitioners a means to apply their previous education towards attainment of a baccalaureate degree, thus positioning them for employment advancement opportunities and the ability to pursue graduate level studies.

The College of Health Science exemplifies a premier education at a private Christian university where quality instruction and student learning are the sole objectives. With an average class size of less than 30 to 1 and instructors that are dedicated solely to the highest quality instruction and success of students, the college provides the best possible learning environment and opportunity for mastery of course material. In addition to the quality learning environment provided by the college in each course, faculty and staff work closely with students outside of the classroom to create a supportive extracurricular environment focused on students’ personal growth, career development, and professional development. Graduates from the College of Health Sciences at Grand Canyon University can be confident that they have received a premier level of academic achievement and personal support in the nation, providing them with the knowledge and values necessary to be among the top critically thinking health care professionals, global citizens, effective communicators, and responsible leaders.

College Vision

The College of Health Science is the "gold standard" in providing the most desirable training for quality preparation of health care professionals.

College Mission

The College of Health Sciences provides an academically challenging, values-based environment that prepares learners to be critically thinking health care professionals who become global citizens, effective communicators, and responsible leaders in the context of our Christian heritage.

Athletic Training and Exercise Science

The major degrees described offer a blend of classroom instruction and clinical experience designed for the optimum preparation of students for careers in this field. These courses of study will prepare students for eligibility to meet the requirements of the Board of Certification, national certifications in the commercial health and fitness industry, State Board of Education Certification or Endorsement in physical education, health education, or athletic coaching.

Athletic training, as defined by the National Athletic Trainer’s Association, is practiced by Athletic Trainers, health care professionals who collaborate with physicians to optimize activity and participation of patients and clients. Athletic training encompasses the prevention, diagnosis and intervention of emergency, acute and chronic medical conditions involving impairment, functional limitations and disabilities. The Athletic Training major prepares the student for the Board of Certification Examination.

Typical patients and clients served by athletic trainers include: recreational, amateur, and professional athletes; individuals who have suffered musculoskeletal injuries; those seeking strength, conditioning, fitness, and performance enhancement; and others delegated by the physician. Some places athletic training services are provided include: athletic training facilities; schools (K-12, colleges, universities); amateur, professional, and Olympic sports venues; clinics; hospitals; physician offices; community facilities; and workplaces (commercial and government).

The Athletic Training Education program is divided into two phases: the prerequisite phase and the professional phase. The student must complete an application procedure to enter into the professional phase of the program once the prerequisite phase is completed. Upon acceptance to the professional phase and prior to the start of the first clinical course, the student must complete the "clinical course requirements," found in this catalog and on the Athletic Training program Web site (http://www.gcu.edu/programs/atep/). This includes, but is not limited to, a complete physical exam and the signing of a technical standards agreement prior to full acceptance to ensure the ability to complete tasks associated with the position. The education includes clinical rotations on and off campus that require at least 600 hours of clinical experience that are completed over the course of five sequential clinical courses/semesters. Students must provide transportation to offsite clinical rotations. The selection of athletic training students is competitive. A completed admission application for the professional phase of the program should be submitted by April 1, after completing at least 30 observation credits and athletic training student prerequisite requirements as found on Athletic...
Training program Web site. Students will be accepted to the program by June 1 for priority admission. For application materials, visit the Athletic Training program Web site.

The Physical Education major offers a blend of classroom instruction and clinical experience designed for the optimum preparation of students for eligibility to meet the physical education content area requirements for Arizona State Board of Education Certification and K-12 physical education Endorsement. The Physical Education major meets NCATE National Standards for physical education. This major is well suited for those students who wish to complete a bachelor’s degree first, and then complete the education requirements for Department of Education certification at a later date.

- The Health Education emphasis will assist in providing additional competency in personal and group health instruction to prepare students as health educators. The national health issues for children, especially obesity, must be addressed. There is no other system as capable of meeting this need as the field of physical education in the public schools.
- The Athletic Coaching Emphasis offers skills to assist the future teacher or other professional who wishes to coach interscholastic, intercollegiate, or other sports teams in all aspects of preparation for competition. Successful completion of coursework will meet level three guidelines from NASPE or State Board of Education requirements for coaching certification (see Appendix C) and the content is complementary to the major content for career choices that Physical Education major student’s make and enhances the typical physical education students marketability with school districts.

**Additional Admissions/ Program Requirements Athletic Training Degree**

In addition to the general Undergraduate Admission Requirements listed in the Admission Policies and Application Procedures section, the following admission requirements must be met in order to apply to the professional phase of the athletic training program. For application and clinical requirements, refer to the Athletic Training program Web site.

1. All interested students may apply to the Athletic Training Education program during the semester in which all prerequisite course work will be completed. Prerequisite coursework includes: BIO181, BIO181L, EXS214, EXS214L, BIO160, BIO160L, and PSY102.
2. Application deadline for priority acceptance is April 1. Students are accepted by June 1 for a fall semester start.
3. A maximum of two different prerequisite courses may be repeated only once to earn a grade of C or above.
4. Acceptance into the ATEP is determined by athletic training application criteria listed below and availability of clinical spaces.
   - Application Form
   - ATC Letter of Recommendation Form
   - Instructor Letter of Recommendation Form
   - Observation Time Sheet
   - Observation Summary Form
   - Letter of Interest Form
   - Taping Evaluation
   - Emergency Evaluation
   - College Transcripts (with prerequisite course work included)

5. Clinical Course Requirements: Upon admission to the Athletic Training Education program, students must provide the following clinical course requirements to the Program Director prior to the start of any clinical rotation:
   - Provide a copy of Professional Rescuer CPR Certification current through the academic year (see CPR requirements).
   - Provide a copy of current First Aid Certification.
   - Sign a technical standards agreement.
   - Complete an athletic training education health history and physical examination at the Student Health Center at the cost of the student. This examination will include immunization review of immunization or immunity for measles, mumps, rubella, and technical standards review. The form found on the Athletic Training program Web site must be used.
   - Purchase athletic training student liability insurance (to renew annually, see student liability insurance section).
   - Purchase an athletic training student name badge from the bookstore.
   - Provide proof of Hepatitis B vaccination or sign a waiver form declining vaccination.
   - Provide a completed background check and Fingerprint Clearance card through Arizona Department of Public Safety at the cost of the student.
   - Complete Athletic Training Student Orientation (annual orientation).
   - Complete OSHA training during Athletic Training Student Orientation.

6. Students must complete the following annually
   - Attend Student Orientation.
   - Attend OSHA training.
   - Renew student liability insurance (at the cost of the student).
   - Renew CPR certification (must be valid throughout the academic year).

**Transfer Students and Student Athletes**

Transfer Students and Student Athletes will follow the same admission, retention and progression policies as traditional students.
Retention and Progression
Students who have been accepted into the athletic training program may remain as athletic training students if they adhere to the following criteria:

1. Maintain continuous Fall/Spring registration for athletic training courses in the major. Continuous registration is for Fall/Spring semesters only.
2. Maintain continuous accumulation of clinical contact hours during fall and spring semesters (150 clinical contact hours per clinical course).
3. Satisfactory completion of athletic training competencies and clinical proficiencies.
4. Successfully complete all Athletic Training major courses with C or better.
5. Maintain Professional Rescuer CPR & 1st Aid certifications.
6. Attend Athletic Training Student Liability Insurance.
7. Complete Athletic Training Student Orientation annually
8. Maintain health and safety standards of ATEP.

Class Scheduling
Upon admission, students are assigned to a cohort group. This cohort follows a set sequence of courses that begin in the Fall semester and continues for three consecutive academic years (Fall and Spring semesters only).

Unsuccessful Course Completion
Failure of a course occurs when the student receives below a “C” in the final grade calculation of the course. Failure removes the student from the athletic training major and the student must reapply to the athletic training program to be considered for progression.

Re-Entry to Athletic Training Major Courses
Students who have failed courses in the athletic training major must submit an official academic appeal to be considered for re-entry into the program.

1. A student receiving a grade of incomplete “I” in any athletic training major course must assure that the incomplete is resolved and a grade is submitted prior to the start of the next academic semester. Failure to do so will result in administrative withdrawal from the program and current cohort sequence.
2. Student must apply for re-entry to the athletic training major under the following conditions:
   - Interrupted Enrollment- Student has been out of the athletic training major (for at least one course). Students must follow a cohort sequence.
   - Course failure- Student receives a failure (below a grade of “C”) in athletic training course. Students may not continue in ATEP course sequence until failed course has been repeated and passed with a “C” or better. Courses are currently offered one time during the academic year.

   ▪ Unresolved incomplete- Student receives an incomplete “I” as a grade in an athletic training course that is unresolved by the first day of classes in the following semester.
   ▪ Administrative Withdrawal- Student has been administratively withdrawn from the athletic training major course.
3. The student must complete a typewritten letter re-enter the Athletic Training major and submit it to the Program Director. The student must meet the June 1 designated application deadline.
4. Re-entry to the major is not assured simply because the student was previously enrolled in athletic training courses or was previously accepted. The decision will be based on the evidence showing that the student is ready to continue, has potential to complete the program, and is in compliance with University regulations and standards of behavior. All decisions to readmit are also contingent upon clinical space availability. The student must meet all admission and clinical requirements to be considered for re-entry into the program.
5. Only one failed athletic training course may be repeated once based on acceptance of the student by the reapplication process to the major. Subsequent course failures constitute administrative withdrawal from the athletic training education program.

Probation
Clinical probation means that the student is not meeting the stated clinical objectives. A student may be removed from the clinical area for any unsafe or unprofessional behaviors. Being placed on clinical probation can affect the clinical grade and may result in being withdrawn from the course which may affect placement in the program.

Examples of clinical probationary actions:
- Unsafe practice in clinical area
- Insufficient preparation for the clinical experience
- Failure to follow faculty/staff guidance
- Failure to notify ACI of tardiness or absence
- Causing patient to experience unnecessary suffering
- Inappropriate performance specific to level expectations
- Unprofessional communication to faculty, staff, coaches, or patients
- Consciously falsifying documents, including patient and personal

Probation Process:
A probationary action sheet is initiated by the Program Director, Clinical Coordinator or Faculty Member.

---

*Campus/Off-site only | Writing-intensive course | Fulfills General Education requirement |
A copy of the probation plan is verbalized with the student, signed by the student and the involved parties and placed in the student’s file.

At the end of the semester the student makes an appointment with the program director to determine probationary status.

If a student disputes probationary status, he/she should follow academic grievance procedures outlined in GCU student handbook.

**Mentoring and Mandatory Advisement**

Each student is assigned to an academic mentor in the Athletic Training Education program. This mentor will assist the student in completing the graduation roadmap found on the Web site. Faculty members may request mandatory advisement sessions when students are in clinical or academic jeopardy, and/or when student behavior appears below professional standards. Satisfactory academics and/or behavioral changes must be accomplished by the end of the course in order to progress in the athletic training program. It is important to maintain continuous progress and a sound knowledge base to be successful throughout the program.

**Clinical Participation Policies**

Students must enroll in five Clinical Instruction Classes over the course of five semesters, two academic years minimum. During these classes students will be placed in a clinical rotation and assigned to an approved clinical instructor (ACI). A qualified ACI will use evaluation sheets to evaluate students on clinical proficiencies. The ACI will be informed of the level of athletic training student, and the student will wear an ATS name badge while at the rotation site. The ATEP Clinical Coordinator will place students based on rotation schedule. Student preference will be considered.

1. Participation in clinical experience is essential to meet the objectives for all clinical athletic training major courses. Students are responsible for all materials covered while student is absent.
2. Clinical absences may result in clinical probation. Students who are too ill to perform safely in clinical should seek medical attention and contact athletic training faculty prior to missing clinical.
3. Any student who has experienced an Emergency Department visit or hospitalization or an acute illness, trauma, surgery or pregnancy/delivery will need a health care provider’s release to return to clinical. Such a release should provide information that attests to the fact that the student is physically and emotionally able to provide direct patient care.
4. Students who must miss clinical due to pregnancy or extended illness may not be able to complete clinical objectives. Students must contact the course instructor to discuss options. The ATEP is not obligated to provide makeup clinical opportunities for students unable to complete clinical during the normal academic calendar. Any make-up clinical opportunity will be at the student’s expense and subject to faculty availability, clinical site availability, and approval of the Program Director.

**Qualifications for Clinical Rotation Placement**

In addition to the clinical course requirements stated above, the student must meet the following qualifications:

- Admitted into professional phase of Athletic Training major.
- Attended Athletic Training Student Orientation.
- Verification of OSHA education.
- Verification of Current Professional Rescuer CPR and First Aid certification through academic year.
- Verification of immunization.
- Verification of student liability insurance throughout academic year.
- Verification of Fingerprint Clearance card.
- Verification of clinical site policies and procedures review.

**Clinical Time Requirements**

- Clinical courses must be completed over a minimum of five consecutive semesters.
- Students will not be required to complete more than 20 hours per week in a clinical setting. This policy is consistent with federal work-study policy on campus.
- Student will also follow NCAA rules for athletes in regards to comparable relief from clinical experiences during the academic year which is at least one day off per week during in season and two days off per week during out of season.
- Participation in a variety of clinical experience is essential to meet the objectives for all athletic training courses.
- Excessive clinical absences may result in clinical probation (see probation policy). Students who are too ill to perform safely in clinical should seek medical attention and contact ACI prior to missing rotation. A written release from your physician or campus nurse may be requested prior to re-entry to the clinical (see Communicable Disease policy).
- Students are required to provide transportation to and from clinical rotation sites. Travel time may not be logged for clinical contact.

**Student Work Policy**

Athletic Training Students (ATS) are not certified athletic trainers and will not be used in the place of a certified athletic trainer. After demonstrating proficiency, athletic training students may be permitted to undertake those specific defined activities with appropriate supervision, direction, and job description. All athletic training students whether granted aid, scholarship, work study or not, will work under the direction of the certified athletic trainer at GCU and affiliated settings. The students will follow guidelines set up by the clinical site where they are working and the following:

- Completely document all injuries, modalities used, treatment plans, rehabilitation plans, doctors referrals
Health and Safety Requirements

All athletic training students are expected to take measures to maintain their personal health as not to jeopardize themselves or any patient with which they come in contact. Students who are ill are to call the clinical site and talk to the clinical instructor to find someone to replace them. The student will then go to the Health Center to be evaluated. A student athlete that is ill will be referred to the Student Health Center for a determination to practice or not. The requirements for athletic training students upon admission are:

- Athletic Training Physical Examination in Student Health Center upon admission to program which includes a review of immunizations and technical standards
- OSHA training at Grand Canyon University
- HBV immunization is strongly recommended for athletic training students accepted into the professional phase of the program. Students may sign a waiver of vaccination to be admitted into the program.
- Health Insurance as required by the university
- Immunizations as required by the university
- Influenza immunization is strongly recommended

At any time, a student may be required to receive a medical examination if deemed necessary by faculty for the well being of the student or athletes.

Health and Immunization Requirements

Athletic Training Students (ATS) are expected to take measures to maintain their personal health so as not to jeopardize themselves or any patient with which they come in contact. Therefore, students who are accepted into the Athletic Training Education program must show evidence of the ATEP required immunizations and diagnostic procedures as required by the clinical agencies utilized. At anytime, a student may be required to receive a medical examination if deemed necessary by the faculty for the wellbeing of the student and/or the patients/clients.

Students are responsible for updating appropriate CPR prior to the start of each academic year (fall semester). Students will not be allowed to participate in clinical experiences without all requirements being current through the academic school year. Missing clinical may jeopardize a student being successful in the program. As Athletic Training students are in contact with clients in a variety of health situations, it is imperative that students maintain protection against communicable illnesses. In addition, students must meet agency health requirements to enter clinical course work.

The charts below indicate the specific health requirements for undergraduate admission and continuing enrollment.

---

*Campus/Off-site only | ∆ Writing-intensive course | *Fulfills General Education requirement |
Test | Requirements for Admission
---|---
MMR (rubella, measles, mumps, rubella) | Students must show one of the following:
  - Lab evidence (titer) of immunity
  - MMR (two doses)
  - Physician documented evidence of disease (not accepted for Rubella)
Varicella Zoster (VZV) | Strongly recommended
Hepatitis A | Hepatitis A vaccine is strongly recommended.
Hepatitis B | Hepatitis B vaccine is strongly recommended. A signed waiver available from the Program Director is required if the vaccination series is not complete or declined by the student.
Influenza | Strongly recommended - A signed waiver available from the College of Nursing is required if the vaccine is not complete or declined by the student.

**Communicable Disease Policy**

Students may not participate in clinical rotations and field experiences during the time they are affected by or suspect they have a communicable disease. A communicable disease is a health disorder that can be passed from one person to another. If suspected of communicable disease, the student must immediately visit the student health center or personal physician for evaluation. If the evaluation shows possible communicable disease, the student must remain out of contact with athletes and other athletic training students for the duration suggested by the physician. The student may not return to clinical participation until he or she has been re-evaluated by a physician, nurse practitioner, or physician assistant and released. This release must be a written verification from the physician.

Students must contact the Approved Clinical Instructor or Clinical Instructor and Clinical Coordinator upon suspicion and verification of the disease. An e-mail will suffice, although a phone message would be appreciated. The following are examples of communicable diseases:

- AIDS
- Botulism
- Infections
- Chancroid
- Chickenpox
- Chlamydia
- Trachomatis infection
- Cholera
- Conjunctivitis
- Diphtheria
- Diarrhea - Infectious
- Influenza

- Strep pharyngitis

**OSHA Policy**

Athletic Training Students in the clinical phase of the ATEP will undergo annual OSHA education at Grand Canyon University during ATS orientation at the start of each academic year. During this training students will be educated in pathogen and infection control. Once in a setting, students will have access to and utilize appropriate blood-borne pathogen barriers, access to and utilize proper sanitary precautions, and access to appropriate biohazard disposal equipment and procedures at each clinical site.

If a student is exposed to blood or bodily fluid that is an intact skin exposure should:

- Wash the area immediately and thoroughly with soap and water
- Within 24 hours, follow-up with the Cooke Health and Wellness Center or own Primary Care Provider who will make a determination of immunization status and give appropriate prophylaxis or referral for appropriate prophylaxis.
- Complete a student incident report (Available from the Program Director) to be filled out by the student and the supervising faculty or instructor who was present during incident. A copy of this report will be given to the Program Director and placed in the student’s file.
- Counseling referral and other referrals can be arranged through the health center.

**Sexual Harassment**

Any form of harassment (physical or verbal) is prohibited and will not be tolerated by Grand Canyon University. Sexual harassment is a violation of federal law. “Unwelcome sexual advances, requests for sexual favors, and other verbal or physical conduct of a sexual nature constitute sexual harassment when, among other things, such conduct has the purpose or effect of creating an intimidating, hostile, or offensive environment.”

For procedures regarding harassment, please refer to the grievance procedures. The Harassment Intake Officer for student matters is the Vice President of Student Life. He or she can guide you through the process.
HIPAA Guidelines

As health care providers, one of the covered entities, Athletic Trainers must be knowledgeable about the various aspects of the Health Insurance Portability and Accountability Act of 1996 (HIPAA). CONHS offers this guidance below for those persons to ensure compliance with those requirements and asks that all students sign the HIPAA confidentiality agreement.

**Students Are Required to Do the Following:**

- Sign the ATEP Faculty/Staff/Student Confidentiality Agreement before any involvement in a clinical agency.
- Attend ATEP training or in-classroom clinical instruction on requirements relating to patient privacy.
- Know and adhere to a clinical site’s privacy and procedures before undertaking any activities at the site.
- Maintain at all times the confidentiality of any patient information, regardless of whether the identifiers listed in the “Do not” section of these guidelines have been removed.
- Promptly report any violation of those procedures, applicable law, or ATEP confidentiality agreement by an ATEP student, faculty or staff member to the appropriate ATEP clinical instructor or faculty member.
- Understand that a violation of the clinical site’s policies and procedures, of applicable law, or ATEP confidentiality agreement will subject the student to disciplinary action.

**Students Are Not to Do the Following:**

- Discuss, use or disclose any patient information while in the clinical setting unless it is part of the clinical setting assignment.
- Remove any record from the clinical site without the prior written authorization of that site.
- Disclose any information about a patient during the clinical assignment to anyone other than the healthcare staff of the clinical site.
- Use patient information in the context of a learning experience, classroom case presentation, class assignment, or research without attempting to exclude as much of the following information as possible:
  - Names
  - Geographical subdivisions smaller than a state
  - Dates of birth, admission, discharge, death
  - Telephone and fax numbers
  - E-mail addresses
  - Social security numbers
  - Medical records or account numbers
  - Certificate/license numbers
  - Vehicle or device numbers
  - Web locators/Internet protocols
  - Biometric identifiers
  - Full face identifiers
  - Any other unique identifying number, characteristic, or code

**Student Liability Insurance**

All Athletic Training Students are required to have personal athletic training student liability insurance for their own protection. The cost varies depending upon company. Companies include: National Professional Group [www.usatrainers.com](http://www.usatrainers.com) and HPSO [www.hpsocom](http://www.hpsocom).

**CPR Requirements**

Students must be certified in CPR for the Professional through the American Safety and Health Institute or BLS Healthcare Provider through the American Heart Association prior to applying to the Athletic Training Education program (ATEP). CPR certification must be continuous through the academic year (August- May) for each year of the program. CPR for Bystanders or the community will not fulfill this requirement. Students are required to maintain certification throughout the program. Students who do not have a current CPR certification card throughout the academic year will not be permitted to participate in clinical experiences.

**Dress Code**

The Athletic Training Student will wear a GCU athletic training shirt or appropriate attire as designated by the assigned ACI. In addition, all students are required to wear GCU ATS name tag during clinical rotations.

**Professional Appearance**

1. Hair should be short or pulled back and styled neatly. Beards or mustaches, if worn, should be neatly trimmed.
2. Fingernails should be neatly trimmed and free of cracked nail polish. Only clear or neutral nail polish may be used if desired.
3. Permitted jewelry is: one pair of studded earrings, a watch, a plain ring band. No other visible jewelry is acceptable including tongue rings or other facial jewelry. Tattoos and any other body art should be covered where possible. (Students are directed to follow the clinical site guidelines).
4. Perfume, after-shave lotion, and heavy makeup are not acceptable in the clinical area.
5. Gum chewing is not acceptable.
6. Clothing worn in course activities not requiring student uniform should adhere to professional standards.

Please remember that students also represent Grand Canyon University. Look clean, neat, and professional.

**Professional Attire for Formal Presentations**

Business casual is acceptable which can be interpreted as:

1. Women: slacks (dress pants), skirts (mid-calf to about two inches above the knee), blouses, shells, cardigans, blazers, dresses.
2. Men: dress pants, button down shirts, polo shirts (short sleeved shirts with a collar), blazers.
Do not wear: Denim material, anything that is see-through, short, tight, or shows too much skin, flip-flops, tennis shoes

**Program Associated Costs**

- Purchase student name badge.
- Health exam.
- Student liability insurance.
- Update of CPR certification as necessary.
- Hepatitis B vaccination (unless declined).
- Provide a Fingerprint Clearance card from the Arizona Department of Public Safety.

**Course Policies**

Refer to the College of Health Sciences classroom policies relating to attendance, absences, and late work. These policies can be found in the ANGEL classroom.

**Graduation Requirements**

Athletic Training Students must:

- Complete at least 600 supervised clinical hours after acceptance into Athletic Training Education program.
- Complete hours in clinical instructor courses over a minimum of five consecutive semesters.
- Complete all required clinical instruction course proficiency evaluations.
- Successfully complete all required courses with a “C” or better.

**Board of Certification Examination**

* (taken from Board of Certification Web site: [www.bocatc.org](http://www.bocatc.org))

In order to attain certification, an individual must complete an entry-level athletic training education program accredited by the Commission on Accreditation of Athletic Training Education (CAATE) and pass the BOC certification exam.

In order to qualify as a candidate for the BOC certification exam, an individual must meet the following requirements:

- Endorsement of the exam application by the recognized Program Director (PD) of the CAATE accredited education program
- Proof of current certification in emergency cardiac care (ECC)
  (Note: ECC certification must be current at the time of initial application and any subsequent exam retake registration)

Students who have registered for their last semester, or quarter, of college are permitted to apply to take the certification exam prior to graduation provided all academic and clinical requirements of the CAATE Accredited Program have been satisfied or will be satisfied in their last semester or quarter of college. Eligible candidates are permitted to take the exam prior to graduation. Candidates may take the exam during the exam window closest to his/her graduation date.

Students are responsible for following BOC exam policies and procedures (refer to the BOC Exam Candidate Handbook).

**Bachelor of Science in Athletic Training (Ground)**

Athletic training, as defined by the National Athletic Trainer’s Association, is practiced by Athletic Trainers, health care professionals that collaborate with physicians to optimize activity and participation of patients and clients. Athletic training encompasses the prevention, diagnosis, and intervention of emergency, acute, and chronic medical conditions involving impairment, as well as functional limitations and disabilities. The Bachelor of Science in Athletic Training program prepares students for the Board of Certification Examination. Certified Athletic Trainers (ATC) are qualified to work in a variety of settings, including high schools, colleges and universities, professional sports, clinics, and other areas as an integral part of the health care team. Students will receive education in prevention, clinical evaluation and diagnosis, treatment, rehabilitation, reconditioning, organization and administration, and professional responsibility related to the management of athletic-related injuries and illnesses. The education requires that 600 hours of clinical rotations on- and off-campus be completed before graduation. Students must provide their own transportation to clinical rotations. Students are also required to complete a physical exam and sign a technical standards agreement prior to full acceptance to ensure ability to complete tasks associated with the position. Admittance to the athletic training program is competitive. After completing at least 30 observation credits and athletic training student prerequisite requirements, a completed admission application (obtained from the College of Health Sciences) should be submitted by April 1. Students are accepted to the program by June 1 for priority admission.

**Bachelor of Science in Exercise Science with an Emphasis in Athletic Coaching (Ground)**

The Bachelor of Science in Exercise Science with an Emphasis in Athletic Coaching program is a blend of classroom instruction and clinical experience designed for the optimum preparation of students in knowledge of the scientific and technical aspects of human performance with skills to assist the future teacher, fitness professional, or other professional who wishes to coach interscholastic, intercollegiate, or other sports teams in all aspects of preparation for competition. Successful completion of coursework will meet Level 3 guidelines from NASPE or State Board of Education requirements for coaching certification. The content is complementary to the major content for career choices that exercise science or physical education teachers make; it also enhances their marketability with school districts, YMCA/YWCAs, and in the fitness industry.

Bachelor of Science in Exercise Science with an Emphasis in Health Education (Ground)

The Bachelor of Science in Exercise Science with an Emphasis in Health Education program offers a blend of classroom instruction and clinical experience designed to prepare students for entry into the fitness industry as a personal trainer or strength coach, health and fitness instructor, or exercise leader. The program can lead—along with practical experience—to eligibility for certification in any of several areas with the American College of Sports Medicine and/or the National Strength and Conditioning Association (or any of the national aerobics instructor certifications). This emphasis will also provide competency in personal and group health instruction to prepare students as health and wellness educators. This career path is for anyone who wants to work directly with student/clients in the areas of disease prevention, physical fitness, wellness, and health enhancement.

Bachelor of Science in Exercise Science with Emphasis in Pre-Physical Therapy (Ground)

The Bachelor of Science in Exercise Science with an Emphasis in Pre-Physical Therapy is designed for students preparing for graduate level physical therapy education. It includes courses required or recommended by graduate professional schools, preparation for the GRE, and specialized coursework focused on preparing students for success in their graduate studies. These students will also have a Pre-PT faculty mentor to ensure that all physical therapy graduate program questions are answered and that proper progress is being made toward completion of the Pre-PT designated curriculum. The Pre-PT advisor will also assist students in choosing a physical therapy graduate program and advocating on behalf of students for a selection of physical therapy graduate programs.

Bachelor of Science in Biology with an Emphasis in Pre-Pharmacy (Ground)

The Bachelor of Science in Biology with an Emphasis in Pre-Pharmacy is designed for students preparing for pharmacy school. It includes courses required or recommended by graduate professional schools, preparation for the pharmacy college admission test (PCAT), and specialized coursework focused on preparing students for success in their graduate studies. These
students will have a Pre-Pharm faculty mentor to ensure that all pharmacy school questions are answered and that proper progress is being made toward completion of the designated curriculum. The Pre-Pharm advisor will assist students in choosing pharmacy schools and will advocate on behalf of students for a selection of pharmacy schools.

Health Care Administration

Bachelor of Science in Health Care Administration (Online/Ground)

The Bachelor of Science in Health Care Administration (BSHA) is an undergraduate professional degree designed to prepare students for entry-level supervisory roles in health care organizations. Ideal candidates for the BSHA program are those looking for career entry in health care administration and those looking to advance from clinical/technical roles to supervisory roles. The BSHA program emphasizes both the conceptual and analytical skills required to manage in contemporary health care organizations. Graduates prepare themselves for administrative positions in hospitals, long-term care, outpatient facilities, physician offices, mental health organizations, insurance companies, public health agencies, and other types of health organizations. The BSHA program also prepares students who wish to eventually seek their master’s degree in order to obtain senior health care executive positions.

The BSHA program features investigative and experimental opportunities in project management, teamwork, and leadership. Students of this program will have the opportunity to gain an in-depth understanding of the following:

- The organization and structure of components of the health care sector to permit development and implementation of successful management strategies within the industry
- The managerial skills needed to work in teams, build cross-functional teams, and facilitate collaborative decision making
- The industry-specific business knowledge and skills related to finance management, human resources, strategic planning, marketing, information management, and quality improvement
- The impact that various dynamics (e.g., regulatory, legal, ethical, public policy, and political) can have on health service organizations and the management or administration of any specific sector of the health care industry
- The manner in which public, private, and social forces can shape the health care system and affect health care providers
- The financial options and strategies within and between component sectors of the health care industry

Master of Science in Health Care Informatics (Online/Ground)

Health care informatics is a rapidly emerging discipline that offers new frontiers requiring innovative leadership. As health care reform begins to impact all areas of the health care system, greater attention is being focused on the value of health informatics in reducing health care costs, increasing access, and improving the quality of health care services. Health care informatics is quickly becoming vital to the growth and security of the United States’ health care system. The integration of information technology into health care and the continuous changes in patient-care systems require professionals and leaders with training in clinical operations, data management systems, health care system operations, project management, decision making, and quality assessment.

Graduates may perform a variety of functions for the organization, such as automating clinical care, building new operational data systems, training health care workers in the use of computer systems, collecting and analyzing data to improve patient care, etc. Depending on their areas of strength and focus, graduates may serve as project managers, project designers, researchers, systems analysts, or administrators and executives at all levels of the organization. Graduates may work in a variety of settings, including hospitals, primary care facilities, physician offices, mental health agencies, insurance companies, public health agencies, and other types of health organizations.

**Master of Science in Health Care Administration (Online/Ground)**

The Master of Science in Health Care Administration (MSHCA) provides the skills and experience necessary to perform as middle- and upper-level managers in a variety of health care organizations, and to serve as innovative change agents and leaders of organizational improvement and adaptation within the health care industry. The MSHCA program emphasizes the conceptual, analytical, and application skills required to manage in contemporary health care organizations. Graduates prepare themselves for administrative positions in hospitals, long-term care facilities, outpatient facilities, physician offices, mental health agencies, insurance companies, public health agencies, and other types of health organizations.

Medical Imaging Sciences

The Medical Imaging Sciences programs are designed to provide students the optimum preparation for a variety of positions within the discipline. Practicing radiological technicians advance to a baccalaureate degree, while expanding the global awareness and skills of their profession. Practicing technicians also have the option of learning a variety of advanced imaging skills to expand their scope of practice through the various certificates of completion that are available.

Bachelor of Science in Medical Imaging Sciences (Online/Ground)

The Bachelor of Science in Medical Imaging Sciences offers an opportunity for imaging technologists to advance their education by acquiring a bachelor’s degree and skills that are relevant to their current vocation. This program offers the imaging technologist an opportunity for advancement in employment and enables the motivated professional to serve the community at a higher level of health care.

Professional Counseling

The Professional Counseling and Addictions Studies programs at Grand Canyon University are designed to train counseling professionals. The focus of the programs is on offering education to persons seeking to become licensed or certified as professional counselors. The following graduate, undergraduate, and certificate programs are available to applicants:

- Bachelor of Science in Addiction Counseling
- Bachelor of Science in Counseling with an Emphasis in Addiction, Chemical Dependency, and Substance Abuse
- Master of Science in Addiction Counseling
- Master of Science in Marriage and Family Therapy
- Master of Science in Professional Counseling
- Certificate of Advanced Graduate Studies in Addiction Counseling

The Master of Science in Professional Counseling Degree is designed to meet the academic requirements established by the National Board for Certified Counselors for the National Certified Counselor credential (NCC) and to meet the licensing requirements established by many states, including Arizona.

The Master of Science in Addiction Counseling Degree is designed to meet the academic requirements established in many states, including Arizona, for licensing/certification as an addiction/substance abuse counselor.

Mandatory licensing of individuals who provide substance abuse counseling is administered by the Arizona Board of Behavioral Health Examiners (AzBBHE) and available at three different levels.

- Licensed Substance Abuse Technician (LSAT)
- Licensed Associate Substance Abuse Counselor (LSAC)
- Licensed Independent Substance Abuse Counselor (LISAC)

Students must independently review the licensing guidelines to determine the type of licensing for which they may qualify.
The Certificate of Advance Graduate Studies (CAGS) in Addiction Counseling is a 12 credit hour program, designed to meet the needs of currently licensed behavioral professionals who wish to increase their areas of specialization to include the study of addictions.

**Bachelor of Science in Counseling with an Emphasis in Addiction, Chemical Dependency, and Substance Abuse (Online/Ground)**

The Bachelor of Science in Counseling with an Emphasis in Addiction, Chemical Dependency, and Substance Abuse is designed to train practitioners in the field of addiction counseling, chemical dependency, and substance abuse treatment. The coursework focuses on the nature of psychopathological conditions and their impact on the physical, emotional, social, intellectual, and spiritual nature of the human being. Core courses include study of the psychopathological behavior’s impact on the individual, family, and society; screening and assessment methods at the beginning of treatment; and case management during the treatment phases. Counseling skills courses and a fieldwork/practicum course complete the focused coursework list. Completion of this program may qualify graduates to meet the standards for state, national, and international certification for professional prevention specialists and treatment counselors/providers. Participants should contact the appropriate certifying body to ensure that courses meet certification requirements.

Total Bachelor of Science in Counseling with an Emphasis in Addiction, Chemical Dependency, and Substance Abuse | 120 credits |

**Master of Science in Addiction Counseling (Online)**

The Master of Science in Addiction Counseling degree is designed to meet the needs of learners who wish to pursue careers as addiction counseling professionals. This degree prepares students to treat substance abuse/dependency disorders. The demand for licensed addiction counselors is expected to grow in both the public and private sectors in the foreseeable future. A Masters degree is a required step for individuals seeking the highest level of licensing and/or certification in many states. Graduates from the GCU program of study are prepared to meet the academic requirements for licensure in Arizona as a:
• Licensed Associate Substance Abuse Counselor (LASAC)
• Licensed Independent Substance Abuse Counselor (LISAC).

Additionally, program graduates from most other states will be academically prepared to begin the process of seeking certification and/or licensure in their home state. Licensing and/or certification requirements may vary from state-to-state. It is the students’ responsibility to check the licensing/certification requirements in their respective states.

Total Master of Science in Addiction Counseling: 36 credits

**Master of Science in Marriage and Family Therapy (Online)**

A marriage and family therapist (MFT) is a recognized and regulated mental health service provider in California, and a valid state license is required to provide designated therapeutic services and to use the title. The M.S. in Marriage and Family Therapy is designed to prepare students for MFT licensure in the state of California. The California MFT licensing requirements reflect relatively high standards of preparation and are among the most stringent in the country (for similar licensure). Although the program’s courses were chosen at the time of development to meet the academic requirements established within the California Business and Professions Code, Chapter 13, it is the student’s responsibility to check the licensing/certification requirements and verify that he/she will qualify upon completion of the program. The M.S. in Marriage and Family Therapy requires 60 credit hours that include 400 hours of practicum experience.

### Public Health

#### Master of Public Health (Online/Ground)

The demand for public health professionals is rapidly increasing as a result of health care reform, environmental health concerns, emerging and re-emerging diseases, sociopolitical factors affecting our nation’s health, and expansion of health issues that are global in scope. Professionals with the Master of Public Health (MPH) degree may hold positions of responsibility in a variety of settings, including health care facilities, county and state health departments, social service agencies, health policy and planning organizations, universities, nongovernmental organizations, community-based health education and health promotion settings, and the corporate world. Individuals with an MPH degree are often actively involved in the coordination, planning, development, implementation, and evaluation of health programs and services.

The MPH program is designed for people interested in disease prevention and community health, and is the most widely recognized professional credential for leadership positions in public health. Public health professionals draw on knowledge and skills from a variety of disciplines to define, assess, and ultimately resolve public health problems. Students study theories, concepts, and principles of public health and their application. The curriculum, developed around national public health curriculum standards, uses a multidisciplinary approach that emphasizes psychological, behavioral, and social factors influencing population-based health disparities; principles of epidemiology and biostatistics; environmental public health concepts; public health administration systems and processes; and economic factors. It prepares students for an expanding range of professional opportunities and roles in public health and medicine. The MPH program culminates with a practicum and capstone project that students are able to design to best fit their area of specific interest.

The College of Liberal Arts

College of Liberal Arts Description

In support of the University mission the College of Liberal Arts presents students with theoretical perspectives examining the workings of the human mind, cultural diversity, and the integration of faith and discipline. In addition, the college facilitates opportunities for the application of knowledge through internships, study abroad and faith-based outreach around the world.

College Mission

The College aims to produce individuals with a broad range of knowledge in the liberal arts, special competence in a particular major, and individuals who possess the critical thinking skills necessary for their intellectual discipline and their lifelong learning. The College of Liberal Arts provides many of the courses for the University’s General Education program. The college is committed to the search for objective truth, believing that God is the ultimate source of any human truth. Professors in the college seek to integrate this concept of truth into the various disciplines.

College Features

College faculty commit themselves to improving oral and written communication for all students matriculating through courses within the University. Graduating students should have the tools for effective academic and professional discourse.

The College is composed of the departments of Humanities and Social Sciences. In addition, Grand Canyon University’s values-based approach to education includes a vibrant department of Christian Studies which focuses on the spiritual dimension of the human experience. The College of Liberal Arts is uniquely engaged in preparing students as global citizens, servant-leaders, critical thinkers, and effective communicators.

Mathematics-Placement Examination

All Grand Canyon University mathematics courses require a prerequisite or an assessment examination for entry. See the Assessed Placement in mathematics classes section of the Academic Catalog for further details.

Department of Christian Studies

The Department of Christian Studies provides students with a strong biblical foundation in the field of ministry. They can become highly skilled for service in Christian communities. The courses are designed to equip students with an understanding of the Bible and its historical and theological significance for the Christian faith, to prepare them for ministry, and to provide them with spiritual guidance.

A vital part of the student’s development in ministry is the exploration of a personal call to ministry. Each Christian Studies student should be able to identify and verbalize his/her experience of being called to ministry.

The faculty is committed to helping students formulate their call to ministry by exploring the various directions that a call may take. Opportunities to dialogue with church, denominational, and other Christian leaders help guide students in the process of ministry development.

The Christian Studies degree program seeks to provide a solid foundation for working with people in all fields of Christian endeavor, as well as to prepare students for the rigors of graduate education. The Department of Christian Studies provides students with a learning environment where they not only obtain a strong biblical foundation but also a greater degree of practical applications in their particular field of ministry. Students will experience learning through hands-on opportunities as well as classroom instruction.

Bachelor of Arts in Christian Studies (Online/Ground)

Graduates of Grand Canyon University’s Bachelor of Arts in Christian Studies program will utilize biblical studies as the foundation, and an understanding of theology, philosophy, and Christian history as the framework, for communicating Christ to various audiences. In addition to spiritual formation and exegetical skills essential to Christian studies, graduates will be able to employ communication, leadership, and organizational skills necessary for effective ministry.

Department of Humanities

The Department of Humanities is comprised of the traditional disciplines of the liberal arts that increase our understanding of human actions in the past and present. These disciplines focus on the analysis of written texts and oral communications as unique products of the diverse human community. The Department of Humanities serves two principal functions—the provision of a liberal arts education and specialized training for future careers, including graduate studies.

English offers a major in English Literature, and supports the English Emphases in the Bachelor of Science (Elementary and Secondary Education) degrees of the College of Education. English majors are given the opportunity to gain the knowledge and professional competence to communicate effectively in written and oral discourse. They also gain a wider knowledge in American literature, English literature, linguistics, grammar, and the history of English.

Courses in Spanish are included in the offerings of the department, because study of a foreign language increases the student’s awareness and appreciation of other people and cultures, as well as provides a means of communication. The study encourages students to pursue new areas of interest and provides the means to enhance many career fields.

The Communications degree offers students a liberal arts foundation in the discipline. In addition, students may focus on one or more areas of emphasis such as Digital Film Production, Graphic Design/Animation, and Public Relations.

A Bachelor of Interdisciplinary Studies is offered for students who recognize that many real world problems cannot be addressed by the application of a single discipline. This degree prepares students for careers that bridge other academic disciplines.

Bachelor of Arts in Communications
(Online/Ground)

Grand Canyon University’s Bachelor of Arts in Communications program develops leaders in the fields of human communication and media. The program is built on a values-based liberal arts foundation. Students develop the knowledge, creativity, and intermodal communication skills necessary to design and deliver compelling messages.

Students must complete a minimum of 36 upper-division credits in order to graduate.

Department of Social Sciences

The Department of Social Sciences is a diverse department serving two principal functions: the provision of a liberal arts education and a solid foundation in the majors offered by the department.

History presents students with chronological and theoretical frameworks that enable them to properly contextualize the human cultural, social, political, and economic experience. The department seeks to equip its majors with the basic skills for historical research and reflection.

Justice Studies is an interdisciplinary field that embraces those aspects of the social sciences and the humanities that are relevant to an understanding of law, justice, social control, and political change. Courses aid students in developing their own values and seeing how they apply to the field of justice studies.

Psychology offers a broad array of courses that increase our understanding of human actions in the past and present. Individualized instruction is encouraged through practicum and internships, research and writing experience, and small group interactions.
Sociology seeks to encourage students to think deeply and seriously, using both the Christian and scientific perspectives, about the consequences of social structures upon human social behavior in its many diverse contexts.

Bachelor of Arts in History
(Online/Ground)

Grand Canyon University’s Bachelor of Arts in History program entails the study of diverse world cultures. The degree allows students to develop the skills and knowledge associated with a liberal arts degree, while giving graduates the analytical skills necessary to compete in a global economy. The degree also prepares students for graduate studies in history, law, and related fields.

Degree Requirements

Total General Education 34-40 credits

Bachelor of Science in Justice Studies
(Online/Ground)

Grand Canyon University’s Bachelor of Science in Justice Studies prepares students to enter careers in law enforcement, governmental and private agencies, research, social work, political science, and a variety of other fields. Graduates will be able to describe the components of the justice system from a systems perspective, including function, organization, issues, practices, and interrelationship of law enforcement agencies, the courts, and the corrections system.

Students must complete a minimum of 36 upper-division credits in order to graduate.

Master of Science in Criminal Justice with an Emphasis in Law Enforcement
(Online)

The Master of Science in Criminal Justice with an Emphasis in Law Enforcement is designed for students seeking to expand their understanding of the law, social order, and justice. This program is particularly suited to law enforcement personnel who wish to advance in their field, as well as corrections, probation, and parole officers; law clerks; and other decision makers who address questions of public policy, social research, and administration of justice in the public sphere. This program also prepares students for work in legal foundations where in-depth issues are contended.

Bachelor of Science in Psychology (Online/Ground)

Grand Canyon University’s Bachelor of Science in Psychology program offers a broad array of courses that increase the understanding of past and present human actions. With this understanding comes the responsibility to improve relationships with others and to help others achieve similar understanding of and insight into their own behaviors. The program helps prepare students for entry-level positions in agencies and organizations that seek to help those in need. It should be understood that the requirements for employment in many positions in the helping professions include advanced education beyond the bachelor’s degree.

Master of Science in Psychology with an Emphasis in Industrial and Organizational Psychology (Online)

The Master of Science in Psychology is a program designed for individuals who desire promotion and/or continued academic exposure in the field of psychology. The program focuses on the development of critical thinking and leadership qualities. Graduates with these attributes impact those around them through leadership, action research, and introduction of programmatic community changes whether they are acting from the perspective of teachers, practitioners, or researchers.

The College of Fine Arts and Production

College of Fine Arts and Production Description

The College of Fine Arts and Production is dedicated to providing its students with the finest training possible in their chosen fields. All disciplines and majors within the College require a thorough and exhaustive study of subject-specific theory and related performance to translate theory into active and exciting participation and presentation. All of the College’s faculty are dedicated professionals who are active within their fields and therefore can offer students the unique opportunity of their current professional expertise as well as classroom knowledge.

College Mission

The College of Fine Arts and Production endeavors to create an environment where students can be challenged to excel throughout all of their class work as well as in their performance opportunities. Faculty strive to imbue students with the tools to create, analyze, lead, and teach through the eventual mastery of their chosen disciplines.

College Features

Currently, the College consists of two departments. The Department of Music features three degrees, a Bachelor of Arts in Music Education, a Bachelor of Arts in Music with an Emphasis in Piano, and a Bachelor of Arts in Music with an Emphasis in Voice. The Department of Theatre offers a Bachelor of Arts in Theatre and Drama. Both departments have several performing groups. The Department of Music features four ensembles—Choral Union, Grand Canyon Chorale, Canyon Singers, and New Life. The Department of Theatre presents the Grand Canyon University Theatre Series, which is comprised of five productions performing over 30 times annually.

Department of Dance

Grand Canyon University’s Department of Dance is dedicated to the training of dancers, teachers, and choreographers by blending both the theory and the practice of dance performance and its related disciplines.

In addition to regular classroom studies, students are encouraged to take part in the University Dance Series in numerous capacities, including performing and choreographing, thus allowing them to explore the creative process from rehearsal to live performance. This global approach to dance training creates a graduate who is multifaceted and prepared to succeed in today's marketplace.

Bachelor of Arts in Dance Education (Ground)

(Leads to Credential)

Grand Canyon University’s Bachelor of Arts in Dance Education program is designed for students interested in the education of children in grades K-12, and for those who are seeking teacher certification. The format and courses of this regionally accredited and Arizona-approved program are designed to maximize the content knowledge that the teacher candidate will possess upon graduation. Courses are taught by experts in their respective fields who share knowledge and experience in areas of educational psychology, philosophy, methodology, and curriculum development. All courses are directly aligned with the Arizona Professional Teacher Standards and the Interstate New Teacher Support and Assessment Consortium Standards. Opportunities are provided to apply concepts, theories, and research throughout the program. Assignments within many of the courses guide students through over 100 hours of observational and practice-based experiences, and the final semester of the program includes a full-time, 16-week student teaching component. These educational settings must be state certified environments and mentor teachers must be fully certified. Teacher candidates are responsible for contacting their state department of education for certification requirements and program approval. Furthermore, teacher candidates should consult the Grand Canyon University Academic Catalog, the University Policy Handbook, and an academic counselor to obtain information regarding current policies and procedures inherent in a teacher credentialing program. Graduates of the Bachelor of Arts in Dance Education program are prepared to become informed educators in public and private schools and other settings requiring a teaching credential. Students and applicants are responsible for contacting their state department of education for certification requirements and program approval.

Students and applicants are responsible for contacting their state department of education for certification requirements and program approval.
The program focuses on choral music. The curriculum provides a balanced program of applied music, theoretical and historical studies, professional education studies, and field work experiences. An emphasis is placed on contemporary music education with training and experiences designed to meet the varying needs of today’s schools. The mission of the Music Education program is to prepare outstanding educators who can make a difference in the lives of their students. Students choose either Voice or Piano for their focus and maintain that choice throughout the program. Choral Ensemble auditions are required each semester.

Total Music with an Emphasis in Piano Major  52 credits

In addition to the coursework listed above, students must perform in eight semesters of university choral ensembles. Placement in ensembles will be determined by the music faculty. For more information, students should consult the music handbook. Students will also perform public recitals in their junior and senior years, as designated in the music handbook.

Bachelor of Arts in Music with an Emphasis in Voice (Ground)

The Bachelor of Arts in Music program is designed for serious students who wish to devote themselves to developing musical skills, understanding composition, and refining their performance skills. The program is a true liberal arts degree, allowing participation in varied performing ensembles and studies while simultaneously preparing students for a variety of careers both within and outside the field.

Degree Requirements

Total General Education  34-40 credits
Total Music Major  52 credits
Total Electives  28-34 credits
Total Bachelor of Arts with an Emphasis in Voice  120 credits

Music Major

MUS 125  Music Theory I  4 credits
MVA 119  Private Voice Study I  1 credits
MPC 109  Class Piano I  1 credit

Department of Theatre

The Department of Theatre provides the foundation needed to pursue careers in academic, professional, and community theatre. Students receive a comprehensive knowledge of the body of dramatic literature, theatre history, and practical experience in the production and performance of drama.

The Department of Theatre, in conjunction with the Department of Music, produces the Grand Canyon University Theatre Series which presents five major productions annually. Additionally, the department offers a student-directed series of productions that are performed on campus. Auditions for all productions are open to the entire student body.

Bachelor of Arts in Theatre and Drama (Ground)

The Bachelor of Arts in Theatre and Drama program seeks to provide students the foundation needed to pursue careers in teaching, community and professional theatre, the entertainment industry, and/or graduate study. Students are given the opportunity to receive a comprehensive knowledge of theatre history and dramatic literature, as well as practical experience in production and performance. The Theatre and Drama program, in conjunction with the Music program, produces the University Theatre series, which presents a series of major productions annually. Auditions for all of the productions are open to the entire student body. Scholarships are available by audition and interview.

Faculty

Ken Blanchard College of Business

W. Kevin Barksdale
Professor of Management, Dean for the Ken Blanchard College of Business
B.B.A. Georgia State University; Ph.D. Georgia State University

Olivier Bouclier
Assistant Professor of Strategy, Assistant Dean for the Ken Blanchard College of Business
B.S., Conservatoire National des Arts et Métiers; M.B.A, Thunderbird School of Global Management; Doctoral Program (2012), Case Western Reserve University

Donna DeMilia
Assistant Professor of Accounting
B.B.A., M.B.A., Pace University; Ph.D. Candidate, Northcentral University

Kim Donaldson
Associate Professor of Economics
B. Commerce, M.B.A., Dalhousie University; M.I.M., Thunderbird, the Garvin School of International Management

R. Kevin McClean
Professor of Marketing
B.A., King’s College; M.B.A., St. John’s University; D.P.S., Pace University

Cathryn M. Meegan
Assistant Professor of Accounting
B.S. Accounting, East Carolina University; B.A. Anthropology, University of North Carolina at Charlotte; M.B.A., Queens College; M.A. Anthropology, Arizona State University; Ph.D. Anthropology, Arizona State University

Ann Nelson
Assistant Professor of Leadership
B.S., Grand Canyon University; M.B.A., Northcentral University; Ph.D., Northcentral University

Moronke Oke
Associate Professor of Management
B.Sc., University of Ilorin; M.B.A., PGDip, Ph.D., University of Wales

David Perkins
Associate Professor of Business Administration
B.E.T., Southwest Minnesota State University; M.T., M.B.A., Arizona State University; D.B.A., Anderson University

Ernest Scarbrough
Associate Professor of Finance
B.A., Ottowa University; M.B.A. University of Phoenix; D.B.A. Nova Southeastern University

College of Education

Lisa Aaroe
Associate Professor: Chair, Special Education
B.A., University of Iowa; M.Ed., Arizona State University; Ph.D., Arizona State University

Jackson “Skot” Beazley
Assistant Professor
B.S., University of Maryland (Munich); M.A.Ed., Chapman University; Ed.D., Arizona State University

Susan Bejarano
Assistant Professor; Chair, Elementary Education
B.A., Arizona State University; M.A. Ed., University of Phoenix

Marjaneh Gilpatrick
Assistant Dean; Chair, TESOL
B.S., Louisiana State University; M.A., San Diego State University; Ed.D., Argosy University/Phoenix

Donna Kay Hansen
Associate Professor; Chair, Reading; Interim Chair, Secondary Education
B.S., St. Mary of the Plains College; M.Ed., Arizona State University; Ph.D., Arizona State University

Kimberly LaPrade
Associate Dean
B.A., Grand Canyon University; M.Ed., Grand Canyon University; Ph.D., Capella University
**Gina Meyer**  
Assessment and TaskStream Coordinator  
B.A., Arizona State University; M.Ed., Northern Arizona University  

**M. Nan Pennington**  
Assistant Professor; Chair, Early Childhood Education  
BIS., Arizona State University; M.Ed., Arizona State University; Ph.D., Arizona State University

---

**College of Nursing**

**Fran Bartholomeaux**  
Assistant Professor  
B.S., University of Arizona; M.S., University of Arizona  

**Helen Cobb**  
Director of the Cooke Health Center; Assistant Professor  
B.S.N., Grand Canyon University; M.S., Grand Canyon University  

**Deborah Evinrude**  
Assistant Professor  
B.S., Dickinson State University; M.S.N.; University of Phoenix  

**Sabine Garrett**  
Director of Biomedical Sciences, Assistant Professor  
B.S.N., University of St. Francis - Joliet, IL; N.M.D., Southwest College of Naturopathic Medicine  

**Deb Haber**  
Assistant Professor  
B.S.N, Baylor University; M.S., University of Arizona  

**Linda Hemmila**  
Assistant Professor  
B.S.N., Carlow College; M.S.N., Capital University  

**Michael Hughes**  
Assistant Professor  
B.S.N, University of Rio Grande; M.S.N., University of Phoenix  

**Paula James**  
Director, Tucson Pre-licensure BSN program  
M.S.N., Emory University  

**Lisa Jaurigue**  
Assistant Professor  
B.S.N., Grand Canyon University; M.S.N., University of Phoenix  

**Casey Reason**  
Professor; Chair, Leadership B.S., Bowling Green University; M.Ed., Bowling Green University; Ph.D., Bowling Green State University  

**Stacey Rimmerman**  
Associate Professor  
B.A., University of West Florida; M.Ed., University of West Florida; Ed.D., University of West Florida

---

**Melanie Logue**  
Assistant Professor  
B.S.N., Grand Canyon University; M.S., Arizona State University  

**Patti Luttrell**  
Assistant Professor of Nursing  
B.S.N., Illinois Wesleyan University; M.S., Arizona State University  

**Jocelyn Nelms**  
Clinical Lab Director  
B.S.N., University of Arizona; MS, Grand Canyon University  

**Lisa O’Neal**  
Assistant Professor  
M.S.N, Arizona State University  

**Jo Podjaski**  
Assistant Professor, Lead CNS faculty  
B.S.N., Marian College; M.S.N., University of Phoenix; Post-M.S. CNS, Grand Canyon University; D.N.P., Arizona State University  

**Maria Quimba**  
Director, Professional Studies Programs  
B.S.N., University of Arizona; M.A. in Bioethics, Midwestern University  

**Marsha Ramstad**  
Assistant Professor  
B.S., Moorhead State University; M.S., Tri-College Nursing Consortium, North Dakota State University  

**Cheryl Roat**  
Associate Dean, College of Nursing  
B.S.N., Olivet Nazarene University; M.S.N., University of Missouri-Columbia; Ed.D., University of Nebraska-Lincoln

---

*Campus/Off-site only | ∆ Writing-intensive course | * Fulfills General Education requirement |
Patricia Shannon
Associate Professor
B.S.N., Avila College; M.S., Arizona State University; M.A., University of San Francisco

Theerse Shipps
Associate Professor
B.S.N., St. Anselm’s College; M.S., Boston University; D.N.Sc., Boston University

Sherri Spicer
Assistant Professor
B.S.N., Southern Illinois University at Edwardsville; M.S.N., Arizona State University

Kay Turk
Assistant Professor, Lead FNP Faculty
B.S.N., Corpus Christi State University; M.S.N.-F.N.P., Texas A & M University

Amy Werner
Assistant Professor
B.S., Goshen College; M.S., University of Washington

Note: Adjunct personnel are assigned to classes when their special abilities or experience would enrich the curriculum.

College of Health Sciences

Neal R. Adam
Assistant Professor of Biology
B.S., Kansas State University; M.S., University of Nebraska-Lincoln; Ph.D., Kansas State University

Sophie Borowski
Coordinator, COHS Office of Field Experience, Assistant Professor
B.S., Arizona State University; MSW, Smith College School for Social Work

Kirk Bowden
Professor, Director of Professional Counseling and Addiction Studies
B.A., Brigham Young University; M.A. Ottawa University; Ph.D. Northcentral University

Terrell Daughtry
Assistant Professor
B.A., University of New Mexico; M.A., University of New Mexico; A.B.D Trinity Southwest University

Donna Gerakos
Assistant Professor of Athletic Training, Clinical Education Coordinator
B.S., State University of New York-Buffalo; M.S. Ed., Canisius College

Danae Farrell
Assistant Professor in Health Care
B.A., Simmons College; M.B.A., University of Alaska, Anchorage

Russell Grubbs
Assistant Professor of Chemistry
B.A., Bowdoin College; Ph.D., Purdue University

William Kuehl
Associate Professor of Health, Exercise Science, and Physical Education; Director of Exercise Science
B.A., Augustana College; M.S., University of Illinois

Antoinette Marks
Assistant Dean, College of Health Sciences
B.S., Arizona State University; M.A.Ed., University of Phoenix

Klaus Mortensen
Assistant Professor of Physics
B.S., University of Aarhus, Denmark; M.S., University of Aarhus, Denmark; Ph.D., University of Aarhus, Denmark

Guna Sherlin D. Moses
Assistant Professor of Biology
B.Sc., University of Madras (W.C.C), India; M.Sc., University of Madras (M.C.C), India; Ph.D., Gujarat University, India.

Haley Peebles
Instructor of Biology
B.S., Grand Canyon University; MBA, Grand Canyon University

Thomas Pirtle
Assistant Professor of Biology
B.S., Christian University Department of Biology; M.S., Abilene Christian University Department of Biology; Ph.D., Arizona State University Department of Biology

*Campus/Off-site only | † Writing-intensive course | *Fulfills General Education requirement |
Ellen Roy-Day  
Assistant Professor, Professional Counseling and Addiction Studies  
B.S., Arizona State University; M.C., University of Phoenix

Cindy Seminoff  
Associate Professor of Exercise Science, Director of Athletic Training  
B.S., University of South Alabama; M.S., Arizona State University

Rebecca Socia  
Faculty Associate in Physical Science/Chemistry  
B. S., Grand Canyon University

Timothy Tracy  
Director of Health Care Administration and Services Programs  
Professional Nursing Diploma, Waterbury Hospital School of Nursing; B.S. Health Care Administration, University of Phoenix; M.P.A. in Health Service Management, Golden Gate University

College of Liberal Arts

Michael Baird  
Professor of Christian Studies  
B.A., Grand Canyon College; M.Div., Ph.D., Southwestern Baptist Theological Seminary

William Larry Barron, III  
Professor of Psychology  
B.A., Rice University; M.A., Ph.D., University of Texas at Austin

James G. Beggs  
Professor of Humanities  
B.A., Baptist College; M.A., Southwest Missouri State University; Ph.D., Louisiana State University

Jenna Behm  
Instructor of Psychology  
B.S., University of Wisconsin-Madison; M.S., Arizona State University

Course Descriptions

Accounting (ACC)

ACC 211: Financial Accounting 3 credits
An introduction to the fundamental principles and practices of financial accounting and the construction of financial statements.

ACC 212: Managerial Accounting 3 credits
Continuation of ACC 211. An introduction to the use of managerial accounting data in the decision-making process. Prerequisite: ACC 211.

ACC 250: Financial Accounting 4 credits
This course is an introduction to the accounting cycle and the construction of financial statements. Students explore the fundamental principles and practices of financial accounting as outlined by Generally Accepted Accounting Principles (GAAP); the steps in the accounting cycle from journalizing transactions through the preparation of financial statements; and the use and interpretation of the balance sheet, income statement, and statement of cash flows. Prerequisite: MAT 134 or equivalent college algebra course.

ACC 321: Intermediate Accounting I 3 credits
An in-depth study of accounting objectives, principles, theory, and practice as related to assets and income determination. Prerequisite: ACC 212.

ACC 322: Intermediate Accounting II 3 credits
Continuation of ACC 321. An examination of liabilities and owners’ equity, special problems in income determination, and financial reporting. Prerequisite: ACC 321.

ACC 331: Cost Accounting 3 credits
This course provides a study of the principles of internal accounting, including job order systems, process costing, and activity-based costing. Prerequisite: ACC 212.

ACC 350: Managerial Accounting 4 credits
This course is an introduction to the use of managerial accounting data in the decision-making process. Topics include the use of cost-volume-profit (CVP) analysis and relevant costs in decision making, using budgets and the balanced scorecard to evaluate performance, methods for setting prices of products and services, and analyzing capital investment opportunities. Prerequisite: ACC 250.

ACC 355: Intermediate Accounting (Retired) 4 credits
This course is an in-depth study of accounting objectives, principles, theory, and practice as related to the balance sheet and income statement. Students will explore accounting for assets, liabilities, and equity items, the specific rules for accounting for pensions, postretirement benefits, leases, and accounting changes, and other items frequently addressed on the Uniform Certified Public Accounting Examination (Uniform CPA Exam). Prerequisite: ACC 350.

ACC 370: Intermediate Accounting I 4 credits
This course is an in-depth study of accounting objectives, principles, theory, and practice as related to the balance sheet and income statement. Students will explore accounting for assets, liabilities, and equity items, the specific rules for accounting for pensions, postretirement benefits, leases, and accounting changes, and other items frequently addressed on the Uniform Certified Public Accounting Examination (Uniform CPA Exam). Prerequisite: ACC 350.

ACC 371: Intermediate Accounting II 4 credits
This course is an in-depth study of accounting objectives, principles, theory, and practice as related to the balance sheet and income statement. Students will explore accounting for assets, liabilities, and equity items, the specific rules for accounting for pensions, postretirement benefits, leases, and accounting changes, and other items frequently addressed on the Uniform Certified Public Accounting Examination (Uniform CPA Exam). This course also includes an analysis and interpretation of a firm’s three principal financial statements and their uses from a managerial perspective. Prerequisites: ACC 370 and FIN 350.
ACC 483: Advanced Accounting  3 credits
A study of accounting theory as it applies to partnerships and business combinations, international accounting, and governmental accounting. Prerequisite: ACC 322.

ACC 485: Advanced Accounting  4 credits
This course provides a study of accounting theory as it applies to partnerships and business combinations, international accounting, and governmental accounting. Prerequisites: One of the following: 1) ACC 355, or 2) ACC 370 and 371.

ACC 486: Financial Statement Analysis  4 credits
This course provides a detailed analysis and interpretation of a firm’s three principal financial statements and their uses from a managerial perspective. Prerequisites: ACC 350 and FIN 350.

ACC 490: Auditing  3 credits
Auditing is an examination of generally accepted auditing standards, procedures involved in the auditing process, and ethical issues faced by the auditor. Through class discussions, practical applications and case studies, students will learn the responsibilities of the independent public auditor in the expression of opinion within the guidelines set by the AICPA's Code of Professional Ethics. Topics include the nature and types of audits, auditor responsibilities and legal liabilities, audit reports, auditing procedures, ethical issues, contemporary issues in auditing and the Sarbanes-Oxley Act of 2002. Prerequisite: ACC 322.

ACC 491: Auditing  4 credits
Auditing is an examination of generally accepted auditing standards, procedures involved in the auditing process, and ethical issues faced by the auditor. Through class discussions, practical applications and case studies, students learn the responsibilities of the independent public auditor in the expression of opinion within the guidelines set by the AICPA’s Code of Professional Ethics. Topics include the nature and types of audits, auditor responsibilities and legal liabilities, audit reports, auditing procedures, ethical issues, contemporary issues in auditing and the Sarbanes-Oxley Act of 2002. Prerequisite: ACC 322.

ACC 495: Accounting Theory  3 credits

ACC 501: Accounting Practices  3 credits
This course is designed for students who have not had accounting in their undergraduate work or for those who desire a refresher in accounting. Topics covered include the accounting cycle, the presentation and valuation of accounts shown on the Balance Sheet and Income Statement, the Statement of Cash Flows, cost behavior, and budgeting.

ACC 502: Accounting Practices  4 credits
This course is designed for individuals who are preparing for more advanced coursework in accounting and for students who have not had accounting in undergraduate work. Topics covered include the principles and practices of financial accounting and the fundamentals of managerial accounting, such as cost behavior and budgeting. The course covers accounting theories using computational examples, and homework is problem solving.

ACC 605: Managerial Accounting  3 credits
Students study the accounting concepts used within an organization for management decision-making. Topics include cost behavior, cost systems, profit planning, cost control, cost-volume-profit analysis, and performance evaluation. Prerequisite: ACC 501.

ACC 613: Taxation  4 credits
This course is a study of the theory and practices of accounting for income taxes of corporations, partnerships, estates, trusts, and individuals.

ACC 612: Internal Auditing  3 credits
Students study the principles involved in internal auditing. Topics include internal controls, the responsibilities and authority of the internal audit function, the types of audits conducted by internal auditors, and accounting ethics. Forensic accounting and Sarbanes-Oxley will also be covered. Prerequisite: ACC 605.

ACC 619: Accounting Theory  3 credits
Through self-directed and collaborative learning, the student will critically examine the central issues which arise in the application of financial and managerial accounting concepts to situations encountered in business. Topics include the accounting standard-setting process and the selection of accounting methodologies in the absence of clear standards. Prerequisite: ACC 605.

ACC 620: Financial Statement Analysis  3 credits
This course discusses analysis and interpretation of corporate financial reports. Topics include the form, content, and general accounting principles governing the construction of financial statement; valuation, classification, and income determination problems; the methods of analyzing and interpreting financial data; and the utility and limitations of financial accounting data. Prerequisites: ACC 501 and FIN501.

ACC 623: Business Law and Ethics for Accounting  4 credits
This course gives students a robust legal and ethical framework that is crucial for accountants and managers under Sarbanes-Oxley. Using case studies that incorporate the principles of business law, the AICPA code, and other systems of ethics, students learn how a commitment to ethics can enable accounting professionals to meet their ethical obligations to all stakeholders.

ACC 633: Financial Intelligence and Decision Making  3 credits
This course focuses on understanding, interpreting, and using financial information for the purposes of making sound financial decisions. The concept of financial intelligence is introduced as it relates to effectively analyzing and assessing financial performance to understand what numbers really mean and when or how to appropriately challenge them.

*Campus/Off-site only | † Writing-intensive course | * Fulfills General Education requirement |
ACC 650: Managerial Accounting  4 credits
This course covers managerial accounting concepts and procedures for internal reporting, including the study of cost behavior, cost systems, budgeting, and performance evaluation. Coursework includes case studies, group projects, and class discussion. Prerequisite: ACC 502.

ACC 651: Internal Auditing  4 credits
This course is a study of the principles involved in auditing. Topics include financial statement audits, the responsibilities of the external auditor, internal controls, the responsibilities and authority of the internal audit function, the types of audits and other attestation engagements, and accounting ethics. The effects of the Sarbanes-Oxley Act of 2002 are also covered. Prerequisite: Either 1) ACC 650, or 2) ACC 653.

ACC 653: Advanced Managerial and Cost Accounting  4 credits
This course is focused on key managerial and cost accounting concepts and methods. Students examine why, when, and how cost information is used to make effective decisions that lead a firm to success. Prerequisite: ACC 502

ACC 655: Compliance in Financial Reporting  4 credits
This course focuses on building an understanding of the U.S. and international regulatory framework of financial reporting. Students learn to apply GAAP, IASs, and IFRSs to practical situations and train to prepare financial statements in accordance with GAAP, IASs, IFRSs, and pronouncements of the Standing Interpretation Committee. Prerequisites: ACC 502 and BUS 611.

ACC 660: Advanced Financial Accounting  4 credits
This course is an exploration of advanced topics in financial accounting and reporting, including recognition, measurement, and valuation issues affecting corporations, partnerships, consolidated entities, not-for-profits, government, and international operations. Prerequisite: ACC 650.

ACC 662: Advanced Accounting and Mergers and Acquisitions  4 credits
This course is an exploration of advanced topics in financial accounting and reporting, including governmental, nonprofits, partnerships, and the preparation of consolidated financial statements affected by mergers and acquisitions. The financial and economic aspects of merger and acquisition activities are examined in both a domestic and international context. Prerequisite: ACC 655.

ACC 664: Forensic Accounting and Fraud Examination  4 credits
This course is focused on fraudulent financial reporting and the prevention and detection of irregularities. Students become familiar with fraudulent reporting practices and the misappropriation of assets. Prerequisites: ACC 655, ACC 651, and ACC 623.

ACC 665: Tax Planning and Business Strategy  4 credits
This course provides the practical and theoretical framework for recognizing tax planning opportunities and applying basic principles of tax strategy in various contexts, including investments, capital expenditures, organizational form, compensation, regulation, financial instruments, and family wealth planning. Prerequisite: ACC 613.

Administration (ADM)
ADM 611: Public Organizational Theory  4 credits
Fundamental approaches to organizational theory are examined in this course within the context of public administration. Both traditional and emerging paradigms in public organization theory are also explored. The relevance of these theories is applied to the practical management and decision-making processes inherent in public organizations.

ADM 614: Economics for Public Administrators  4 credits
In this course, the role of government in the economy is explored within the general context of market failure and social equity. Topics include allocation of goods and services, income distribution, externalities, public goods, and public choice theory. This course also examines the impact of macroeconomic events and policy decisions on the budgets and service levels of public entities.

ADM 624: Public Governance  4 credits
This course focuses on how government and public organizations serve their stakeholders, the manner in which their services are carried out, how resources are managed, and how regulatory powers are complied with and/or managed. In accordance with UN guidelines on public governance, issues related to transparency, participation, and accountability are also examined.

ADM 626: Public Budgeting and Financial Management  4 credits
This course provides an introduction to the revenue and expenditure structure of the public sector, including revenue policy, expenditure policy, and budget structure and administration.

ADM 632: Intergovernmental Relations  4 credits
This course examines in detail the relationships among the federal, state, and municipal levels of government in the United States. The history of U.S. federalism is briefly covered, followed by a more in-depth focus on such issues as competition among levels and branches of government, the challenge of institutional fragmentation, and the role of governmental interest groups. Specific policy issues (education, health care, social services) are also examined.

ADM 634: Policy Studies  4 credits
This course focuses on how challenges and problems facing society become policy issues. Leading theories in policy analysis and the policy-making process are examined and critiqued. The
impact of policy decisions on various groups within society (related to gender, age, ethnicity, etc.) is also examined.

**ADM 636: Law and Administrative Process  4 credits**
An introduction to law relevant to public administration, this course covers selected topics in administrative and constitutional law, including the exercise of governmental power, legislative and executive oversight, rule making, adjudication, and judicial review.

**Aerospace Studies (AES)**

**AES 101: Air Force Today I  2 credits**
Every Fall. Introduction to U.S. Air Force and AFROTC. Topics include: the Air Force mission and organization, customs and courtesies, officer opportunities, officership, and professionalism.

**AES 102: Leadership Lab  0 credits**
Every Fall. Emphasis on common Air Force customs and courtesies, drill and ceremonies, health and physical fitness through group participation. Co-requisite: AES 101.

**AES 103: Air Force Today II  2 credits**
Every Spring. Continuation of AES 101. Topics include: the Air Force mission and organization, customs and courtesies, officer opportunities, officership, and professionalism. Prerequisite: AES 101 or department approval.

**AES 104: Leadership Lab  0 credits**
Every Spring. Continuation of AES 102 with more in-depth emphasis on learning the environment of an Air Force officer. Co-requisite: AES 103.

**AES 201: The Evolution of USAF Air and Space Power I  2 credits**
Every Fall. Further preparation of the AFROTC candidate. Topics include: Air Force heritage and leaders, communication skills, ethics, leadership, quality Air Force, and values. Prerequisite: AES 103 or department approval.

**AES 202: Leadership Lab  0 credits**
Every Fall. Application of advanced drill and ceremonies; issuing commands; knowing flag etiquette; and developing, directing, and evaluating skills to lead others. Co-requisite: AES 201.

**AES 203: The Evolution of USAF Air and Space Power II  2 credits**
Every Spring. Continuation of AES 201. Topics include: the Air Force mission and organization, customs and courtesies, officer opportunities, officership, and professionalism. Prerequisite: AES 201 or department approval.

**AES 204: Leadership Lab  0 credits**

**AES 301: Air Force Leadership Studies I  3 credits**
Every Fall. Study of communication skills, leadership and quality management fundamentals, leadership ethics, and professional knowledge required of an Air Force officer. Prerequisite: AES 203 or department approval.

**AES 302: Leadership Lab  0 credits**
Every Fall. Advanced leadership experiences applying leadership and management principles to motivate and enhance the performance of other cadets. Co-requisite: AES 301.

**AES 303: Air Force Leadership Studies II  3 credits**
Every Spring. Continuation of AES 301. Topics include: communication skills, ethics, leadership, professional knowledge, and quality management required of an Air Force officer. Prerequisite: AES 203 or department approval.

**AES 304: Leadership Lab  0 credits**
Every Spring. Continuation of AES 302 with an emphasis on planning the military activities of the cadet corps and applying advanced leadership methods. Co-requisite: AES 303.

**AES 401: National Security Affairs  3 credits**
Every Fall. Examines advanced ethics, Air Force doctrine, national security process, and regional studies. Special topics include: civilian control of the military, military justice, and officership. Prerequisite: AES 303 or department approval.

**AES 402: Leadership Lab  0 credits**
Every Fall. Advanced leadership experience demonstrating learned skills in planning and controlling the military activities of the corps. Co-requisite: AES 401.

**AES 403: Regional Security Issues  3 credits**
Every Spring. Continuation of AES 401. Topics include: civilian control of the military, doctrine, ethics, military justice, the national security process, and officership. Prerequisite: AES 401 or department approval.

**AES 404: Leadership Lab  0 credits**
Every Spring. Continuation of AES 402 with an emphasis on preparation for transition from civilian to military life. Co-requisite: AES 403.

**Applied Management (AMP)**

**AMP 330: Group Dynamics  3 credits**
This course examines how group behavior affects organizational effectiveness, decision-making, conflict resolution, and strategies for efficient group and task management.

**AMP 335*: Career and Life Assessment  3 credits**
This course focuses on the preparation of students’ personal portfolios and professional life-learning experiences. This course is a writing-intensive course and is not offered online. It is an on-campus only course.

---

*Campus/Off-site only | *Writing-intensive course | *Fulfills General Education requirement |
AMP 340: Management Principles 3 credits
This course focuses on real-world management situations concerned with planning, organizing, leading, and controlling. General management and basic management processes will be examined.

AMP 350*: Managerial Communication 3 credits
Students will demonstrate the fundamentals and application of writing and presentation used in formal settings in the professional environment. A writing-intensive course.

AMP 360: Informational Technology and Systems 3 credits
This course provides an overview of management issues and technologies that a business professional needs to understand to effectively deal with the rapidly changing world of information systems. Although many technologies are covered, it is not intended to be a technology class. The major focus is on the organizational, management, and technology dimensions of information systems.

AMP 370: Systems Concepts 3 credits
The focus of this course will be on analysis of organizations using the systems model and application of the systems model for solving organizational problems.

AMP 410*: Ethical Decision-Making 3 credits
This seminar style course on business ethics will focus on applying a principle-centered approach to business and personal issues. This course leads to an exploration of the philosophy of life, ethical theories, and values as a base of ethics and accountability in business and a responsible lifestyle.

AMP 415: Financial Decision Making 4 credits
This course is a study of the components of primary financial statements and the use of these statements to analyze the performance of a business entity. The course includes selected managerial accounting topics that assist in internal decision-making.

AMP 420: Marketing Environment 3 credits
This course will emphasize the marketing concept, consumer behavior, the need for market research, and the elements of the marketing mix (product, price, place, and promotion).

AMP 425: Marketing Environment 4 credits
This course addresses basic concepts in project management, emphasizing a balance between the technical aspects of project work. Topics include the emerging importance of project management, tools and techniques to plan and schedule projects, the manager’s role in coordinating projects, and how managers need to be aware of culture influences.

AMP 430: Human Resources 3 credits
Values and perceptions of groups affecting recruiting, training, evaluation, and current legal issues in human resources will be studied. Students will focus on the manager as a coach in the organization.

AMP 434: Human Resources 4 credits
This course is a study of the human resource management function in organizations, including detailed coverage of staffing, organizational development, compensation and benefits administration, and employee relations. Emphasis is placed on how human resource management as a whole enhances organizational performance and success. Prerequisites: PSC 420.

AMP 435: Intrapreneurship and Innovation 4 credits
This course examines the importance of creating innovative work environments in small-, medium-, and large-scale organizations in order to ensure the long-term competitiveness of the firm. Innovation is explored from the perspectives of product development, internal process improvements, and strategic shifts. Students have the opportunity to participate in an experiential innovation project. Also ENT 435.

AMP 440: Financial Decision-Making 3 credits
This course will study the components of the primary financial statements and the use of these statements to analyze the performance of a business entity. The course includes selected managerial accounting topics that assist in internal decision-making.

AMP 450V: Leadership and Vocation 3 credits
This course emphasizes major behavior patterns that effective leaders use to influence followers, including Ken Blanchard’s leadership model. Topics include what effective leaders really do and how leaders can diagnose and modify situations to make their leadership a more positive and productive endeavor.

AMP 460: Project Management 3 credits
This course addresses basic concepts in project management, emphasizing a balance between the technical aspects of project work. Topics include the emerging importance of project management, tools and techniques to plan and schedule projects, the manager’s role in coordinating projects, and how managers need to be aware of culture influences.

AMP 470: Global Management 3 credits
This course emphasizes practical skills needed for effective management of people and processes in a 21st century global business context. It places the student in the role of a manager of any nationality, encouraging the student to take a truly global perspective in dealing with dynamics of international management.

AMP 480: Small Business Entrepreneurship 3 credits
This course explores basic concepts for successful operations of small business, including starting and managing a successful new business venture.

AMP 490: Organizational Development and Change 3 credits
This course emphasizes an overview of approaches to organizational development with emphasis on the practical aspects of changing organizations to improve effectiveness.
AMP 492: Organizational Change and Development 4 credits
This course provides an overview of approaches to organizational development with an emphasis on the practical aspects of changing organizations to improve effectiveness.

AMP 495: Capstone–Action Research Project 3 credits
This course provides a structured way for managers to take an overview and general management perspective. Emphasis will be placed on a capstone project that synthesizes major elements of the Applied Management program.

Art Education (ARE)
ARE 423: Art in the Secondary School 3 credits
Exploration of materials, theory, and organization for presenting art activities and development in the arts for students at the secondary school level. Prerequisites: Admission to the College of Education and junior status.

Art History (ARH)
ARH 100: Art Appreciation 3 credits
Designed specifically for non-art majors and minors with emphasis on the meaning of art as it relates to the personal interests of each individual. The understanding of art will be pursued by examining its history and by personal observation through field trips, slides, and videos.

ART 202: Photography and Digital Imaging 3 credits
This in an introductory course on digital photography, in which students explore basic techniques in camera operation, film and print processing, composition, and presentation. Students are required to provide their own digital camera for this class.

ARH 234: Art History II 3 credits
A survey of Occidental Art during the Renaissance, Mannerist, Baroque, Rococo, Neo-Classic, Romantic and Modern epochs.

ARH 439V: Contemporary Art History 3 credits
A survey of recent and current trends in art with special consideration of post-modernism and new concepts with media and modes of presentation. A Writing-Intensive course.

Art Studio (ART)
ART 202: Photography and Digital Imaging 3 credits
This in an introductory course on digital photography, in which students explore basic techniques in camera operation, film and print processing, composition, and presentation. Students are required to provide their own digital camera for this class.

ART 215: Photography and Digital Imaging 4 credits
This in an introductory course on digital photography in which students explore basic techniques in camera operation, composition, print processing, and presentation. Digital editing and compositing are explored using photo editing software.

Bible (BIB)
BIB 103: Survey of the Bible 3 credits
An introduction to the study of the Bible, providing essential background information of God’s redemptive work throughout history. This course, in combination with UNV 304, UNV 305, or UNV 306, will meet the General Education requirements of the University but does not serve as a required prerequisite for certain upper division courses.

BIB 104: Old Testament Historical Perspectives 4 credits
This course is an introductory historical survey of the Old Testament. Attention is given to the study of the Bible itself, its institutions, its literature, and the history of the national life of the Hebrew people from earliest times to the close of the Old Testament period. The course also explores the impact of the Old Testament on the development of Christianity and Christian values.

BIB 105: New Testament Historical Perspectives 4 credits
This course is an introductory historical survey of the New Testament, beginning with the interbiblical period. The main emphasis of this course is the Gospels and Acts, and the development of Christian faith and perspectives throughout this historical period.

BIB 113: Old Testament History (Retired) 3 credits
An introductory and historical survey of the Old Testament. Attention is given to the study of the Bible itself, its institutions, literature, and history of the national life of the Hebrew people from earliest times to the close of the Old Testament period.

BIB 123: New Testament History (Retired) 3 credits
A general historical survey of the New Testament, beginning with the inter-biblical period, with the main emphasis given to the Gospels and Acts.

BIB 313: Biblical Interpretation 3 credits
This course helps equip students more interested in more serious Biblical Studies to understand and use basic principles of Biblical interpretation. An introduction to the nature of Bible interpretation

*Campus/Off-site only | *Writing-intensive course | *Fulfills General Education requirement |

© 2010 Grand Canyon University. All Rights Reserved.
is given. The majority of the course will focus on developing skills in exegesis of Scripture, using a nine-step approach. Prerequisites: BIB 113 and BIB 123.

**BIB 351: Moses and the Prophets 4 credits**

This course examines the tradition of the pentateuch tradition and its elaboration in the prophetic tradition. The scriptural record of beginnings and of early Hebrew history, religion, and law is the foundation for the study, with corresponding attention given to Old Testament prophetic writings. Aspects of the prophetic study include the messianic element, the occasion of writing, authorship, content, and interpretation. Prerequisite: BIB 104.

**BIB 354: Jesus and His Interpreters 4 credits**

This course focuses on the teachings and major events in the life of Jesus and the elaboration on those teachings in Paul’s writings. Special attention is given to the person, teachings, and work of Jesus. Some pertinent issues in Pauline studies, such as the Judaizer conflict, the effect of Paul’s conversion on his thinking and writing, and the sequence of his letters will be examined for their role in the development of the Gospel tradition. Prerequisite: BIB 105.

**BIB 355*: Biblical Interpretation and Application 4 credits**

This writing-intensive course helps equip students to understand and use basic principles of biblical hermeneutics, including an introduction to the nature of Bible interpretation and the application to contemporary issues. The majority of the course focuses on developing practical procedures and step-by-step skills in exegesis of Scripture. Prerequisites: ENG 105, BIB 104, and BIB 105.

**BIB 410: Interpreting the Bible for Youth 3 credits**

Aids future youth leaders in interpreting and communicating the Bible to a youth audience to develop the necessary skills in exegesis, scripture outline, and content analysis throughout the course. The majority of the course will focus on developing the skills necessary to assist others to relate the Bible to modern situations facing youth and their families. Successful completion of the course will entail interpreting assigned Scripture and relating it to current situations.

**BIB 423: General Epistles and the Revelation 3 credits**

A study of the historical background, authorship, and exegetical analysis of the General Epistles (Hebrews; James; I and II Peter; I, II, and III John; and Jude) and The Revelation. Prerequisites: BIB 113, and BIB 123.

**BIB 432: Old Testament Prophets 3 credits**

A study of the writings of the prophets of the Old Testament, with special attention given to the Messianic element, the occasion of writing, authorship, content, and interpretation. Prerequisites: BIB 113 and BIB 123.

**BIB 433: The Gospels 3 credits**

A study of the life of Jesus, with special attention given to his person, teachings, and work. Prerequisites: BIB 113 and BIB 123.

**BIB 442: The Pentateuch 3 credits**

A study of the first five books of the Bible with special emphasis given to the scriptural record of beginnings and of early Hebrew history, religion, and law. Prerequisites: BIB 113 and BIB 123.

**BIB 443: The Epistles of Paul 3 credits**

A study of the life and times of the apostle Paul, with emphasis on an interpretation of his epistles and their historical setting. Prerequisites: BIB 113 and BIB 123.

**BIB 453: Old Testament Poetry 3 credits**

A study of the poetical books of the Old Testament, with reference to their literary style, occasion of writing, authorship, content, an interpretation. Prerequisites: BIB 113 and BIB 123.

**BIB 501: Old Testament Foundations 4 credits**

This course is a survey of the historical and theological structures and themes of the Old Testament historical and literary documents.

This course is a survey of the historical and theological structures and themes of the New Testament historical and literary documents.

**BIB 650: Biblical Hermeneutics 4 credits**

This course is a study of the basic principles of evangelical biblical interpretation, exegesis, and application, especially in the context of ministry, including an introduction to the use of biblical language tools. Prerequisites: BIB 501 and BIB 502.

**Biology (BIO)**

**BIO 100: Biology Concepts 3 credits**

This course is a complete overview of the science of biology from a human perspective. Topics include cells, energetics, ecology, inheritance, evolution, embryology, anatomy, and physiology. This course does not apply toward Biology majors. Co-requisite: BIO 100L.

**BIO 100L: Biology Concepts Lab 1 credit**

A lab course designed to complement and support the principles being learned in Biology 100 lecture. Co-requisite: BIO 100.

**BIO 130: Introduction to Life Sciences 1 4 credits**

This course introduces students to the concepts of the scientific method and critical thinking in making observations and formulating hypotheses. Students learn about the structure of cells, DNA replication and gene expression, metabolic pathways, cell cycle, and cell division. The final section of the class includes an overview of animal form and function, organs and organ systems, and physiological processes, with an emphasis on human systems.

**BIO 155: Introduction to Anatomy and Physiology 3 credits**

A study of the basic structure and function of the major systems of the human body, this course focuses on an in-depth exploration of
the musculoskeletal and neurological systems for athletic training, health, and exercise science majors. This course also compares normal and abnormal function for more comprehensive understanding of the human body. Prerequisite: BIO 181. Co-requisite: BIO 155L.

**BIO 155L: Introduction to Anatomy and Physiology Lab** 1 credit

This lab is designed to complement and support the principles taught in BIO 155. Upon successful completion of the course, students will be able to identify and describe functions, structures, and classifications of the skeletal, muscular, and organ systems along with related disorders. Prerequisite: BIO 181. Co-requisite: BIO 155.

**BIO 160: Anatomy and Physiology** 3 credits

A study of the basic structure and function of the major body systems of the human body. This course focuses on an in-depth study of the musculoskeletal and neurological systems for the athletic training, health and exercise majors. This course will also compare normal and abnormal function for more comprehensive understanding of the human body. Co-requisite: BIO 160L.

**BIO 160L: Anatomy and Physiology Lab** 1 credit

A laboratory course designed to complement and support the principles taught in BIO 160. Co-requisite: BIO 160. Does not substitute for BIO 201L or BIO 202L.

**BIO 181: General Biology (Majors) I** 3 credits

This course is a study of biological concepts emphasizing the interplay of structure and function, particularly at the molecular and cellular levels of organization. Cell components and their duties are investigated, as well as the locations of cellular functions within the cell. The importance of the membrane is studied, particularly its roles in controlling movement of ions and molecules and in energy production. The effect of genetic information on the cell is followed through the pathway from DNA to RNA to protein. Co-requisite: BIO 181L.

**BIO 181L: General Biology I Lab** 1 credit

This lab course is designed to reinforce principles learned in BIO 181 through experiments and activities which complement and enhance understanding of macromolecules, cell membrane properties, cellular components, and their contribution to cell structure and function. Assignments are designed to relate cellular processes such as metabolism, cell division, and the flow of genetic information to cell structure. Co-requisite: BIO 181.

**BIO 182: General Biology (Majors) II** 3 credits

This course is a study of biological concepts emphasizing the interplay of structure and function at the molecular, cellular, and organismal levels of organization. Relationships of different life forms are studied, noting characteristics and general lifecycles of the different types of organisms, including bacteria, archaea, and eukaryotes. Plant structure, function, and reproduction are studied, as well as photosynthesis and plant nutrition. Ecological principles are discussed, including organism interactions at the various ecological levels. Principles of conservation are introduced. Prerequisite: BIO 181. Co-requisite: BIO 182L.

**BIO 182L: General Biology II Lab** 1 credit

This lab is designed to reinforce principles learned in BIO 182. Organisms are examined to recognize similarities and differences among different types. Plant structure and processes, including photosynthesis and water transport, are investigated through observation and activities. Concepts of ecology are explored through study of species interactions projects and other activities. Co-requisite: BIO 182.

**BIO 201: Human Anatomy and Physiology I** 3 credits

This course is the first of a two-course sequence examining the structure and function of the human body and mechanisms for maintaining homeostasis within it. This portion includes the study of cells; tissues; genetics; and the integumentary, skeletal, muscular, and nervous systems. Prerequisites: One of the following: 1) BIO 181 or satisfactory placement exam results. Does not substitute for BIO 360 or BIO 373; or 2) BIO 181. Co-requisite: BIO 201L.

**BIO 201L: Human Anatomy and Physiology I: Lab** 1 credit

This course involves a study of the gross anatomy and functions of the skeletal, muscular, and nervous systems. This experiential lab involves gaining basic knowledge of the use of human cadavers, animal demonstrations, and computer-assisted instruction. Prerequisite: One of the following: 1) None. Does not substitute for BIO 373; or 2) BIO 181L. Co-requisite: BIO 201.

**BIO 202: Human Anatomy and Physiology II** 3 credits

This course is the second of a two-course sequence examining the structure and function of the human body and mechanisms for maintaining homeostasis within it. This portion includes the study of immunity; metabolism; energetics; fluid, electrolyte and acid-base balance; and the endocrine, hematologic, cardiovascular, lymphatic, respiratory, digestive, urinary, and reproductive systems. Prerequisite: BIO 201. Co-requisite: BIO 202L.

**BIO 202L: Human Anatomy and Physiology II: Lab** 1 credit

This course is a study of the gross anatomy and functions of the endocrine, cardiovascular, respiratory, digestive, renal, and reproductive systems. The experiential lab involves an advanced exploration of concepts using human cadavers, animal demonstrations, and computer-assisted instruction. Prerequisite: One of the following: 1) none; or 2) BIO 201L. Co-requisite: BIO 202.

**BIO 205: Microbiology** 3 credits

This course provides an introduction to the principles and applications of microbiology and a study of the general characteristics of microorganisms, their activities, and their relationship to humans. Students develop understanding of microbial cell structure and function, microbial genetics, related pathologies, immunity, and other selected applied areas. Co-requisite: BIO 205L.

*Campus/Off-site only | Writing-intensive course | Fulfills General Education requirement |
The laboratory section of BIO 205 supports further learning surrounding principles gained in the lecture course. Students develop fundamental skills in microbiological laboratory techniques, microscopy methodologies, and the isolation and identification of pathogenic microorganisms. Co-requisite: BIO 205.

**BIO 205L: Microbiology Lab 1 credit**

This course examines the risks and the environmental impact of human behavior and population growth on natural resources. Emphasis is placed on a holistic approach to environmental science using hands-on exercises, environmental surveys, and class discussions to reinforce scientific principles.

**BIO 250: Introduction to Life Sciences II 4 credits**

This course introduces students to the relevance and impact of scientific endeavors/advances/processes on human populations, society, and the environment. Natural phenomena and relationships between scientific disciplines and technology provide foundational knowledge for students to critically analyze the interactions between humans and their world.

**BIO 304: Applied Nutrition 3 credits**

Applied Nutrition provides a foundation of basic nutrition theory. The focus is on assessment, food components, exercise, nutrition, weight control, community programs, and resources. Application of these aspects is used to promote health and prevent illness.

**BIO 308: Pathophysiology 3 credits**

A study of manifestations of altered human physiology and disease processes. Systems theory is used to analyze the relationship between disease and physiology. Prerequisites: BIO 201 and BIO 202, or BIO 160.

**BIO 311: Sectional Anatomy MRI/CT 3 credits**

Content is designed to provide students with a review of the anatomy of the body systems from the cross sectional perspective via diagrams and radiographic images.

**BIO 316V: Pharmacology for Health Care Professionals 3 credits**

The content of this course is designed to broaden the health care professional’s knowledge of pharmacology. Topics include types and effects of drugs, including diagnostic imaging contrast media. The pharmacology, pharmacokinetics, and pharmacodynamics of drugs commonly used in ancillary health care are presented. Conscious sedation, adverse reactions, and patient care under sedation are also included.

**BIO 317+: Science Communication 3 credits**

Science Communication studies how to gather, analyze, and communicate scientific information. Students will be able to effectively communicate clearly organized scientific thoughts across a wide array of platforms. Topics covered include recognizing the various forms of written communication, utilizing research papers to conduct individual research, organizing and writing journal papers, producing and giving scientific oral presentations, producing poster presentations at scientific meetings, understanding the funding process for professional scientific research, and writing proposals for federal funding agencies. A writing-intensive course.

**BIO 317V: Science Communication and Research 3 credits**

This writing-intensive course focuses on the use of scientific research as a basis for understanding and improving clinical practice. Topics include differentiation between various forms of written communication, utilizing former research to support a position and/or develop new research proposals, organizing and writing research papers, and producing visual aids for oral presentations. Emphasis in this course is on the critical review of research studies and their applications to clinical practice. An overview of evidence-based practice is provided. Prerequisite: HLT 312.

**BIO 319: Applied Nutrition 4 credits**

This course provides a foundation of basic nutrition theory, with a focus on assessment, food components, exercise, nutrition, weight control, community programs, and resources. Application of these aspects is used to promote health and prevent illness.

**BIO 332: Cell Biology 3 credits**

A comprehensive study of the composition, structure, energetics, regulation, and growth of eukaryotic cells. Prerequisites: BIO 181 and BIO 182.

**BIO 340: Genetics 3 credits**

A comprehensive examination of the principles of heredity and variation, including Mendelian genetics, molecular genetics, and population genetics. Prerequisites: BIO 181 and BIO 182.

**BIO 352: Developmental Anatomy 4 credits**

A comprehensive examination of human anatomical development from fertilization through birth including genetic regulation, molecular pattern formation, teratology, and developmental anomalies.

**BIO 353 Calculus for Biological Sciences 3 credits**

This course focuses on the study and mathematical modeling of biological systems. Through a host of biological and medical applications, the rudiments of calculus are developed. Concepts include measuring the slope of a curve, writing equations of tangent lines, maximizing and minimizing a function, determining the rate of change of a function, and measuring the area under a curve. Solution techniques, both analytic and numeric, for difference and differential equations are utilized. Modeling activities are heavily emphasized. Qualitative analysis of solutions of differential equations is incorporated in modeling activities. Application areas include mathematical physiology, pharmacology, cell biology, and population biology. Prerequisites: MAT 121 or satisfactory placement exam results.

**BIO 360: Medical Physiology 3 credits**

This course focuses on the normal function of human cells, tissues, and organ systems. Emphasis is placed on the
interconnections and biochemical functions between systems of the body and maintenance of homeostasis. Minor emphasis is placed on the dysfunctions and resulting pathologies. 

Prerequisites: One of the following combinations: 1) BIO 182; or 2) BIO 181 and BIO 181L, and co-requisite: BIO 360L.

**BIO 360L: Medical Physiology** 1 credit

This course involves the exploration of normal function of human cells, tissues, and organ systems through hands-on laboratory experimentation. Students develop a deeper understanding of the materials learned in BIO 360 using simulation software for human functions, systems, and pathologies. Prerequisites: One of the following combinations: 1) BIO 182; or 2) BIO 181 and BIO 181L. Co-requisite: BIO 360.

**BIO 363: Biostatistics** 3 credits

Introduction to experimental design, and basic concepts of descriptive and inferential statistics including descriptive methods and graphing, binomial and Gaussian probability theory, estimation, confidence intervals, hypothesis testing, correlation, and regression. One-, two- and multi-group parametric and nonparametric methods will be introduced. Sampling distributions covered include the Z, t, F, and Chi-squared distributions. Prerequisite: MAT 120 or higher.

**BIO 365: Biomedical Statistics** 4 credits

This course is an introduction to basic concepts of descriptive and inferential statistics, experimental design, and an exploration of chronic and infectious disease epidemiology. Students explore study and sampling designs by reviewing the steps of experiment design. Statistical methodologies include graphing, probability theory, estimation, confidence intervals, hypothesis testing, correlation and regression, and analysis of variance. One-, two- and multi-group parametric and nonparametric methods are introduced, requiring use of Z, t, F, and Chi-squared distributions. Epidemiology techniques include basic measures of disease frequency, exposure-disease associations, prevalence, and incidence relationships. Measures of effect, sources of bias, estimation, and hypothesis testing in epidemiology are discussed, along with estimation of risk and odds. Prerequisite: Grade C or better in MAT 134 or 3 years of high school algebra with a grade of C or better.

**BIO 368A: Pathophysiology I** 2 credits

The first of a two course sequence designed to the bridge the gap between basic preclinical science courses and the clinical requirements of healthcare professionals. Systematic studies focus on the etiology, pathogenesis, morphology, and clinical manifestations associated with various altered health states and diseases. Material presentation in clinically relevant terminology enhances accurate and effective communication through extensive vocabulary expansion. Upon completion of this course, the student should be able to accurately discuss a variety of disease states with both other health care professionals and patients:

- How does a change in normal physiology cause the signs and symptoms of a given condition or disease;
- How do these physiological effects correlate to mechanisms of accurate diagnoses;
- Why is one treatment method chosen over another?

Prerequisites: BIO 202 and BIO 202L or BIO 360 and BIO 360L.

**BIO 368B: Pathophysiology II** 2 credits

The second of a two course sequence designed to the bridge the gap between basic preclinical science courses and the clinical requirements of healthcare professionals. Systematic studies focus on the etiology, pathogenesis, morphology, and clinical manifestations associated with various altered health states and diseases. Material presentation in clinically relevant terminology enhances accurate and effective communication through extensive vocabulary expansion. Upon completion of this course, the student should be able to accurately discuss a variety of disease states with both other health care professionals and patients:

- How does a change in normal physiology cause the signs and symptoms of a given condition or disease;
- How do these physiological effects correlate to mechanisms of accurate diagnoses;
- Why is one treatment method chosen over another?

Prerequisite: BIO 368A

**BIO 372: Biomechanics** 3 credits

This course introduces students to concepts of mechanics as they apply to human movement. The student should gain an understanding of the mechanical and anatomical principles that govern human motion and develop the ability to link the structure of the human body with its function from a mechanical perspective. At the completion of this course it is desired that each student be able to: 1) describe motion with precise, well-defined mechanical and anatomical terminology; 2) understand and quantify linear and angular characteristics of motion; 3) understand the quantitative relationships between angular and linear motion characteristics of a rotating body; and 4) understand and quantify the cause and effect relationship between force and linear and angular motion. Prerequisites: BIO 160, BIO 201, or BIO 360

**BIO 373: Human Gross Anatomy and Dissection** 4 credits

A detailed study of the gross anatomy of the human body through lecture presentation and dissection of human cadavers. Enrollment is competitive and limited to 16 students. This course cannot be taken as an audit. Prerequisites: BIO 182, and Enrollment in the BS Biology: Pre-med program or instructor's approval

**BIO 451: Pharmacology I** 3 credits

This course presents the foundational concepts of pharmacology emphasizing basic mechanisms of drug action such as pharmacokinetics, pharmacodynamics and pharmacotherapeutics. Drug classes illustrated using prototypic drugs. Examples drawn from various body systems, i.e., neuromuscular, respiratory and so forth. The course will also briefly introduce concepts in modern drug design such as gene and cell therapy and application of pharmacogenomics. Prerequisites: CHM 332 and CHM 332L.

conduct their own statistical analysis of basic epidemiological measures used for evidence-based decision making using data and reports.

**Business (BUS)**

**BUS 230: Introduction to Sport Management** 3 credits

An overview of the business of sport, including career opportunities. A study of the value of professional management to sport organizations.

**BUS 232: Introduction to Sports Management** 4 credits

This course is an overview of the business of sports, including career opportunities, as well as a study of the value of professional management to sports organizations.

**BUS 251: Business Statistics** 3 credits

An introduction to the practical application of descriptive and inferential statistics in business. Topics include probability, probability distributions, the central limit theorem, confidence intervals, hypothesis testing, correlation, and regression. Prerequisite: MAT 120 or equivalent.

**BUS 307*: Business Communications** 3 credits

This course provides practice in writing effective business letters, memos, and reports. Emphasis is on effective oral and written communication as it applies to human relations in business and management. A Writing-Intensive course. Prerequisites: ENG 101 and ENG 102.

**BUS 310: Business Law I** 3 credits

A study of our business legal system and the nature and sources of law, including the laws of torts, crimes, strict liability, intellectual property, contracts, secured transactions, real property, and bankruptcy.

**BUS 311: Ethical and Legal Issues in Business (Retired)** 3 credits

This course is a comprehensive study of the legal and ethical issues of concern to business. The course will cover those areas of the U.S. legal system that are most relevant to business, such as the law of torts, liability, intellectual property, and contract law. It will explore the role of ethics and values in business decision making, and approach these subjects from the perspective of the stakeholders as opposed to an economic interpretation of the firm and its responsibilities.

**BUS 315: Business Law II** 3 credits

Continuation of BUS 310. Included in this course is the study of partnerships, corporations, sales, commercial paper, credit, and government regulations and agencies.

**BUS 316: Ethical Issues in Business and Society** 3 credits

A comprehensive course dealing with macro-environmental issues of concern to business. The course encompasses the political, social, economic, legal, ethical, and other environments of business. Emphasis is placed on a stakeholder's approach as opposed to an economic interpretation of the firm and its responsibilities.

**BUS 321: Sport Law** 3 credits

A presentation of the basic legal system, its terminology, and principles as applied to professional and amateur sports. Emphasis is on identifying and analyzing legal issues, the ramifications of those issues, and the means of limiting the liability of sport organizations. Prerequisite: BUS 310.

**BUS 340: Ethical and Legal Issues in Business** 4 credits

This course is a comprehensive study of the legal and ethical issues of concern to business, including those areas of the U.S. legal system that are most relevant to business, such as the law of torts, strict liability, intellectual property, and contract law. It explores the role of ethics and values in business decision making, and approaches these subjects from the perspective of the stakeholders as opposed to an economic interpretation of the firm and its responsibilities.

**BUS 352: Business Statistics** 4 credits

This course is an introduction to the practical application of descriptive and inferential statistics in business. Topics include probability, probability distributions, the central limit theorem, confidence intervals, hypothesis testing, correlation, and regression. Prerequisite: MAT 134 or equivalent college algebra course.

**BUS 364: Sports Law** 4 credits

This course is a presentation of the basic legal system, its terminology, and principles as applied to professional and amateur sports. Emphasis is on identifying and analyzing legal issues, the ramifications of those issues, and the means of limiting the liability of sports organizations. Prerequisites: BUS 340 or BUS 316.

**BUS 372: Sports Event Planning** 4 credits

This course provides an introduction to event planning for athletic, recreational, entertainment, and special events. An emphasis is placed on budgeting, site selection, sponsorship, and facility management.

**BUS 406: International Business** 3 credits

A course in the concepts and practices of business in a multinational context. The course covers objectives, strategies, policies, and organizational structures for operating in various international environments. Current issues in the field are discussed in detail. Prerequisites: FIN 301 and MGT 301.

**BUS 411: Business Internship** 1–3 credits

An opportunity for students to practice principles learned in the classroom by working in an organization under the supervision of a practitioner. Prerequisites: Permission of the Director of the Internship Program.

**BUS 450: Leadership and Vocation**

This course emphasizes major behavior patterns that effective leaders use to influence followers, including Ken Blanchard’s leadership model. Topics include what effective leaders really do and how leaders can diagnose and modify situations to make their leadership a more positive and productive endeavor.

**BUS 480**: Strategic Management 3 credits

- A capstone course in business providing detailed coverage of strategic management theory and practice. Emphasis is placed on managing as a general manager with cross-functional and enterprise-wide responsibilities. A Writing-Intensive course. Prerequisites: FIN 301, MGT 301, MKT 301, and senior status.

**BUS 485**: Strategic Management 4 credits

- This is a capstone course in business and management that includes the gradual development of a comprehensive and integrative business plan. This course is designed to assist students in their development as managers, servant leaders, and successful strategic thinkers. Management, marketing, accounting, finance, economics, global perspectives, law, and political issues are covered during this course. It is a writing-intensive course that will help students develop competencies such as critical thinking, effective communication, leadership, and global awareness. Prerequisites: FIN 350, MGT 420, MKT 245, and senior status.

**BUS 499: Independent Study** 1–4 credits

- This involves research, seminars, or readings on a special topic selected by the student and the faculty advisor as appropriate. This course may be taken for one, two, three, or four credits, depending on the amount of time and work involved, and may be repeated for up to four credits total per subject area unless specified otherwise in requirements for a major.

**BUS 601: Quantitative Methods in Business** 3 credits

- This course prepares the student to develop and explore quantitative business models for the purpose of improving managerial decision-making. Topics include economic order quantity, probability distribution applications, ANOVA and regression, decision-making under uncertainty, hypothesis testing, linear programming, and queuing theory. Both theory and practical applications are explored. Prerequisite: SYM 501.

**BUS 602: Managerial Communications** 3 credits

- An examination and practice of communication theories, techniques, strategies, and skills essential for success in business. Topics include communication strategy and analysis, managerial presentations, writing, effective meeting management, cross-cultural communication, and the core areas of the modern corporate communication function.

**BUS 604: Organizational Ethics** 3 credits

- This course explores the role of ethics in the organization. An emphasis is placed upon discussing how ethics affects policy formation, developing awareness of ethical situations, and forming a personal value system to guide ethical decision-making and professional conduct in business and society.

**BUS 605: Legal and Ethical Practices in Information Security** 3 credits

- In this course, students evaluate ethical decision making and the best practices employed in security operations planning and management. Students review best practices in the remaining five domains of the CBK within this context.

**BUS 606: Business and Security Risk Analysis** 3 credits

- This course provides students with an overview of risk management principles. Methods to identify, quantify, and qualify internal and external risks to the organization are examined. Students apply these principles and methods to the current business and risk environment.

**BUS 611: Financial Research and Business Modeling** 4 credits

- This course provides students with applied knowledge in using electronic databases to find accounting information and financial reports. Students develop the skills needed to access accounting, auditing, and taxation rules and regulations; company financial statements; and related industry data used for analyzing financial statements.

**BUS 630: Building Innovative Organizations** 4 credits

- This course introduces the challenge of balancing efficiency with the ability to innovate successfully. It examines steps to achieving successful innovation, including understanding what customers really want and having the right structure, processes, and resources to support innovation.

**BUS 637: Serving Communities** 3 credits

- This course brings a unique societal perspective to the decision-making process within organizations. The concept of "enlightened self-interest" is considered within the context of short- versus long-term business results. Societal business costs are defined and examined, including analysis of both sustainable environmental resources and human quality-of-life issues, which center on social responsibility and community outreach. Case studies will be used to profile and examine organizations considered as exemplary corporate citizens.

**BUS 640: Building Efficient Organizations** 3 credits

- This course examines how to streamline and drive inefficiencies out of a firm’s internal processes in order to build a super lean, highly efficient organization. It also covers management structures required to support internally integrated processes, examining how to break down silos and build structures that support cross-functional coordination. The course also focuses on external processes by examining ways to achieve greater supply chain integration with suppliers and customers.
BUS 641: Building Innovative Organizations 3 credits
This course introduces the challenge of balancing efficiency with the ability to innovate successfully. It examines three steps to achieving successful innovation, including understanding what customers really want and having the right structure, processes, and resources to support innovation.

BUS 660: Quantitative Methods 4 credits
This course is a study in the quantitative tools and techniques used to model business functions and applications. Emphasis is placed on how to set up models, and how to interpret and apply their results. Prerequisite: SYM 506.

BUS 697: Internship 1 credit
The internship is the culminating course in an academic program of study. The internship provides students the opportunity to work as independent practitioners within their field and to practice principles learned in their major area of study by working in an outside organization under the supervision of a professional. Internships are strongly recommended for all academically qualified students for any discipline taught in the Ken Blanchard College of Business (KBCOB). The College's desire is to promote an environment where students and organizations benefit from real-world application of classroom instruction. In order to arrange an internship, students should consult the KBCOB Director of the Internships.

Christian Leadership (CHL)

CHL 330: Old Testament History and Theology 3 credits
This course is a comprehensive survey of the important events in the earliest history of the nation Israel. In addition, the course will introduce the student to the major theological ideas of the nation in their historical context. The course will combine lecture, discussion, papers, and presentations.

CHL 332: New Testament History and Theology 3 credits
This course is a comprehensive survey of the important events in the life of Christ and the early church. In addition, the course will introduce the student to the major theological ideas of Christ and the early Church in their historical context. The course will combine lecture, discussion, papers, and presentations.

CHL 430: The Dynamics of Groups 3 credits
The social and communication characteristics of groups that drive organizations are studied with regard to their special leader and member roles and relational culture. Special attention is given to development of members. The cohort nature of the Christian Leadership program becomes a model for dealing with organizations, councils, and committees. Students assess the specific leadership needs for their own context.

CHL 432: Leadership Theory and Praxis 3 credits
Definitions of leadership are explored and various models and styles for leadership are identified. Students assess their own skill sets, learn new ones, and develop strategies for being a more effective leader in various contexts. The influence of values on decision-making is examined. Students compare their own skills with the needs of their context identified in CHL 430.

CHL 434*: Research Methodology 3 credits
This course helps students identify problems, review related literature, collect data, and measure objectives in their vocational environment. Students develop their analytical skills and apply them through quantitative or qualitative research methods in generating their final research projects. Specific quantitative tools are introduced. Qualitative tools will be emphasized, such as case methods, verbatim reports, incident reports, process notes, and journaling. These will reinforce the importance of theological reflection and mentoring. Mentors help students to identify problems and issues related to their project. An intensive writing course.

CHL 435: Biblical Leadership 3 credits
Leaders in the Bible, including Old and New Testament examples, form the basis for exploring models of biblical leadership. Students will learn valuable lessons from the struggles and successes of significant men and women in the Bible. Students will propose their own leadership project, which they will develop in CHL 445 and complete in CHL 450.

CHL 436: Leadership for Ministry 3 credits
Students will become familiar with the administrative skills necessary for more effectively leading a successful organization. Students explore management of systems, resource, and time, as well as learn to network and to understand change and transition.

CHL 438: Spiritual Formation of Leaders 3 credits
This course examines the spiritual and Biblical understanding and preparation necessary for effective Christian Leadership. Attention is given to spiritual formation of self and groups, articulation of vision, exploration of call to vocation and position.

CHL 442: The Leader as Coach and Mentor 3 credits
Coaching and mentoring are important dimensions of effective leadership. This course will reinforce the personal leadership effectiveness of the students by helping them to improve the personal, interpersonal and leadership effectiveness of those with whom they work. Students will build on the foundations of servant leadership and mutual accountability as they identify potential team-building experiences and persons to begin to mentor.

CHL 444: Ethical Challenges for the Christian Leader 3 credits
Specific ethical issues will be raised which students will examine how their Christian values influence their actions and decisions as they live out their faith in their vocations and positions. After an introduction to Christian ethics, issues are investigated through the use of case studies.

CHL 445: Life Management Issues 3 credits
Students learn valuable lessons in how to balance the time and energy constraints of school, family, ministry, job, and crisis in order to more effectively lead in Christian vocational or

*Campus/Off-site only | *Writing-intensive course | *Fulfills General Education requirement |
avocational ministry. Development of a plan for completing the Professional Project will be included in the study as it relates to maintaining balance in the face of mounting obligations. Prerequisite: CHL 435.

CHL 446: Issues in Counseling 3 credits
This course is an introduction to counseling. Specific personal, social and psychological issues will be discussed. Appropriate use of networks and referral to trained resource professionals will be explored. Limitations and implications of counseling for untrained practitioners are stressed.

CHL 448: Leadership in Global Community 3 credits
Christian values in a global community provide a forum for interdisciplinary examination of ethics, community, and the environment, as well as possibilities for cross-cultural leadership development. The course will help students develop the framework for practicing global citizenship, as well as allow the students the opportunity for informed dialogue concerning the nature of leadership in other cultures.

CHL 450: Professional Project 3 credits
This capstone course requires students to implement theories and concepts in individual projects related to leadership in their vocational or avocation organizational contexts. A presentation of the project initiated in CHL 434 is submitted in a written document and as a presentation made to the cohort as partial completion of the requirement of the Christian Leadership program. Prerequisites: CHL 435 and CHL 445.

CHL 465: Christian Leadership in the 21st Century 4 credits
This course is an examination of Christian leadership with an emphasis on ethics, community, the environment, and the intricacies of cross-cultural leadership. The course helps students identify administrative skills necessary for leading a successful organization, examine how their Christian values influence their actions and decisions as they live out their faith in their vocations and positions, develop a framework for practicing global citizenship, and initiate an informed dialogue concerning the nature of leadership in other cultures and in diverse situations. Prerequisites: BIB 351, BIB 354,MIN 350, and HTH 469.

Chemistry (CHM)

CHM 101: Introduction to General, Organic, and Biochemistry 3 credits
An introduction to the principles of chemistry; designed for students without a strong background in science. Topics covered include a survey of the chemical and physical properties of elements and compounds, chemical reactions, chemical energetics, acids and bases, and chemical bonding. An introduction to organic and biochemistry emphasizes the relationship between molecular structure and function. Co-requisite: CHM 101L.

CHM 101L: Introduction to General, Organic, and Biochemistry: Lab 1 credit
This lab course is designed to complement and support the principles being addressed in CHM 101. Students learn basic lab techniques related to general and organic chemistry, building upon and strengthening foundational knowledge such as stoichiometry and reaction types. Additionally, some topics are addressed from a biochemical standpoint to highlight application to daily living. Co-requisite: CHM 101.

CHM 103: Chemistry Lab Safety 3 credits
The chemistry laboratory safety course is designed to emphasize proper principles and procedures related to safety in the science labs and classrooms. This course outlines the correct procedures for labeling, storing and disposing of chemicals and related materials. Emphasis is placed on the Occupational Safety and Health Administration (OSHA) and Materials Safety Data Sheet (MSDS) standards and regulations.

CHM 105: Introductory Studies in the History of Chemistry 3 credits
Introductory studies in the history of chemistry emphasize the importance of significant events, theories and individuals in the development of chemistry. This course will analyze the impact of chemistry and technology on society along with ethical considerations or viewpoints related to current events.

CHM 113: General Chemistry I 3 credits
This is the first course of a two-semester introduction to chemistry intended for undergraduates pursuing careers in the health professions and others desiring a firm foundation in chemistry. The course assumes no prior knowledge of chemistry and begins with basic concepts. Topics include an introduction to the scientific method, dimensional analysis, atomic structure, nomenclature, stoichiometry and chemical reactions, the gas laws, thermodynamics, chemical bonding, and properties of solutions. Prerequisites: MAT 250 or college algebra. Co-requisite: CHM 113L.
CHM 113L: General Chemistry I: Lab 1 credit
The laboratory section of CHM 113 reinforces and expands learning of principles introduced in the lecture course. Experiments include determination of density, classification of chemical reactions, titrations, the gas laws, determination of enthalpy change using calorimetry, determination of empirical formula, and freezing point depression. Prerequisite: MAT 250 or college algebra. Co-requisite: CHM 113.

CHM 115: General Chemistry II 3 credits
This is the second course of a two-semester introduction to chemistry intended for undergraduates pursuing careers in the health professions and others desiring a firm foundation in chemistry. Upon successful completion of this course, students demonstrate knowledge and/or skill in solving problems involving the principles of chemical kinetics, chemical equilibrium, and thermodynamics; understanding chemical reactions using kinetics, equilibrium, and thermodynamics; comparing and contrasting the principal theories of acids and bases; solving equilibrium involving acids, bases, and buffers; describing solubility equilibrium; describing terms associated with electrochemistry and solving problems associated with electrochemistry; and describing fundamentals and applications of nuclear chemistry and organic chemistry. Prerequisite: CHM 113. Co-requisite: CHM 115L.

CHM 115L: General Chemistry II: Lab 1 credit
The laboratory section of CHM 115 reinforces and expands learning of principles introduced in the lecture course. Experiments include preparation of an alkene from an alcohol, a Grignard reaction, preparation of cinnamaldehyde, nitration of methyl benzoate, synthesis of N-Methyl Prozac, an Aldol reaction, Benzimidazole synthesis, and a Diazonium coupling reaction. Prerequisite: CHM 113L. Co-requisite: CHM 115.

CHM 153: Chemistry Laboratory Equipment, Setup, and Use 3 credits
The chemistry laboratory equipment setup and use course (on campus 1 week – 40 hours) is designed to give students hands-on experience in performing chemistry experiments in the classroom. The course emphasizes proper application and handling of laboratory equipment in a classroom setting. Application of safety principles and procedures will be reinforced. Prerequisite: CHM 103.

CHM 331: Organic Chemistry I 3 credits
This course is the first of two organic chemistry courses. The first half of this course develops the vocabulary and concepts of chemical bonding, chemical structure, acid-base principles, and nomenclature needed to understand properties and reactions of organic compounds. The second half of this course discusses chemical reactions, including radical reactions, substitution and elimination reactions, and synthesis and reactions of alkenes. Students learn how to predict reaction products and draw reaction mechanisms. Organic synthesis and structural determination are also covered. Instruction includes lecture and in-class problem solving. Prerequisite: CHM 115. Co-requisite: CHM 331L.

CHM 331L: Organic Chemistry I: Lab 1 credit
The laboratory section of CHM 331 reinforces principles learned in the lecture course through various techniques that organic chemists use to synthesize compounds. Students use these techniques throughout the semester. These techniques include determination of melting point, determination of solubility, thin layer chromatography, recrystallization, and distillation. Structural determination using theories discussed in CHM 331 is applied to unknown compounds. Prerequisite: CHM 115L. Co-requisite: CHM 331.

CHM 332: Organic Chemistry II 3 credits
This course is the second of two organic chemistry courses. The course is organized by common organic functional groups, including alkynes, alcohols, ether, aromatic compounds, ketones and aldehydes, amines, carboxylic acid, and carboxylic acid derivatives. The reactions and properties of each functional group are discussed. Students learn how to predict reaction products, draw reaction mechanisms, and predict physical properties. Instruction includes lecture and in-class problem solving. The final assignment for the course is a paper that describes the synthesis of a popular pharmaceutical agent. Prerequisite: CHM 331. Co-requisite: CHM 332L.

CHM 332L: Organic Chemistry II: Lab 1 credit
The laboratory section of CHM 332 supports and extends principles learned in the lecture course. Students carry out various organic syntheses using techniques taught in CHM 331. The experiments include preparation of an alkene from an alcohol, a Grignard reaction, preparation of cinnamaldehyde, nitration of methyl benzoate, synthesis of N-Methyl Prozac, an Aldol reaction, Benzimidazole synthesis, and a Diazonium coupling reaction. Prerequisite: CHM 331L. Co-requisite: CHM 332.

CHM 360: Principles of Biochemistry 3 credits
The course objective is to survey basic biochemical principles, including the composition, structure, and function of proteins, nucleic acids, lipids, and carbohydrates. Important biochemical principles include structure-function correlation, chemical reactivity, kinetics and equilibrium, thermodynamics, membrane structure and function, and metabolic energy pathways. The application of biochemical concepts in the medical field is emphasized. Prerequisite: CHM 332. Co-requisite: One of the following: 1) none; or 2) CHM 360L.

CHM 360L: Principles of Biochemistry Lab 1 credit
This laboratory course covers modern biochemical laboratory techniques and their theoretical foundations. Topics include methods for protein, nucleic acid, and lipid isolation and characterization; enzyme assays; chromatography; electrophoresis; and representing and manipulating proteins and nucleic acids. Experiments are designed for hands-on experimentation and students acquire practical techniques currently used in biochemistry laboratories. Prerequisite: CHM 332L. Co-requisite: CHM 360.

**Computer Information Systems (CIS)**

Basic studies of applications of electronic data processing. Students may select from one-hour modules to meet their objectives. Modules include, but are not limited to:

- Word Processing
- Beginning Spreadsheet
- Beginning Database
- Desktop Publishing
- Intermediate Spreadsheet
- Intermediate Word Processing
- Introduction to the Internet
- Accounting Applications
- Presentation Graphics

In this course, students examine the role of security policies, standards and procedures in addressing business and technical risks. Using this framework, students develop a security governance report to evaluate compliance across the enterprise.

In this writing-intensive course, students learn storytelling for the screen through a managed regimen of in-class and out-of-class experiences that emphasize the essential mix of imagination and craft in writing. They hone their skills in observation, communication, and visualization, and receive instruction on structure for screenwriting and how to employ written language to articulate dramatic and visual expression.

In this course, students transform high-level policies and procedures into quantifiable and measurable controls and mechanisms that enforce data and process integrity, availability and confidentiality.

In this course, students identify and analyze the nature of security incidents, the source of potential threats and the methods used in incident management and mitigation. Students also evaluate technical and business issues which affect the actions of the enterprise in responding to a security incident.

This course is a study of media history and theory with an emphasis on the implications and impact of mass messages on meaning, culture, and society.

This course presents the history of visual art and its connection and influence on modern media. Students gain an artistic vocabulary by becoming familiar with many kinds of visual art, developing their skills in visual analysis, increasing their understanding of aesthetic theory, and applying that understanding in course presentations.

This basic course in oral communication uses focused content to practice the principles of effective oral presentation. The lectures, speaking assignments, and all written work will acquaint the student with the theory, practice, and necessary technological literacy required for effective message building and presentation.

This course is a study of the theory and practice of communication as it relates to influencing attitude and behavioral change. The course begins by presenting a historical overview of persuasive
theory from its classical beginnings and progresses to analyzing persuasive strategies and their use by contemporary practitioners. Examples for analysis are taken from advertising, public relations, religion, sales, politics, and propaganda.

COM 260: Introduction to Digital Media Production 3 credits
Introduction to the theory, process, and procedure of electronic media production. Lecture and lab. Lab fee required.

COM 300: Writing for the Media 3 credits
Students study the content, styles, and formats of media writing. The course emphasizes the differences in writing across diverse media modalities.

COM 302: Writing for the Media 4 credits
This course is a study of the content, styles, and formats of media writing, with an emphasis on the differences in writing across diverse media modalities.

COM 310: Principles of Public Relations 3 credits
An overview of theory and practice of public relations, media relations, promotion, research, and campaigns. An application of theory through problem solving and case study. Prerequisite: Junior or senior status or instructor’s approval.

COM 311: Principles of Public Relations 4 credits
This course presents an overview of the theory and practice of public relations, media relations, promotion, research, and campaigns, as well as an application of theory, through problem solving and case study.

COM 314*: Intercultural Communication 3 credits
This course creates an awareness of the skills necessary to promote positive communication and relationships across cultural differences. Students will explore verbal and non-verbal communication behaviors. Other cultures are explored through an examination of demographics, family structure, religion, politics, education, social life, art, and literature. A Writing-Intensive course. Prerequisite: Junior or senior status or instructor’s approval.

COM 315: Intercultural Communications 4 credits
This course creates an awareness of the skills necessary to promote positive communication and relationships across cultural differences. Students explore verbal and nonverbal communication behaviors. Other cultures are explored through an examination of demographics, family structure, religion, politics, education, social life, art, and literature.

COM 320: Public Relations Writing and Design 3 credits
The study of planning, producing, and evaluating written public relations messages for and from a variety of media including print, broadcast, and the web. Student writing assignments include news releases. Newsletters, public service announcements, coverage memos, position papers, background papers, brochures, and reports and proposals.

COM 321: Public Relations Writing and Design 4 credits
This course is a study of planning, producing, and evaluating written public relations messages for and from a variety of media, including print, broadcast, and the Web. Student writing assignments include news releases, newsletters, public service announcements, coverage memos, position papers, background papers, reports, and proposals.

COM 330: Visual Media and Storytelling 3 credits
This course focuses on the elements the make up almost all storytelling. Each student is encouraged to discover and develop their unique voice as a writer and storyteller, while understanding the critical importance of working as part of a creative team. This course emphasizes the use of traditional storytelling, classic mythology and how these devices apply to contemporary media.

COM 331: Visual Media and Storytelling 4 credits
This course focuses on the elements that make up almost all storytelling. Students are encouraged to discover and develop their unique voices as writers and storytellers, while understanding the critical importance of working as part of a creative team. This course emphasizes the use of traditional storytelling, classic mythology, and the ways in which these devices apply to contemporary media.

COM 435: Consumer Communications and Behavior 4 credits
This course provides an integrated marketing communications perspective for today’s changing world as well as a behavioral science approach that studies distinct buyer strategies and decision-making processes of purchase by consumers. Topics include external and internal influences on today’s buyers, purchase and postpurchase processes, customer satisfaction, customer commitment, branding and positioning, creative strategies, media strategies, distribution strategies, and integrated marketing communications.

COM 340: Screenwriting 3 credits
In the Screenwriting course students learn storytelling for the screen through a managed regimen of in-class and out-of-class experiences that emphasizes the essential mix of imagination and craft in writing. They will hone their skills in observation, communication, and visualization, and receive instruction on structure for screenwriting and how to employ written language to articulate dramatic and visual expression.

COM 350: Cinematography and Set Design 3 credits
This course will be an intensive exploration of the craft, technologies, and aesthetic principles of cinematography, lighting, and set design techniques. Lectures and in-class demonstrations will cover video formats, cameras, exposure, lenses and optics, lighting units, lighting placement, lighting control, camera support, and camera movement. Lab fee required.

COM 400: Current Issues in Communication 3 credits
Special topics and current issues of interest to communication and media students are studied.
COM 410: Effective Ministerial Communications  3 credits
The theory and practice of effective ministerial communications including preaching, writing, and teaching techniques that spread the gospel will be the basis of this course. An application of theory through problem solving and case study of current effective ministerial speakers. The student will learn the tools and preparation needed to communicate with a variety of audiences, to employ creative pedagogy that challenges and engages the audience, and to develop a message that is culturally relevant and biblically accurate.

COM 445: Communication Issues and Critical Thinking  4 credits
This course provides a capstone, or practicum, for the communications student that facilitates the practical application of historical and modern communications styles across modalities in language that is industry-specific. The course emphasizes the ethical and social responsibility of communications in real-world situations.

COM 460: Media Production and Editing  3 credits
This course will follow the general chronology of editing from capture and logging, through editing and effects, to final output of a finished program. The first half of the course will be devoted entirely to a mastery of the editing software. The second half of the course will be devoted to the “why” we cut. Different editing theories will be explored including montage, fast cut, long take, jump cut, etc. Lab fee required.

COM 470: Production Management  3 credits
This course explains how a movie is transformed from a screenplay to the screen. Students will learn how to break down a screenplay, organize a shooting schedule, create a budget, secure locations, find actors, hire crews, and communicate with unions. Students will also learn the art of storyboards by conceptualizing and rendering the drawings that will communicate continuity. Lab fee required.

COM 480: Media Production and Directing  3 credits
This course utilizes techniques of directing, sound editing, lighting, and advanced editing programs. Several practical and written exercises lead to a short digital production. Students will spend time working with actors in front of the camera as well as composing shots to convey a story visually. Lab fee required.

COM 495: Senior Seminar  3 credits
This capstone course examines in depth the concepts of Global Citizenship, Critical Thinking, Effective Communication, and Responsible Leadership, focusing on the ethical and intellectual challenges such concepts evoke for the individual. Students contemplate a values-based view of success, and critically assess the impact their GCU education has had on their future personal and professional lives.

COM 497: Internship  3 credits
An opportunity for students to practice principles learned in their functional area by working in an outside organization under the supervision of a practitioner. Prerequisites: Senior status, admission to Communications program, and instructor’s approval.

Computer Science (CSC)
CSC 105: Introduction to Programming Languages  3 credits
An introduction to higher-level programming languages. Topics include structured programming techniques, algorithm design, problem solving, program coding and program verification.

CSC 205: High Level Programming  3 credits
A continuation of the concepts introduced in CSC 105 to include an in-depth study of a higher-level programming language. Topics include the use of dynamic variables and the pointers required to manipulate them. Prerequisite: CSC 105.

Christian Worldview (CWV)
CWV 101: Foundations of a Christian Worldview  4 credits
A worldview acts like glasses through which one views the world. In this course students explore the big questions that make up a worldview, questions like “Why are we here?” and “What is my purpose?” Students examine how Christians answer these questions and work on exploring their own worldviews, as well as learning how worldview influences one’s perceptions, decision making, and everyday life.

CWV 301: Foundations of a Christian Worldview  4 credits
A worldview acts like glasses through which one views the world. In this course students explore the big questions that make up a worldview, questions like “Why are we here?” and “What is my purpose?” Students examine how Christians answer these questions and work on exploring their own worldviews, as well as learning how worldview influences one’s perceptions, decision making, and everyday life.

Dance (DAN)
DAN 100: Introduction to Ballet Technique  1 credit
This course is an introduction to the techniques of the classical ballet, including alignment, positions, port de bras, and allegro combinations. It includes fundamental concepts, skills, movement vocabulary, and artistic expression specific to ballet.

DAN 101: Introduction to Jazz Technique  1 credit
This course is an introduction to the style, technique, and rhythmic structures of jazz dance with emphasis on increasing movement capabilities and personal expression. It includes fundamental concepts, skills, movement vocabulary, and artistic expression specific to jazz.

DAN 120: Introduction to Modern Technique  1 credit
This course is an introduction to the movement techniques of modern dance. It includes fundamental concepts, skills, movement vocabulary, and artistic expression specific to modern dance.
### DAN 200: Somatics for the Dancer 2 credits
This course is a study of somatic practices in dance. Students explore and discuss issues related to one body practice. Topics include body awareness, alignment, injury prevention, and movement observation.

### DAN 210: Improvisation for Dance 1 credit
This course focuses on creating and developing movement through dance improvisation in solos, duets, and groups. Contact improvisation and partnering, the uses of improvisation in choreography and performance, and the creative process are explored. Students are guided toward finding their own artistic voice through movement, discussion, and writing.

### DAN 230: Dance Ensemble II 1 credit
This course is designed to prepare the student for a performance tour. Through rehearsal, performance, and discussion, students gain proficiency in dance by learning choreography for performance in various dance styles. Prerequisite: Audition.

### DAN 250: Ballet Technique II 1 credit
This technique course is designed to increase skill in classical ballet. It includes intermediate concepts, skills, movement vocabulary, and artistic expression specific to ballet. Prerequisite: DAN 100.

### DAN 260: Jazz Technique II 1 credit
This course is a refinement of beginning skills, with an emphasis on development of technical abilities and performance qualities. It focuses on intermediate concepts, skills, movement vocabulary, and artistic expression specific to jazz. Prerequisite: DAN 101.

### DAN 270: Modern Technique II 1 credit
This course is a refinement of beginning skills with an emphasis on development of technical abilities and performance qualities. It includes intermediate concepts, skills, movement vocabulary, and artistic expression specific to modern dance. Prerequisite: DAN 120.

### DAN 300: Alignment and Pilates for Dance 2 credits
This course addresses issues of strength and alignment for dancers, using Pilates mat exercises. The class addresses areas of strength essential for dancers, focuses on breathing techniques integral to the exercises, and uses the exercises as a means to better understand and improve alignment. The course also addresses how strength and alignment facilitate more ease and efficiency in movement.

### DAN 310: Technology for Dance Educators 3 credits
Students study and utilize a variety of dance technologies, such as computer software, hardware, networking, multimedia, interactive media, and the Internet in order to foster inquiry, collaboration, and interaction in the classroom in order to meet the needs of a diverse student population.

### DAN 315: Dance History I 4 credits
This writing-intensive course is a study of the histories and aesthetic systems of selected world dance traditions emphasizing interconnections between aesthetic practice, religious and social needs, and the impact of cultural convergence on dance.

### DAN 330: Dance Ensemble III 1 credit
This course is designed to prepare the student for a performance tour. Through rehearsal, performance, and discussion, students gain proficiency in dance by learning choreography for performance in various dance styles. Prerequisite: Audition.

### DAN 335: Foundations of Dance and Culture for Diverse Learners 4 credits
Students study the historical, philosophical, and sociological influences that have shaped dance, ethno/world dance, dance education, and the issues faced by educators today, as well as the challenges of the future that await persons now entering the teaching profession. The course also examines the unique learning needs of exceptional students. Emphasis is placed on definitions, etiology, characteristics, and prevalence of various exceptionalities; laws and litigation protecting the rights of students with special needs and their families; current issues affecting persons with special needs; social perceptions, assessment, inclusion, and transition; and basic curriculum accommodations and supportive services for teaching students with special needs in the dance classroom. Practicum hours: 15. Prerequisites: Fingerprint Clearance.

### DAN 340: Dance History II 4 credits
This writing-intensive course is a comprehensive comparative study of dance in the 20th and 21st centuries. The focus is on significant trends and individuals who shaped the development of modern dance, ballet, jazz, and vernacular dance in the modern era.

### DAN 350: Ballet Technique III 1 credit
This course is designed to increase skill in classical ballet technique. It includes advanced concepts, skills, movement vocabulary, and artistic expression specific to ballet. Prerequisite: DAN 250.

### DAN 355: Dance Kinesiology and Injury Prevention 1 credit
This writing-intensive course focuses on the anatomical and mechanical principles that relate to human movement; the analysis, management, and prevention of dance injuries; the analysis of body types and technical ability; and the means by which to improve dance ability. Aspects of teaching safe technique classes and alternative methods will also be explored. Prerequisite: DAN 200.
DAN 360: Jazz Technique III 1 credit
This course is designed to increase skill in jazz technique. It includes advanced concepts, skills, movement vocabulary, and artistic expression specific to jazz. Prerequisite: DAN 260.

DAN 370: Modern Technique III 1 credit
This course focuses on the exercises and activities necessary to develop strength, flexibility, endurance, and technical dance skill. It includes advanced concepts, skills, movement vocabulary, and artistic expression specific to modern dance. Prerequisite: DAN 270.

DAN 385: Choreography I: Space and Time/Design and Dance 2 credits
This course is a study of the elements of time and space, their intrinsic artistic significance, and their significance in organized forms of meaning in dance. The course considers time and space design in the related fields of music and art as relevant to choreographic design and communication in dance. Prerequisite: DAN 210.

DAN 390: Choreography II: Process 2 credits
This course is a study of and experience in various approaches to the choreographic process as related to artistic concepts and to the philosophy of art as espoused by various traditional and contemporary dance artists and as developed by the individual student. Prerequisite: DAN 385.

DAN 395: Dance Production 4 credits
This course is designed to introduce students to the elements of technical theater specific to a dance production and to prepare students to organize a production in a variety of media. The course covers the fundamentals of lighting and costume design; sound/music/video recording and other multimedia devices; and basic elements of production management, such as contracts, labor issues, budgets, facility rentals, marketing and fundraising. Prerequisite: DAN 390.

DAN 397: Dance Methods and Assessment in the Elementary School 4 credits
This course is a study and demonstration of methods and materials for the first six grades. A study is made of activities implemented with each grade level. Lesson plans are prepared. Students visit classrooms to observe teaching situations. Practicum hours: 30. Prerequisite: DAN 390.

DAN 398: Dance Methods and Assessment in the Secondary School 4 credits
This course is a study of methods for developing and conducting the music program in junior and senior high schools. Methods, materials, topics, and issues in music education are used to prepare music education majors to enter the teaching profession. Practicum hours: 30. Prerequisite: DAN 390.

DAN 430: Dance Ensemble IV 1 credit
This course is designed to prepare the student for a performance tour. Through rehearsal, performance, and discussion, students gain proficiency in dance by learning choreography for performance in various dance styles. Prerequisite: Audition.

DAN 450: Dance Pedagogy 2 credits
This course is a supervised experience in choreographing a dance for public performance arranged through a cooperative effort of the student and supervisor. Practicum hours: 10. Prerequisite: DAN 390.

DAN 460: Choreography Practicum 2 credits
This course is a supervised experience in choreographing a dance for public performance arranged through a cooperative effort of the student and supervisor. Practicum hours: 10. Prerequisite: DAN 390.

DAN 480A: Student Teaching: Elementary Dance 6 credits
Teacher candidates are required to fulfill an 8-week internship experience in a classroom with a certified, experienced teacher. The semester includes the opportunity to improve skills in classroom management, assessment, and professional preparation, and to utilize applicable content standards, Arizona Professional Teacher’s Standards, and Interstate New Teacher Assessment and Support Consortium Standards within the classroom. All paperwork for student teaching must be submitted by the due date the semester prior to student teaching. Prerequisites for A: One of the following combinations: 1) Successful completion of all courses in the Program of Study, a 2.8 GPA, and approval and placement by the Office of Field Experience and Certification; or 2) Successful completion of all courses in POS and content area; senior status; a 2.8 GPA; successful completion of state mandated basic skills and content area exams or Praxis II® (Basic Skills) and Praxis II® (Content Area); Arizona residents will be required to take the Arizona Educator Proficiency Assessments.

DAN 480B: Student Teaching: Secondary Dance 6 credits
Teacher candidates are required to fulfill an 8-week internship experience in a classroom with a certified, experienced teacher. The semester includes the opportunity to improve skills in classroom management, assessment and professional preparation, and curriculum development, and to utilize applicable content standards, Arizona Professional Teacher’s Standards, and Interstate New Teacher Assessment and Support Consortium Standards within the classroom. Prerequisites: One of the following combinations: Successful completion of all courses in the Program of Study, a 2.8 GPA, and approval and placement by the Office of Field Experience and Certification; or 2) Successful completion of all courses in POS and content area; senior status; a 2.8 GPA; successful completion of state mandated basic skills and content area exams or Praxis I® (Basic Skills) and Praxis II® (Content Area); and approval and placement by Office of Field Experience. Arizona residents will be required to take the Arizona Educator Proficiency Assessments (AEPA). All paperwork for student teaching must be submitted by the due date the semester prior to student teaching.
Digital Film and Production (DFP)

**DFP 101: Introduction to Cinema: History and Aesthetics** 4 credits
This course covers multiple eras and movements throughout the age of film.

**DFP 111: Digital Video Production I** 4 credits
This course introduces students to the technical and aesthetic aspects of small format digital production as well as the basic principles of motion picture production. Students learn the language of film/digital video and how its manipulation can express one’s individual message or purpose.

**DFP 113: Film Financing, Budgeting, and Distribution** 4 credits
This course is an intense overview of the entire process beyond the creation of a production. Students review film financing, contracting, budgeting, insurance, etc.

**DFP 115: Acting for the Camera** 4 credits
This introductory course helps digital film production students to develop skills and gain experience in acting and directing for the camera. Students participate on both sides of the camera. Course sessions include lecture, practical exercises, and preparation for analyzing and blocking a scene and working on a set. Students screen selected film clips to evaluate performances, explore methods to prepare for an audition, discuss the actor/director relationship, and examine the professional requirements of relating to a crew.

**DFP 223: Cinematography** 4 credits
This course will be an intensive exploration of the craft, technologies, and aesthetic principles of cinematography, lighting, and set design techniques. Lectures and in-class demonstrations cover video formats, cameras, exposure, lenses and optics, lighting units, lighting placement, lighting control, camera support, and camera movement.

**DFP 225: Nonlinear Editing** 4 credits
This course follows the general chronology of editing from capture and logging, through editing and effects, to final output of a finished program. The first half of the course is devoted entirely to a mastery of the editing software. The second half of the course is devoted to examining how and why editing is important. Different editing theories are explored, including montage, fast cut, long take, jump cut, and others. Lab fee required.

**DFP 227: Audio Production and Design** 4 credits
This course is an interactive exploration and implementation of audio production for cinema, including multimodal and theoretical approaches.

**DFP 311: Cinema Directing** 4 credits
This course utilizes techniques of directing, sound editing, lighting, and advanced editing programs. Several practical and written exercises lead to a short digital production. Students spend time working with actors in front of the camera as well as composing shots to convey a story visually.

**DFP 345: Entertainment Union and Guilds** 4 credits
Students learn the impact, use, and history of entertainment guilds and unions. The course also covers value, membership requirements, and alternative opportunities outside of the union system.

**DFP 361: Music Video/Documentary Production** 4 credits
This course is a survey of music video and documentary productions. Students study, analyze, and implement techniques in both types of productions. Prerequisite: DFP 311.

**DFP 451: Digital Production II** 4 credits
This course exposes students to every aspect of media production. Students also learn how to work well in a team environment and to adhere to deadlines, time constraints, and medium limitations. Prerequisite: DFP 111.

**DFP 455: Advanced Digital Post-Production** 4 credits
This class is about developing students’ understanding of the art of cinematic storytelling and montage and exposing them to the cueing, performing, and editing of Foley and Automated Dialogue Replacement. Students work on more advanced projects integrated into the class as a means of mastering advanced editing tools and techniques. Prerequisite: DFP 225.

**DFP 457**: Screenwriting II 4 credits
Students in this writing-intensive course study, analyze, and implement advanced techniques in creating cinema screenplays. This course emphasizes the use of traditional storytelling and classic mythology, and how these devices apply to contemporary screenplays. Prerequisite: COM 221.

**DFP 463: Adapting Media to Screenplays** 4 credits
Students learn to adapt various forms of media to screenplays. Prerequisite: DFP 457.

**DFP 470: Screenwriting Capstone** 4 credits
Students participate in individually writing a full-length feature film. They also explore all aspects of structure, character, settings, theme, obstacle, and expressive writing storytelling. Prerequisites: DFP 457 and DFP 463.

**DFP 480: Digital Production Practicum** 4 credits
This practicum provides students with the foundation and practice in digital production. Students learn how to use different media forms to express creativity and ideas. The course goal is to teach students to analyze a script by identifying character objectives, through-lines, key facts, circumstances, and emotional events while transferring that to an on-set production experience. The

---

*Campus/Off-site only | Writing-intensive course | Fulfills General Education requirement |
course focuses on the process and completion of a short production piece. Prerequisite: DFP 451.

Design Studio (DGN)

DGN 205: Introduction to 3D Animation 3 credits
This is an introductory course on the creation of elements for 3D animation using industry standard Maya software. Students will be introduced to the entire production pipeline of 3D animation: modeling, texturing, rigging, lighting, and rendering. Coursework is a combination of lecture, critique, and lab work. Maya software is required for the online course.

DGN 210: Introduction to 3D Animation 4 credits
This is an introductory course exploring 3D computer graphics using industry standard Maya software. Students research the history of computer graphics and the different media formats where 3D characters, objects, and sets are used. Students are introduced to the entire production pipeline of 3D animation, including modeling, texturing, rigging, lighting, and rendering. Coursework is a combination of lecture, critique, and lab work. Maya software is required for the online course.

DGN 220: Graphic Design I 4 credits
This is an introductory course in the study of the primary elements and principles of design, type, and imagery, and their application to graphic design problems. The course includes the development of logos, type, poster, and book design using page layout. Coursework is a combination of lecture and lab work. Students complete work both by hand and with technology. Adobe Creative Suite (Photoshop, Illustrator, and InDesign) or equivalent is required for the online course.

DGN 223: Advertising Design 3 credits
An overview of skills needed to develop successful advertising campaigns. Coursework is a combination of lecture and lab work.

DGN 230: Web Design 4 credits
This course focuses on the development of students’ ability to plan a Web site and develop multiple design solutions for the needs of this media. Students learn the technical and aesthetic skills necessary for basic site creation and maintenance. Emphasis is placed on the student’s ability to keep themselves current with the tools as they change over time. Programs used are industry standard within the design field.

DGN 233: Graphic Design II 3 credits
Intensified study of typography and its use as a communications design tool. Continued study of the use of images, color and texture. Study of paper, ink and bindery methods, and the printing processes. Students will design and execute multiple projects using computer based tools.

DGN 235: Graphic Design IV 3 credits
Studying the tools to convert 2D hand drawings, photos and other references into 3 dimensional elements. Students will understand the terminology, tools and topology that the 3D animation industry uses. There is an emphasis on polygon modeling in hard surface and organic models in Maya for film. Maya software is required for the online course.

DGN 237: Graphic Design III 3 credits
A highly aesthetic and technical class where students bring all design skills together, including typography, illustration, photography, graphics and production planning. Course may be repeated for up to six hours of credit.

DGN 245: 3D Animation 3 credits
Students will learn the 12 principles of animation and apply it to specific animation assignments. Students will learn the process of animating a character in Maya from acting, camera, staging, blocking, and in-betweens to create short 3-second pieces that can be presented in a portfolio or demo reel. Students will also dissect shots from the major animation studios and analyze their work and their peers’ work. Maya software is required for the online course.

DGN 246: 3D Animation for Film 3 credits
A highly aesthetic and technical class in which students bring all design skills together, including preproduction, graphic design, modeling, animation, texturing and rendering. Students will
understand composition, timing and editing to create a short, time-based project. Maya software is required for the online course.

**Dissertation (DIS)**

**DIS 955: Dissertation I** *3 credits*

One of the most essential aspects of bringing research findings to the scholarly community is mastering the discipline of approaching this task in an unbiased, benign manner. This course emphasizes the steps scholars must take in taking their findings and establishing a reporting mechanism that presents the outcomes of the research in a way that clearly articulates the fruits of the researcher’s labors without distracting or misinforming the audience. This work is typically done in chapter 4 of a dissertation. Also included in this content will be the organization of data sets and the application of tables, charts, and graphs.

**DIS 960: Dissertation II** *3 credits*

While chapter 4 focuses on the benign presentation of results, chapter 5 of the dissertation seeks to make sense of these findings in relationship to the overarching body of work that currently exists. Reflections include the synthesis of findings, comparing those findings to previous work done in the area; consideration of issues related to the research process used and the potential challenges and advantages of the approaches used; and thoughts on implications of these findings on the current body of work. In addition to this aforementioned course content, students will learn to present the opportunities for further research that might have emerged as a result of this work and the potential that lies ahead for others to follow. Prerequisite: DIS 955.

**DIS 965: Dissertation III** *3 credits*

This course emphasizes the finalization of the dissertation and provides learners guidance for finding the appropriate venues and approaches in publishing their research findings. This will include the final steps necessary in pulling together what might have been earlier versions of chapters 1, 2, and 3, as well as the proofing and dissertation editing strategies that are required and the steps scholars can take to make sure their results are, in fact, shared with other scholars. This will include an exploration of writing research articles, preparing to present scholarly papers, as well as other publication venues. Prerequisite: DIS 960.

**Early Childhood Education (ECH)**

**ECH 125: Foundations of Early Childhood** *4 credits*

This course covers the fundamental basis of the early childhood field, including historical and philosophical foundations, current practices, ethics, models of teaching, and application in early childhood settings. Practicum hours: 20. Prerequisite: Fingerprint Clearance.

**ECH 135: Child Guidance, Management, and the Environment** *4 credits*

This course includes a beginning analysis of positive classroom environments and school management techniques. Practicum hours: 20. Prerequisite: Fingerprint Clearance.

**ECH 225: Introduction to the Exceptional Learner** *4 credits*

This course explores characteristics and quality practices for typical and atypical behaviors of young children. Practicum hours: 20. Prerequisite: Fingerprint Clearance.

**ECH 235: Child Growth and Development: Health, Safety, Nutrition, and Fitness** *4 credits*

This course explores child growth and development—including health, safety, nutrition, and fitness—by examining the theories and domains associated with early childhood growth. Child, family, cultural, and community relationships are also investigated. Practicum hours: 20. Prerequisite: Fingerprint Clearance.

**ECH 325: Child, Family, Community, and Culture** *4 credits*

This course covers historical foundations, theories, and models of child development that specifically address diversity, multicultural assimilations, and human change. No Fingerprint Clearance necessary.

**ECH 335: Instructional Teaching Methodologies: Language, Math, Science, Social Studies, and the Arts** *4 credits*

This course examines instructional methodologies for teaching young children, with a specific emphasis on language, math, science, social studies, and the arts. Practicum hours: 20. Prerequisite: Fingerprint Clearance.

**ECH 425: Early Literacy Development** *4 credits*

This course looks at research in language and literacy development, with an emphasis on effective strategies (such as phonemic awareness and decoding) in ages birth through 8 years. No Fingerprint Clearance necessary.

**ECH 435: Developmental and Functional Assessment: Birth to Age 8** *4 credits*

This course leads the teacher through the process of assessing, monitoring, and reporting the progress of young children.

**ECH 480: Student Teaching: Birth to Pre-School** *6 credits*

Teacher candidates are required to fulfill a 16-week internship experience in a classroom with a certified, experienced teacher. The semester includes the opportunity to improve skills in classroom management, assessment, and professional preparation, and to utilize applicable content standards, Arizona Professional Teacher’s Standards, and Interstate New Teacher Assessment and Support Consortium Standards within the classroom. Prerequisites: Successful completion of all courses in POS and content area; senior status; a 2.8 GPA; successful completion of state mandated basic skills and content area exams or Praxis I* (Basic Skills) and Praxis II* (Content Area); and approval and

*Campus/Off-site only | *Writing-intensive course | *Fulfills General Education requirement |
place. Teacher candidates are required to complete their internship experiences in a K-3 classroom. Prerequisite: ECH 680.

ECH 685: Student Teaching: Birth to Pre-School 6 credits
This course is a continuation of ECH 680, but teacher candidates are required to complete their internship experiences in a K-3 classroom. Prerequisite: ECH 680.

Economics (ECN)

ECN 211: Microeconomic Principles 3 credits
An introduction to the basic micro economic concepts of supply and demand, consumer choice, elasticity of demand, costs of production, market structures, and the social costs of economic activity. Prerequisite: MAT 120 or equivalent. Micro Economics is a prerequisite for Macro Economics.

ECN 212: Macroeconomic Principles 3 credits
An introduction to basic macro economic concepts including measures of national output, national income accounting, unemployment, inflation, money and banking, and fiscal and monetary policy. Prerequisite: ECN 202, ECN 211, or equivalent.

ECN 220: Introduction to Economics 4 credits
The course covers microeconomic topics, macroeconomic topics, and international economics topics. Microeconomic topics include the nature and method of economics, supply and demand, utility, and supply and demand elasticities. Macroeconomic topics include the measurement of national output, factors that impact output, other means of measuring national wealth and economic well-being, unemployment, inflation, GDP accounting, and business cycles. While the focus of this course is primarily on the U.S. economy, some comparative economic analysis will be covered. In addition, select topics related to international trade and finance are introduced.

*Campus/Off-site only | Writing-intensive course | Fulfills General Education requirement |
ECN 360: Intermediate Economics  4 credits

This course focuses on microeconomic principles and techniques of analysis from the perspective of the firm and the study of the national economy. Topics include the costs of production, market structures, profit maximization, regulation and deregulation of business, labor markets, GDP and measures of economic well-being, national income accounting, the effects of business cycles, an overview of fiscal, monetary and supply side policies, and role of money, banks, and the Federal Reserve System in the United States. Prerequisite: ECN 220.

ECN 363: Money and Banking  3 credits

A general survey of financial institutions, the Federal Reserve System, the qualities of a sound monetary system, the theory and value of money, deposit insurance, and foreign exchange. Prerequisite: ECN 201 or ECN 212 and FIN 301.

ECN 407: Managerial Economics  3 credits

This course studies those aspects of economics that enable managers to make profitable business decisions and maximize the value of their firms. Specific topics include supply and demand, sources of competitive advantage, pricing and production decisions, and the effects of social, political and technological factors on the decision-making process.

ECN 425: International Trade and Finance  3 credits

An overview of the international economy including the motivation for trade, trade patterns, barriers to trade, protectionist policies, exchange rates, foreign exchange markets, and exchange rate interventions. The evolving role and relevancy of such global institutions as the IMF, WTO, and World Bank are also examined. Prerequisites: ECN 201 or ECN 212; and FIN 301.

ECN 450: International Trade and Finance  4 credits

This course provides a study of interrelationships between the international monetary environment and financial planning for corporations with overseas operations. The topics covered include the international monetary system, the foreign exchange market, managing exchange exposure, political risk management, import/export financing, and international performance evaluation. Prerequisites: FIN 350 and ECN 360.

ECN 601: Economics  4 credits

The first half of this course covers those aspects of economics that are particularly applicable to business decision making. Topics include demand and cost estimation, production decisions, pricing, analysis at competitive market structures, and antitrust. The second half of this course focuses on the world economy and the global environment within which business must operate. Topics include currency markets and exchange rates, balance of payments accounts, international monetary regimes, and international banking.

ECN 607: Managerial Economics  3 credits

This course explores microeconomic principles and techniques of analysis for managerial decision-making. Topics include demand analysis, production planning, and product pricing. Prerequisite: MKT501 or its equivalent.

ECN 630: Growth Strategy Through Merger and Acquisition  4 credits

This course examines the opportunities and challenges inherent in mergers, acquisitions, partnerships, and other types of strategic alliances. There is a focus on financial viability and integration issues involved in merger and acquisition activities. Students learn to critically analyze costs, risks, and potential gains of such growth strategies. Organic growth strategies are presented along with a framework for determining when and where to pursue organic versus external growth options. Predatory versus collaborative growth strategies are also examined.

ECN 638: Growth Strategies  3 credits

This course examines the opportunities and challenges inherent in mergers, acquisitions, partnerships, and other types of strategic alliances. There is a focus on financial viability and integration issues involved in merger and acquisition activities. Students learn to critically analyze costs, risks, and potential gains of such growth strategies. Organic growth strategies will be presented along with a framework for determining when and where to pursue organic versus external growth options. Predatory versus collaborative growth strategies are also examined.

Education Administration (EDA)

EDA 530: Educational Leadership  3 credits

Upon completion of this course, educational leaders will possess an understanding of the complexity of being a leader, ranging from development of a vision for systemic change to demonstrating practical skills ensuring smooth day-to-day operations. This course meets the Interstate School Leaders Licensure Consortium (ISLLC) Standard #2.

EDA 531: Organizational Theory  3 credits

This course provides a new paradigm for the school leader to apply the fundamental concepts of organizational theories and models to educational enterprises. This course meets the Interstate School Leaders Licensure Consortium (ISLLC) Standard #1.

EDA 532: Legal Issues in Education  3 credits

Upon completion of this course, educational leaders will possess an understanding of the legal principles, along with the origin and development of laws governing American schools. This course addresses the Interstate Leaders Licensure Consortium (ISLLC) Standard #6.

EDA 533: Public School Finance  3 credits

Because of the pervasive nature of school finance, this course responds to a portion of each of the six national standards of the Interstate Leaders Licensure Consortium (ISLLC). Upon completion of this course, the student will possess an understanding of the application of school finance topics related to education at the federal, state, and local levels; basic
administrative theories, processes, and techniques; and major challenges in the operation of local schools.

EDA 534: Educational Administration Foundation and Framework 4 credits

This course orients students to the program, the field, and the six Interstate School Leaders Licensure Consortium standards guiding them. It includes an introduction to creating a professional portfolio. This course does not require embedded field experience/practicum hours.

EDA 535: Public School Finance 4 credits

Upon completion of this course, students possess knowledge and understanding of the application of school finance topics related to education at the federal, state, and local levels. The students explore basic administrative theories, processes, and techniques, as well as discuss the major challenges facing them in the daily operation of local schools. In addition, students gain an understanding for the application of financial, organizational, and implementation challenges of integrating technology into the educational community. This course focuses on ISLLC Standards 3 and 6, and requires 15 embedded field experience/practicum hours. Prerequisite: EDA 577.

EDA 540: The Principalship 3 credits

Personnel management in educational organizations includes recruitment, selection, orientation, development, compensation, and evaluations. This course will focus on attracting and retaining a quality workforce in education. This course responds to all six of the Interstate School Leaders Licensure Consortium (ISLLC) Standards.

EDA 541: The Assistant Principalship 3 credits

Assistant principals are educational leaders who have major responsibilities that promote the success of students and their activities. Five important areas will be covered during this course: 1) discipline and student safety, 2) student activities, 3) athletics, 4) student scheduling, and 5) Interstate Leaders Licensure Consortium (ISLLC) Standard #3.

EDA 550: Supervision and Instructional Leadership 3 credits

Because of the pervasive nature of supervision and instructional leadership, this course responds to several of the six national standards of the Interstate School Leaders Licensure Consortium (ISLLC) but will focus on ISLLC Standard #2. Upon completion of this course, the student will possess an understanding for the application of 1) models and theories of supervision, 2) interpersonal and technical skills needed for supervision, and 3) tasks and functions of the supervisor.

EDA 551: Supervision and Instructional Leadership 4 credits

Because of the pervasive nature of supervision and instructional leadership, this course approaches the topic within several arenas of the educational environment. Upon completion of this course, students possess knowledge and understanding for the application of the models and theories of supervision and instructional leadership, the interpersonal and technical skills needed for supervision, and the tasks and functions of the supervisor. In addition, students possess an understanding for the application of financial, organizational, and implementation challenges of integrating technology into the educational community, as well as leadership strategies to integrate technology into the educational community. This course focuses primarily on ISLLC Standard 2 and requires 15 embedded field experience/practicum hours. Prerequisite: EDA 577.

EDA 555: Legal Issues in Education 4 credits

The 21st century school is a complex, ever-changing environment that poses a myriad of challenges to school leadership on a daily basis. This course explores important critical issues currently facing school principals and discusses possible strategies for meeting those issues. Upon completion of this course, educational leaders are able to apply the federal and state laws that govern the operation and conduct of their organization, so that they can achieve their vision and mission without treading upon the constitutional rights and personal freedoms of students and staff. This course addresses the Interstate Leaders Licensure Consortium (ISLLC) Standard 6 and requires 15 embedded field experience/practicum hours. Prerequisite: EDA 577.

EDA 560: Curriculum Development for School Improvement 3 credits

Upon completion of this course, educational leaders will possess the skills to direct, guide, stimulate, and put into effect curriculum changes and alignment. They will also understand the variety of components necessary to build a strong curriculum that will be flexible enough to adapt to a constantly changing world and withstand personal biases. This course responds to a portion of the Interstate Leaders Licensure Consortium (ISLLC) Standard #2.

EDA 561: Curriculum Development for School Improvement 4 credits

Upon completion of this course, educational leaders possess the skills to examine existing curriculum for gaps, strengths, and weaknesses. They also understand the variety of components necessary to build a rigorous curriculum that is also flexible enough to adapt to a constantly changing world and can withstand personal and community bias. The essential elements of curriculum development for school—including improvement by examining goals, beliefs, and current outcomes—are also examined and discussed. In addition, students explore leadership strategies designed to integrate technology into both teaching and learning. This course responds to the Interstate Leaders Licensure Consortium (ISLLC) Standard 2 and requires 20 embedded field experience/practicum hours. Prerequisite: EDA 577.

EDA 570: Action Research in Education Administration 4 credits

This course is designed to provide a theoretical foundation and framework for action research. Special emphasis is placed on an examination of the basic principles of qualitative research methodologies, which will lead to the design and implementation of a peer-supported action research project. The student’s research project will be personalized to his or her school.

*Campus/Off-site only | *Writing-intensive course | *Fulfills General Education requirement |
EDA 575: Educational Leadership in a Changing World  
This course provides a new paradigm for the school leader. Students examine the fundamental concepts of organizational theories and leadership models on a macro level and relate those theories and models to the educational enterprises. Upon completion of this course, educational leaders possess an understanding of the complexity of being a school leader, with experiences ranging from the development of a vision for systemic change to the demonstration of practical skills that work to ensure smooth day-to-day operations of a school. This course is primarily germane to the Interstate School Leaders Licensure Consortium (ISLLC) Standards 1 and 3. This course does not require embedded field experience/practicum hours. Prerequisite: EDA 534.

EDA 577: Data-Driven Decisions for School Improvement  
This course provides participants with a wide range of strategies to facilitate the process of school improvement through evidence-based inquiry. Students utilize systematic processes to describe the existing environment and areas of weaknesses in order to facilitate and promote continuous and sustainable school improvement through innovation and change. This course focuses primarily on ISLLC Standards 1 and 3, and requires 15 embedded field experience/practicum hours. Prerequisites: EDA 534 and EDA 575.

EDA 580: Internship in Educational Administration  
This supervised clinical internship will encourage a cooperative arrangement among the key stakeholders. Upon completion, the candidate will possess an understanding of the complexity of being a leader, ranging from development of a vision for systemic change to demonstrating practical skills ensuring smooth day-to-day operations.

EDA 585: The Principalship  
The job of a principal in today’s PK-12 environment is both complex and demanding. It requires that a person be skilled in the recruitment, selection, orientation, development, compensation, and evaluation of a highly qualified staff, while also seeing to the leadership and management of the educational organization. This course will explore important critical issues currently facing school principals, including the challenge of attracting and retaining a quality work force in education, while also meeting the myriad of district and state policies and laws. This course focuses on all six of the Interstate School Leaders Licensure Consortium (ISLLC) standards and requires 20 embedded field experience/practicum hours. Prerequisites: EDA 534, EDA 575, EDA 577, EDA 555, EDA 535, EDA 551, and EDA 561.

EDA 586A: Internship in Educational Administration I  
This is the first part of a supervised, clinical, 16-week internship that encourages a cooperative arrangement among the key stakeholders. Upon completion, students possess an understanding of the complexity of being leaders, ranging from development of a vision for systemic change to demonstrating practical skills ensuring smooth day-to-day operations. All six ISLLC standards are reviewed. The two parts of this internship require a total of 270 internship hours, split between the A and B sections of the course.

EDA 586B: Internship in Educational Administration II  
This is the second part of a supervised, clinical, 16-week internship that encourages a cooperative arrangement among the key stakeholders. Upon completion, students possess an understanding of the complexity of being leaders, ranging from development of a vision for systemic change to demonstrating practical skills ensuring smooth day-to-day operations. All six ISLLC standards are reviewed. The two parts of this internship require a total of 270 internship hours, split between the A and B sections of the course.

EDA 590: Educational Leadership in Technology  
Upon completion of this course, the student will possess an understanding for the application of 1) financial, organizational, and implementation challenges of integrating technology into the educational community, 2) leadership strategies to integrate technology into the educational community, and 3) effective evaluation and assessment plans of current and future technology integration in the educational community. This course responds to several of the six national standards of the Interstate School Leaders Licensure Consortium (ISLLC) but will focus on the ISLLC Standard #3.

EDA 805: Effective Schools Research  
The aim of this course is to assure that students know and understand the philosophy, core beliefs and values, and findings of the effective school beginning in the late 1960s to the present. In addition, the students will explore the effective schools research, focusing on the correlates of effective schools as they have evolved over the years. Students will learn how this large and growing body of research has come to serve as the foundational work for most of the current models for school improvement as well as most state standards and accountability programs.

EDA 810: Case Studies of Effective Schools  
Students will conduct critical reviews of various case studies of individual schools and school districts that have used the effective schools philosophy and research findings as their framework for school improvement. The course will provide students with the opportunity to examine the research and practice implications of the effective schools research in the context of different school and district types (elementary, middle, secondary, rural, and urban). Prerequisite: EDA 805.

EDA 815: Leadership for Continuous School Improvement  
Educational leaders explore a proven theory of action that will give them the knowledge and skills needed to initiate and sustain a continuous school improvement effort based on the effective schools framework. The course will present and illustrate the steps
and stages necessary to design and deploy a process of continuous school improvement that is research-based and data-driven. The tools needed to support this theory of action will be provided and discussed. Prerequisite: EDA 810.

**EDA 820: Leadership and Sustainable Educational Change**  
3 credits

Schools exist within a nested system that includes the school district and the state in which it resides. The course will focus primarily on the traditional central office roles and functions as well as school board policies that must change in order to support ongoing and continuous school improvement at the individual school level. This course will consider the various change forces that schools and districts are currently confronting. Prerequisite: EDA 815.

**Instructional Leadership (EDL)**

**EDL 805: Training and Collaboration for Learning**  
3 credits

Clearly, instructional leadership today is driven to a great extent by the capacity to lead teaming and collaboration. This course will explore the leadership required to support teaming at all levels. For example, horizontal teams are required in schools today in order to be thoughtful about the instructional leadership decisions that must be made on a consistent basis. This requires strategic grade-level collaboration that helps to ensure horizontal alignment of the curriculum and consistency in instructional practice. Furthermore, vertical collaboration includes teachers and administrators from different levels—perhaps from central office, etc.—all working together toward instituting a more comprehensive implementation of the instructional plan. This exploration will include an examination of Professional Learning Communities and the mechanisms used to make this reform model successful.

**EDL 810: Staff Development and Deep Organizational Learning**  
3 credits

Leaders today must be comprehensively cognizant of the steps they can take to lead deep organizational learning. Specifically, the evolution of brain research, adult learning theory, and the exploration of contemporary conventions on leading learning organizations have given us new insights into the tools we need to help adult learners make their learning organization as thoughtful and forward-thinking as possible. This course will, therefore, explore contemporary leadership strategies associated with adult learning theory and talk about the steps leaders can take to ensure that their school is leading the learning in the most effective way possible.

**EDL 815: Systematic Structures for Innovation and Change**  
3 credits

This course will specifically examine the change process from a systemic standpoint. Clearly, there are a number of sources for innovation, change, and growth in any school. Included in this exploration will be topics related to teacher leadership, the use of collaboration in Professional Learning Communities, and the connection between district-level strategic planning processes and the steps schools can take to lead innovation and change from the building level. Examining the points wherein these systems connect and ultimately emerge represents a major focal point of the course.

**EDL 820: The Systematic Use of Data for Innovation and Change**  
3 credits

Data today clearly drives how we think about school improvement and change. The strategic and appropriate use of data allows us to be much more thoughtful about where we have been, our current levels of progress, and the steps we should take moving forward to continue to influence these most essential results. This course will focus on the leader’s role in identifying the appropriate data sets and the mechanisms that can be put into place to consistently evaluate data streams and be thoughtful about their exploration and deep-level analysis.

**EDL 825: Prevention and Intervention Strategies**  
3 credits

Throughout the instructional leadership program, learners will examine the steps leaders can take to be thoughtful about their instructional planning processes and the influencers on that process. This course focuses on what leaders must do when they identify learning challenges in the system and the steps they must take from an instructional planning standpoint to both prevent learning failure and, at times, intervene in response to failure that is happening within the delivery of the instructional plan. This is an often neglected step in the instructional process, in that schools may develop change initiatives without being thoughtful as to what they will do when a cadre of students are not successful in the process. Preventing learning failure and intervening when those failures emerge is an essential aspect of instructional leadership and will be explored in this course.

**Education (EDU)**

**EDU 183: Exploring Education as a Career**  
3 credits

This course is designed for students who are considering teaching as a profession. By observation and participation, students experience working with children and young people, as well as many of the duties as a teacher. A practicum in K-12 classrooms is required.

**EDU 215: Education Foundations and Framework**  
4 credits

This writing-intensive course provides a study of the historical, philosophical, and sociological influences that have shaped American education; the issues faced by educators today; and the challenges of the future that await people now entering the teaching profession. No Fingerprint Clearance necessary.

**EDU 225: Instructional Technology**  
4 credits

This course provides future teachers the opportunity to examine the use of technology in the 21st century classroom. In addition to studying and utilizing a variety of technologies, such as computer software and hardware, students develop a personal technology philosophy and classroom technology plan designed to enhance and shape their teaching skills and knowledge in order to better utilize emerging technology.

---

*Campus/Off-site only | Writing-intensive course | Fulfills General Education requirement |
This course examines the relationship of cultural values to the formation of self-concept and learning styles. The roles of prejudice, stereotyping, and cultural incompatibilities in education are also evaluated. No Fingerprint Clearance necessary.

**EDU 273N: Children’s Literature** 3 credits

All types of children’s literature from outstanding authors are surveyed through synopses and actual reading of children’s books to acquaint the student with the best stories and poems for use with children. Methods of using these types of literature and the techniques of storytelling are also studied.

**EDU 300: Teaching in a Pluralistic Society: Strategies for Multicultural Teaching** 3 credits

This course introduces students to the major goals, principles, and concepts of multicultural education. Specifically, four central topics will guide the study: 1) clarifying key concepts and terminology; 2) discovering multiple perspectives in culture and history; 3) understanding cultural and individual differences in teaching and learning; 4) becoming a multicultural and effective teacher.

**EDU 303N: Foundations of Education** 3 credits

Students will study the historical, philosophical, and sociological influences which have shaped American education, the issues faced by educators today, and the challenges of the future which await persons now entering the teaching profession. The course is designed for students who have already committed themselves to a career in education or are exploring a career in education and includes a first phase observation in the K-12 classroom. A Writing-Intensive course. No Fingerprint Clearance required.

**EDU 303N: Foundations of Education** 3 credits

Students will study the historical, philosophical, and sociological influences which have shaped American education, the issues faced by educators today, and the challenges of the future which await persons now entering the teaching profession. The course is designed for students who have already committed themselves to a career in education or are exploring a career in education and includes a first phase observation in the K-12 classroom. A Writing-Intensive course. No Fingerprint Clearance required.

**EDU 310: Exploring Education as a Profession** 4 credits

This course is designed to provide an overview of the education profession for students who are inspired to be teachers. Students explore a variety of the common issues, trends, and opportunities that professional educators face in the field. No Fingerprint Clearance necessary.

**EDU 313N: Educational Psychology** 3 credits

This course provides a thematically arranged study of the theories and principles of psychology that have influenced instructional practices. Behavioral and cognitive approaches to learning, motivation, and instruction are explored. Prerequisite: No Fingerprint Clearance required.

**EDU 363N: Instructional Technology** 3 credits

Students will study and utilize a variety of technologies such as computer software, hardware, networking, multimedia, interactive media, and the Internet in order to foster inquiry, collaboration, and interaction in classroom in order to meet the needs of a diverse student population. Prerequisite: Fingerprint Clearance.

**EDU 430N: Classroom Management** 3 credits

Designed to allow the prospective teacher the opportunity to learn techniques involved in the successful management of a learning environment. Major emphasis is given to the establishment of a realistic discipline plan to manage student behavior and management techniques and strategies to maximize instructional time, classroom procedures, and physical space.

**EDU 450: Classroom Engagement and Management** 4 credits

This course is designed to allow prospective teachers the opportunity to learn techniques involved in the successful engagement and management of a learning environment. Major emphasis is given to the establishment of a realistic discipline plan to manage student behavior, as well as engagement and management techniques and strategies to maximize instructional time, classroom procedures, and physical space. Prerequisites: EDU 215 and EDU 230.

**EDU 460N: Dynamics of Data-Driven Pedagogy** 3 credits

This course will provide participants with a wide range of assessment strategies based on instructional outcomes. Emphasis will be given to alignment of educational objectives to standards and building both formative and summative assessments including rubrics to analyze student learning. Course content is strategically planned to enable participants to make informed educational decisions about student learning based on data. This course focuses on the principles and practices involved in various models of educational assessment, evaluation, and testing. Participants will develop and implement their own authentic assessments and evaluate results. Practicum hours – 15. Prerequisites: SED 420N, SED 430N, Fingerprint Clearance.

**EDU 473: Children's Literature** 3 credits

All types of children’s literature from outstanding authors are surveyed through synopses and actual reading of children’s books to acquaint the student with the best stories and poems for use.
with children. Methods of using these types of literature and the
techniques of storytelling are also studied.

EDU 519: The Engaged Mind (Retired) 3 credits
To better understand thinking, an educator must research current
knowledge of the human mind and learn to assess a student’s
ability to think. This course addresses all five core propositions
of the National Board for Professional Teaching Standards (NBPTS).
Prerequisite: EDU 529.

EDU 520: Classroom Management 3 credits
Designed to allow the prospective teacher the opportunity to learn
techniques involved in the successful management of a learning
environment. Major emphasis is given to the establishment of a
realistic discipline plan to manage student behavior and
management techniques and strategies to maximize instructional
time, classroom procedures, and physical space. Prerequisite:
EDU 529.

EDU 520N: Classroom Management 3 credits
Designed to allow the prospective teacher the opportunity to learn
techniques involved in the successful management of a learning
environment. Major emphasis is given to the establishment of a
realistic discipline plan to manage student behavior and
management techniques and strategies to maximize instructional
time, classroom procedures, and physical space.

EDU 521: Current Classroom Methods
and Strategies 3 credits
A growing body of research shows that teacher effectiveness is
the single most important school-based influence on student
achievement. Today’s educator responds to complex and diverse
needs of students in each classroom. This course provides the
foundations for instructional design along with the tools for
instructional planning. The alignment of curriculum standards to
instruction and assessment is a major focus in this course. Upon
completion of this course, the student will have established a wide
repertoire of methods and strategies that are research-based and
easily modified to today’s complex classroom. Prerequisites: EDU
529 and EDU 519.

EDU 523: Advanced Educational Psychology 3 credits
This study of the theories and principles of psychology that
influence education addresses developmental, behavioral, and
cognitive approaches to learning, motivation, instruction, and
assessment.

EDU 529: Foundations and Framework (Retired) 3 credits
This course orients students to the program, the field, and the
National Board for Professional Teaching Standards (NBPTS)
guiding them. It includes an introduction to creating a professional
portfolio. Prerequisite: EDU 529.

EDU 530: Educational Leadership 3 credits
Teachers should possess a repertoire of skills that will enable
them to function comfortable and effectively in a changing
learning environment. The course will provide teachers with an
understanding of the complexity of being a leader in times of
change. Teachers will develop a vision of systemic change and
demonstrate practical skills for ensuring smooth day-to-day
operations within their school.

EDU 532: Legal Issues in Education 3 credits
Teachers need to recognize potential legal issues, make informed
judgments and decisions, and seek administrative and legal
counsel when necessary. This course provides teachers with a
basic understanding of the legal principles directing the American
school system, along with the legal case origins determining
current classroom guidelines. Prerequisite: EDU 529.

EDU 536: Classroom Engagement and
Management 4 credits
This course is designed to allow the prospective teacher the
opportunity to learn techniques involved in the successful
engagement and management of a learning environment. Major
emphasis is given to the establishment of a realistic discipline plan
to manage student behavior, as well as engagement and
management techniques and strategies to maximize instructional
time, classroom procedures, and physical space.

EDU 549N: Dynamics of Data-Driven Pedagogy 3 credits
This course will provide participants with a wide range of
assessment strategies based on instructional outcomes. Emphasis
will be given to alignment of educational objectives to standards
and building both formative and summative assessments including
rubrics to analyze student learning. Course content is strategically
planned to enable participants to make informed educational
decisions about student learning based on data. This course
focuses on the principles and practices involved in various models
of educational assessment, evaluation, and testing. Participants
will develop and implement their own authentic assessments and
evaluate results. Practicum hours – 15. Prerequisite: Fingerprint
Clearance.

EDU 550: Technology Enhanced Instructional
Design 3 credits
The purpose of this course is to introduce students to the
theoretical foundations of technology enhanced instructional
design and the designing and planning of technology enhanced
instruction. This course meets International Society for
Technology in Education (ISTE) Standards and the National
Board of Professional Teaching Standards (NBPTS).
Prerequisites: EDU 529, EDU 519, and EDU 521.

EDU 560: Curriculum Assessment
for School Improvement 3 credits
Upon completion of this course, teachers will possess the skills to
direct, guide, stimulate, and put into effect curriculum changes
and alignment. Educators will also understand the variety of
components necessary to build a strong curriculum that will be
flexible enough to adapt to a constantly changing world. This
course responds to the National Board of Professional Teaching
Standards (NBPTS). Prerequisites: EDU 529, EDU 519, EDU
521, EDU 590, and EDU 530.

<tr>
<td></td>
<td>This course will provide teachers with the theoretical foundation and framework for research in education. Special emphasis is placed on the examination of the basic principles of qualitative research methodologies that lead to the design and implementation of a peer-supported action research project. Prerequisites: EDU 529, EDU 519, and EDU 521.</td>
<td></td>
</tr>
<tr>
<td>EDU 614</td>
<td>Research and Writing</td>
<td>3</td>
</tr>
<tr>
<td></td>
<td>Incorporating active learning principles within a theoretical context will be the essence of the course. The practitioner in the field will have the opportunity to explore one educational problem in-depth and one appropriate research methodology. The problem and methodology will be presented and conducted as a research project.</td>
<td></td>

<tr>
<td>EDU 805</td>
<td>The History and Politics in Higher Education</td>
<td>3</td>
</tr>
<tr>
<td></td>
<td>In order for higher education leaders to make informed decisions, both today and looking into the future, it is essential that leaders establish a working understanding of the history of higher education. This course will explore early conventions and foundational beliefs regarding higher education and attempt to articulate the relationship between these origins and the work that is led in higher institutions today. Furthermore, the historic influence of politics in higher education has served to shape its trajectory and this course explores the leader’s role in managing this factor in relationship to the change process.</td>
<td></td>
</tr>
<tr>
<td>EDU 810</td>
<td>Funding and Budgetary Challenges in Higher Education</td>
<td>3</td>
</tr>
<tr>
<td></td>
<td>This course examines the complex world of funding in higher education. Higher education leaders in private and public institutions must be able to strategically evaluate funding and budgetary challenges and be able to establish systemic responses to the ongoing challenge of comprehensively supporting the needs of the organization. Funding sources in higher education today include Federal Title grants, income from tuition, and the support of alumni groups and various benefactors, just to name a few. Acknowledging the management of these funding resources in relationship to annual budget goals, while simultaneously being faithful to organizational values and beliefs, are the challenges this course will explore.</td>
<td></td>
</tr>
<tr>
<td>EDU 815</td>
<td>Curriculum Leadership and Development in Higher Education</td>
<td>3</td>
</tr>
<tr>
<td></td>
<td>Clearly, higher education leadership is defined to a great extent by the influence on the academic programming. Being cognizant of those factors that influence the instructional program is essential in this process, and this course examines how leaders think about these challenges and the steps they must take to consistently and strategically lead state-of-the-art teaching and learning experiences for the higher education students the leader serves. Consideration for national curriculum standards, labor needs, and other demographic issues that influence this process will also be explored.</td>
<td></td>
</tr>
<tr>
<td>EDU 820</td>
<td>Supervision and Staff Development in Higher Education</td>
<td>3</td>
</tr>
<tr>
<td></td>
<td>This course examines the responsibilities a higher education leader has in supervising and developing the staff connected with the work associated with higher education. Supervision is a process that is made increasingly complex by the legal parameters associated with human resources and the steps that are required in order to provide appropriate levels of feedback throughout the</td>
<td></td>

</tbody>
</table>
supervisory process. The research has made it clear that staff development is an extremely essential aspect to helping an employee be successful on the job, and this course will explore the leader’s role in creating a systemic response to the need to develop the talents and skills of those working in institutions of higher education.

EDU 825: Facilities Management and Continuous Renewal 3 credits

Leaders in higher education must be cognizant of the facility needs that are germane to the work of the institutions they serve. Those facility needs could include the management of the virtual networking hardware and software applications that are the lifeblood of the organization. Leaders must also consider various space options in which to conduct their business, including the maintenance of a campus learning environment and/or consideration of other satellite learning spaces. This course will comprehensively evaluate these challenges and examine the steps a higher education leader must consider in order to thoughtfully meet the needs of the learners and to plan strategically for future programming and administrative applications.

Elementary Education (EED)

EED 323: Curriculum and Methods: Science 3 credits

This course is designed to acquaint the elementary teacher with the curriculum and effective techniques for the teaching of science. The student is involved in planning instruction, employing science programs that are currently being used in the public schools, and using instructional models. This course includes laboratory experiences. Practicum hours – 15. Prerequisites: Fingerprint Clearance, EDU 303 or EDU 313, BIO course with a lab, and a CHM, GLG, or PHY course with a lab. EDU 363 is recommended.

EED 323N: Curriculum and Methods: Science 3 credits

This course is designed to acquaint the elementary teacher with the curriculum and effective techniques for the teaching of science. The student is involved in planning instruction, employing science programs that are currently being used in the public schools, and using instructional models. This course includes laboratory experiences. Practicum hours – 15. Prerequisites: Fingerprint Clearance.

EED 364: Curriculum, Methods, and Assessment: Science and Mathematics 4 credits

This course is designed to acquaint elementary teachers with the curriculum, theory, and effective techniques for the teaching and assessment of science and mathematics. Students are involved in formulation of programs, planning instruction, employing science and mathematics resources and materials that are currently being used in the public schools, and using instructional models. This course includes laboratory experiences. Practicum hours: 20. Prerequisites: Fingerprint Clearance, EDU 215 or EDU 313N; a BIO course with a lab; and a CHM or PHY course with a lab.

EED 403: Curriculum and Methods: Mathematics 3 credits

The student is involved in the formulation of programs for the individual child to teach the theory and practice of elementary mathematics. Utilization of games in the classroom, manipulative materials, and mathematics curriculum in the elementary school are examined. Practicum hours – 15. Prerequisites: Fingerprint Clearance, EDU 303, and EDU 313.

EED 403N: Curriculum and Methods: Mathematics 3 credits

The student is involved in the formulation of programs for the individual child to teach the theory and practice of elementary mathematics. Utilization of games in the classroom, manipulative materials, and mathematics curriculum in the elementary school are examined. Practicum hours – 15. Prerequisites: Fingerprint Clearance, EDU 303N, and EDU 313N.

EED 443: Curriculum and Methods: Literacy: Reading/Language Arts, K-3 3 credits

This is a school-centered practicum (to include decoding) designed to provide prospective teachers with teaching experience in reading over the length of one semester in a regular school classroom. This course will also focus on reading diagnostics, assessments, and strategies implemented with a single elementary student in a site-based reading lab. Practicum hours – 20. Prerequisites: Fingerprint Clearance and EDU 303.

EED 443N: Curriculum and Methods: Literacy: Reading/Language Arts, K-3 3 credits

This is a school-centered practicum (to include decoding) designed to provide prospective teachers with teaching experience in reading over the length of one semester in a regular school classroom. This course will also focus on reading diagnostics, assessments, and strategies implemented with a single elementary student in a site-based reading lab. Practicum hours – 20. Prerequisites: Fingerprint Clearance and EDU 303N.

EED 463: Curriculum and Methods: Social Studies 3 credits

This course is designed to assist the elementary teacher with methods of instruction, unit and daily lesson plan construction, materials and resources available, and current developments in the field. Laboratory experiences will include multicultural classrooms. Practicum hours – 15. Prerequisites: Fingerprint Clearance, EDU 303, EDU 313, and three credits of history.

EED 463N: Curriculum and Methods: Social Studies 3 credits

This course is designed to assist the elementary teacher with methods of instruction, unit and daily lesson plan construction, materials and resources available, and current developments in the field. Laboratory experiences will include multicultural classrooms. Practicum hours – 15. Prerequisites: Fingerprint Clearance, EDU 303N, EDU 313N, and 3 credits of history.

EED 465: Curriculum, Methods and Assessment: Social Studies 4 credits

This course is designed to assist elementary teachers with methods of instruction, unit and daily lesson plan construction, use of literary materials and resources, and developing a coherent,

*Campus/Off-site only | Writing-intensive course | Fulfills General Education requirement |
assessent-based, data-driven program fostering social studies in the classroom. Laboratory experiences include multicultural classrooms. Practicum hours: 20. Prerequisites: Fingerprint Clearance, EDU 215, EDU 313N, and three credits of history.

**EED 470: Curriculum, Methods, and Assessment: Literacy and Language Arts, K-3**  4 credits

This course includes a wide range of literacy and assessment strategies based on instructional outcomes. Course content is strategically planned to enable participants to make informed decisions based on data in literacy and language instruction. This course includes reading diagnostics, assessments, and strategies implemented with a single elementary student in a site-based reading lab. Practicum hours: 20. Prerequisites: Fingerprint Clearance and EDU 215.

**EED 473N: Curriculum and Methods: Literacy: Reading/Language Arts, 4-8**  3 credits

This course is designed to teach and develop a coherent approach to fostering literacy in the classroom. Emphasis is placed on planning lessons in reading comprehension, literature, phonics, writing, oral language, vocabulary, and evaluation of learning. The course includes discourse theory as it pertains to the teaching of reading and writing. Laboratory experiences will include multicultural classrooms. Practicum hours – 15. Prerequisites: Fingerprint Clearance and EDU 303.

**EED 480NA: Student Teaching Session A**  6 credits

Teacher candidates are required to fulfill a 16-week internship experience in a classroom with a certified, experienced teacher. The semester includes seminars in classroom management, assessment, and professional preparation. The student is assigned to an approved school to serve as a student teacher for a semester under the supervision of an experienced teacher. Prerequisites: Successful completion of all courses in POS and content area, senior status, a 2.8 GPA, and approval and placement by Office of Field Placement and Certification. All paperwork for student teaching must be submitted by the due date the semester prior to student teaching.

**EED 480NB: Student Teaching Session B**  6 credits

This session is a continuation of Session A. All paperwork for student teaching must be submitted by the due date the semester prior to student teaching. Prerequisites for B: One of the following combinations: 1) Successful completion of all courses in POS and content area; senior status; a 2.8 GPA; and approval and placement by Office of Field Placement and Certification; or 2) Successful completion of all courses in POS and content area; senior status; a 2.8 GPA; successful completion of state mandated basic skills and content area exams or Praxis I® (Basic Skills) and Praxis II® (Content Area ); and approval and placement by Office of Field Experience; Arizona residents will be required to take the Arizona Educator Proficiency Assessments (AEP).

**EED 503: Curriculum Theory and Methods: Mathematics**  3 credits

This course is designed to acquaint the student with the current research related to the pedagogy of teaching mathematics. Curriculum formulation and implementation along with the utilization of manipulative materials and individualized games in the elementary classroom are addressed. Practicum hours – 15. Prerequisites: Fingerprint Clearance and EDU 570.

**EED 503N: Curriculum Theory and Methods: Mathematics**  3 credits

This course is designed to acquaint the student with the current research related to the pedagogy of teaching mathematics. Curriculum formulation and implementation along with the utilization of manipulative materials and individualized games in the elementary classroom are addressed. Practicum hours – 15. Prerequisites: Fingerprint Clearance and EDU 570.

*Campus/Off-site only | *Writing-intensive course | *Fulfills General Education requirement |
the elementary classroom are addressed. Practicum hours – 15. Prerequisites: Fingerprint Clearance and EDU 570N.

EED 510: Curriculum, Assessment, and Methods: Science and Mathematics 4 credits
This course is designed to acquaint elementary teachers with curriculum and effective techniques for the teaching of science and mathematics. Students are involved in planning instruction, assessment, and employment of science and mathematics programs that are currently being used in public schools and in using instructional models. This course includes laboratory experiences. Practicum hours: 20.

EED 523: Curriculum Theory and Methods: Science 3 credits
This course is designed to acquaint the student with science curriculum and effective techniques for the teaching of science. The student is involved in planning instruction, employing science programs that are currently being used in the public schools, and using research-based instructional models. This course includes laboratory experiences. Practicum hours – 15. Prerequisite: Fingerprint Clearance.

EED 523N: Curriculum Theory and Methods: Science 3 credits
This course is designed to acquaint the elementary teacher with the curriculum and effective techniques for the teaching of science. The student is involved in planning instruction, employing science programs that are currently being used in the public schools, and using instructional models. This course includes laboratory experiences. Practicum hours – 15. Prerequisite: Fingerprint Clearance.

EED 525: Curriculum, Assessment, and Methods: Literacy 4 credits
This course is designed to develop a coherent, research-based program fostering literacy in the classroom. The course includes discourse theory as it pertains to the teaching of reading and writing. Emphasis is placed on planning, assessment, management, and delivery of lessons in reading comprehension, literature, phonics, writing, oral language, vocabulary, and evaluation of learning. Practicum hours: 15.

EED 543: Prescriptive Reading Theory and Practicum 3 credits
The focus of this course is on reading diagnostics, assessments, and strategies implemented with a single elementary student. Emphasis is also given to research-based systematic phonics instruction. Practicum hours – 20. Prerequisite: Fingerprint Clearance.

EED 543N: Prescriptive Reading 3 credits
The focus of this course is on reading diagnostics, assessments, and strategies implemented with elementary students. Emphasis is also given to research-based systematic phonics instruction, as well as assessment and management methods. Practicum hours: 20.

EED 544: Prescriptive Reading and Assessment 4 credits
The focus of this course is on reading diagnostics, assessments, and strategies implemented with elementary students. Emphasis is also given to research-based systematic phonics instruction, as well as assessment and management methods. Practicum hours: 20.

EED 563: Curriculum Theory and Methods: Social Studies 3 credits
This course presents the current research-based curriculum developments and models of effective instruction used in the field. Emphasis is placed on the construction of unit and daily lesson plans, materials and resources with implementation in the elementary classroom. Practicum hours – 15. Prerequisite: Fingerprint Clearance.

EED 563N: Curriculum Theory and Methods: Social Studies 3 credits
This course presents the current research-based curriculum developments and models of effective instruction used in the field. Emphasis is placed on the construction of unit and daily lesson plans, materials and resources with implementation in the elementary classroom. Practicum hours – 15. Prerequisite: Fingerprint Clearance.

EED 565: Integrated Elementary/Middle School Language Arts and Social Studies 3 credits
This course is designed to teach and develop a coherent approach to fostering literacy through the integration of social studies content in the elementary and middle school classroom. Emphasis is placed on the use of reading skills and strategies to help students access social studies content. Curriculum theory related to an integrated approach to teaching and learning is a primary focus.

EED 570: Curriculum, Assessment, and Methods: Social Studies 4 credits
This course presents the current research-based curriculum developments and models of effective instruction and of assessment and management used in the field. Emphasis is placed on the construction of unit and daily lesson plans, materials, and resources with implementation in the elementary classroom. Practicum hours: 15.

EED 573: Curriculum Theory and Methods: Literacy: Reading/Language Arts 3 credits
This course is designed to develop a coherent, research-based program fostering literacy in the classroom. The course includes discourse theory as it pertains to the teaching of reading and writing. Emphasis is placed on planning and delivery of lessons in reading comprehension, literature, phonics, writing, oral language, vocabulary, and evaluation of learning. Practicum hours – 15. Prerequisite: Fingerprint Clearance.
EED 573N: Curriculum Theory and Methods: Literacy: Reading/Language Arts  3 credits
This course is designed to develop a coherent, research-based program fostering literacy in the classroom. The course includes discourse theory as it pertains to the teaching of reading and writing. Emphasis is placed on planning and delivery of lessons in reading comprehension, literature, phonics, writing, oral language, vocabulary, and evaluation of learning. Practicum hours – 15. Prerequisite: Fingerprint Clearance.

EED 580A: Student Teaching Internship: Elementary I  6 credits
Students are required to fulfill an 8-week internship experience in a classroom with a certified teacher. This course must be taken immediately preceding EED 580B Elementary II Student Teaching.

EED 580B: Student Teaching Internship: Elementary II  6 credits
Students are required to fulfill an 8-week internship experience in a classroom with a certified teacher. This course must be taken immediately following the 8-week EED 580A Elementary I Student Teaching.

EED 580NA: Student Teaching Internship: Elementary I  6 credits
Teacher candidates are required to fulfill a 16-week internship experience in a classroom with a certified, experienced teacher. The semester includes the opportunity to improve skills in classroom management, assessment, and professional preparation, and to utilize applicable content standards, Arizona Professional Teacher’s Standards, and Interstate New Teacher Assessment and Support Consortium Standards within the classroom. All paperwork for student teaching must be submitted by the due date the semester prior to student teaching. Prerequisites for A: One of the following combinations: 1) Successful completion of all courses in the Program of Study, a 3.0 GPA, and approval and placement by the Office of Field Placement and Certification; or 2) Successful completion of all courses in POS and content area; senior status; a 3.0 GPA; successful completion of state mandated basic skills and content area exams or Praxis I ® (Basic Skills) and Praxis II ® (Content Area ); and approval and placement by Office of Field Experience; Arizona residents will be required to take the Arizona Educator Proficiency Assessments (AEPA).

EED 580NB: Student Teaching Internship: Elementary II  6 credits
This session is a continuation of Session A. Prerequisite: EED 580NA.

Executive Fire Leadership (EFL)

EFL 620: Organization Theory and Behavior  3 credits
This course examines organizations from a sociological perspective, considering structural issues, inter-organizational phenomena, and interactions between the organization and its environment. Topics include organizational design, organization culture, organization structure, organization learning, and large scale or complex organization change. Course draws heavily upon sociology, systems theory, economics, and anthropology.

EFL 621: Information Systems  3 credits
Fire service leaders require a pragmatic methodology for study, analysis, and planning in order to assist their organization and personnel in adapting to the increasingly complex and rapidly changing world. This course provides the framework for organizational analysis and strategic planning for change, particularly technology-driven change. The course examines the new challenges stemming from increased use of technology and the rapid acceleration in the rate of change.

EFL 622: Public Policy  3 credits
The focus of this course is on how public action takes place, what course(s) of action are available, and the implications, costs, and consequences of those actions. The Fire Service Executive of the future will require a more disciplined understanding of public policy. This course will be especially useful for individuals working in the public sector and will encourage a familiarity with public issues that will be useful for Fire Service Executives in making administrative or policy decisions. Further, this course will enhance the executives’ sense of their own influence—in their work environments, their community, their profession, and in the broader realm of political life at the local, state, and national level.

EFL 623: Community and Human Service Delivery  3 credits
This course examines human services, such as the Fire/EMS services, from theoretical and practical positions. It examines underlying philosophies and values, planning and development of programs and systems, managing these programs and systems, and evaluating and altering them. The course will consider the relevance for receiving these services, e.g., age, ethnicity, sex, family status, and other related factors of the service recipients, as well as the belief systems, sociopolitical concerns, financial and organizational demands, and personal circumstances of the service providers.

EFL 624: Public Sector Finance  3 credits
This advanced introduction to the fundamentals of financial management emphasizes analysis of financial statements, organizational-departmental-divisional cash flows, taxes, the financial environment, bonds and their valuation, stocks and their valuation, and the cost of capital.

EFL 625: Public Sector Ethics  3 credits
This course examines major topics in professional ethics particular to the public sector. Topics include, but are not limited to, the responsibilities of organizations to personnel; the responsibilities of personnel to the employer; the responsibilities of supervisors to personnel and personnel to supervisors; economic issues in economic systems with the primary emphasis on capitalism; and social responsibilities of business, including quality of products or service, truth in advertising, environmental

*Campus/Off-site only | † Writing-intensive course | * Fulfills General Education requirement |
concerns, ethical standards for professionals, and what is involved in moral education.

**EFL 626: Strategic Planning in Fire Science** 3 credits
This course examines and defines the steps, concepts, theory, and value of comprehensive strategic planning. Students will participate in the formulation, financial development, operational management, and evaluation of currently utilized strategic plans and take part in the outline and design of a mock strategic plan.

**EFL 627: Disaster Preparation and Crisis Management** 3 credits
Students will receive the preparation necessary to uniquely manage and make critical decisions regarding a major incident or disaster. The courses focuses on specialized decision-making processes involving analytical methods and information management; interaction with other agencies and effective coordination of roles and efforts within a structured command system offer the crisis manager decisions in an unstructured environment; major events that have happened to the fire service; and how to prepare for the unexpected, including how to be a strong leader dealing with instant life and death decision-making on the emergency scene.

**EFL 628: Environmental Issues and Hazardous Management** 3 credits
Students will learn about Fire Service’s role in protecting the environment from damage; the potential environmental impact of various types of emergency incidents; the roles of various agencies in mitigating incidents that may be hazardous to the environment, including federal, state, and local laws, regulations, and ordinances; and planning, resource management, and other related issues.

**EFL 629: Occupational Health and Safety** 3 credits
This course covers management of an integrated fire service health and safety program; related national and local regulations and standards, medical management, physical fitness development and implementation of safety programs, statistical development and assessment, gaining workforce commitment, including related fire service health and safety issues; an organized approach to assisting the individual and/or organization through the crisis and back to equilibrium; practical approaches to psychology of stress and its relationship to physical well-being for health care professionals; and identifying and understanding stress patterns in relation to balanced living, mental aspects of performance, and mental conditioning.

**EFL 630: Applied Fire Service Research** 4 credits
Preparing the applied research project will allow the student to investigate and research a key issue or problem identified as important to his/her respective organization and the larger fire service in general. This is a capstone course in which the student will be able to translate a great deal of the knowledge and skills gained in the other MSEFSL course work into a comprehensive graduate level research study.

**EFL 631: Legal Aspects of Fire Service** 3 credits
This course discusses rules and regulations governing the fire service and how it affects the government, the fire department, and the community; practical approaches to legal issues that affect managers regarding duties, responsibilities, and authority; and reducing personal and departmental liability, including state-of-the-art standards to maximize safety and efficiency.

**EFL 670: Contemporary Issues in Disaster Preparedness** 3 credits
Provides students with the opportunity to explore several major contemporary issues in crisis management and disaster preparedness. Students will conduct independent research and present their findings on community preparedness, and the leadership and management of contemporary community emergencies and crises. Additionally, students will develop an informed position on a controversial issue and engage in debate with students who have taken the opposing position.

**Emergency Management (EMM)**

**EMM 300: History and Development of Emergency Management** 4 credits
This course provides students with insight into the profession of emergency management, its history, principles, participants, functions, structure, and future. This course includes concepts related to accreditation of emergency management programs, professional associations, and professional credentials.

**EMM 305: Emergency Operations and Techniques** 4 credits
The knowledge and practice gained in this course will provide the emergency manager and first responder with management and supervision skills and techniques that are specific to emergency management and to the agencies employing emergency managers. These skills and techniques of management are necessary for success in the emergency services environment.

**EMM 310: Mitigation Planning** 4 credits
This course examines the processes and principles of mitigation planning for emergency management, the benefits of mitigation, and the development and implementation of appropriate mitigation measures.

**EMM 320: Emergency Management Organization** 3 credits
The student will gain insight into the profession of emergency management, its history, principles, participants, functions, structure, and future. This course includes concepts related to accreditation of emergency management programs, professional associations, and professional credentials.

**EMM 330*: All Hazards Emergency Planning** 3 credits
This course focuses on emergency management planning, types of plans, the major components of the planning process, the hazard assessment process, and the importance of personal disaster planning. A writing-intensive course.

---

*Campus/Off-site only | ^ Writing-intensive course | * Fulfills General Education requirement |
EMM 335: Emergency Management Operations and Techniques 3 credits

The knowledge and practice gained in this course will provide the emergency manager and first responder with management and supervision skills and techniques that are specific to emergency management and to the agencies employing emergency managers. These skills and techniques of management are necessary for success in the emergency services environment.

EMM 340*: Communications for Emergency Management 3 credits

The focus of this course will be on successful interpersonal communication skills, the difference between daily and emergency communication methods, and how to work with the media. A writing-intensive course.

EMM 380: Mitigation Planning in Emergency Management 3 credits

This course examines the process and principles of mitigation planning for emergency management, the benefits of mitigation, and the development and implementation of appropriate mitigation measures.

EMM 410*: Ethical Leadership in Emergency Management 3 credits

This course will provide focus on leadership with an emphasis on guiding and influencing emergency personnel and volunteers in an ethical manner during disasters while providing decision-based leadership.

EMM 415: Disaster Response and Recovery 4 credits

This course addresses disaster recovery and business continuity in public agencies and private companies, an explanation of federal guidelines for government continuity planning, and professional practices for business continuity planning in private companies, as well as how to address and respond to special emergency management issues in disasters, including animal care, special needs populations, and evacuations.

EMM 425: Disaster Recovery and Business Continuation 3 credits

This course addresses disaster recovery and business continuity in public agencies and private companies, an explanation of federal guidelines for government continuity planning, and professional practices for business continuity planning in private companies.

EMM 433*: Research Methodology 3 credits

This course helps students identify problems, review related literature, collect data, and measure objectives in the public safety environment. Students will apply analytical skills to emergency management-related research projects. A writing-intensive course.

EMM 435: Health, Shelter, and Evacuation Issues in Emergency Management 3 credits

This course examines how to address and respond to special emergency management issues in disasters including animal care, special needs populations, and evacuations.

EMM 440: Terrorism’s Impact on Emergency Management 3 credits

An examination of the historical and political impact of terrorism on emergency management including examples of terrorist activity, summary of federal government efforts, and media coverage of terrorism.

EMM 442: Terrorism’s Impact on Emergency Management 4 credits

This course examines the historical and political impact of terrorism on emergency management, including examples of terrorist activity, a summary of federal government efforts, and media coverage of terrorism. Also JUS 442.

EMM 445: Case Studies of Critical Incidents 3 credits

Case studies are utilized through the course to illustrate commonly encountered problems and issues in the management of human-caused and natural disasters. Incidents will be studied for the purpose of learning best practices and for the development of mitigation, response, and recovery plans.

EMM 490: Organizational Development and Change 3 credits

An overview of approaches to organizational development with emphasis in the practical aspects of changing public safety organizations to improve effectiveness.

EMM 495: Senior Capstone 3 credits

Identification of planning, preparation, and completion of a project to solve or research emergency management problems particular to a government, business, health care setting, or educational setting.

EMM 600: Emergency Planning and Management 4 credits

This course is designed to teach students the planning and management processes and the issues involved in large-scale emergencies. The nature of natural and technological risk and emergency are explored via case studies. Public sector roles in contingency planning and response are also assessed.

EMM 605: Economic and Human Issues 4 credits

This course provides an overview of the strategic, political, economic, and human issues encountered in the management of disasters or major traumatic public events. This knowledge gives the emergency manager a realistic view of the issues to expect in a disaster, how to plan accordingly, and how to manage resources and people more effectively in emergency situations.

EMM 610: Law and Legal Issues 4 credits

This course analyzes the federal, state, and local legislation related to emergency management in various types of disasters. Guaranteed rights under the U.S. Constitution and the legal and ethical application of measures within the parameters of these rights in emergency situations are also discussed.

* Campus/Off-site only | * Writing-intensive course | * Fulfills General Education requirement |
EMM 641: Understanding Terrorism’s Threats 4 credits
This course explores modern terrorism and terrorist behavior, including cyberterrorism, the role of the media, the private sector, and implications in a global society.

English (ENG)
ENG 101*: Academic Writing (Retired) 3 credits
A course in writing academic prose, including various types of essays, arguments, and constructions. A Writing-Intensive course.

ENG 102*: Research Writing (Retired) 3 credits
A course exploring various types of research writing, with a focus on constructing essays, arguments, and research reports based on primary and secondary sources. A Writing-Intensive course. Prerequisite: ENG 101.

ENG 103*: Honors Composition 3 credits
A course designed for students who have demonstrated good writing skills. Students will learn how to use a variety of research techniques and discourse styles to create proposals, arguments, and nonfiction articles. This course fulfills all freshman English requirements. A Writing-Intensive course. Prerequisite: Placement from the ACT/SAT scores.

ENG 105*: English Composition I 4 credits
This is a course in writing academic prose, including various types of essays, arguments, and constructions. A writing-intensive course.

ENG 106*: English Composition II 4 credits
This course explores various types of research writing, with a focus on constructing essays, arguments, and research reports based on primary and secondary sources. A writing-intensive course.

ENG 200: Analysis of World Literature 3 credits
A study of some diverse works in world literature. This course is an introduction to all advanced English course offerings. Students will also be introduced to methods of literary criticism and analysis. All students who plan to major in English should earn a 3.00 or above in this course before taking any upper division English courses. Prerequisites: ENG 105 and ENG 106, or satisfactory completion of GCU’s written communication competency.

ENG 201: Intermediate Grammar 3 credits
A review of basic English syntax, form, and mechanics. The course also introduces principles of grammar and linguistics. Prerequisites: Grade of 2.00 or higher in ENG 101 and ENG 102, or ENG 103.

ENG 221: English Literature I 3 credits
A survey of English Literature from the Old English Period through the Enlightenment. Prerequisites: ENG 101 and ENG 102, or ENG 103 (and ENG 200 for English majors).

ENG 222: English Literature II 3 credits
Continuation of ENG 221 covering the Romantic period through the Modern period. Prerequisites: ENG 101 and ENG 102, or ENG 103 (and ENG 200 for English majors).

ENG 250: Analysis of World Literature 4 credits
This course is a study of some diverse works in world literature. It introduces all advanced English course offerings. Students will also be introduced to methods of literary criticism and analysis. All students who plan to major in English should earn a 3.00 or above in this course before taking any upper division English courses. Prerequisites: ENG 105 and ENG 106, or satisfactory completion of GCU’s written communication competency.

ENG 260: English Literature I 4 credits
This course is a survey of English Literature from the Old English period through the Enlightenment. Prerequisites: ENG 105 and ENG 106, or satisfactory completion of GCU’s written communication competency, and ENG 250 for English majors.

ENG 270: English Literature II 4 credits
This course is a continuation of ENG 260, covering the Romantic period through the Modern period. Prerequisites: ENG 105 and ENG 106, or satisfactory completion of GCU’s written communication competency, and ENG 250 for English majors.

ENG 300: English Practicum 2 credits
Guided practical experience in tutoring and evaluating writing. Prerequisite: English Teaching majors only or instructor's approval.

ENG 301*: Advanced Composition 3 credits
A course for students who wish to develop their skills in academic and nonfiction writing. A Writing-Intensive course. Prerequisite: Grade of 2.00 or above in ENG 101 and ENG 102, or ENG 103.

ENG 315: English in Its Social and Historical Settings 3 credits
An exploration of the historical development of English and its variations across social contexts. Prerequisite: ENG 201 or instructor’s approval.

ENG 324: Studies in Poetry 3 credits
A course designed for students who are pursuing a major or minor in English or who wish to increase their understanding and appreciation of poetry. Prerequisites: ENG 101 and ENG 102, or ENG 103 (and ENG 200 for English majors).

ENG 341: American Literature I 3 credits
A survey of outstanding authors, their works, and the literary movements from the Colonial Age to Romanticism (1850). Prerequisites: ENG 101 and ENG 102, or ENG 103 (and ENG 200 for English majors).

ENG 342: American Literature II 3 credits
A survey of Realism, Naturalism, Modernism, and Post-Modernism in American fiction, drama, and poetry of the 19th
and 20th centuries. Prerequisites: ENG 101 and ENG 102, or ENG 103, (and ENG 200 for English majors).

**ENG 350: American Literature I** 4 credits

This course is a study of outstanding authors, their works, and the literary movements from the Colonial Age to Romanticism (1850). Prerequisites: ENG 105 and ENG 106, or satisfactory completion of GCU’s written communication competency, and ENG 250 for English majors.

**ENG 352: The Short Story** 3 credits

A study of the short story, its development, the different types, and an analysis of technique. Prerequisites: ENG 101 and ENG 102, or ENG 103.

**ENG 353: American Literature II** 4 credits

This course is a survey of realism, naturalism, modernism, and postmodernism in American fiction, drama, and poetry of the 19th and 20th centuries. Prerequisites: ENG 105 and ENG 106, or satisfactory completion of GCU’s written communication competency, and ENG 250 for English majors.

**ENG 356: The Short Story** 4 credits

This course is a study of the short story in English and in translation, its development, the different types, and an analysis of technique. Prerequisites: ENG 105 and ENG 106, or satisfactory completion of GCU’s written communication competency; and ENG 250 for English majors.

**ENG 358: Introduction to English Grammar and Linguistics** 4 credits

This course is a review of basic English syntax, form, and mechanics. It also introduces principles of grammar and linguistics and explores the historical development of English and its variations across social contexts. Prerequisites: Grade of 2.00 or higher in ENG 105 and ENG 106, or satisfactory completion of GCU’s written communication competency.

**ENG 413: The Novel** 3 credits

A study in the development of the novel which focuses primarily on the reading and discussion of 19th and 20th century British and American works. Prerequisite: Junior status.

**ENG 421: Shakespeare** 3 credits

A study of major Shakespearean comedies and tragedies and of Shakespeare’s development as a dramatist. Prerequisite: ENG 221 or junior status.

**ENG 422 Major Authors** 3 credits

The course focuses upon the study of the works of a major author, with emphasis on his or her seminal works with suitable reference to his or her biography and other works of merit.

**ENG 423 Literary Movement** 3 credits

A course that surveys the major works and figures of a literary movement, including examining that movement’s historical and cultural context.

**ENG 424: Literary Movement** 4 credits

This course surveys the major works and figures of a literary movement, including examining that movement’s historical and cultural contexts.

**ENG 425: Major Author** 4 credits

This course focuses upon the study of the works of a major author, with emphasis on the author’s seminal works and with suitable reference to the author’s biography and other works of merit.

**ENG 450: Shakespeare** 4 credits

This course is a study of major Shakespearean comedies and tragedies and of Shakespeare’s development as a dramatist, including some consideration of Shakespeare’s cross-cultural reception. Prerequisite: ENG 260.

**ENG 460: The Novel** 4 credits

This course is a study in the development of the novel focusing primarily on the reading and discussion of 19th and 20th century British and American works. Prerequisites: ENG 105 and ENG 106, or satisfactory completion of GCU’s written communication competency, and ENG 250 for English majors.

**ENG 471: Adolescent Literature** 3 credits

A course for students who wish to read and examine the literature being written for adolescents. Novels from a variety of subgenres will be studied and a variety of contemporary issues will be traced through adolescent literature.

**ENG 480: Methods of Teaching English** 3 credits

Methods of instruction, organization, and presentation of content in English.

**ENG 490: Senior Seminar** 3 credits

An exploration of English as a discipline. Students study the interpretations of literature and methodology of writing, including advanced research. Students consider membership in professional organizations and explore career opportunities in the teaching of English in middle and high school as well as in professions outside the field of education. A Writing-Intensive course. Prerequisites: Declared English major (Literature or Teaching) and senior status.

**Entrepreneurship (ENT)**

**ENT 100: The Entrepreneurial Economy** 3 credits

This course is designed to enable students to recognize the unique opportunities and challenges faced by entrepreneurs in today’s dynamic business environment and combine essential business and interpersonal skills for a successful career as an entrepreneur. Both the structure and dynamics underpinning today’s entrepreneurial economy will be examined. Major topics areas will include the role of small business in the economy, how start-up firms compete for competitive advantage, and the ‘mind-set’ required to be a successful business owner. The course will underscore the importance of having a strong sense of personal values, and a healthy tolerance for risk taking.

---

*Campus/Off-site only | *Writing-intensive course | *Fulfills General Education requirement |
ENT 250: Public Relations and Networking Skills 3 credits
This course is designed to build effective communication and networking skills so that students can leverage contacts and relationships to create business opportunities. The importance of building a professional and trustworthy business reputation is also addressed.

ENT 320: Public Relations and Networking Skills 4 credits
This course is designed to build effective communication and networking skills so that students can leverage contacts and relationships to create business opportunities. The importance of building a professional and trustworthy business reputation is also addressed.

ENT 350: Sales and Negotiation Skills 3 credits
This course builds the skills and techniques required for successful negotiations with suppliers, buyers, contractors, employees, financial institutions, etc. The strategies and tactics required to negotiate win-win agreements even from a position of lesser power are covered. A negotiations simulation will provide an experiential learning opportunity for students.

ENT 351: Legal Aspects for Entrepreneurs 3 credits
This course is designed to prepare students be aware of and comply with government policies, laws and regulations that impact small business operations. Major topics areas include contracts and leases, employment law, tax law, intellectual property and patents, litigation, and small claims court, and how to protect the ongoing operations and viability.

ENT 353: Venture Capital 3 credits
This course examines the growth of the venture capital market and provides students with an understanding of the advantages and risks associated with venture capital financing. Both start-up and growth needs are explored. The course will focus on the more practical aspects of structuring transactions that add value for the firm, owners, and financial backers.

ENT 355: In the Game 3 credits
In the Game drills down on the information learned in Ready, Aim, Fire, and will develop the functional area topics in more detail. Students will walk through each step of writing a business plan for a new venture and will develop a preliminary plan

ENT 420: New Venture Financing 4 credits
This course examines the growth of the venture capital market and provides students with an understanding of the advantages and risks associated with venture capital financing. Both start-up and growth needs are explored. The course focuses on the more practical aspects of structuring transactions that add value for the firm, owners, and financial backers.

ENT 435: Intrapreneurship and Innovation 4 credits
This course examines the importance of societal wealth ventures, social responsibility, community outreach, and giving back to the community in order to ensure balance between private and societal interests. The concept of identifying social issues as new business opportunities is fully explored.

ENT 445: Business Planning for Entrepreneurs 4 credits
This course explores the development of business plans; the preparation of financial packages; and the evaluation of opportunities, risks, and problems associated with business development. The course will culminate with the preparation of a comprehensive business plan for a new venture.

ENT 450: Social Entrepreneurship 3 credits
This course is examines the importance of societal wealth ventures, social responsibility, community outreach, and giving back to the community in order to ensure balance between private and societal interests. This course is to be taken concurrently with AMP 435.

ENT 453: Intrapreneurship and Innovation 3 credits
This course examines the importance of creating innovative work environments in small, medium, and large-scale organizations in order to ensure the long-term competitiveness of the firm. Innovation is explored from the perspectives of product development, internal process improvements, and strategic shifts.

ENT 455: In the Game 3 credits
In the Game drills down on the information learned in Ready, Aim, Fire, and will develop the functional area topics in more detail. Students will walk through each step of writing a business plan for a new venture and will develop a preliminary plan.

ENT 465: Business Planning for Entrepreneur 3 credits
This course explores the development of business plans; the preparation of financial packages; and the evaluation of opportunities, risks, and problems associated with business development. The course will culminate with the preparation of a comprehensive business plan for a new venture.

ENT 470: New Venture Financing 4 credits
This course examines the growth of the venture capital market and provides students with an understanding of the advantages and risks associated with venture capital financing. Both start-up and growth needs are explored. The course focuses on the more practical aspects of structuring transactions that add value for the firm, owners, and financial backers.

ENT 475: Intrapreneurship and Innovation 4 credits
This course examines the importance of societal wealth ventures, social responsibility, community outreach, and giving back to the community in order to ensure balance between private and societal interests. Innovation is explored from the perspectives of product development, internal process improvements, and strategic shifts.

ENT 480: Business Planning for Entrepreneurs 4 credits
This course explores the development of business plans; the preparation of financial packages; and the evaluation of opportunities, risks, and problems associated with business development. The course will culminate with the preparation of a comprehensive business plan for a new venture.

ENT 485: Intrapreneurship and Innovation 3 credits
This course examines the importance of societal wealth ventures, social responsibility, community outreach, and giving back to the community in order to ensure balance between private and societal interests. This course is to be taken concurrently with AMP 435.

ENT 490: Social Entrepreneurship 3 credits
This course is examines the importance of societal wealth ventures, social responsibility, community outreach, and giving back to the community in order to ensure balance between private and societal interests. This course is to be taken concurrently with AMP 435.

ENT 495: Intrapreneurship and Innovation 3 credits
This course examines the importance of societal wealth ventures, social responsibility, community outreach, and giving back to the community in order to ensure balance between private and societal interests. Innovation is explored from the perspectives of product development, internal process improvements, and strategic shifts.

ENT 499: Business Planning for Entrepreneurs 4 credits
This course explores the development of business plans; the preparation of financial packages; and the evaluation of opportunities, risks, and problems associated with business development. The course will culminate with the preparation of a comprehensive business plan for a new venture.

School Counseling (EPC)

EPC 535: Psychology of Learning 3 credits
This course stresses the major contributions of learning theorists to understanding behavior. Attention is given to human learning and the applicability of learning theory to the educational process. Students are required to design, conduct, report, and evaluate a learning activity pertaining to a major theory of learning.

EPC 537: Appraisal of Children With Special Education Needs 3 credits
This course is an introduction to appraisal techniques used to identify learning disabilities, such as interpretation of standardized achievement tests, descriptive statistics and data, mental ability and aptitude tests, preparation of individualized educational plans, and use of case study data in educational applications. It contains individual assessment processes that include (1) physical, mental, or emotional disability, (2) significant educational deficits, and (3) specific learning competency levels.

EPC 639A: Internship in Counseling 3 credits
This course involves supervised lab experiences in individual and group counseling with emphasis on personal counseling. Competence in counseling skills with varied types of human concerns is developed. This course is to be taken concurrently with one’s work at a practicum site. The student must be involved in counseling activities and evaluation activities in the internship (practicum). A minimum of 300 clock hours of internship (practicum) occurring in a school counseling setting, with direct supervision from a site supervisor that also includes no less than 200 direct service clock hours with clients is required.

*Campus/Off-site only | Writing-intensive course | Fulfills General Education requirement |
ESL 410: Advanced Language Teaching: Foundations and Methodologies 3 credits
This thorough examination of available methodologies, underlying philosophies, and assessment procedures includes lessons in teaching the four recognized skill areas (listening, speaking, reading, and writing) within the content areas and the use of standard tests. Prerequisite: ESL 423.

ESL 411: Language Teaching Curriculum and Materials Design 3 credits
This course integrates general school curriculum, materials, and the specific English language teaching goals with the actual design and rendering of instructional materials. Prerequisite: ESL 423.

ESL 414: English in its Social and Historical Setting 3 credits
This exploration of English language variation across sociocultural context and time discusses implications for building culturally appropriate ways of interacting in professional settings.

ESL 420: English Linguistics 3 credits
This course is designed to familiarize students with emergent language, early linguistic development, and the fundamentals of linguistic theory, including the morphological, phonological, and syntactic structure of the English language as well as pragmatics, semantics, and issues in first and second language acquisition. Emphasis is placed on oral and written language development and the implications of this development on language, learning, curriculum, language structure, and an awareness of patterns of communication among cultures. Prerequisite: Admittance to the Teacher Education program.

ESL 423: SEI English Language Teaching: Foundations and Methodologies 3 credits
Through this course the historical, legal, theoretical, and sociological foundations of programs of instruction for non-English language background students are presented. The study of models, prototypes, and methodologies for ESL instruction is included. Practicum hours – 10. Prerequisites: Fingerprint Clearance.

ESL 423N: SEI English Language Teaching: Foundations and Methodologies 3 credits
This course presents the historical, legal, theoretical, and sociological foundations of programs of instruction for English language learners. It includes an examination of the role of culture in learning and instructional program models, with a focus on Structured English Immersion. Students are instructed in immersion strategies and the use of assessment data. The content of this course correlates with the following NBPTS English as a New Language Standards: Standard 1: Knowledge of Students; Standard 3: Knowledge of Culture and Diversity; Standard 8: Learning Environment; Standard 9: Assessment; and Standard 11: Linkages with Families. Practicum hours: 10. Prerequisite: Fingerprint Clearance.

ESL 433: Advanced Methodologies of Structured English Immersion 3 credits
In this course students continue to examine the fundamentals of the legal, historical, and educational foundations of Structured English Immersion and other instructional programs for English Language Learners. Theoretical principles of language acquisition and the role of culture in learning are examined. Methods of assessment are identified and analyzed. Students will identify strategies to promote English language development and improve student achievement. They will plan, deliver, and evaluate instruction for English Language Learners. Practicum hours – 15. Prerequisites: Fingerprint Clearance and ESL 423.

ESL 433N: Advanced Methodologies of Structured English Immersion 3 credits
In this course, students continue to examine the fundamentals of the legal, historical, and educational foundations of Structured English Immersion and other instructional programs for English Language Learners. Theoretical principles of language acquisition and the role of culture in learning are examined. Methods of assessment are identified and analyzed. Students identify

*Campus/Off-site only | Writing-intensive course | *Fulfills General Education requirement |
strategies to promote English language development and improve student achievement. They plan, deliver, and evaluate instruction for English language learners. Practicum hours: 15. Prerequisite: Fingerprint Clearance and ESL 423N or ESL 223N.

**ESL 480: Internship in ESL**  
The student is assigned to an approved, experienced teacher or coordinator of programs for ESL for four weeks. The internship is individualized, and arrangements can be made based on student needs. Prerequisites: ESL 414, ESL 420, and ESL 423.

**ESL 505: SEI Foundations and Methodologies**  
1 or 3 credits

This course familiarizes students with the fundamentals of the legal, historical, and educational foundations of Structured English Immersion and other instructional programs for English Language Learners. Theoretical principles of language acquisition and the role of culture in learning are examined. Methods of assessment are identified and analyzed. Students will identify strategies to promote English language development and improve student achievement. They will plan, deliver, and evaluate instruction for English Language Learners.

**ESL 510: Advanced Language Teaching Methodologies and Assessment**  
3 credits

This thorough examination of available methodologies, underlying philosophies, and assessment procedures includes lessons in teaching the four recognized skill areas (listening, speaking, reading, and writing) within the content areas and the use of standard tests. Prerequisite: ESL 523 or concurrent enrollment.

**ESL 511: Language Teaching Curriculum and Materials Design**  
3 credits

This course integrates general school curriculum, materials, and the specific English language teaching goals with actual design and rendering of instructional materials. Prerequisite: ESL 423.

**ESL 514: English in its Social and Historical Setting**  
3 credits

This exploration of English language variation across sociocultural context and time discusses implications for building culturally appropriate ways of interacting in professional settings.

**ESL 520: English Linguistics**  
3 credits

This course is designed to familiarize students with emergent language, early linguistic development, and the fundamentals of linguistic theory, including the morphological, phonological, and syntactic structure of the English language as well as pragmatics, semantics, and issues in first and second language acquisition. Emphasis is placed on oral and written language development and the implications of this development on language, learning, curriculum, language structure, and an awareness of patterns of communication among cultures.

**ESL 523: SEI English Language Teaching: Foundations and Methodologies**  
3 credits

This course presents the historical, legal, theoretical, and sociological foundations of programs of instruction for English language learners. It includes an examination of the role of culture in learning and instructional program models, with a focus on Structured English Immersion. Students will be instructed in immersion strategies and the use of assessment data. The content of this course correlates with the NBPTS English as a New Language Standards, Standard I: Knowledge of Students, Standard III: Knowledge of Culture and Diversity, Standard VIII: Learning Environment, Standard IX: Assessment, Standard XI: Linkages with Families. Practicum hours – 10. Prerequisite: Fingerprint Clearance.

**ESL 523N: SEI English Language Teaching: Foundations and Methodologies**  
3 credits

This course presents the historical, legal, theoretical, and sociological foundations of programs of instruction for English language learners. It includes an examination of the role of culture in learning and instructional program models, with a focus on Structured English Immersion. Students will be instructed in immersion strategies and the use of assessment data. The content of this course correlates with the NBPTS English as a New Language Standards, Standard I: Knowledge of Students, Standard III: Knowledge of Culture and Diversity, Standard VIII: Learning Environment, Standard IX: Assessment, Standard XI: Linkages with Families. Practicum hours – 10. Prerequisite: Fingerprint Clearance.

**ESL 530: Internship in ESL**  
3 credits

This course is specifically designed to aid teacher understanding of the nature of language, the processes of language use, and a descriptive grammar of English.

**ESL 533: Advanced Methodologies of Structured English Immersion**  
3 credits

In this course students continue to examine the fundamentals of the legal, historical, and educational foundations of Structured English Immersion and other instructional programs for English Language Learners. Theoretical principles of language acquisition and the role of culture in learning are examined. Methods of assessment are identified and analyzed. Students will identify strategies to promote English language development and improve student achievement. They will plan, deliver, and evaluate instruction for English Language Learners. Practicum hours – 15. Prerequisite: Fingerprint Clearance and ESL 523.

**ESL 533N: Advanced Methodologies of Structured English Immersion**  
3 credits

In this course students continue to examine the fundamentals of the legal, historical, and educational foundations of Structured English Immersion and other instructional programs for English Language Learners. Theoretical principles of language acquisition and the role of culture in learning are examined. Methods of assessment are identified and analyzed. Students will identify strategies to promote English language development and improve student achievement.
student achievement. They will plan, deliver, and evaluate instruction for English Language Learners. Practicum hours – 15. Prerequisite: Fingerprint Clearance and ESL 523N.

**Exercise Science (EXS)**

**EXS 214: Care, Treatment, and Prevention of Athletic Injuries** 3 credits

This course is designed to provide students with a basic knowledge and understanding of the principles of sports medicine, the care and treatment of athletic trauma, and the use of proper conditioning principles for the prevention of injury. Prerequisites: One of the following combinations: 1) BIO 155 and BIO 155L; or 2) BIO 201, BIO 201L, BIO 202, and BIO 202L; or 3) BIO 360, BIO 360L, and either BIO 474 or BIO 484. Co-requisite: EXS 214L.

**EXS 214L: Care, Treatment, and Prevention of Athletic Injuries Lab** 1 credit

This lab is designed to complement and support the principles taught in EXS 214. The course is designed to provide students with a basic knowledge and understanding of the principles of sports medicine; the care and treatment of athletic trauma; safety and its importance in related settings; and the use of proper conditioning principles of the prevention of injury. Prerequisites: One of the following combinations: 1) BIO 155 and BIO 155L; or 2) BIO 201, BIO 201L, BIO 202, and BIO 202L; or 3) BIO 360, BIO 360L, and either BIO 474 or BIO 484. Co-requisite: EXS 214.

**EXS 295: Clinical Instruction in Athletic Training I** 5 credits

This course is designed to provide a clinical setting in which the athletic training student can clinically apply and show proficiency in the information learned in Care and Prevention of Athletic Injuries and First Aid and Safety. The student will be assigned to an “Approved Clinical Instructor” (ACI) who will supervise the student on a daily basis through constant visual and auditory interaction and provide feedback to the student on his/her progression. Prerequisites: HLT 270, EXS 314

**EXS 314: Care and Prevention of Athletic Injuries** 3 credits

A course designed to provide the student with a basic knowledge and understanding of the principles of sports medicine, the care and treatment of athletic trauma, and the use of proper conditioning principles of the prevention of injury. Co-requisite: EXS 314L.

**EXS 314L: Care and Prevention of Athletic Injuries Lab** 1 credit

A laboratory course designed to complement and support the principles taught in EXS 314. Co-requisite: EXS 314.

**EXS 321: Clinical Instruction in Athletic Training I** 4 credits

This 16-week-long course is designed to provide a clinical setting in which athletic training students clinically apply and demonstrate proficiency in the information learned in prior courses. This sequence allows students to apply what they have learned in class on real patients. Students are assigned to an approved clinical instructor who supervises students on a daily basis through constant visual and auditory interaction and provides feedback to students on their progression. The mode of delivery is student-to-student demonstration and a clinical exam testing students’ proficiency at a clinical site (high school, college, and/or professional) on true patients. Students are evaluated at a clinical site weekly to ensure proficiency in these skills.

**EXS 324: Recognition and Evaluation of Athletic Injuries** 3 credits

A course covering the evaluation of athletic injuries through practical skills of palpation of bony and soft tissue structures, assessing range of motion, neurological testing, and special tests for primary joints and areas of the body. Prerequisites: EXS 314 and BIO 160 or BIO 201. Co-requisite: EXS 324L

**EXS 324L: Recognition and Evaluation of Athletic Injuries Lab** 1 credit

A lab course designed to complement and support the principles taught in EXS 324. Co-requisite: EXS 324

**EXS 335: Kinesiology** 3 credits

This course is an analysis of human movement, integrating knowledge of the skeletal, muscular, and neurological systems with the effects that gravity, friction, internal and external forces, and the laws of motion have on their functions. Topics presented include biomechanics of human bone, joint, and skeletal muscle; structure and function of the upper extremity, lower extremity, and spine; concepts of linear and angular kinematics and kinetikas as applied to human motion; equilibrium and stability on land; and motion through a fluid medium of air or water. Included is the application of these factors to various types of physical skills. Prerequisites: One of the following combinations: 1) BIO 160 or BIO 201; or 2) one of these combinations (a) BIO 155 and BIO 155L; or (b) BIO 201, BIO 201L, BIO 202, and BIO 202L; or (c) BIO 360, BIO 360L, and either BIO 474 or BIO 484. Co-requisite: EXS 335L. Recommended: PHY 101 or PHY 111 (may be taken concurrently).

**EXS 335L: Kinesiology Lab** 1 credit

This laboratory course is designed to apply the anatomical, kinesiological, and biomechanical principles learned in the lecture course to human body movement. Movement of all of the major joints of the body is analyzed by relative and absolute joint position and muscle action, and biomechanical terms—such as linear and angular kinematics, friction, work, power, energy, and torque—are applied to human motion. Prerequisites: One of the following: 1) none; or 2) one of the following combinations: (a) BIO 155 and BIO 155L; or (b) BIO 201, BIO 201L, BIO 202, and BIO 202L; or (c) BIO 360, BIO 360L, and either BIO 474 or BIO 484. Co-requisite: EXS 335. Co-requisite: EXS 335.

**EXS 340: Physiology of Exercise** 3 credits

This course is a study of the effects of exercise on the body. Topics include nutrition as the basis for physical activity; how energy is produced and utilized during physical activity; the
energy delivery and vital functions of the respiratory, cardiovascular, muscular, and nervous systems during exercise; how these systems can be enhanced through training; the impact of ergogenic aids and environmental stress on performance; and the effect of exercise on body composition, weight control, aging, and disease prevention. The body’s responses and adaptations to exercise at the systemic, as well as the subcellular level, are also discussed. Prerequisites: Prerequisites: One of the following combinations: 1) HLT 253 or BIO 160 or BIO 201 and BIO 202; or 2) one of these combinations: (a) BIO 155 and BIO 155L; or (b) BIO 201, BIO 201L, BIO 202, and BIO 202L; or (c) BIO 360, BIO 360L, and either BIO 474 or BIO 484. Co-requisite: EXS 340L.

**EXS 340L: Physiology of Exercise Lab** 1 credit

This is a course of field and laboratory experiences designed to reinforce the basic principles learned in the lecture course. Skills of measurement and evaluation, including computerized methods employed to facilitate testing, are applied to physiological and systemic principles of exercise. Prerequisites: One of the following: 1) none; or 2) one of the following combinations (a) BIO 155 and BIO 155L; or (b) BIO 201, BIO 201L, BIO 202, and BIO 202L; or (c) BIO 360, BIO 360L, and either BIO 474 or BIO 484. Co-requisite: EXS 340.

**EXS 350: Clinical Instruction in Athletic Training II** 4 credits

This 16-week-long course is designed to provide a clinical setting in which athletic training students clinically apply and demonstrate proficiency in the information learned in prior courses. This sequence allows students to apply what they have learned in class on real patients. Students are assigned to an approved clinical instructor who supervises students on a daily basis through constant visual and auditory interaction and provides feedback to students on their progression. The mode of delivery is student-to-student demonstration and a clinical exam testing students’ proficiency at a clinical site (high school, college, and/or professional) on true patients. Students are evaluated at a clinical site weekly to ensure proficiency in these skills. Prerequisite: EXS 321.

**EXS 351: Clinical Instruction in Athletic Training III** 4 credits

This 16-week-long course is designed to provide a clinical setting in which athletic training students clinically apply and demonstrate proficiency in the information learned in prior courses. This sequence allows students to apply what they have learned in class on real patients. Students are assigned to an approved clinical instructor who supervises students on a daily basis through constant visual and auditory interaction and provides feedback to students on their progression. The mode of delivery is student-to-student demonstration and a clinical exam testing students’ proficiency at a clinical site (high school, college, and/or professional) on true patients. Students are evaluated at a clinical site weekly to ensure proficiency in these skills. Prerequisite: EXS 350.

**EXS 353: Clinical Instruction in Athletic Training IV** 4 credits

This 16-week-long course is designed to provide a clinical setting in which athletic training students clinically apply and demonstrate proficiency in the information learned in prior courses. This sequence allows students to apply what they have learned in class on real patients. Students are assigned to an approved clinical instructor who supervises students on a daily basis through constant visual and auditory interaction and provides feedback to students on their progression. The mode of delivery is student-to-student demonstration and a clinical exam testing students’ proficiency at a clinical site (high school, college, and/or professional) on true patients. Students are evaluated at a clinical site weekly to ensure proficiency in these skills. Prerequisite: EXS 351.

**EXS 356: Recognition and Evaluation of Athletic Injuries I** 4 credits

This course is designed to provide students with specific knowledge and practical skills required to perform proper evaluation of the upper and lower body. Students learn to palpate body and soft tissue structures, and perform active, passive, and resistive range of motion testing, neurological testing, and special ligament tests for the major synovial joints in the body. Students are provided multiple opportunities to reinforce their knowledge with hands-on practice. Prerequisites: EXS 214 and EXS 214L.

**EXS 357: Recognition and Evaluation of Athletic Injuries II** 4 credits

Building on concepts of EXS 356, this course is designed to provide students the opportunity to further analyze and apply skills in the areas of evaluation of upper and lower body, palpation of body and soft tissue structures, range of motion testing, neurological testing, manual muscle testing, and special ligament tests for the major synovial joints in the body. Prerequisite: EXS 356.

**EXS 360: Strength and Conditioning** 3 credits

The study of the physiological responses to exercise, exercise techniques, exercise program design for anaerobic and aerobic exercise, exercise prescription principles and organization and administration of strength and conditioning facility. This course is designed to prepare students for National Strength and conditioning association (NSCA) Strength and Conditioning Specialist (CSCS) certification exam and personal training certificate. Prerequisites: BIO 160 or BIO 201

**EXS 365: General Medicine/Pharmacology** 3 credits

Covers the competencies related to recognition, detection and referral and understanding treatment approaches for medical condition and disabilities associated with the physically active. These competencies covered are related to the derma, head, face, thorax, abdomen, eyes, ears, nose and throat. The student will also learn pharmacologic applications and governing pharmacy regulations relevant to treatment of injuries, illnesses and diseases. Prerequisites: EXS 314.

This course provides a broad discussion of general medical conditions and associated pathologies of the physically active, as well as applicable information to athletes, coaches, and athletic trainers of all levels. This course covers evaluation techniques and equipment, coverage of all body systems and conditions, as well as special populations. Prerequisites: EXS 214 and EXS 214L.

This course examines current theories and practices of pharmacology and epidemiology of drug use as related to athletic training and sports medicine. Additional topics include drug abuse issues, such as: performance-enhancing substances; psychological, legal, social, and cultural implications; and approaches to solving drug abuse problems. Prerequisites: EXS 214 and EXS 214L.

This course is a study in tests and measurements in physical education and sports skills. Prerequisites: PED 246 and four credits of Professional Activities.

This course is a study of various therapeutic modalities that aid in the healing process of injuries. The course covers the theory behind and proper use of these modalities with laboratory experience. Prerequisites: EXS 214 and EXS 214L. Co-requisite: EXS 387L.

This course is designed to complement and support principles being taught in EXS 387. Practical applications of therapeutic modality application techniques are learned. Prerequisites: EXS 214 and EXS 214L. Co-requisite: EXS 387.

This course is designed to provide a clinical setting in which athletic training students clinically apply and demonstrate proficiency in the information learned in prior courses. This sequence allows students to apply what they have learned in class on real patients. Students are assigned to an approved clinical instructor who supervises students on a daily basis through constant visual and auditory interaction and provides feedback to students on their progression. The mode of delivery is student-to-student demonstration and a clinical exam. Students are evaluated at a clinical site weekly to ensure proficiency in these skills. Prerequisite: EXS 353.

This 16-week-long course is designed to provide a clinical setting in which athletic training students clinically apply and demonstrate proficiency in the information learned in prior courses. This sequence allows students to apply what they have learned in class on real patients. Students are assigned to an approved clinical instructor who supervises students on a daily basis through constant visual and auditory interaction and provides feedback to students on their progression. The mode of delivery is student-to-student demonstration and a clinical exam. Students are evaluated at a clinical site weekly to ensure proficiency in these skills. Prerequisite: EXS 353.

This course covers content specific to upper-level athletic training students, including therapeutic massage, research design and presentation, resume development, review for the Board Of Certification (BOC) exam, and preparation to become professionals in the field of athletic training. This course fulfills the writing-intensive course requirement. Prerequisite: Athletic training major in final semester.

This course deals with the organization and administration tasks and techniques required in an athletic training program, the commercial health industry, and interscholastic and intercollegiate athletics. Topics include program and human resource management; budgeting; inventory and finance management; insurance; organizing and promoting health; and legal considerations, ethics, decision making, and communication in athletic training, health, and athletic settings.

This course covers content specific to upper-level athletic training students, including respiratory conditions and diseases, joint mobilizations, therapeutic massage, research design and presentation, resume development, and review for the NATA BOG exam. A Writing-Intensive course. Prerequisites: EXS 314 and EXS 426.

---

*Campus/Off-site only | △ Writing-intensive course | * Fulfills General Education requirement |
EXS 426L: Theory of Prescribing Exercise: Lab 1 credit
This course reinforces and expands learning gained in the lecture course. Practical applications and experiments include exercise prescription and rehabilitation techniques. Prerequisites: One of the following combinations: 1) BIO 201 or BIO 160 and EXS 340; or 2) none. Co-requisite: EXS 426.

EXS 458: Theory and Practice of Strength and Conditioning 4 credits
This course is the study of the physiological responses to exercise, exercise technique, program design for anaerobic and aerobic exercise, exercise prescription principles, and organization and administration of strength and conditioning facilities. This course provides students information on the design and implementation of a successful strength and conditioning program. Emphasis is placed on assessment, description, and analysis of sport movement, and designing weight training programs to enhance performance variables. Workshops reinforce these goals, focusing on assessment of athletic performance, as well as the development of musculoskeletal flexibility, speed, agility, quickness, strength, and power. This course assists those students who desire to take the National Strength and Conditioning Association’s Certified Strength and Conditioning (CSCS) Exam. Prerequisites: EXS 340 and EXS 340L.

EXS 494: Clinical Instruction in Athletic Training III 5 credits
This course is designed to provide a clinical setting in which the athletic training student can clinically apply and show proficiency in the knowledge acquired in the prerequisite classes. The student will be assigned to an “Approved Clinical Instructor” (ACI) who will supervise the student on a daily basis through constant visual and auditory interaction and provide feedback to the student on his/her progression Prerequisites: EXS 395 and instructor’s approval.

EXS 495: Clinical Instruction in Athletic Training IV 5 credits
This course is designed to provide a clinical setting in which the athletic training student can clinically apply and show proficiency in the knowledge learned in prerequisite classes. The student will be assigned to an “Approved Clinical Instructor” (ACI) who will supervise the student on a daily basis through constant visual and auditory interaction and provide feedback to the student on his/her progression Prerequisites: EXS 494 and instructor’s approval.

EXS 498A: Internship A 1 credit
The first portion of a full semester internship. The internship provides an opportunity for students to practice principles learned in their functional area by working in an outside organization under the supervision of a practitioner. Prerequisite: Senior Status or Instructor's approval.

EXS 498B: Internship B 2 credits
The second portion of a full semester internship. The internship provides an opportunity for students to practice principles learned in their functional area by working in an outside organization under the supervision of a practitioner. Prerequisite: Senior Status or Instructor's approval.

Family Studies (FAM)
FAM 432: Marriage Enrichment 3 credits
An investigation into the elements involved in choosing a mate. Also addressed are understanding a mate's needs, strengths, and weaknesses and fostering healthy marital relationships, including physical unity and sexual fulfillment, typical problems related to sexual behavior, and strategies for enhancing sexual intimacy. Support of sexuality in marriage from a distinctly Christian point of view.

Finance (FIN)
FIN 301: Fundamentals of Business Finance 3 credits
A study of the finance function within the modern corporation. Topics covered include financial analysis and planning, the valuation of financial assets, capital budgeting, capital structure, and working capital management. Prerequisites: ACC 211 and ACC 212.

FIN 350: Fundamentals of Business Finance 4 credits
This course is a general survey of financial institutions, the Federal Reserve System, the qualities of a sound monetary system, the theory and value of money, deposit insurance, and foreign exchange. Prerequisites: ECN 220, ACC 250, and MAT 134 or equivalent college algebra course.

FIN 402: Intermediate Finance 3 credits
A study of the application of financial techniques and principles to case studies in corporate financial management. The case study approach involves problem determination, identification of alternative courses of action, qualitative and quantitative analysis, and decision-making. Several major topic areas in financial management will be covered. Prerequisite: FIN 301.

FIN 426: Investments and Portfolio Management 3 credits
This course examines contemporary issues and strategies related to sources of capital funds for both small and large companies. The course will examine issues related to mergers, acquisitions, leveraged buyouts, and IPOs in corporate finance. The growth of the venture capital market will be discussed, and students will gain an understanding of the risks associated with venture capital financing.
FIN 450: Intermediate Finance 4 credits
This course is a study of the finance function within the modern corporation. Topics covered include financial analysis and planning, the valuation of financial assets, capital budgeting, capital structure, and working capital management. Prerequisites: ACC 350 and FIN 350.

FIN 451: Investments and Portfolio Management 4 credits
This course studies stocks, bonds, and other investment vehicles, and their application in investment portfolio management. The securities market and trading procedures are discussed. The course develops and emphasizes portfolio theory that is applicable to both professional portfolio management and individual investment decisions. The application of portfolio theory to corporate investments and diversification is also discussed. Prerequisite: FIN 450.

FIN 501: Financial Analysis 3 credits
A course designed for students who have not had finance in their undergraduate work or for those who desire a refresher in finance. Topics covered include financial analysis, financial planning, asset valuation, capital structure, time value of money, and working capital management. Prerequisite: ACC 501.

FIN 504: Finance Principles 4 credits
This course is designed for individuals who are preparing for more advanced coursework in accounting and is designed for students who have not had finance in undergraduate work. Topics covered include financial analysis, financial planning, asset evaluation, capital structure, and working capital management.

FIN 608: Managerial Finance 3 credits
Students study the finance function within the modern corporation. Emphasis is placed on how capital markets work and how management actions impact determining security values within capital markets. Topics include financial analysis, working capital management, capital budgeting, and capital structure. Prerequisite: FIN 501.

FIN 624: Management of Working Capital 3 credits
This course studies the management of cash, accounts receivable, inventory, and short-term liabilities. Outlets for the investment of short-term funds in the money market, as well as potential sources of short term borrowing, are identified and discussed. Prerequisite: FIN 501.

FIN 626: Investments 3 credits
Students study stocks, bonds, derivatives, and their application in portfolio management as well as securities markets and trading procedures. Portfolio theory is developed and emphasized. Material in this course is applicable to both professional portfolio management and individual investment decisions. Prerequisite: FIN 501.

FIN 634: Balancing Conflicting Financial Interests 3 credits
This course explores the inherent conflicts faced by managers, investors, creditors, and corporate boards in governing the modern corporation. It also addresses a number of issues that require a balancing of conflicting stakeholder interests, including bankruptcy, capital investment, capital structure, and mergers and acquisitions. Ethical principles that underlie management practice in these areas are analyzed and critiqued.

FIN 650: Managerial Finance 4 credits
This course discusses elements of business financial decisions, including financial forecasting and development of pro formas, management of working capital, capital budgeting, capital structure, and raising funds in capital markets. Prerequisite: FIN 504.

FIN 655: Investments 4 credits
This course is a study of stocks, bonds, and derivatives, and their application in portfolio management. This course discusses securities market and trading procedures, and develops and emphasizes portfolio theory. Material in the course is applicable to both professional portfolio management and individual investment decisions. Prerequisite: FIN 650.

FIN 660: Advanced Financial Strategies 4 credits
A course studying more advanced business strategies including mergers and acquisitions, spin-offs, carve-outs, partnerships, cooperative agreements, and their business applications for strategic growth or survival. It will also cover business value issues, the role of investment bankers, M&A specialists, and the issues to consider in cross-border transactions. Prerequisite: FIN 650.

Foreign Language (FLA)
FLA 480: Foreign Language Teaching Methods 3 credits
This course studies the analysis and description of second language learning specific to the targeted language; evaluation procedures; methods and trends of teaching a modern foreign language. Prerequisites: SPA 312 or GER 312 or FRE 312 or instructor’s approval.

Geography (GEO)
GEO 121: World Geography 3 credits
A study of the physical environment and of the relationship of humanity to each of the major geographic areas of the world.

Geology (GLG)
GLG 101: General Geology 3 credits
An introduction to physical and historical geology with an emphasis on the geology of Arizona. The relation of geology to man’s culture and economic development is stressed. Co-requisite: GLG 101L

GLG 101L: General Geology: Lab 1 credit
A lab course designed to complement the topics covered in the geology lecture. Co-requisite: GLG 101.

*Campus/Off-site only | *Writing-intensive course | *Fulfills General Education requirement |
Health Care Administration (HCA)

HCA 240: Health Care Accounting and Billing 4 credits
This course introduces students to the management and analysis of financial information in health care environments, as well as the fundamental principles of finance, accounting, and budgeting. It includes an overview of revenue sources for various health care entities and the Diagnosis-Related Group (DRG) system of service classification that is used to determine payment for providers and organizations. Students are also introduced to the fundamentals of strategic planning, cost concepts, and capital budgeting, and analyze issues surrounding the development and management of budgets.

HCA 255: Health Policy and Economic Analysis 4 credits
Through the application of basic economic principles, this course examines the impact of government, private sector, and special interest groups on the determination of health care policy. Prerequisite: HLT 205.

HCA 360: Health Information Technology and Management 4 credits
This course provides information and skills necessary for managing information technology and systems with which the health care administrator must be familiar. In addition to understanding the various input systems that may be utilized, emphasis is placed on the efficiency, effectiveness, obstacles, and outcomes of integrating such systems into health care operations. Students also consider issues surrounding privacy and security of information, work within current laws affecting privacy and security, and evaluate the impact of IT on people and organizations. Prerequisite: HLT 205.

HCA 450: Quality in Health Care 4 credits
This course introduces students to the strategic environment that exists in health care and the models for planning effective improvements. Prerequisites: HLT 305 and HLT 205.

HCA 455: Organizational Behavior and Leadership in Health Care 4 credits
This course introduces students to some basic behavioral science concepts, as they apply to health care settings and organizations such as content and process theories of motivation; attribution theory and motivation; and behavioral, contingency, and contemporary leadership theories. Students have the opportunity to explore the manager’s role in relation to individuals, teams, and the overall health care organization system, and to analyze organization structures and design in order to develop strategies for improvement in operations and increase efficiency.

Throughout the course, students are exposed to real-life scenarios in which they are asked to demonstrate the skills of motivation, workplace communication, conflict management, teamwork, decision making, and negotiation as they might be needed in a health care organizational framework to implement structural improvements. Prerequisites: HLT 305 and HLT 205.

HCA 460: Operations and Risk Management in Health Care 4 credits
This course introduces students to the roles of local, state, and federal regulatory agencies and accrediting bodies; the enforcement of federal guidelines, standards, and regulations; and the issues and demands of the regulatory environment that affect health care in the United States today.

Throughout the course, students are asked to demonstrate understanding regarding legal responsibility, workplace safety, and the health care facility’s obligation to provide protection from injury for patients, their families, and staff. Additionally, students are exposed to real-life scenarios in which they are asked to demonstrate the ability to develop strategic plans around risk management issues that would protect the health care organization from accidental injury costs or violations of safe health care regulations. Prerequisites: HCA 450 and HCA 455.

HCA 465: Health Care Administration and Management 4 credits
This course introduces students to the management of human resources, with particular focus on health care environments and provides the health care manager with a framework for human resource decision making. It includes topics such as job analysis, recruitment, selection and placement, training and development, retention, performance appraisal, and compensation, and provides the health care manager with popular concepts and theories in health care management, current topics in health care such as patient safety initiatives, the Health Insurance Portability and Accountability Act (HIPAA), revenue recovery efforts, and diversity training, and skills in using materials, references, tools, and technology central to health care management.

Throughout the course, students are exposed to real-life scenarios in which they will be able to demonstrate basic management skills and the ability to work productively with others in multidisciplinary and ethnically diverse teams on relevant activities such as planning, organizing, decision making, staffing, motivating, budgeting, and more. Prerequisite: HCA 460.

HCA 470: Strategic Planning and Implementation in Health Care 4 credits
This course introduces students to the strategic environment that exists in health care and the models for planning effective
programs, implementing programs, and program evaluation in health care settings. The course introduces special procedures and options available to health care organizations and provides methods for identifying, gathering, and utilizing data for decision making. Students are presented with the theory of health care administration using a strategic management framework and study the role played by the key business functions (finance, marketing, human resources, information technology, and law) as well as specific strategic options (merger/acquisition, reorganization, joint venture) and some of the popular tools for analyzing strategic situations (balanced scorecard, Six Sigma, SWOT).

The culmination of efforts in the course is to complete the multistep process of creating strategic and implementation plans related to the work done in HLT 364 and the upcoming capstone project. A writing-intensive course. Prerequisites: HLT 364.

This course focuses on essential managerial communication skills. Human resource topics include conflict management, negotiation, mediation, and coaching, as well as change management principles and the types of communication required for paradigm modification. Marketing topics include interdepartmental, cross discipline, external partner, and consumer communication and collaboration techniques.

The focus of this course is to begin integrating all previous study and to identify the focus of students' final capstone project. Students evaluate and integrate the methodologies, considerations, and strategies for project or program design, planning, implementation, and evaluation that are relevant or specifically required by their specific health care discipline. Topics of investigation and consideration include (but are not limited to) financial and economic impact; resource allocation; competition; public and private educational requirements; availability of information technology; impact assessment of change; process improvement assessment; social, behavioral, and environmental impact; legal/ethical issues; and any other factors that impact the provision of care or subsequent outcomes within an organization and community. A collaborative group project approach is emphasized to enhance contribution and consideration from diverse experiences within the health care field. Prerequisite: Successful completion of all previous coursework in the program of study.

This course provides an opportunity for students to envision the best possible future for the American health care system, and to understand what changes are necessary to achieve it. By focusing on and developing a set of recommendations for improving American health care, students appreciate the difference between forcing a current system to work harder, and redesigning a system in order to achieve desired outcomes. Students learn how transactional leaders can become transformational leaders, and begin the formal process of preparing for their capstone research project. Students gain understanding of how clinical data, knowledge, and practice are driving the development of health care surveillance systems through informatics. Topics of investigation include the role of informatics in improved patient care and research, organization and national bio-surveillance, and clinical decision support. Consideration is given to legal and regulatory issues in private and public health practice and as they apply to public health security and preparedness in response to bioterrorism and disasters. Prerequisite: HCA 620.

This capstone course provides an opportunity for students to complete the development of a comprehensive evidence-based project, plan, or proposal that addresses a problem, issue, or concern in their professional practice and can be implemented upon completion of the program. Projects address a problem amenable to research-based intervention; include a relevant and comprehensive literature review; propose a solution; and include a fully developed program, project, or business plan. The project also contains all the necessary information to implement the proposed solution, evaluate its outcome(s), and disseminate the findings. Prerequisite: HCA 675.

*Campus/Off-site only | *Writing-intensive course | *Fulfills General Education requirement |
### Health Care Informatics (HIM)

**HIM 515: Foundations and Concepts of Health Care Informatics**  
4 credits  
This course examines the history, application, impact, and future need for informatics in health care. Emphasis is placed on standards, processes, and systems that impact areas of evidence-based medicine, administrative and clinical practices, information infrastructure, security, and electronic health records.

**HIM 615: Health Care Information Systems and Technology**  
4 credits  
This course examines the application of information systems in health care settings, beginning with an analysis of the broad meaning and nature of information and systems. The focus narrows to utilization of computer technologies, configurations, and applications as tools to benefit health care environments. Emphasis is placed on the challenges related to the development and implementation of effective information systems in light of a rapidly and continuously changing health care model, evolution of technology team member roles and responsibilities, and advancement of technological requirements within the health care system.

**HIM 650: Health Care Data Management**  
4 credits  
This course examines health care information resources and their impact on administrative functions, interfaces, data security and integrity, and business processes. Topics include use of relational database management software to construct tables, develop forms, create and execute queries, design and deploy reports, and advance database concepts to automate contemporary business processes. Students are able to distinguish between various network hardware technologies and associated data communications protocols in order to direct how organizations design and implement data networks. Prerequisites HIM 515 and HIM 615.

### History/Social Science (HIS)

**HIS 103: Early American History**  
3 credits  
A study of the history of the United States from pre European contact through the post Civil War reconstruction period which ended in 1877.

**HIS 104: Recent American History**  
3 credits  
A study of the history of the United States from 1877 through the beginning of the twenty-first century.

**HIS 107: World History Before 1500**  
3 credits  
A survey of the major events, personalities, movements, and ideas in world civilization from the prehistoric era to 1500 CE. This course focuses on the key political, intellectual, scientific, social, economic, and cultural changes that occurred in world civilization. Students will gain an understanding of the social forces and trends in social, religious, political, and philosophic thought that laid the foundations of the modern world.

**HIS 108: World History After 1500**  
3 credits  
A survey of the major events, personalities, movements, and ideas in world civilization after 1500 CE. This course focuses on the key political, intellectual, scientific, social, economic, and cultural changes that occurred in world civilization. Students will gain an understanding of the social forces and trends in social, religious, political, and philosophic thought that laid the foundations of the modern world.

**HIS 109: World Civilization**  
4 credits  
This course is a survey of the major events, trends, personalities, movements, and ideas that have shaped world history from the beginnings of civilization to the present.

**HIS 200: Christian History**  
3 credits  
The history of the church from Christ to modern times and the current status of the American Church, and its particular denominational derivations, will provide historical perspective of Christianity. The student will examine the relationship between Christianity and culture in order to answer how and why the political and social, and intellectual traditions in American culture shaped Christianity and were, in turn, shaped by Christianity. Students will be able to explain the significant ideas, movements, and people associated with the history of Christianity.

**HIS 211: Themes in United States History**  
4 credits  
This course is a survey of U.S. history from the Colonial era to the present. Topics include the American Revolution, the early national period, Jeffersonian and Jacksonian America, the Civil War and the Reconstruction, industrialization, the World Wars, the Great Depression, and the Cold War and the post-Cold War eras.

**HIS 231: American Military History**  
3 credits  
On demand. A survey of the development of the American military and militia system from its English origin through the present. The principles of warfare and military leadership, the soldier's experience on the battlefield, and the place of the military within the American democracy are threads of continuity woven by the instructor through the course. Prerequisite: Instructor's approval.

**HIS 246*: History and Historians**  
3 credits  
An exploration of the historical discipline. Students will examine the meaning and interpretations of history and its methodology. Required for all history majors and minors. A Writing-Intensive course. Prerequisites: Six credits from the following: HIS 103, HIS 104, HIS 107, or HIS 108, or instructor’s approval.

**HIS 247: History and Historians**  
4 credits  
This course is an examination of the meaning and interpretation of history and its methodology. This course is required for history majors.

**HIS 303: The History of Christianity in America**  
3 credits  
An examination of the Protestant and Catholic traditions as they evolved in the United States with particular emphasis given to the

---

*Campus/Off-site only | * Writing-intensive course | * Fulfills General Education requirement |
reciprocal role of religion and politics as formative cultural influences that contributed to the shape and development of social and intellectual institutions in America. Prerequisites: HIS 103, HIS 104, and HIS 246 or instructor’s approval.

**HIS 309: Civil War and Reconstruction** 3 credits
An examination of the causes, conduct and consequences of the American Civil War and reconstruction. Prerequisites: HIS 103 and HIS 246, or instructor’s approval.

**HIS 310: Civil War and Reconstruction** 4 credits
This course examines the causes, conduct, and consequences of the Civil War and the Reconstruction.

**HIS 317: Studies in the Non-Western World** 3 credits
A study of the non-western world. Geographic areas studied will vary. This course may be repeated for credit. Prerequisite: Three semester credits of history or instructor’s approval.

**HIS 318: Near-Eastern History** 4 credits
The course presents students with a survey of the history of Ancient Greece and Rome, covering more than 2,500 years of civilization in Southern Europe and the Near East. The initial part of the course discusses the Ancient Greeks, beginning with the early Greek civilizations of the Minoans and Mycenaean during the Bronze Age and concluding with the Age of Alexander and the Hellenistic Empires of Greece and the Near East. The remainder of the course then examines Ancient Rome, beginning with the Etruscans and concluding with the collapse of the Western Roman Empire and the continuation of the Eastern Empire/Byzantine Empire.

**HIS 319: History of the Modern Middle East** 3 credits
A political, cultural, and economic history of the Middle East since 1914.

**HIS 320: Modern Middle East** 4 credits
This course provides a political, cultural, and economic history of the Middle East since 1914.

**HIS 330: The 20th Century World** 3 credits
A study of 20th century Europe which includes World War I, the Bolshevik Revolution, the rise of Fascism, World War II, the Cold War, the Common Market, and the breakup of Communism in Eastern Europe.

**HIS 331: 20th Century World** 4 credits
This course is a study of the 20th century world, focusing on major trends, events, and personalities of the era.

**HIS 333: Early Modern Europe** 3 credits
A study of changing European institutions in the age of the Renaissance. The rise and various manifestations of humanism; the religious and political revolt against Rome; the Catholic/Counter Reformations; the rise of nationalism and capitalism. Prerequisite: HIS 107.

**HIS 343: Colonial and Revolutionary America** 3 credits
This course examines the political, economic, social, and cultural history of the American colonies from initial contact to the Revolutionary War. Prerequisites: HIS 103, HIS 104, and HIS 246, or instructor’s approval.

**HIS 344: Colonial and Revolutionary America** 4 credits
This course is a study of the social, political, intellectual, and cultural life of the American republic from 1607 to 1783.

**HIS 352: History of England to 1688** 3 credits
A study of the origin and the development of the English people, with particular attention given to their political, social, economic, and cultural institutions and their interaction with continental Europe. Prerequisites: HIS 107 and HIS 246, or instructor’s approval.

**HIS 354: England to 1688** 4 credits
This course is a study of the political, social, cultural, economic, and religious history of England from prehistoric times to the Glorious Revolution of 1688. Prerequisite: HIS 247 for History majors.

**HIS 413: Russian History** 3 credits
A study of the Russian peoples and their rulers from the earliest times to the present. Prerequisites: HIS 107, HIS 108, and HIS 246, or instructor’s approval.

**HIS 452: History of Japan** 3 credits
This course is a survey of the social, cultural, and economic history of Japan from the 1850s to the present.

**HIS 460: Russian History** 4 credits
This course is a study of the Russian nation and people, emphasizing the Soviet era of Russian history. Prerequisite: HIS 247 for History majors.

**HIS 465: History of Modern East Asia** 4 credits
This course focuses on the major themes that have influenced the history of East Asia from 1644 to the present, with an emphasis on the history of modern China and Japan. Topics will include imperialism, colonialism, nationalism, revolution, the world wars, and the Cold War in Asia. Prerequisite: HIS 247 for History majors.

**HIS 498: Advanced Topics** 3 credits
Topics of interest to historians not covered in depth in other courses will be offered. Prerequisite: Instructor’s approval.

**Health Education (HLT)**

**HLT 100: Health Care Roles and Integration of Patient Care** 4 credits
This course is an introduction to the health care system and the structure, roles, and responsibilities of medical and allied health care professionals. Focus is placed on the teamwork necessary to effectively provide the highest quality patient care.

Introduction to the roles and responsibilities of medical and allied health care professionals. Focus is also placed on the teamwork necessary to effectively provide the highest quality patient care.

This course covers the language of medicine that will be used as a foundation for understanding the courses to follow. It will include pronunciation, definition, usage and origins of medical terms. Pathology and medical terms in other languages are also presented. With these skills the student will be able to interpret and communicate in medical terms.

This course introduces the student to the complex organizational dynamics and structures that dictate the interaction among major components of the U.S. health care system along with the cultural beliefs and values, social factors, science and technology, economic forces, and political factors that have shaped the health care delivery system.

This course also considers the ever growing global and diverse perspective of health care and introduces students to a multicultural perspective as it relates to developing professional competence in caring for individuals, families, groups, and communities with diverse cultural backgrounds. Culture is examined as a pervasive, determining “blueprint” for thought and action throughout the human health experience. Students will develop a vocabulary for understanding diversity as a concept that includes many different types of racial, ethnic, religious, and socioeconomic categories. Patterns of human interaction that foster health and quality of life are analyzed, and health-destroying patterns of interaction (e.g., stereotyping, discrimination, and marginalization) are examined and submitted to moral and ethical reflection.

Throughout the course, students are exposed to real-life scenarios dealing with the various competing goals, priorities, and perspectives of the many participants in the health care arena, including financing entities, regulators, health care professionals, and patients, thereby developing the critical thinking skills needed to discuss and shape organizational policy related to systematic processes around health care delivery to a culturally diverse population.

Designed to develop the ability to administer emergency treatment for first responders. Upon successful completion of this course, students will receive American Red Cross Standard First Aid and CPR certification. Also a study of safety and its importance in home, work, and recreational settings.

This course explores the concepts of spirituality and Christian values as they relate to the role of the hospital or health care facility, the health care provider, and the patient. Since illness and stress can amplify spiritual concerns and needs, health care professionals are in a unique position to assist the patient/client in meeting those needs. Students explore and document the spiritual components of health care and wellness that permeate both the Old and New Testaments of the Bible as a foundation of understanding pain, suffering, health care, and wellness. From this foundation, students evaluate and reflect upon concepts such as a healing hospital/health care facility, the caregiver’s role in giving care, the caregiver’s need to care for self, dealing with grief, the role of prayer in health care, and the spiritual needs of patients and families dealing with chronic and acute illnesses.

This course provides a broad understanding of professional ethics, legal standards, and responsibilities as they relate to health care administration. The course introduces students to major ethical theory, principles, and models for the recognition, analysis, and resolution of ethical dilemmas in health occupations. This course also includes a review of classic cases in health care ethics and how they have shaped health policy. Students learn how to approach ethical dilemmas using theoretical frameworks and decision-making processes. Throughout the course, students are given the opportunity to evaluate real-life scenarios and arrive at calculated decisions, thereby developing the critical thinking skills needed for the moral decisions encountered in the health care environment.

In addition to learning about the ethical principles in health care, students are introduced to the relationship between law and ethics, and the consequences and impact on individuals and the health care field. This course addresses the concerns of every health care professional regarding legal responsibility, workplace safety, and the health care facility’s obligation to provide protection from injury for patients, their families, and staff. Through the use of case studies, students are exposed to real-life scenarios dealing with the development, understanding, and execution of the law; employee rights and responsibilities; and patient rights and responsibilities, thereby developing the critical thinking skills needed to evaluate the right and wrong courses of action when faced with complicated legal problems.

This course offers an advanced approach to patient care, patient education, and patient management within the health care facility and the outpatient clinic. It considers more than the patients’ physical needs and addresses the patient as a part of the treatment or diagnostic plan. Upon completion of the course, the student should be able to demonstrate communication skills with different patient populations, such as various cultures, religions, ages, and levels of ability, to participate and discuss the approaches the health care professional should use to best interact with each of these groups.

This course addresses the concerns of every health care professional regarding legal responsibility, workplace safety, and
the health care facility’s obligation to provide protection from injury for patients, their families, and staff. The institution must also be protected from accidental injury costs. This is the purpose of a risk management department. Federal, state, county, and city statutes that regulate the administration of safe health care are discussed. At the end of this course, students should be able to explain their part as health care professionals in the ethical and legal responsibilities of risk management.

**HLT 310V: Spirituality in Health Care  3 credits**

This course explores the concept of spirituality as it relates to the person who is involved in the health care system. Since illness and stress can amplify spiritual concerns and needs, health care professionals are in a unique position to assist the patient/client in meeting those needs. This course explores the relationship between health care professionals and those they serve. Topics include performing spiritual assessment, identifying those experiencing spiritual well-being as well as those experiencing a threat to spiritual well-being, and planning and evaluating care related to spiritual wellness. A spiritual care framework is used to apply these concepts to a variety of populations in diverse clinical settings.

**HLT 312V*: Ethics for Health Care Professionals  3 credits**

This course, designed for health care professionals (providers, educators, and managers), introduces the student to major ethical theory, principles, and models for the recognition, analysis, and resolution of ethical dilemmas in health care practice. Students learn how to approach ethical dilemmas using theoretical frameworks and decision-making processes. Through the use of case studies, students are introduced to health topics such as patients’ rights (paternalism, informed consent to therapy, participation in research); dilemmas of life and death (euthanasia, abortion, and the dying); allocation of health care resources; and special dilemmas of health care professionals. This course also includes a review of classic cases in health care ethics and how they have shaped health policy. An overview of patient education and ethics and a discussion on the professional codes of ethics and standards are also part of this course.

**HLT 314V Health Care Systems  3 credits**

This course is designed to impart an understanding of the forces shaping the present and future health care delivery system.

**HLT 315: Interview/Admission Needs/Professionalism  1 credit**

Development of interviewing and professional presentation skills through the study of various principles and practice within the class. Students will also investigate the admission requirements related to graduate level studies and prepare a quality resume or CV.

**HLT 316: Spanish for Health Care Professionals  3 credits**

This course focuses on providing students with knowledge of the basic structures of the Spanish language, and the specialized medical vocabulary needed to communicate effectively with Spanish-speaking patients in a variety of realistic health care situations in the course of their daily work. Cultural studies emphasize the health beliefs of Spanish-speaking countries close to the United States and Spanish communities within the United States. This course is appropriate for all health-related disciplines.

**HLT 322: Medical Ethics  3 credits**

An introduction to medical ethics which examines several approaches to ethics within the interrelated contexts of medicine, health care, and the law. Topics investigated may include: professional patient relationships; institutional and social settings of care delivery; informed consent, confidentiality, and truth-telling; abortion; critically ill neonates; death and dying; mental illness; human experimentation; resource allocation; and justice and health care.

**HLT 324V: Transcultural Health Care  3 credits**

This course explores meanings and expressions of health, illness, caring, and healing transculturally. Focus is on understanding and developing professional competence in caring for individuals, families, groups, and communities with diverse cultural backgrounds. Culture is examined as a pervasive, determining “blueprint” for thought and action throughout the human health experience. Patterns of human interaction that foster health and quality of life are analyzed, and health destroying patterns of interaction (e.g., stereotyping, discrimination, and marginalization) are examined and submitted to moral and ethical reflection.

**HLT 335V: Polysomnography/Sleep Disorders  3 credits**

This course provides an overview of the history of sleep medicine, normal sleep physiology, and the sleep-wake stage. Sleep disorders and abnormal sleep physiology, an introduction to polysomnography (including patient intaration, sensor and lead placements, and instrumentation), application of respiratory care treatment modalities, patient testing and sleep staging, arrhythmia recognition and other physiologic events, and data acquisition.

**HLT 330V: Quality Improvement in Respiratory Health Care  3 credits**

This course provides an introduction and evaluation of current approaches to assessing risk and improving health care quality through the practice of continuous quality improvement. It focuses on conceptual understanding and experiential learning.

**HLT 362V: Applied Statistics for Health Care Professionals  3 credits**

This introductory course on statistical concepts emphasizes applications to health care professions. The course is designed to prepare students to interpret and evaluate statistics and statistical methods used in published research papers and to make decisions about the appropriateness of specific statistical methods in a variety of settings. Areas of emphasis include introduction to analysis of variance, regression, and graphical presentation; experimental design; descriptive statistics; sampling methods; and z, t, and chi-square.
HLT 382: Principles of Public Health 3 credits

This course explores the impact of numerous professional and societal forces on health care policy and practice. Content includes an analysis of current studies; nursing care policy and position statements; political, environmental, and cultural issues; and changing nursing roles. The study of these issues examines the impact on health care delivery systems in society.

HLT 423: Health Administration 3 credits

This course emphasizes administrative tasks and techniques for use in the commercial health industry. Topics include budget and finance, organizing and promoting health, and business, administrative, and ethical decision-making in a health setting.

HLT 480: Methods of Teaching Health 3 credits

A study of the methods and procedures of teaching health. Resources, aids, and agencies are studied in an attempt to determine how they may best assist the teacher.

HLT 485: Methods of Teaching Health and Measuring in Exercise Science 4 credits

This course is a study of the methods and procedures of teaching health. Resources, aids, and agencies are studied in an attempt to determine how they may best assist the teacher. Practice teaching is included. Tests and measurements in health, physical education, and exercise science are presented. Emphasis is placed on producing valid and reliable tests, data analysis techniques for test evaluation, test construction assessment, and interpretation of test results. Prerequisites: One of the following combinations: 1) BIO 155 and BIO 155L; or 2) BIO 201L, BIO 201L, BIO 202, and BIO 202L; or 3) BIO 360, BIO 360L, and either BIO 474 or BIO 484.

HLT 490V: Professional Capstone Project 3 credits

This course is designed to aid in the development of inquiry and research skills. Learning research skills and conducting research projects benefits the individual and the profession—the individual by learning new knowledge and skills, and the profession by adding to the professional body of knowledge.

HLT 494: Professional Capstone Project 4 credits

This capstone project is the culmination of the learning experiences of students in the Health Care Administration program at Grand Canyon University’s College of Health Sciences. Students prepare written proposals for evidence-based projects focusing on the resolution of issues or problems significant to health care administration. Proposals include problem description, resolution, strategic and implementation plans, evaluation plans, and proposed dissemination of findings. Professional capstone project proposals need to reflect synthesis and integration of course content and professional practice. Capstone projects are guided by the baccalaureate program student learner outcomes and are intended to be presented to a senior-level administrator at a current or potential place of employment. A writing-intensive course. Prerequisites: HCA 470.

HLT 496: Environmental Health 3 credits

A study of your personal health and how it is affected by environmental factors and health risks related to the environment on personal, community, regional, national and global levels. Topics include air, water, waste, disease, toxicology, and occupational health and environmental health planning. Prerequisite: BIO 160
### HLT 497A: Internship in Health Education: A 1 credit

The first portion of a full semester internship. The internship provides an opportunity for students to practice principles learned in their functional area by working in an outside organization under the supervision of a practitioner. Prerequisite: Senior Status or Instructor's approval.

### HLT 497B: Internship in Health Education: B 2 credits

The second portion of a full semester internship. The internship provides an opportunity for students to practice principles learned in their functional area by working in an outside organization under the supervision of a practitioner. Prerequisite: Senior Status or Instructor's approval.

### HLT 510: Foundations for Success in Graduate Study of Health Sciences 4 credits

This course is designed to provide students with the foundational knowledge, resources, and guidance to meet graduate academic and professional health care standards across a variety of disciplines within the industry. Emphasis is placed on critical thinking, technology utilization, research skills, the role of a scholarly graduate student and practitioner, utilization of success protocols, awareness and identification of resources, communication strategies, and goal setting.

### HLT 520: Legal and Ethical Principles in Health Care 4 credits

Topics covered in this course include principles and models for the recognition, analysis, and resolution of ethical dilemmas in health occupations; legal responsibility; workplace safety; and the health care facility’s obligation to provide protection from injury for patients, their families, and staff.

### HLT 540: Health Care Research Methods, Analysis, and Utilization 4 credits

This course focuses on the critical analysis of health care research and its application to the administration and delivery of health care services. Emphasis is placed on strategies to access current and relevant data, synthesize the information, and translate new knowledge into practice. Students are introduced to concepts of measurement, reliability, and validity, as well as ethical issues in the design and conduct of research through an evaluative process of health care initiatives and projects.

### HLT 555: Environmental Health 4 credits

This course is designed to examine environmental dynamics that impact community health and safety. Emphasis is placed on determining relationships between chemical, biological, and physical factors and environmental threats that produce inferior health outcomes. Topics include historical and current approaches for assessing, preventing, and controlling environmental hazards, human health and safety, impact of environmental and occupational agents, environmental justice and equity, and the influence of biological information on public health laws, policies, and regulations.

### HLT 560: Social, Behavioral, and Cultural Factors in Public Health 4 credits

This course is designed to provide an overview of the history of public health, system infrastructure, and its key role in health care. Students explore social, behavioral, and cultural factors that impact health populations based on demographic information such as gender, age, race, ethnicity, socioeconomic status, behavioral risks, and community. Focus is placed on research, theories, and models not exclusively designed for, but applied to, public health issues that help to minimize health disparities through community engagement, education, and empowerment.

### HLT 600: Public Health Policy 4 credits

This course utilizes health care policy as a framework to analyze how health is defined and health care is designed and delivered in the United States and around the world. Emphasis is placed on policies and public health, social justice and human rights principles, public law and regulations quality, global issues; and views of public health, access, disparities, and finance. The various roles of the master’s prepared public health professional in the health care system are explored.

### HLT 605: Public Health Administration 4 credits

This course provides an overview of public health system components and competing factors that have historically impeded the delivery of public health services. Students employ systems thinking processes to determine the most effective approach to strategic implementation of programs. Topics include utilization of collaborative partnerships, global trends analysis, evidence-based decisions regarding improved health outcomes for individuals and communities, root cause analysis, public health financing, systems theory, and application to organizational problem solving. This course prepares learners to apply knowledge in an effort to address future health care challenges as well as goals set forth within the Healthy People 2010 initiative.

### HLT 660: Practicum 4 credits

The practicum course is designed to provide students an opportunity to transition from theory to practice. The student reinforces and integrates concepts, principles, and skills gained during coursework that are essential to professional competency. Students are required to complete a minimum of 80 hours of on-site work under close supervision of a faculty member and an on-site preceptor approved by the college or university. Prerequisites: HCA 620 and a release by the college’s Office of Field Experience documenting that the following requirements have been completed: Documentation (with face sheet) of personal liability insurance ($1 million/$3 million) coverage, programmatic GPA of 3.0 or higher, site approval, and site supervisor approval.

### Human Resources (HRM)

#### HRM 635: Acquiring, Developing, and Leveraging Human Capital 4 credits

The effective strategic management of human capital is the differentiator of every successful organization. This course examines talent management, workforce diversity, succession planning, employee development and motivation, and
performance matrix. This course addresses human resource competencies identified by the Society of HR Management (SHRM). Using the strong strategic HR acumen provided by this course, students will be well-prepared for positions as senior human resources specialists or as general managers. Also LDR 635.

HRM 640: Designing HR for Competitive Advantage 4 credits
Frequent mergers and acquisitions, downsizing, and globalization have increased the complexities of managing human resources. Linking human resource management to the bottom line and decision making is critical for both strategy and business success. This course addresses human resource competencies identified by the Society of HR Management (SHRM). Using the strong strategic HR acumen provided by this course, students will be well-prepared for positions as senior human resources specialists or as general managers.

Health Systems Management (HSM)

HSM 301: Principles of Health Care Management 3 credits
This course provides a survey of the health care industry in general, including industry value chain analysis, funding mechanisms, and governmental regulation. The course also examines the strategic decisions and managerial skills needed to effectively lead health care organizations.

HSM 402: Health Care Economics and Finance 3 credits
This course provides students with an overview of both the macro-economic environment of the health care industry segment, as well as the principal financial mechanisms in place across the U.S. health care industry. It emphasizes the critical financial issues facing the industry, and practical financial analysis skills that have immediate application within the industry. Prerequisites: ECN 212 and FIN 301.

HSM 418: Ethical Concerns in Health Care 3 credits
This course is an introduction to the challenges of ethical decision-making confronted in the health care industry. Topics include euthanasia, treatment protocols, quality of care, product utilization, and legal/regulatory concerns. Prerequisite: BUS 311 or BUS 318.

HSM 620: Health Systems Management 3 credits
This course examines the status and changes in the health care industry, including vertical integration, health care funding mechanisms, and specialized networks. The course also examines the strategic decisions and managerial skills needed to effectively lead health care organizations. Prerequisite: MGT 604.

HSM 621: Health Care Finance 3 credits
This course provides students with a both a macro overview of the principal financial mechanisms in place across the U.S. health care industry and specific insights into the critical financial issues the industry faces. It also emphasizes practical financial analysis skills that have immediate application within the health care industry. Prerequisite: FIN 608.

HSM 622: Ethical Concerns in Health Care 3 credits
This course is an introduction to the challenges of ethical decision-making confronted in the health care industry. Topics include euthanasia, treatment protocols, quality of care, product utilization, and legal/regulatory concerns. Prerequisite: BUS 604.

HSM 650: Health Systems Management 4 credits
This course examines the status and changes in the health care industry, including vertical integration, health care funding mechanisms, and specialized networks. The course also examines the strategic decisions and managerial skills needed to effectively lead health care organizations. Prerequisite: MGT 604.

HSM 651: Health Care Finance 4 credits
This course provides students with a both a macro overview of the principal financial mechanisms in place across the U.S. health care industry and specific insights into the critical financial issues the industry faces. It also emphasizes practical financial analysis skills that have immediate application within the health care industry. Prerequisite: FIN 650.

HSM 653: Ethical Concerns in Health Care 4 credits
This course is an introduction to the challenges of ethical decision-making confronted in the health care industry. Topics include euthanasia, treatment protocols, quality of care, product utilization, and legal/regulatory concerns.

History and Theological Studies (HTH)

HTH 303: History of Christianity in America 3 credits
This course is a study of Christianity in its American context. It is a historical inquiry that examines the relationship between Christianity and culture in order to answer how and why the political and social, and intellectual traditions in American culture shaped Christianity and were, in turn, shaped by Christianity.

HTH 355: Biblical Theology 3 credits
An introduction to the history, method, and structure of biblical theology. Attention is given to the study of some of the key topics of biblical theology, including God, God’s role in history, the concept of the Messiah, Jesus Christ as Suffering Servant, the church as covenant community, and the biblical foundations of ethics.

HTH 359: Systematic Theology 4 credits
This course is a systematic study of the major doctrines of the Christian religion, including revelation and the Bible, the Trinity, the doctrine of man, the atonement, salvation and Christian growth, the church and it ordinances, and eschatology, examining the biblical foundation for these teachings and their development over time. The course also discusses the relationship between Christianity and other world religions and the relationship...
between Christian theology and philosophy. Prerequisites: BIB 351 and BIB 354.

**HTH 365: Historical Theology** 3 credits

This course is a study of the story of the main highlights of the development from the second century A.D. to the present, of Christian beliefs, doctrines, and theories. Special emphasis is given to how these beliefs, doctrines and theories are connected with concrete events and real persons to show why they mattered and how they developed. The study includes an understanding of the role of heresy, philosophy, and culture as factors in the shaping of Christian theology. Special emphasis is also given to a deeper look at the place of evangelical theology.

**HTH 373: Christian Doctrines** 3 credits

A systematic study of the major doctrines of the Christian religion, including revelation and the Bible, the Trinity, the doctrine of man, the atonement, salvation and Christian growth, the church and its ordinances, and eschatology. Prerequisites: BIB 113 and BIB 123.

**HTH 375: Contemporary Theology** 3 credits

Begins with a brief background of the development of Protestant Liberal Theology starting with Schleiermacher. Then, more attention is given to twentieth-century schools of theological thought: Neo-Orthodox, Existential, Process, Theology of Hope, Liberation Theology, etc.

**HTH 379: History of Christianity** 4 credits

This course addresses the significant movements and turning points within the church from New Testament times through the Reformation and into modern day America and the world. Special emphasis is given to the ancient Christian church, the church fathers, heresies, monasticism, the Papacy, the practices and problems of the church, the Protestant Reformation, the Catholic Counter-Reformation, and the mission movement—both Catholic and Protestant. Attention is also given to the relationship between Christianity and culture, as Christianity in its geographical expansion through the course of history has interfaced with various cultures ranging from the Jewish world, to the Greco-Roman world, to the barbarian cultures of northern Europe, to the varying cultures encountered as Christianity spread to the New World and then to African and Asian cultures. Prerequisites: BIB 104 and BIB 105.

**HTH 469: Contemporary Theology** 4 credits

This course begins with a brief background of the development of Protestant liberal theology starting with Schleiermacher. Then attention is given to the 20th century schools of theological thought: neo-orthodox, existential, process, theology of hope, Latin American liberation theology, African-American liberation theology, feminist liberation theology, new Catholic theology, theological expressions of Christianity in Africa and Asia, narrative/post modern approaches to theology, and variations and popular expressions in Protestant theology particularly in America. Even as Christianity must be clothed in various cultures, so the various contemporary theologies attempt to relate theological truth in ways that are relevant to particular cultures or sub-cultures. In the process of studying each contemporary theology, attention will also be given to how that theology is expressed in cultural clothing. Prerequisite: HTH 359.

**HTH 505: Systematic Theology I** 4 credits

This course is an introduction to the study of theological method and the doctrines of revelation, God, humanity, and the world.

**HTH 550: Systematic Theology II** 4 credits

This course is a continuation of the study of theology focusing on the doctrines of soteriology, Christology, ecclesiology, and eschatology. Prerequisite: HTH 505.

**HTH 655: Christian Worldview and Contextualization** 4 credits

This course is a study of the Christian worldview and other dominant worldviews—religious and secular—and their role in the contextualization of the Christian message and mission. Prerequisites: HTH 505 and HTH 550.

**Intercultural Ministries (INT)**

**INT 244: World Religions** 4 credits

This course is a study of the major contemporary religions of the world including Abrahamic religions, Eastern religions, and other religions. The course covers religious texts, historical background, and current beliefs and practices. Emphasis is given to the ideological foundations of a Christian worldview, a comparison of worldviews, and the application of worldviews within a global society.

**INT 303: Cross-Cultural Communication** 3 credits

A study of cross-cultural communication and cultural transition for students preparing for cross-cultural Christian ministry. The course will present with the philosophy, principles, and methods of cross-cultural communication and cultural transition/adjustment.

**INT 333: Christianity and Culture** 3 credits

This course leads students to look critically at what they consider to be fundamentally Christian, and therefore imperative to duplicate across cultural lines, as opposed to what they consider to be Christian that is actually a cultural value and not necessarily Christian. Special emphasis will be given to comparisons between western and non-western cultures, syncretism, and current efforts being made in intercultural evangelism.

**INT 454: Christianity and Culture** 4 credits

This course leads students through a cross-cultural study to critically examine the essentials of Christianity as opposed to cultural values that might be considered Christian. Special emphasis is given to comparisons between Western and non-Western cultures, syncretism, and Christianity’s expression in cultures other than the United States. Some aspects of cross-cultural communication are also included. Prerequisite: INT 244.

---

*Campus/Off-site only | ^Writing-intensive course | *Fulfills General Education requirement |
INT 463: World Religions 3 credits
A study of the major contemporary religions of the world, including both historical background and development and current beliefs and practices with emphasis on basic religions, Hinduism, Jainism, Buddhism, Sikhism, Taoism, Confucianism, Shintoism, Zoroastrianism, Judaism, Christianity, Islam, and Baha’i.

INT 520: Cross-Cultural and Multicultural Ministry 4 credits
This course is a study of the opportunities and challenges of ministering cross-culturally and multiculturally. Students will consider domestic and international settings.

INT 630: Issues in Urban Ministry 4 credits
This course is an examination of how the church’s mission expresses itself in the urban setting and the ethical implications for decisions made in urban ministry.

Justice Studies (JUS)
JUS 100: Introduction to the Justice System 3 credits
This course provides the student with current and up-to-date information, policies, and techniques that are being used in police courts and corrections. Students are required to research new trends in the system, not only in the U.S., but globally.

JUS 101: Issues in Justice Studies 3 credits
This course emphasizes issues relating to justice policies, perspectives, techniques, role, institutional arrangements, management, uses of research, and innovative patterns.

JUS 104: Introduction to Justice Studies 4 credits
This course provides an introduction to the basic components of the criminal justice system in the United States today: corrections, courts, and law enforcement.

JUS 110: Crime and Criminology 4 credits
This course provides an examination of classic and contemporary theories of crime causation, including psychological and social causes of crime and theories of punishment.

JUS 250: Critical Issues in Criminal Justice 4 credits
This course provides an examination of issues relating to justice policies, perspectives, techniques, roles, institutional arrangement, management and administration, use of research, and innovative patterns. Prerequisite: JUS 104 and JUS 110.

JUS 296: Social Research 3 credits
Also POS 296 and SOC 296. An exploration of the various methods used by social scientists to find answers to the questions posed by their subject matter. Includes basic terminology, concepts, and practice using methods such as surveys, experiments, field research, and evaluation research, as well as some unobtrusive methods. Prerequisite: SOC 101.

JUS 303: Theory of Criminal Justice 3 credits
An examination of classic and contemporary schools of thought, including psychological and social causes of crime and theories of punishment. Prerequisites: JUS 100 and JUS 101.

JUS 306: Police Function 3 credits
Objectives, strategies, programs, roles, perspectives and interagency relationships of police. Prerequisites: JUS 100 and JUS 101.

JUS 308*: Adjudication Function 3 credits
Objectives, strategies, programs, roles, perspectives, and interagency relationships of the courts. A Writing-Intensive course. Prerequisites: JUS 100 and JUS 101.

JUS 310: Correctional Function 3 credits
Objectives, strategies, programs, perspectives, and interagency relationships of correctional agencies. Prerequisites: JUS 100 and JUS 101.

JUS 320: The Police Function 4 credits
This course provides an examination of the objectives, strategies, tactics, programs, roles, perspectives, public perception, and interagency relationships of the police.

JUS 321*: Practical Criminalistics I 2 credits
Students explore the fundamental applications of forensic science essential for gathering evidence at the crime scene and methods for analysis of evidence in the crime laboratory. Co-requisite: JUS 321L.

JUS 321L*: Practical Criminalistics I Lab 1 credit

JUS 325*: The Adjudication Function 4 credits
This is a writing-intensive course emphasizing the objectives, strategies, programs, roles, perspectives, and interagency relationships of the courts.

JUS 330: The Correctional Function 4 credits
This course provides an examination of the objectives, strategies, programs, roles, perspectives, and interagency relationships of correctional agencies.

JUS 333*: Forensic Photography 2 credits
Students use photography and other aids in identification and preservation of evidence such as fingerprints, footprints and impressions. Covered are techniques in crime scene and traffic accident photography. Co-requisite: JUS 333L.

JUS 333L*: Forensic Photography Lab 1 credit
A lab course designed to support JUS 333, Forensic Photography. Co-requisite: JUS 333.
JUS 347*: Crime Scene Reconstruction and Recording  2 credits
Students use logical thinking skills to reconstruct a crime scene and then record the crime scene using a variety of methods to include: photography, rough sketch, refined sketch, CAD programs and thorough report writing. Accurate presentations of crime scenes are required for successful completion. Prerequisites: JUS 333 and JUS 33L. Co-requisite: JUS 347L.

JUS 347L*: Crime Scene Reconstruction and Recording Lab  1 credit
A lab course designed to support JUS 347, Crime Scene Reconstruction and Recording. Co-requisite: JUS 347L.

JUS 351*: Practical Criminalistics II  2 credits
This course continues the exploration of evidentiary recovery of materials at crime scenes. Prerequisites: JUS 321 and JUS 321L. Co-requisite: JUS 351L.

JUS 351L*: Practical Criminalistics II Lab  1 credit
Students collect and analyze tool-mark evidence, impression evidence, questioned documentary evidence, blood spatter, and toxicology evidence. Co-requisite: JUS 351L.

JUS 363: Introduction to Probability and Statistics  3 credits
Also POS 363, PSY 363, and SOC 363. A study of elementary theories of probability, distribution, and testing of statistical hypotheses. Practical experience is provided in the application of statistical methods. Prerequisite: MAT 120 or equivalent.

JUS 430: Criminal Law  4 credits
This course provides an introduction to criminal liability with an emphasis on the elements of a crime and governmental sanctions of individual conduct as formulated by the legislature and the court system.

JUS 435: Criminal Procedure  4 credits
This course is a study of the procedural process from a constitutional perspective as it relates to due process in the context of crime control.

JUS 442: Terrorism’s Impact on Emergency Management  4 credits
This course examines the historical and political impact of terrorism on emergency management, including examples of terrorist activity, a summary of federal government efforts, and media coverage of terrorism. Also EMM 442.

JUS 452: Juvenile Delinquency and Justice  4 credits
This course is an exploration of causes and responses to juvenile crime viewed through the prism of evolving societal perspectives on the criminal culpability of youth. Prerequisite: JUS 250.

JUS 460: Ethics in the Criminal Justice System  4 credits
This course conducts an in-depth examination of the subculture created in the American justice system. Police subculture, corrections subculture, and the culture of the courtroom workgroup are explored from the perspective of a participant. Prerequisite: JUS 250.

JUS 461: Substantive Law  3 credits
Criminal liability with emphasis on the elements of a crime. Governmental sanctions of individual conduct as formulated by the legislature and the court system. Prerequisites: JUS 100 and JUS 101.

JUS 462: Procedural Law  3 credits
Study of the criminal process from a constitutional perspective as it relates to due process in the context of crime control. The limits of stops, arrests and searches are explored. Prerequisites: JUS 100 and JUS 101.

JUS 490*: Senior Seminar: Justice Studies  3 credits
The integration of justice studies learning, focusing on its relevance to graduate schools and related careers in justice studies. A Writing-Intensive course. Prerequisites: Senior status and justice studies major.

JUS 497: Internship in Justice Studies  4 credits
Placement of student in a criminal justice or related agency to further the student’s integration of theory with practice. Prerequisites: Junior or senior status and 15 credits of JUS courses.

JUS 498: Advanced Topics: Justice Studies  3 credits
In-depth study of chosen topics such as: Justice and Ethics, Juvenile Delinquency, Gangs, Comparative Criminal Law, Law and Social Control, and Issues of Death in Politics and Justice. Prerequisites: JUS 100, JUS 303, and one Upper Division Justice Studies course, or instructor’s approval.

JUS 499: Independent Study  1–4 credits
This involves research, seminars, or readings on a special topic to be selected by the student and the faculty advisor are appropriate. This course may be taken for one, two, three or four credits, depending on the amount of time and work involved and may be repeated for up to four credits total credit per subject area unless specified otherwise in requirements for a major.

JUS 510: Research Methods  4 credits
This course provides a fundamental analysis of research and a methodological evaluation of criminal justice topics. This course familiarizes students with aspects of statistical analysis and methodological evaluation of criminal justice topics. This course also familiarizes students with aspects of statistical analysis and methodological evaluation of criminal justice topics. This course also provides for use of research design in community action.

JUS 515: Organizational Behavior and Leadership in Criminal Justice  4 credits
This course explores contemporary law enforcement management by examining personality, values, groups, power dimensions, decision making, conflict management, change, and organization development.
JUS 520: Restorative Justice 4 credits
This course compares and contrasts traditional goals of punishment (rehabilitation, incapacitation, retribution, and deterrence) with the concepts of restorative justice. Topics include community service, victim assistance, victim-offender mediation, and restitution. Restorative justice seeks a balance between the need to rehabilitate offenders while executing a duty to protect the public.

JUS 521: Criminal Investigations 4 credits
This course enhances students’ understanding of criminal investigative procedure, collection and preservation of evidence, chain of custody concerns, computer forensics, investigative jurisdiction, administration, and use of information gathering techniques.

JUS 524: Terrorism and Homeland Security 4 credits
This course provides insight into the historical causes, strategies, and tactics of terrorism, as well as counterterrorism planning and utilization of law enforcement assets to prevent, detect, and deter acts of terrorism. Also covered are constitutional issues regarding terrorism suspects, long-term detention, financial embargoes of private funds, and other issues pertinent to the modern political climate.

JUS 531: Constitutional Issues in Criminal Justice 4 credits
This course conducts an in-depth analysis of both historic and contemporary questions of constitutional rights. Provided is an understanding of the powers of the federal courts, Congress, and the president; an examination of the doctrines of separation of power and federalism; and discussion regarding some of the limitations that the Constitution imposes on state powers. Topical coverage also includes the takings and contracts clauses, due process, freedom of speech, freedom of religion, and equal protection.

JUS 610: Forensic Psychology 4 credits
This course provides an objective study of the many roles psychology plays in the legal system, including expert witnesses, criminal profilers, and trial consultants for jury selection and child custody hearings.

JUS 615: Critical Issues in Criminal Justice 4 credits
This course expands the student’s understanding of the scope of criminological theories focused through contemporary peer-reviewed resources.

JUS 618: Ethics and Liability for Policing and Corrections 4 credits
This course explores the subcultures created by police and correctional officers. Topics include the need for building a subculture of mutual support and survival in a dangerous profession, dilemmas of new officers entering corrupt departments, and ways administrators can help police and correctional officers rediscover their community.

JUS 620: Exploration of Law and Public Policy 4 credits
This course explores the interconnectedness of law and socioeconomic concerns and attempts to generate a holistic perspective of society and social control for those charged with the administration of justice.

JUS 630: International Law 4 credits
This course addresses the issue of international law in an increasingly interconnected world. The course explores the procedural workings of various international and regional organizations regarding public international law.

JUS 635: Legal Research 4 credits
This course teaches students how to do legal research using both hardcopy and electronic resources. Presented from the perspective of a law specialist working for a client, this course allows students to consider a client’s legal issues and to discover how to locate resources that address the problem, including statutes, regulations, court orders, court decisions, and secondary sources.

JUS 651: Capstone 4 credits
This course is taken in the final term of the graduate program. It focuses on professional portfolio development and a final written proposal by the graduate. The portfolio will contain the graduate’s curriculum vitae, exemplars of writing from graduate courses, a statement of criminal justice philosophy, a 5-year plan for professional goals, and a research topic paper/written proposal.

A final written proposal must focus on how the graduate will use the totality of the learning experience to examine and improve the criminal justice system at the federal, state, county, or city level. The proposal must exhibit adequate research, coordination within the extant layers of justice policy, realistic consideration of available resources, and a reasonable timeline of benchmarks.

Latin (LAT)

LAT 101: Elementary Latin I 3 credits
This course builds a foundation in grammar, syntax, reading, translation, and prose composition through the use of a textbook and classroom practice.

LAT 101L: Elementary Latin I Lab 1 credit
A lab course designed to complement and support the principles learned in LAT 101 through listening, pronunciation, and group discussion.

LAT 102: Elementary Latin II 3 credits
This course continues to build upon a foundation in grammar, syntax, reading, translation, and prose composition through the use of a textbook and classroom practice. Prerequisite: LAT 101, LAT 101L

LAT 102L: Elementary Latin II Lab 1 credit
A lab course designed to complement and support the principles learned in LAT 102 through listening, pronunciation, and group discussion. Prerequisite: LAT 101, LAT 101L
Leadership (LDR)

LDR 600: Leadership Styles and Development 4 credits
This course explores the nature of business leadership models and theories, examines these models through a broad variety of insights and viewpoints, and provides a description and analysis of these approaches to leadership, giving special attention to how the models can improve leadership in real-world organizations.

LDR 610: Power, Politics, and Influence 4 credits
This course focuses on sources and types of power and specific tactics for becoming an empowering leader. Issues include organizational politics, influence tactics, and succession planning. Students learn how transactional leaders can become transformational leaders.

LDR 615: Organizational Development and Change 4 credits
This course is an exploration of the behavioral forces and relationships that influence organizational effectiveness and change. Topics include the study of intervention strategy and application skills.

LDR 620: Leading as a General Manager 4 credits
This course is designed to prepare leaders for the cross-functional complexities inherent in organizational life. Students develop an advanced skill set enabling effective leadership in each of the major organizational functions (marketing, finance, human resource management, information systems, and operations management). The course explores methods of evaluating alternatives to make effective decisions.

LDR 625: Organizational Culture and Team Leadership 4 credits
This course equips students to fully understand the complexities of organizational systems and cultures, the ways in which these forces manifest themselves, and the means by which leaders intentionally impact the shape that these forces take in their organizations. Additionally, this course covers team dynamics, group processes, and strategies for designing and supporting teams in the workplace.

LDR 630: Servant Leadership 4 credits
This course focuses on servant leadership, how a servant leader is different from other leaders, and how focusing on the needs of others can create interdependency rather than dependency in organizations.

LDR 635: Acquiring, Developing, and Leveraging Human Capital 4 credits
The effective strategic management of human capital is the differentiator of every successful organization. This course examines talent management, workforce diversity, succession planning, employee development and motivation, and performance matrix. This course addresses human resource competencies identified by the Society of Human Resource Management (SHRM). Using the strong strategic HR acumen provided by this course, students become well-prepared for positions as senior human resources specialists or as general managers.

LDR 640: Leadership and Innovation 4 credits
This course provides students with an understanding of various models of problem solving and the ability to apply them, as well as knowledge of various techniques, strategies, and skills appropriate for creative and innovative thinking.

LDR 645: Cross-Cultural Communication 4 credits
This course examines leadership communication in a cross-cultural setting and seeks to increase participants’ overall communication skills. The importance of understanding key audiences is analyzed, including connecting and communicating with important stakeholders, communicating change, communicating during a crisis, and framing a leadership message.

LDR 650: Diversity Management and Leadership 3 credits
Demonstrating organizational leadership demands the development and implementation of diversity management and a commitment to lead using values-based strategic and operational objectives designed to champion organizational diversity as a source of strength. Students will demonstrate the capacity to value the talents and skills of a diverse workforce with respect to gender, age, race, ethnicity, disability, and lifestyle. Students will master leadership skills based on a comprehension that leading and managing diversity is a process of constructing a work place that is inclusive and allows all employees to reach their full work potential. Through diversity leadership, students will make significant cognitive connections across organizational practices and access the full talents of individuals to achieve and sustain a competitive advantage.

LDR 657: Leading Global Organizations 3 credits
Leading global organizations has become a significant skill set responsibility for today’s business and organizational leaders. The course will address the need to develop the capacity for leaders to promote a global perspective within multi-cultural and multi-national organizations. Students will be able to recognize the impact of the global economy on organizational decision-making, planning, and sourcing of organizational resources and functions. Understanding how global operations are influenced by environmental differences, legal-political, and economic systems within countries will be examined as central to leaders maintaining a global competitive advantage. Students will explore international business practices leaders must comprehend that drive global sourcing, organizational structure, and the influence of diverse cultures on leadership practices and decision-making.

LDR 800: Ethical Dilemmas and Stewardship 3 credits
This course examines multiple ethical frameworks, principles, and theories as they apply to the study and practice of leadership. Corporate social responsibility will be addressed from the perspective of ethical decision making.

LDR 802: Progressions in Leadership Thought 3 credits
This course provides an overview of seminal leadership theories and models. Students will focus on understanding the
development and evolution of leadership theories and the range and emphasis of leadership research.

**LDR 804: Leading Across Cultures** 3 credits
This course explores the opportunities and challenges facing leaders in the global environment. The course topics focus on aspects of leading global and diverse workforces, and on theories of leadership and leadership development in diverse and global cultures.

**LDR 805: Innovation: The Last Frontier of Competitive Advantage** 3 credits
In the face of rapidly changing customer needs, the importance of innovation to the survival of businesses cannot be overemphasized. Innovation has become the fundamental source of competitive advantage and new value for companies facing the threat of extinction. The purpose of this course is to develop an understanding of the leadership skills and capabilities required to foster, lead, and sustain innovation in organizations operating under either the ‘steady state’ or change environment. The fundamental role of leadership in the innovation process will be explored by evaluating the relationship between key leadership and innovation theories.

**LDR 809: Servant Leadership** 3 credits
This course examines the essence of what makes servant leadership distinct from other styles of leading. The focus on the needs of others rather than self, leading without ego, and creating interdependence rather than dependency are examples of topics that will be examined. The pathway to becoming a servant leader will also be explored, including the concept that one chooses to serve first and then is compelled to lead in order to fulfill that service.

**LDR 825: Strategic Planning and Change** 3 credits
This course provides an overview of the impact of leadership and the effects of behaviors on the formulation and execution of strategy within an organization. Topics include the increasing importance of resilience and change in today’s global and turbulent economy.

**Music Applied Piano (MAP)**

**MAP 118: Private Piano Study I** 1 credit
This course is the private applied study required for music majors in their major instrument or area. Prerequisite: Instructor’s approval.

**MAP 128: Private Piano Study II** 1 credit
This course is the private applied study required for music majors in their major instrument or area. Prerequisite: Instructor’s approval.

**MAP 218: Private Piano Study III** 1 credit
This course is the private applied study required for music majors in their major instrument or area. Prerequisite: Instructor’s approval.

**MAP 250: Private Piano Study IV** 1 credit
This course is the private applied study required for music majors in their major instrument or area. Prerequisite: Instructor’s approval.

**MAP 318: Private Piano Study V** 1 credit
This course is the private applied study required for music majors in their major instrument or area. Prerequisite: Instructor’s approval.

**MAP 350: Private Piano Study VI** 1 credit
This course is the private applied study required for music majors in their major instrument or area. Prerequisite: Instructor’s approval.

**MAP 450: Private Piano Study VII** 1 credit
This course is the private applied study required for music majors in their major instrument or area. Prerequisite: Instructor’s approval.

**MAP 451: Private Piano Study VIII** 1 credit
This course is the private applied study required for music majors in their major instrument or area. Prerequisite: Instructor’s approval.

**Mathematics (MAT)**

**MAT 100: Beginning Algebra** 3 credits
Review of pre-algebra, real number system, algebraic expressions, solving linear equations and inequalities, graphing linear equations and inequalities, systems of equations and inequalities, laws of exponents, functions, and polynomials. The intent of the course is to prepare students for MAT 120. MAT 100 does not fulfill the math requirement for any degree program.

**MAT 110: Basics of Algebra** 4 credits
This course begins with a review of basic mathematical concepts, such as operations with fractions, decimals, percents, and real numbers; exponents; order of operations; and simplifying expressions. It then continues with an introduction to underlying concepts and techniques of algebra, such as solving linear equations and inequalities; graphing linear equations and inequalities; system of equations; and functions. The course is designed to prepare students for MAT 134.

**MAT 120: Intermediate Algebra** 3 credits
Factoring polynomials, rational expressions and equations, radical expressions and equations, quadratic equations, functions, and inequalities, exponential and logarithmic functions, conic sections and nonlinear systems. Prerequisite: MAT 100.

**MAT 121: College Algebra** 3 credits
Equations, inequalities, and modeling, functions and graphs, polynomial and rational equations, exponential and logarithmic equations, systems of equations and inequalities, matrices and determinants, the conic sections, sequences, series, and probability. Prerequisites: Grade of “C” or better in MAT 120.

*Campus/Off-site only | Writing-intensive course | Fulfills General Education requirement |

</tbody>
</table>
needs of future teachers of high school mathematics. A brief introduction to non-Euclidean geometry is also included.

**MAT 320: Technology in the Mathematics Curriculum** 3 credits

A study of the use of computers, calculators, and graphing utilities in the mathematics classroom, with an emphasis on problem solving. Educational hardware and commercial software are introduced. Applications of selected programming languages to the teaching of mathematics will be discussed.

**MAT 342: Linear Algebra** 3 credits

An introductory study of finite dimensional vector spaces, linear transformations, and matrices associated with them. Proofs and theory are included. Prerequisite: MAT 271 or instructor’s approval.

**MAT 351: Calculus for Biomedical Sciences** 4 credits

This course is intended for health science majors and develops the concepts of calculus through a wide variety of biological and medical applications. Topics include an in-depth study of limits, continuity, the derivative and its applications, integrals, techniques of integration and applications of integration. These concepts are examined through algebraic and transcendental functions of a single variable. An introduction to algebraic functions of several variables and a qualitative analysis of solutions of first-order differential equations is also provided. Application areas include mathematical physiology, pharmacology, cell biology, and population biology. Prerequisites: Grade of C or better in MAT 250 or college algebra.

**MAT 352: Calculus and Analytic Geometry I** 4 credits

This course covers in depth the differential calculus portion of a three-course calculus sequence. Topics include limits, continuity, and derivatives of algebraic, transcendental, and inverse functions; applications of the derivative; and integrals of algebraic and transcendental functions of one variable, with applications. Prerequisite: MAT 250.

**MAT 353: Calculus and Analytic Geometry II** 4 credits

This course provides a rigorous treatment of integration and is the second calculus course in a three-course sequence. Topics include applications of definite integrals, further techniques of integration, indeterminate forms, L’Hopital’s Rule, improper integrals, infinite series, conic sections, parametric equations, polar coordinates, and differential equations. Prerequisite: MAT 352.

**MAT 363: Probability and Statistics for Mathematics and Science** 3 credits

A study of elementary theories of probability, distribution, estimation and testing of statistical hypotheses. Prerequisite: MAT 271.

**MAT 373: Differential Equations** 3 credits

A study of the methods of solution of ordinary differential equations and their applications including the theoretical development of the methods. Prerequisite: MAT 272.

**MAT 410: Math PRAXIS Preparation** 3 credits

Arithmetic, basic algebra, geometry and measurement, functions and their graphs, data probability, statistical concepts, discrete mathematics, and problem-solving exercises are the topics covered to prepare students for the PRAXIS test in Middle School Mathematics.

**MAT 466: Methods of Teaching Secondary School Mathematics I** 3 credits

This course is designed to develop an understanding and ability to apply the methods and principles of effective instruction using mathematics in the secondary classroom. This course examines different learning modalities, instructional strategies, and the use of technology to help design and deliver effective lessons that are aligned to standards and increase student achievement. Topics to discuss in this course will include, but are not limited to algebra and geometry. Prerequisite: MAT 270.

**MAT 467: Methods of Teaching Secondary School Mathematics II** 3 credits

This course is designed to develop an understanding and ability to apply the methods and principles of effective instruction using mathematics in the secondary classroom. This course examines different learning modalities, instructional strategies, and the use of technology to help design and deliver effective lessons that are aligned to standards and increase student achievement. Topics to discuss in this course will include, but are not limited to precalculus, calculus, probability, and statistics. Prerequisite: MAT 466.

**MAT 483: Mathematics in the Secondary School** 3 credits

Topics in geometry, number theory, algebra and analysis. Emphasis is on the development of a problem-solving process and unifying principles. Teaching strategies, examination of secondary school curricular materials and classroom experience will be included. Required course for Mathematics for Secondary Teacher majors. A Writing-Intensive course. Prerequisite: MAT 271.

**MAT 484: Mathematics in the Elementary School** 3 credits

Emphasis is on the development of a problem-solving process and unifying principles. Teaching strategies, examination of secondary school curricular materials, and classroom experience will be included.

**MAT 495: Mathematics Capstone** 3 credits

The professional capstone project needs to reflect synthesis and integration of course content and professional practice. This course provides a structured way to organize facts, information, and ideas from the math content area. Theoretical concepts from the major will be discussed by critically analyzing and evaluating ideas relating to a practical application process.

**Church Music (MCH)**

**MCH 378: Music in Worship** 3 credits

A study of music in worship from Biblical times to the present. Comparison of liturgies and orders of worship and planning...
Medical Imaging (MDI)

MDI 304V: Medical Imaging in the Digital Environment 3 credits

This course presents an introduction to medical imaging in the digital environment. Included is the history of computers in radiography and a look into the future of digital imaging. Subjects covered are, equipment, interface standards, networking and interfacing, RIS, computed radiography, PACS, image processing and quality, functions and parameters, and practical experiences. At the end of this course the student should be able to discuss the subject of digital medical imaging and continue on to advanced imaging modality studies.

MDI 306: Physics and Instrumentation of Magnetic Resonance 3 credits

Students will become familiar with the basic concepts of magnetic resonance physics. Content is designated to impart an understanding of the theories of magnetic resonance properties, their discovery, and initial applications in the clinical setting. Prerequisite: Enrollment in the BS in Radiologic Science or Certificate in Magnetic Resonance Imaging.

MDI 308: Physics and Instrumentation of Computed Tomography 3 credits

Students will become familiar with the basic concepts of computed tomography physics. Content is designed to impart an understanding of the theories of computed tomography properties, their discovery, and initial clinical setting. Prerequisite: Enrollment in the BS in Radiologic Science or Certificate in Computed Tomography.

MDI 312: Breast Anatomy, Physiology and Pathology 3 credits

Content establishes a knowledge base in breast anatomy and physiology. Correlation between breast anatomical structures and mammographic anatomic structure are described and discussed. Introduces the concepts of breast viability and pathology, presents benign and cancerous pathology, including their mammographic appearance.

MDI 314: Mammography Facility and Equipment Management 3 credits

Content provides students with an overview of the mammography facility and its personnel. It provides a foundation for the types of patient services offered and the regulations that affect the operation of a facility or service. Content also gives the student a foundation of the concepts of mammography equipment. The types and function of mammographic and quality control equipment, along with the mandated requirements governing their use, are described and discussed. Prerequisite: Enrollment in the BS in Radiologic Science or Certificate in Mammography Program.

MDI 316: Mammography Procedure Protocols 3 credits

Content establishes a knowledge base in the type and application of interventional procedures involving mammography. Provides a knowledge base of the various positions and projections used in mammography. Content includes discussions on clinical data needed to perform the exam and positioning techniques for screening and diagnostic mammography. This course also develops an understanding of basic principles of sonomammography. Where applicable, ultrasonographic examinations that complement breast imaging are discussed. Includes patient care and adaptive positioning. Prerequisite: Enrollment in the BS in Radiologic Science or Certificate in Mammography Program.

MDI 318: Quality Management in Mammography 3 credits

Content establishes a knowledge base of factors that govern and influence producing and recording mammographic images. Content establishes a protocol for quality assurance and quality control that incorporates all operations and functions of a mammography facility or service. The interrelatedness of accreditation and service delivery standards are demonstrated and discussed. Prerequisite: Enrollment in the BS in Radiologic Science or Certificate in Mammography Program.

MDI 410V: Critical Patient Care in Medical Imaging 3 credits

In this course, critical procedures such as advanced cardiac life saving skills, treatment of reactions to contrast media, and physiological monitoring and recording are presented.

MDI 412: Magnetic Resonance Imaging Procedures and Protocols 3 credits

Content is designed to provide students with an understanding of MR tissue characteristics as they will be used in producing images. A body system approach including Musculoskeletal, Thoracic/intestinal, Abdomen/Pelvis and Central Nervous Systems is used. Prerequisite: MDI 306.

MDI 414: Computed Tomography Procedures and Protocols 3 credits

Content is designed to provide students with an understanding of computed tomography tissue. Prerequisite: MDI 308.

MDI 420: Pathology in MRI/CT 3 credits

Content introduces the study of pathology and how this relates to CT and MR imaging. A body system approach is used. Prerequisite: BIO 311; Enrollment in the BS in Radiologic Science or Certificate in Computed Tomography or Certificate in Magnetic Resonance Imaging.

MDI 424V: Quality Management in Medical Imaging 3 credits

This course is designed to provide the basics of imaging system selection and architectural design of an advanced imaging facility. Discussions regarding staffing needs and staff education are included.
Music Education (MED)

MED 003: Music Educator's National Conference 0 credits
The Music Educator's National Conference Collegiate Membership gives the students an opportunity for professional development while still in school. It is expected the benefits will accrue both to the students and to the professional organization as the students gain an understanding of the practices of the professional music educator.

MED 232: Woodwind Instrument Class 1 credit
A practical study of the high and low woodwind instruments. The student learns to play, care for, and teach each instrument. Prerequisite: Sophomore status.

MED 241: Brass Instrument Class 1 credit
A practical study of the high and low brass instruments. The student learns to play, care for and teach each instrument. Prerequisite: Sophomore status.

MED 251: Percussion Instrument Class 1 credit
Same format as MED 241, except pertaining to percussion instruments. Prerequisite: Sophomore status.

MED 252: String Instrument Class 1 credit
A practical study of the high and low string instruments. The student learns to play, care for, and teach each instrument. Prerequisite: Sophomore status.

MED 302: Technology for Music Educators 2 credits
Students will study and utilize a variety of music technologies such as computer software, hardware, networking, multimedia, interactive media, and the Internet in order to foster inquiry, collaboration, and interaction in classroom to meet the needs of a diverse student population.

MED 360: Music Methods and Assessment in the Elementary School 4 credits
This course is a study and demonstration of methods and materials for the first six grades. A study is made of activities implemented with each grade level. Lesson plans are prepared. Students visit classrooms to observe teaching situations. Practicum hours: 30. Prerequisite: MUS 275.

MED 370: Music Methods and Assessment in the Secondary School 4 credits
This course is a study of methods for developing and conducting the music program in junior and senior high schools. Methods, materials, topics, and issues in music education will be used to prepare music education majors to enter the teaching profession. Practicum hours: 30. Prerequisite: MUS 450.

MED 480: MCAT/DAT Exam Preparation 3 credits
This course provides a review of key concepts tested on the MCAT and DAT exams, including general and organic chemistry, biology, biochemistry, and physics/quantitative reasoning. Students will also learn test-taking techniques and discuss exam format. MCAT students will take several practice exams as part of this course.

MED 480A: Student Teaching: Elementary Music 6 credits
Teacher candidates are required to fulfill an 8-week internship experience in a classroom with a certified, experienced teacher. The semester includes the opportunity to improve skills in classroom management, assessment, and professional preparation, and to utilize applicable content standards, Arizona Professional Teacher's Standards, and Interstate New Teacher Assessment and Support Consortium Standards within the classroom. All coursework for student teaching must be submitted by the due date of the semester prior to student teaching. Prerequisites for A: One of the following combinations: 1) Successful completion of all courses in the Program of Study, a 2.8 GPA, and approval and placement by the Office of Field Experience and Certification; or 2) Successful completion of all courses in POS and content area; senior status; a 2.8 GPA; successful completion of state mandated basic skills and content area exams or Praxis I® (Basic Skills) and Praxis II® (Content Area); Arizona residents will be required to take the Arizona Educator Proficiency Assessments (AEPAs).

MED 480B: Student Teaching: Secondary Music 6 credits
Teacher candidates are required to fulfill an 8-week internship experience in a classroom with a certified, experienced teacher. The semester includes the opportunity to improve skills in classroom management, assessment, and professional preparation, and to utilize applicable content standards, Arizona Professional Teacher's Standards, and Interstate New Teacher Assessment and Support Consortium Standards within the classroom. All coursework for student teaching must be submitted by the due date of the semester prior to student teaching. Prerequisites for B: One of the following combinations: 1) Successful completion of all courses in the Program of Study, a 2.8 GPA, and approval and placement by the Office of Field Experience and Certification; or 2) Successful completion of all courses in POS and content area; senior status; a 2.8 GPA; successful completion of state mandated basic skills and content area exams or Praxis I® (Basic Skills) and Praxis II® (Content Area); Arizona residents will be required to take the Arizona Educator Proficiency Assessments (AEPAs).

Music Ensembles (MEN)

MEN 111: Canyon Singers 1 credit
A vocal ensemble open to all students at Grand Canyon University with the conductor's approval. Choral literature from all stylistic periods will be performed. This ensemble is designed to provide a quality performance experience for music majors and non-majors alike. Strong emphasis is placed on individual commitment to the ensemble.

MEN 120: Gospel Choir 1 credit
Every semester. Vocal ensemble drawn from the student body. Music includes a broad range of Christian Gospel literature. Strong emphasis is placed on individual commitment to the ensemble. Performances required. Does not fulfill General Education Fine Arts requirement.
### Marriage and Family Therapy (MFT)

#### MFT/PCN 500: Counseling Theories 3 credits

This course provides a comprehensive survey of the major counseling theories and principles. The coursework will include the following theories: Psychoanalytic, Adlerian, Existential, Psychotherapy, Behavioral, Cognitive Behavioral, Person Centered, Reality Therapy/Choice Theory, and Rational Emotive.

#### MFT 505: California Law and Professional Ethics 3 credits

This course provides a broad understanding of professional counseling ethics, legal standards, and responsibilities. An important goal of this course is to help Marriage and Family Therapy students develop a high standard of ethical performance in their career. Specific California codes will be examined.

#### MFT/PCN 509: Social and Cultural Diversity Issues in Counseling 3 credits

This course provides a broad understanding of issues and trends in a multicultural and diverse society. Studies in this area will include the following: attitudes and behaviors based on such factors as age, race, religious preference, physical disability, sexual orientation, ethnicity and culture, family patterns, gender, socioeconomic status, and intellectual ability; individual, family, group, and community strategies for working with diverse populations; and theories of multicultural counseling, identity development, and multicultural competencies.

#### MFT/PCN 511: Introduction to Chemical Dependency Counseling 3 credits

This course provides a broad understanding of the stages, processes, and effects of chemical dependency, social and psychological dynamics of chemical dependency, and the professional’s role in prevention, intervention, and aftercare. This course will also explore theories of addiction, drug classification, assessment, and treatment.

#### MFT/PCN 515: Counseling Skills in the Helping Relationships 3 credits

This course provides a broad understanding of counseling processes, including characteristics and behaviors that influence the helping processes. Included are age, gender, ethnic differences, verbal and nonverbal behaviors, personal characteristics, and orientations. The development of counseling skills to include the following will be emphasized: interviewing, the development of therapeutic relationships, establishment of appropriate counseling goals, strategies, evaluation of client outcome, and successful termination of the counseling relationship.

#### MFT/PCN 518: Human Growth and Development 3 credits

This course provides an understanding of the nature and needs of individuals at all developmental levels. Theories of individual and family development, transitions across the life-span, theories of learning, theories of personality development, and strategies for facilitating optimum development over the life-span will be addressed.

#### MFT 519: Human Sexuality 3 credits

This course examines human sexuality and systems of sexual therapy. Psychological, biological, social, and moral perspectives on sexual development and functioning will be examined.

---

*Campus/Off-site only | † Writing-intensive course | ‡ Fulfills General Education requirement |
MFT/PCN 520: Group Counseling Theory

This course provides a broad understanding of group development, group dynamics, group counseling theories, and ethical standards. The course will also address group process components, appropriate selection criteria, developmental stage theories, group members' roles and behaviors, and group leadership styles and approaches.

MFT/PCN 521: Marriage and Family Therapy

This course provides a broad understanding of the structure and dynamics of the family, which may include assessment and methods of marital and family intervention and counseling.

MFT/PCN 523: Tests and Appraisal in Counseling

This course provides an introduction to basic tests and appraisal in counseling. Individual and group approaches to testing, assessment, evaluation, behavioral observations, and computer-managed and computer-assisted methods will be addressed. The following statistical concepts will also be addressed: scales of measurement; measures of central tendency; and indices of variability, shapes and types of distributions, correlations, reliability, and validity.

MFT 524: Advanced Family Systems Theory

This course examines the dynamic processes of family and couple relationships and the role, value, and benefits of family system therapy. The bio-psychosocial perspectives of family and family system will be evaluated. Assessment and treatment of couples and families will be the focus.

MFT/PCN 527: Psychopharmacology & Addictions

This course provides a broad understanding of psychopharmacology theories of drug abuse, addiction, and treatment. The student is introduced to the basic principles of pharmacology, anatomy, and physiology as applied to the major classes of psychoactive drugs of abuse/addiction. It also examines the effects of various drugs on human behavior. The course introduces drugs that are being developed to support drug treatment such as methadone, suboxone and neroxone. Emphasis is placed on basic principles of drug ingestion, distribution, elimination, dose-response relationships, neurotransmitter chemicals, and synaptic activity.

MFT/PCN 531: Family Issues and Addictive Disorders

This course examines the role of alcohol and/or drug addiction in family systems. Various modalities designed to intervene in the alcohol- and/ or drug-addicted family system will be discussed. The treatment roles and responsibilities of addicted persons and their families will also be examined.

MFT 536: Aging and Long-Term Care

This course provides an understanding of the nature of aging and the elderly. Theories and strategies for facilitating optimum care of the elderly will be addressed. Mental health, the role of drug/alcohol addiction abuse, and family issues will be addressed. To be taken concurrently with MFT 537 and MFT 538.

MFT 537: Spousal or Partner Abuse Assessment, Detection, and Intervention Strategies

This course examines therapy and other treatment strategies for couples and individuals in abusive and/or violent relationships. The legal and ethical issues, the role of drug and/or alcohol addiction and/or abuse, and children in families where domestic violence and abuse occur will be addressed. To be taken concurrently with MFT 536 and MFT 538.

MFT 538: Child Abuse Assessment and Reporting

This course examines child abuse assessment and reporting. Specific California child abuse assessment and reporting codes will be examined. To be taken concurrently with MFT 536 and MFT 537.

MFT/PCN 540: Research Methods

This course introduces research methods and basic statistical analysis, including the following: the importance of research, opportunities, and difficulties in conducting research. Research methods such as qualitative research, quantitative research, single-case designs, action research, and outcome-based research will be addressed.

MFT 660 (A/B): Practicum/Internship (I/II)

The supervised practicum courses (3 credits each) provide an opportunity to accumulate 150 contact hours of required practicum experience. Students will use this experience to develop their counseling skills and to perform all the activities that a regularly employed professional counselor would be expected to perform in a supervised setting. The practicum will be performed under the supervision of a faculty member and an on-site supervisor approved by the college or university. Documentation of completed contact hours will be submitted directly to the COHS Office of Field Experience for verification and tracking. This is a pass/fail course with the minimum passing score of 76% to receive credit. Prerequisite: MFT 615 with a B or higher, GPA of 3.0 or better. Maintenance of personal liability insurance ($1 million/$3 million) coverage.

MFT/PCN 605: Psychopathology and Counseling

This course introduces the study of mental illnesses and the science of psychopathology. The goal is to provide counseling students with a conceptual understanding of psychological and behavioral dysfunctions that occur in mental illnesses. The course includes a survey of major psychiatric disorders and their causes.

MFT/PCN 610: Diagnostics, Assessment, and Treatment

This course provides a conceptual framework for the use of assessment and diagnostic tools for the development of appropriate treatment interventions for a variety of behavioral health disorders. Included is an introduction to the use of the diagnostic tools, including the DSM-VI TR and the integration of diagnostic and assessment information, in the development of treatment plans.

*Campus/Off-site only | Writing-intensive course | Fulfills General Education requirement |
MFT 615: Pre-Practicum and Clinical Instructions 3 credits
Students are required to complete a minimum of 100 hours of clinical work, under close supervision, during the pre-practicum experience. A minimum of 40 hours must be direct client contact hours with at least 1 hour under direct supervision for each 40 clock hours worked. Twenty-five hours can be met through completion of coursework within the pre-practicum class and the remaining time can be met through provision of support functions to the site. The practicum will be performed under the supervision of a faculty member and an onsite supervisor approved by the college or university. Prerequisites: MFT 500, MFT 505, MFT 515, MFT 520, MFT 610, and release by the college’s Office of Field Experience documenting that the following requirements have been completed: Documentation (with face sheet) of personal liability insurance ($1 million/$3 million) coverage, programmatic GPA of 3.0 or higher, completion of at least 24 credits in the program, site approval, and site supervisor approval.

Management (MGT)

MGT 240: Introduction to Management 4 credits
This introductory course deals with management and the basic management processes and functions. It focuses on real-world management situations concerned with planning, organizing, leading, and controlling, the work of the organization.

MGT 301: Principles of Management 3 credits
An introductory course that deals with management and the basic management processes and functions. Focuses on real-world management situations concerned with planning, organizing, leading, and controlling the work of others in organizations.

MGT 310: Production and Operations Management 3 credits
An introduction to designing, planning, operating and controlling production systems. Emphasis is on managerial concepts and strategies relating to the management of operations in both manufacturing and service environments. Quantitative and qualitative methods and tools will be introduced and applied. Prerequisites: MGT 301 and BUS 251.

MGT 415A: Organizational Behavior 3 credits
A study of individual and group behavior in organizations, including detailed coverage of individual differences/diversity, leadership and motivation, decision making, organizational design, and organizational change/development. Emphasis is placed on how an understanding of organizational behavior leads to more effective management practice. Writing-intensive course. Prerequisites: MGT 301.

MGT 420: Organizational Behavior and Management 4 credits
Drawing upon real-world management situations, this course is a study of individual and group behavior in organizations through detailed coverage of the functions of management, individual differences/diversity, leadership, motivation, decision making, organizational design, and organizational change and development. Emphasis is placed on how an understanding of organizational behavior leads to effective management practice. Also PSC 420.

MGT 433: Human Resource Management 3 credits
A study of the human resource management function in organizations, including detailed coverage of staffing, organizational development, compensation and benefits administration, and employee relations. Emphasis is placed on how human resource management as a whole enhances organizational performance and success. Prerequisites: MGT 301.

MGT 435: Project Management 3 credits
A study of the unique challenges associated with managing projects as related to the overarching management framework of planning, organizing, leading, and controlling. Emphasis is placed on balancing competing priorities related to human resources, time constraints, and physical resources/materials. Additional focus is placed on managing and controlling project scope. Prerequisites: MGT 301.

MGT 455: Production/Operations Management 4 credits
This course provides an introduction to designing, planning, operating, and controlling production systems. Emphasis is on managerial concepts and strategies relating to the management of operations in both manufacturing and service environments. Quantitative and qualitative methods and tools are introduced and applied. Prerequisite: BUS 352.

MGT 480: Strategic Management 3 credits
This course examines the formulation of strategy and policy within organizations. Significant emphasis is placed on the integration of strategic decisions across various functional areas and multiple business units as well as ethical considerations of organizational policy and strategy. Prerequisites: FIN 301, MGT 301, and MKT 301.

MGT 490: Organizational Development and Change 3 credits
This course emphasizes an overview of approaches to organizational development with emphasis on the practical aspects of changing organizations to improve effectiveness.

MGT 602: Organizational Behavior 3 credits
Students examine concepts and applications of behavior in organizations. Topics include the study of motivation, organizational climate, group dynamics, leadership, decision-making, and organizational structure and design.

MGT 604: Organizational Behavior 4 credits
Students examine concepts and applications of behavior in organizations. Topics include the study of motivation, organizational climate, group dynamics, leadership, decision making, and organizational structure and design. Additional emphasis is placed on servant leadership and situational leadership.

<th>Course Code</th>
<th>Course Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>MGT 609: Strategic Management</td>
<td>This course examines the formulation of strategy and policy within organizations. Significant emphasis is placed on the integration of strategic decisions across various functional areas and multiple business units as well as ethical considerations of organizational policy and strategy. Prerequisites: ACC 605, FIN 608, MGT 602, and MKT 606.</td>
<td>3</td>
</tr>
<tr>
<td>MGT 613: Operations Strategy</td>
<td>Students examine operations as a strategic resource. Topics include methods to facilitate strategic formulation, analysis of the links between operations and other functional areas, and the management and strategic application of new and emerging technologies.</td>
<td>3</td>
</tr>
<tr>
<td>MGT 615: Organizational Change</td>
<td>Organizational leaders are, by default, change agents. As such, contemporary leaders must proactively lead change throughout their organizations to ensure long-term organizational development, viability, and success. This course involves detailed study of various change management and organizational development models, theories, and methodologies. Students explore applications of the various theories to case studies, as well as their current professional settings.</td>
<td>4</td>
</tr>
<tr>
<td>MGT 621: Project Management</td>
<td>This course examines roles and responsibilities of the project manager, project life-cycle, differentiating elements of projects in various industries, analysis tools and techniques for project plan development, and managerial control of project deployments. Additional components include project scheduling and critical path assessment, project requirements definition and scope management, and project risk identification and control. This course guides each student through the primary project life-cycle of planning, development, implementation, and control. Prerequisites: ACC 501 or 605, BUS 601.</td>
<td>3</td>
</tr>
<tr>
<td>MGT 623: Organizational Development and Change</td>
<td>Students explore the behavioral forces and relationships that influence organizational effectiveness and change. Topics include the study of intervention strategy and change management.</td>
<td>3</td>
</tr>
<tr>
<td>MGT 625: Leadership Styles and Development</td>
<td>This course explores the nature of business leadership models and theories, examining these models through a broad variety of insights and viewpoints and analyzes these approaches to leadership, giving special attention to how the models can improve leadership real-world organizations.</td>
<td>3</td>
</tr>
<tr>
<td>MGT 626: Organizational Systems and Cultures</td>
<td>Students explore organizational systems and cultures as complex and powerful phenomena that profoundly influence the behavior of both individual employees and organizations as a whole. The course of study includes the diagnosis of organizational systems and cultures and the proactive management and shaping of these forces.</td>
<td>3</td>
</tr>
<tr>
<td>MGT 628: Information Security and Organizational Change Development</td>
<td>In this course, students analyze the principles of change management as they apply to the requirements and regulations of information security. Students evaluate the factors which affect corporate decision-making when implementing security programs and the ability of the manager to translate corporate needs into information security projects.</td>
<td>3</td>
</tr>
<tr>
<td>MGT 629: Organizational Security Systems and Awareness</td>
<td>In this course, students review and discuss security awareness and evaluate practices in implementing security systems within enterprise. Best practices within five of the ten domains of the (ISC)2 Common Body of Knowledge (CBK) in information security are explored within this context.</td>
<td>3</td>
</tr>
<tr>
<td>MGT 630: Leading Self</td>
<td>This course is designed to prepare EMBA students as they strengthen important leadership skills and develop a personal leadership vision. The course combines knowledge and application by examining the results of leadership research and how it can be used to develop a clear sense of purpose of leadership, increase leadership communication skills, and deepen awareness of personal leadership styles. Case studies, discussions, exercises, guest speakers, and videos are used to address the challenges of leadership. The disciplines covered in this course include leadership, visioning, emotional and cultural intelligence, and communications.</td>
<td>3</td>
</tr>
<tr>
<td>MGT 635: Leveraging Human Capital</td>
<td>This course presents the perspective that management of human capital is the responsibility of every manager/leader throughout the organization. Talent management, succession planning, employee development and motivation, and performance management and metrics are examined. Additional topics include workforce diversity, contracting within the global 21st century environment, and the challenges inherent in virtual and cross-functional teams. Methods for building and sustaining human capacity and knowledge assets to increase corporate value are examined.</td>
<td>3</td>
</tr>
<tr>
<td>MGT 636: Leading Others</td>
<td>This course provides the structure and direction for teams to remain focused on a common goal to achieve a common result. Using research-validated evaluation methods, the course documents how to accomplish the team's purpose by creating buy-in and increasing commitment for task accomplishment. The concepts and methods of promoting partnership and trust among team members are explored and a solid foundation for building high-performing teams is constructed. The concept of servant leadership is also explored through the study of role models throughout history and today.</td>

*Campus/Off-site only | ^ Writing-intensive course | * Fulfills General Education requirement |
MGT 639: Strategic Advantage Within the Global Economy 3 credits
This course examines the global competitive landscape in which firms operate. An examination of CEOs and how they have successfully seized growth opportunities in unexpected ways provides an actuarial perspective. The international political and economic environment is also examined to ensure familiarity with larger scale shifts occurring within the global economy that impact growth strategies.

MGT 642: Leading Organizations 3 credits
This course focuses on transformational leadership and the themes of organizational culture and leading change. Transformational leaders must be able to grasp the need for change and effectively define and communicate that change to their stakeholder groups. This course examines how and why change efforts get derailed, why people resist change, and how leaders can overcome these challenges. Specifically, the real-life lessons learned by a number of CEOs are examined and discussed. The course also introduces strategies on how to build and sustain a resilient corporate culture that thrives on change and supports the ongoing implementation of change efforts.

MGT 650: Operations Management 3 credits
Operations Management examines managerial concepts and strategies relating to the management of operations in both manufacturing and service environments. Emphasis is placed on methods to streamline and drive inefficiencies out of a firm’s internal processes to build a highly efficient organization. The course also focuses on external processes by examining ways to achieve greater supply chain integration with suppliers and customers. Quantitative and qualitative methods and tools will be introduced and applied.

MGT 655: Operations Management Operations 4 credits
Operations Management examines managerial concepts and strategies relating to the management of operations in both manufacturing and service environments. Emphasis is placed on methods to streamline and drive inefficiencies out of a firm’s internal processes to build a highly efficient organization. The course also focuses on external processes by examining ways to achieve greater supply chain integration with suppliers and customers. Quantitative and qualitative methods and tools are introduced and applied. Prerequisite: SYM 506.

MGT 660: Strategic Management 4 credits
This course emphasizes the definition, formulation, and execution of strategy within organizations. It analyzes the effects on corporate strategy of the rapid shift to a multipolar and complex global marketplace. This course focuses on innovative strategy and leadership and its impact on the quest for customers and key stakeholders. This course also stresses the growing importance of management of intangible assets and organizational alignment with the view to gaining a sustainable competitive advantage over global rivals. Finally, this course integrates the creation of a very structured and comprehensive assignment (creation of a market entry or market expansion or diversification, or M&A plan) that address competencies such as Critical Thinking, Leadership, Effective Communication and Global Awareness, and Business Domains such as Marketing, Management, HR, Operations, Finance and Accounting. Prerequisites: ACC 650, FIN 650, MGT 604, and MKT 607.

MGT 690: Strategic Human Resource Management 3 credits
This course introduces the skill set and mindset that enables managers to perform as strategic and HR-minded business professionals, positioning HR as a key value-chain activity while concurrently driving HR-mindedness throughout their organizations. While a technical knowledge base of the common HR functions (staffing, organizational development, compensation and benefits administration, and employee/labor relations) is covered, the course of study intentionally focuses on how all of this relates to organizational strategy and impacts organizational performance.

Christian Studies (MIN)

MIN 202: Introduction to Ministry 3 credits
An exploration of ministry both in the contexts of identification of spiritual call and in theological field education designed to help ministers function appropriately in ministry. The course includes an introduction to field education, choosing a ministry placement and field supervisor, vocational discernment, designing a learning covenant, and theological reflection.

MIN 213: A Survey of Christian Education 3 credits
An introduction to the development of Christian education from the Early Church to modern-times, focusing on major movements, philosophies, and people. Special attention will be given to the objectives of educational programs in the local church.

MIN 220: Management for Ministry 3 credits
A study of the basic functional areas in the practice of administration. Special attention is given to management principles and leadership development to help make these effective in the local church, para-church, and personal ministries.

MIN 300: Introduction to Youth Ministry 3 credits
A study of the basic areas of the practice of managing youth ministry and related programs in local church, para-church, and personal ministries. Special attention is given to management principles and leadership, specifically as they relate to youth and student ministries.

MIN 315: Spiritual Formation 3 credits
An introductory study of the basic disciplines of Christian discipleship, focusing on the formation of character, values, disciplines, and habits, especially related to the inner development of spirituality. The study makes use of some of the Christian devotional classics. A writing-intensive course.

MIN 343: Teaching and Guiding Youth 3 credits
This course equips students to communicate effectively with a variety of audiences, to employ creative pedagogy that challenges
and engages youth, and to develop curriculum that is culturally relevant and biblically accurate.

**MIN 350**: Spiritual Formation for Christian Leaders 4 credits

This writing-intensive course is a study of the basic disciplines of Christian discipleship, focusing on the formation of character, values, disciplines, and habits, especially related to the inner development of spirituality. The study makes use of some of the Christian devotional classics. Beyond personal spiritual development, this course addresses students’ preparation for being spiritual leaders, encouragers, and/or disciplers of others. Prerequisites: BIB 104 and BIB 105.

**MIN 373**: Introduction to Pastoral Ministry 3 credits

A study of the philosophy and practice of pastoral work. Emphasis is given to the caring and nurturing practices involved in ministry. A special focus is given to assist students in their ability to synthesize pastoral work with their place of service.

**MIN 411**: Financial Decision-Making in Ministry 3 credits

Examining the elements necessary for effective financial decision-making in the local church is imperative to for an effective ministry. Students will understand and be able to develop a ministry budget, building program, and a fundraising campaign. Stewardship programs in the successful growth of a church will be defined and outlined as a part of the courseware.

**MIN 412**: Ministerial Organizational Development and Change 3 credits

Ministerial organizational development and change encompasses the study of individual and group behavior in church organization settings. An introductory study of the basic structures of Christian organizations, the course focuses on an overview of the typical processes and decisions that lead to healthy organizational development and change. Managing organizational development and change challenges individuals to understand and embrace audience diversity, elements of change, effective communication, and performance systems. A comprehensive review of these organizational processes will allow students to examine their role in ministerial organizations in the new millennium. This course will include review of effective structures for ministry.

**MIN 475**: Issues in Contemporary Pastoral Ministry 3 credits

Examining current movements, trends, leaders, and perspectives affecting worship and worship styles in the United States and around the world is imperative to becoming an effective worship leader. Topics will include efforts being made in the local church, regional church, and national ministries to establish unique worship programs. Contemporary worship and classical worship styles will be discussed and defined. Particular attention will be given to understanding worship through the eyes of the audience as well as the leader.

**MIN 476**: Issues in Contemporary Youth Ministry 3 credits

Examining current movements, trends, leaders, and perspectives affecting youth ministry and youth ministry strategies is paramount to foreseeing future trends within the youth culture. Topics will include a review of the efforts being made in the local church, regional service centers, and national ministries to develop unique youth ministry programs. Focus will be also given to churches and Christian ministries which are reaching youth in different settings such as urban, suburban, and rural locations.

**MIN 497**: Ministerial Internship 3 credits

This field education course involves the student in one semester of service with a qualified supervising minister in the ministry setting. An advanced internship can be arranged for the student already engaged in professional ministry who wants further training. Internships are usually available in chaplaincy, church work (pastor, education, music, youth, etc.), Christian social ministries, student work, and other areas. Prerequisites: MIN 202, sophomore or higher-class status, and instructor’s approval.

**MIN 520**: The Work of the Pastor 4 credits

This course is a study of the daily practice of pastoral ministry and the ethical issues that arise in the context of leading in ministry.

**MIN 530**: Youth Issues and Crises 4 credits

This course provides a holistic approach to youth ministry within the larger context of families, schools, etc., including the ethical implications to be considered in youth ministry.

**MIN 615**: Spiritual Formation and Mentoring 4 credits

This course is a study of spiritual growth focusing on students’ own spiritual formation and application through mentoring of others.

**MIN 630**: Mentoring and Counseling Youth 4 credits

This course is a study of techniques used in mentoring and providing a pastoral counseling ministry among youth.

**MIN 650**: Homiletics 4 credits

This course is a study of the techniques involved in preaching, including techniques for appropriate contextualization of the Christian message and preparation and delivery of sermons. Prerequisite: BIB 650.

**Military Science (MIS)**

**MIS 101**: Introduction to Leadership and Personal Development 3 credits

Every Fall. Introduces students to the personal challenges and competencies that are critical for effective leadership. Students learn how the personal development of life skills such as critical thinking, goal setting, time management, physical fitness, and stress management relate to leadership, officership, and the Army profession. The focus is on developing basic knowledge and comprehension of Army leader attributes and core leader competencies while gaining a big-picture understanding of ROTC, its purpose in the Army, and its advantages for the student. Three hours of lecture/conference, 2-hour lab of practical application, and one 2-day field training exercise.
MIS 102: Introduction to Tactical Leadership 3 credits
Every Spring. Overview of leadership fundamentals such as setting direction, problem solving, listening, presenting briefs, providing feedback, and using effective writing skills. Students explore dimensions of leadership values, attributes, and competencies in the context of practical, hands-on, and interactive exercises. Three hours of lecture/conference, 2-hour lab of practical application, and one 2-day field training exercise.

MIS 201: Innovative Team Leadership 3 credits
Every Fall. Explore the dimensions of creative and innovative tactical leadership strategies and styles by examining team dynamics and two historical leadership theories that form the basis of the Army leadership Requirements Model (trait and behavior theories). Students practice aspects of personal motivation and team building in the context of planning, executing, and assessing team exercises and participating in leadership labs. Focus is on continued development of the knowledge of leadership values and attributes. Three hours of lecture/conference, 2-hour lab of practical application, and one 2-day field training exercise.

MIS 202: Foundation of Tactical Leadership 3 credits
Every Spring. Examine the challenges of leading tactical teams in the complex Contemporary Operating Environment (COE). The course highlights dimensions terrain analysis, patrolling, and operation orders. Further study of the theoretical basis of the Army leadership Requirements Model explores the dynamics of adaptive leadership in the context of military operations. Students develop greater self-awareness as they assess their own leadership styles and practice communication and team-building skills. COE case studies give insight into the importance and practice of teamwork and tactics in real-world scenarios. Three hours of lecture/conference, 2-hour lab of practical application, and one 2-day field training exercise.

MIS 205: Leader’s Training Course 4 credits
Every Summer and Fall. A 4-week, summer training program held at Fort Knox, KY. The Leader’s Training Course (LTC) consists of intense classroom and field training emphasizing practical hands-on skills, the value of teamwork, and how to be an effective small team leader. This course is an accelerated version of the first 2 years of leadership development training students receive in the ROTC Basic Course (MIS 101, MIS 102, MIS 201, and MIS 202). Students who attend this course will receive a stipend, transportation to and from Fort Knox, KY, housing, and meals. Attendees may be eligible for a 1.5- to 2.5-year scholarship upon course completion. Prerequisites: Instructor’s approval, meet with the on-campus Army ROTC Enrollment/Scholarship Officer to apply, and have 2- or 2.5-years of college remaining (undergraduate or graduate).

MIS 294: Ranger Fitness 3 credits
Every Fall and Spring. Covers topics of immediate or special interest to a faculty member and students. Must attend at the ASU Campus, Wednesdays, 5-8 p.m. Prerequisite: Instructor approval.

MIS 301: Adaptive Team Leadership 3 credits
Every Fall. Study, practice, and evaluate adaptive leadership skills as students are presented with the demands of preparing for the summer Leader Development and Assessment Course (LDAC). Challenging scenarios related to small-unit tactical operations are used to develop self-awareness and critical-thinking skills. Students receive systematic and specific feedback on their leadership values, attributes, skills, and actions. Three hours of lecture/conference; 2-hour lab of practical application, and one 2-day field training exercise. Prerequisites: MIS 101, MIS 102, MIS 201, and MIS 202; MIS 205; or prior military service and commit to accept a commission and serve as an Officer in the U.S. Army on Active Duty or in a Reserve Component.

MIS 302: Applied Team Leadership 3 credits
Every Spring. Continuation of MIS 301. Integrate the principles and practices of effective leadership, military operations, and personal development in preparation for the summer Leader Development and Assessment Course (LDAC). Students will be capable of planning, coordinating, navigating, motivating, and leading teams in situational training exercises. Three hours of lecture/conference, 2-hour lab of practical application, and one 2-day field training exercise. Prerequisite: MIS 301 and commit to accept a commission and serve as an Officer in the U.S. Army on Active Duty or in a Reserve Component.

MIS 303: National Advanced Leadership CAMP 4 credits
Every Summer and Fall. A summer Leadership Development and Assessment Course (LDAC) designed to evaluate and train all Army ROTC cadets. This 6-week training program emphasizes leadership development and advanced military skills, including tactics, land navigation, and physical training. ROTC cadets normally attend LDAC at Fort Lewis, Washington, between their junior and senior year. Students who attend this course will receive a stipend, transportation to and from camp, housing, and meals. Prerequisites: MIS 301 and MIS 302.

MIS 305: Nurse Summer Training Program 4 credits
Every Summer and Fall. A 3- or 4-week Nurse Summer Training Program (NSTP) at a major Army hospital either in the United States or Germany. NSTP provides Army ROTC nurse cadets with clinical experience in a hospital setting while introducing them to the duties, roles, responsibilities, and expectations of an Army Nurse Corps (AN) officer. The nurse cadet will exercise leadership skills in a hospital environment by planning, organizing, decision-making, implementing, and being accountable for the outcome of nursing care. The overall goal is to encourage students to develop leadership strategies through learning experiences throughout the clinical elective. Nurse cadets will collaborate with health care professionals on decisions related to patient care, management, unit issues and strategies used in the provision of medical care to a select population. Students who attend this program will receive a stipend, transportation to and from the hospital location, housing, and meals. Prerequisites: MIS 301, MIS 302, Level 2 nursing, and instructor approval.

*Campus/Off-site only | *Writing-intensive course | *Fulfills General Education requirement |
MIS 401: Adaptive Leadership  
3 credits
Every Fall. Develop proficiency in planning, executing, and assessing complex operations, functioning as a member of a staff, and providing leadership-performance feedback to subordinates. Students are given situational opportunities to assess risk, make sound ethical decisions, and provide coaching and mentoring to fellow students. Students are measured by their ability to give and receive systematic and specific feedback on leadership abilities using the Socratic model of reflective learning. Students analyze and evaluate the leadership values, attributes, skills, and actions of subordinate students while simultaneously considering their own leadership skills. Three hours of lecture/conference, 2-hour lab of practical application, and one 2-day field training exercise. Prerequisites: MIS 301, MIS 302, and commit to accept a commission and serve as an Officer in the U.S. Army on Active Duty or in a Reserve Component.

MIS 402: Leadership in a Complex World  
3 credits
Every Spring. Continuation of MIS 401. Explore the dynamics of leading in the complex situations of current military operations in the contemporary operating environment (COE). Students will complete exercises to prepare them for the complex ethical and practical demands of leading as a commissioned officer in the United States Army. Three hours of lecture/conference, 2-hour lab of practical application, and one 2-day field training exercise. Prerequisites: MIS 301, MIS 302, MIS 401 (or instructor approval), and commit to accept a commission and serve as an Officer in the U.S. Army on Active Duty or in a Reserve Component.

MIS 410: American Defense Policy I  
3 credits
Every Fall. Evolution, organization, and execution of U.S. national security policy. Must attend at the ASU campus. Optional in lieu of HIS 231, American Military History. Prerequisite: Commit to accept a commission and serve as an Officer in the U.S. Army on Active Duty or in a Reserve Component and instructor approval.

MIS 412: American Defense Policy II  
3 credits
Contemporary problems and analytical issues in the formation and implementation of U.S. national security. Must attend at the ASU campus. Optional in lieu of HIS 231, American Military History. Prerequisites: Instructor approval, MIS 410, and commit to accept a commission and serve as an Officer in the U.S. Army on Active Duty or in a Reserve Component.

MIS 499: Independent Study  
1-3 credits
Work closely with the Professor of Military Science on a special topic that may include research, readings, and presentations. May be repeated once. Prerequisite: Instructor approval.

Marketing (MKT)

MKT 245: Principles of Marketing  
4 credits
This course surveys the marketing mix and marketing concept; markets and buyer behavior; product, service, and relationship marketing for global competition; creating and keeping customers in an e-commerce world; branding and positioning; distribution strategies, integrated marketing communications, and pricing strategies.

MKT 301: Principles of Marketing  
3 credits
This course surveys the marketing mix and marketing concept; markets and buyer behavior; product, service and relationship marketing for global competition; creating and keeping customers in an e-commerce world; branding and positioning; distribution strategies; integrated marketing communications; and pricing strategies.

MKT 302: Buyer and Consumer Behavior  
3 credits
This course focuses on a behavioral science approach that studies distinct buyer strategies and decision-making processes of purchase by organizational buyers and consumers. Topics include cross-cultural variations in behavior, external and internal influences on today’s buyers, purchase and post-purchase processes, customer satisfaction, and customer commitment. Prerequisite: MKT 301.

MKT 303: Sales and Sales Management  
3 credits
This course applies management and leadership principles to the development and operation of the sales force as part of the overall marketing program. Topics include sales planning, organization and control, sales force recruitment, training, motivation, compensation, e-business, and cultural diversity. Prerequisite: MKT 301.

MKT 304: Promotion and Advertising  
3 credits
This course provides an integrated marketing communications perspective for today’s changing world. Topics include the promotional mix, determining and developing advertising and promotional objectives, ethical issues in advertising campaigns, budgeting, positioning, creative strategies, media strategies, personal selling, e-marketing, public relations, publicity, corporate advertising, and evaluating the promotional program. Prerequisite: MKT 301.

MKT 306: Services Marketing  
3 credits
This course surveys the unique issues involved in marketing services. Topics include new products, new services, brand development, delivery of services, pricing of services, and promotion of services. Customer satisfaction and service quality measures as well as ethical considerations in services marketing will be integrated in discussions of the services marketing mix. Prerequisite: MKT 301.

MKT 345: Buyer and Consumer Behavior  
4 credits
This course focuses on a behavioral science approach that studies distinct buyer strategies and decision-making processes of purchase by organizational buyers and consumers. Topics include cross-cultural variations in behavior, external and internal influences on today's buyers, purchase and post-purchase processes, customer satisfaction, and customer commitment.

**MKT 625: Seminar in Marketing**  
Students examine the issues, emerging practices, and problems facing marketing executives, researchers, and decision makers. Topics will include pricing, brand management, direct marketing, retailing, telemarketing, specialty advertising, consumer behavior, motivation theory, and marketing models. Marketing ethics will be an integrated topic throughout the curriculum. Prerequisite: MKT 607.

**MKT 628: International Marketing**  
This course analyzes current trends and issues facing an international firm’s efforts to develop and implement an effective marketing mix. The comparisons of language, aesthetics, religions, business customs, and attitudes about the marketing concept and strategies are addressed. Prerequisite: MKT 606.

**MKT 631: Customer Value and Service Excellence**  
The course is designed to focus on what customers really want, building customer loyalty, and becoming a service excellence leader. Insights are drawn from various fields, including management, innovation, information technology, and cross-cultural communications. The service profit chain provides a framework for linking employee engagement with customer satisfaction and retention.

**MKT 632: Solutions-Based Relationship Management and Branding**  
The course examines the role of corporate brands in creating a competitive advantage and focuses on the critical issues facing senior leaders today, including measuring marketing performance, managing customer information, building cross-cultural customer relationships, and leveraging the Internet.

**MKT 650: Services Marketing**  
This course introduces students to the state-of-the-art research and practice in services marketing, with an emphasis on discussion of the field's most current services marketing concepts, principles and theories, and application of services marketing concepts to actual practice through case analysis and outside projects. Prerequisite: MKT 607.

**MKT 660: International Marketing**  
This course provides an analysis of current trends and issues facing an international firm’s efforts to manage the marketing mix. Comparisons of language, aesthetics, religions, business customs, and attitudes on the marketing concept and strategies are addressed. Prerequisite: MKT 607.

**Leadership (MLE)**  
**MLE 601: Introduction to Organizational Leadership**  
This course is designed to be an introduction to the cross-functional complexities inherent in organizational life. Students will develop an advanced skill-set enabling effective leadership of each of the major organizational functions (namely marketing, finance, human resource management, information systems, and operations management). Students will understand the difference between transformational and transactional leadership and how both are critical to effective leadership, with the primary emphasis in this class being placed on transactional leadership.

**MLE 603: Leadership Styles and Development**  
Students will explore applications of various leadership styles in several work and personal environments, such as the Leadership Grid and Situational Leadership. The student will better understand mentoring/coaching, transformational, charismatic, and visionary leadership. Students will use personal assessments to help assess their individual leadership styles, as well as identify areas for future development.

**MLE 605: Leading High-Performance Teams**  
This course is an experiential introduction to models of team dynamics and group process. Issues discussed will include such topics as meeting management, team building, assessment, roles and responsibilities of the team leader, characteristics of successful teams, strategies for designing and supporting teams in the workplace. Students will also be instructed in methods used to motivate others in helping an organization succeed.

**MLE 606: High Performance Information Security Project Management**  
In this course, students utilize PMI’s Project Management Body of Knowledge (PMBOK) as a framework, to apply project management concepts in the information security arena. Each student develops a project plan for a security assessment which incorporates the technical and behavioral characteristics of high performance teams.

**MLE 607: Organizational Development and Change**  
This course will involve detailed study of various change management and organizations development models, theories, and methodologies. Students will explore applications of the various theories to case studies, as well as their current professional settings. Additionally, students will conduct primary, field-based research surrounding a large-scale organizational change initiative and critically evaluate the relative success/failure of that change initiative.

**MLE 609: Leading Out Loud**  
This course will study the leader as communicator. The personal skill building emphasis will focus on informative speaking, strategic conversational speaking, persuasive speaking, and media interviewing. Personal reflection papers, active learning goals, skill plans, specific performances, feedback sessions, and structured observations are designed for maximum skill development and mastery.

**MLE 611: Organizational Systems and Cultures**  
This course will provide students an understanding of the complexities of organizational systems and cultures, the ways in which these forces manifest themselves, and the means by which leaders intentionally impact the shape that these forces take in their organizations. Students will explore the application of

*Campus/Off-site only | Writing-intensive course | Fulfills General Education requirement |
various organizational systems and cultures theories to case studies, as well as to their current professional settings. Additionally, students will research and critically analyze the comparative cultures of two organizations from the same industry.

MLE 613: Strategic Planning and Decision-Making 3 credits

This course is designed to prepare leaders to guide their organization in the future through the use of effective strategic and contingency planning. A critical component will include learning to evaluate alternatives, make effective decisions, and use appropriate decision-making processes.

MLE 614: Strategic and Technological Trends in Information Security 3 credits

In this course, students assess technical trends as well as new and emerging technologies in information assurance to determine their impact on the implementation of the Strategic Security Plan (SSP) of an enterprise.

MLE 615: Negotiation and Conflict Resolution 3 credits

In this experiential course, students will gain the conceptual tools and behavioral skills necessary to effectively navigate difficult interpersonal situations, resolve conflicts, and negotiate agreements between individuals, departments, and organizations to become more effective leaders. This course focuses on applying theories, models, and data-based approaches to devise strategies for negotiation and conflict resolution.

MLE 617: Leadership and Innovation 3 credits

Students will understand and apply various models of problems solving. They will learn various techniques, strategies, and skills appropriate for creative and innovative thinking.

MLE 618: Leadership and Innovation in Information Security Management 3 credits

In this course, students address an information security management problem through development of an innovative information security solution. In executing their projects, students apply the concepts and methods acquired in previous coursework.

MLE 619: Power, Politics, and Influence 3 credits

The essence of this course teaches the student sources and types of power, specific tactics for becoming an empowering leader, and issues surrounding organizational politics, influence tactics, and succession planning. Students will learn how transactional leaders can become transformational leaders.

MLE 621: Contemporary Issues in Leadership 3 credits

The challenges of contemporary leadership are increasingly complex. Contemporary leaders must simultaneously balance the needs and demands of various stakeholders while concurrently driving overall organizational success. This course will provide students with the opportunity to intentionally explore several major contemporary issues from both an organizational impact and a personal belief perspective. Students will conduct independent research of several contemporary leadership issues and present their findings in an informal round-table setting to their colleagues. Additionally, students will develop an informed position on a controversial issue and engage in debate with students that have taken the opposing position.

MLE 623: Applied Capstone/Leadership Project Presentation 3 credits

This presentation is the culmination of the student’s 15-month employer-based leadership project. A comprehensive written report and oral presentation will highlight the conclusion of this project.

Music Piano Class (MPC)

MPC 109: Class Piano I 1 credit

This course is designed as class instruction for students with limited or no previous piano training. Instruction includes the study of piano technique and literature designed to pass Part I of the Piano Proficiency Examination. The piano proficiency requirements are identified in the music handbook.

MPC 259: Class Piano II 1 credit

This course is a continuation of MPC 109. It includes passing Part II of the Piano Proficiency Examination. Prerequisite: MPC 109.

MPC 359: Class Piano III 1 credit

This course is a continuation of MPC 259. It includes passing Part III of the Piano Proficiency Examination. Prerequisite: MPC 259.

MPC 459: Class Piano IV 1 credit

This course is a continuation of MPC 359. It includes passing Part IV of the Piano Proficiency Examination. Prerequisite: MPC 359.

Music (MUS)

MUS 125: Music Theory I 4 credits

This course is a study in rhythmic, melodic, and harmonic dictation; basic keyboard performance; and sight singing. Computer-assisted ear training is utilized. Study is devoted to the structure of music which includes harmony, melody, form, and rhythm. Skill development in analysis and composition is emphasized. The music of the “common practice period” will be studied. Prerequisite: Theory Placement Examination.

MUS 155: Music Theory II 4 credits

This course emphasizes skill development through analysis and composition. Prerequisite: MUS 125.

MUS 210: Music Appreciation 4 credits

This course introduces the study of the intellectual, emotional, and aesthetic nature of music, its history, theory, and literature. It explores the major works of great composers and explores the elements that contribute to their longevity. Students learn to appreciate and critique live performances.

MUS 252: Music Appreciation 3 credits

Designed specifically for non-music majors and minors. This course contributes to the intellectual, emotional, and aesthetic understanding of music and expression as science and as an art
MUS 370: Piano Literature I 2 credits
This writing-intensive course is a survey study of the composers, their styles, and literature from the beginning of solo song through the early romantic period. Prerequisite: MUS 355.

MUS 376: Song Literature II 2 credits
This writing-intensive course is a survey study of the composers, their styles, and literature from the middle romantic period of solo song through the contemporary period. It is a continuation of MUS 375. Prerequisite: MUS 355.

MUS 377: Piano Literature II 2 credits
This course is a survey of romantic and contemporary periods. Emphasis is on learning the standard piano repertoire through reading and listening assignments. Prerequisite: MUS 355.

MUS 375: Song Literature I 2 credits
This writing-intensive course is a survey study of the composers, their styles, and literature from the beginning of solo song through the early romantic period. Prerequisite: MUS 355.

MUS 380: Counterpoint 4 credits
This course is a survey of contrapuntal practice from the 18th century. Background reference is made to early polyphonic music. Emphasis is given to 16th century species counterpoint and to analyzing and writing inventions and fugues in the 18th century style of J. S. Bach. An introduction is provided for the use of counterpoint in 20th century composition. Prerequisite: MUS 275.

MUS 390: Form and Analysis 4 credits
This course is a study of the various organizational structures in music, from motive, phrase, and period, through binary and ternary forms to the most complex, such as the variation, rondo, and sonata. Works of the masters are analyzed from the standpoint of form. Prerequisite: MUS 275.

MUS 450: Conducting 4 credits
This course is a study of the fundamentals and techniques of conducting. Special emphasis is placed on conducting choral music and the special techniques required to conduct vocal groups. Prerequisite: MUS 390.

MUS 455: Vocal Pedagogy 2 credits
This course is a study of skills for the teaching of voice to individuals or groups. The physical voice is studied, potential vocal problems are analyzed, and historical methods of correction are presented. Rehearsal and conducting techniques, score reading, and artistic interpretation are covered. Prerequisite: MUS 450

Music Applied Voice(MVA)

MVA 119: Private Voice Study I 1 credit
This course is the private applied study required for music majors in their major instrument or area. Prerequisite: Instructor’s approval.

MVA 129: Private Voice Study II 1 credit
This course is the private applied study required for music majors in their major instrument or area. Prerequisite: Instructor’s approval.
complementary & alternative therapies will be presented and the Voice Proficiency Examination. The voice proficiency study of piano technique and literature designed to pass Part I of limited or no previous voice training. Instruction includes the

Music Voice Class (MVC)

This course is designed as class instruction for students with limited or no previous voice training. Instruction includes the study of piano technique and literature designed to pass Part I of the Voice Proficiency Examination. The voice proficiency requirements are identified in the music handbook.

NRS 410V: Pathophysiology and Nursing Management of Clients’ Health 3 credits

This course is designed to enhance the working RN’s existing understanding of the pathophysiological processes of disease as they affect clients across the lifespan. The interrelationship of structural and functional reactions of cells and tissues to genetic alterations and injurious agents provide the foundation for comprehending clinical manifestations and treatment protocols. Critical thinking and nursing management are enhanced through the use of case studies that integrate nutritional and pharmacological concepts. The understanding of environmental and biological risk factors provides the nurse with the knowledge to provide health promotion and prevention education.

NRS 427V: Concepts in Community and Public Health 3 credits

This course focuses on the community as a large system of people of varying cultures, spiritual values, geographic norms, and economic conditions, all influenced by social-legal-political variables that impact individual and community health. Particular attention is paid to vulnerable subgroups in the community. Emphasis is placed on critical analysis, using epidemiological data and functional health pattern assessments to plan and intervene in areas of health promotion and disease prevention.

NRS 429V: Family-Centered Health Promotion 3 credits

This course focuses on family theories, health promotion models, cultural diversity, and teaching learning principles. The course emphasizes the family as the client, family FHP health assessments, screenings across the lifespan, communication, community resources, and family education. Appropriate health promotion education is evaluated against evidence-based research and practice.

NRS 430V: Professional Dynamics 3 credits

This course is designed to enhance the working RN’s existing understanding of the pathophysiological processes of disease as they affect clients across the lifespan. The interrelationship of structural and functional reactions of cells and tissues to genetic alterations and injurious agents provide the foundation for comprehending clinical manifestations and treatment protocols. Critical thinking and nursing management are enhanced through the use of case studies that integrate nutritional and pharmacological concepts. The understanding of environmental and biological risk factors provides the nurse with the knowledge to provide health promotion and prevention education.

NRS 433V*: Introduction to Nursing Research 3 credits

This writing-intensive course promotes the use of research findings as a basis for improving clinical practice. Quantitative and qualitative research methodologies are presented. Emphasis is on the critical review of research studies and their applications to clinical practice. An overview of evidence-based practice is provided. Prerequisite: PSY 363, BIO 363, or HLT 362V.

*Campus/Off-site only | *Writing-intensive course | *Fulfills General Education requirement
**NRS 434V: Health Assessment** 3 credits  
This course focuses on methods of health history taking, physical examination skills, documentation, and health screening. The course emphasizes the individual as the client, functional health patterns, community resources, and the teaching learning process.

**NRS 436: Nursing Management Concepts** 3 credits  
This course focuses on developing the ability to communicate clearly and concisely in both written and oral formats as tools to provide professional nursing management in a variety of settings. Interactive, written, and oral presentation exercises are used to practice management skills.

**NRS 437V: Ethical Decision Making in Health Care** 3 credits  
This course is a general introduction to the field of biomedical ethics. Students study the application of ethics and moral theories to concepts and issues arising in the health care professions. The course provides students—both as consumers and providers—an opportunity to study ethical decision making, health care situations with implications for ethical decision making, and analysis of ethical behavior of individuals involved in health care. Topics include exploration of major ethical theories and principles, informed consent, confidentiality, and ethical implications of selected issues such as abortion, euthanasia, assisted suicide, and allocation of scarce resources.

**NRS 439: Leadership in Nursing and Health Care** 3 credits  
Registered nurses with current licensure have a basic understanding of the role of the professional nurse. This course emphasizes further development of the professional nurse role. Critical management and leadership values, styles and skills are a major focus. Particular attention is given to the identification of personal leadership styles and values. Importance is placed on development of effective management and leadership skills.

**NRS 440V: Trends and Issues in Health Care** 3 credits  
This course explores the impact of numerous professional and societal forces on health care policy and practice. Content includes an analysis of current studies; nursing care policy and position statements; political, environmental, and cultural issues; and changing nursing roles. The study of these issues examines the impact on health care delivery systems in today’s society.

**NRS 441V: Professional Capstone Project** 3 credits  
The capstone project is a culmination of the learning experiences while a student in the nursing program at Grand Canyon University’s College of Nursing. The student will prepare a written proposal for a project whose focus is in the resolution of an issue or problem significant to professional nursing practice. The proposal includes a problem description, resolution, implementation, plans, evaluation plans, and proposed dissemination of findings. The professional capstone project proposal needs to reflect synthesis and integration of course content and professional practice. The capstone project is guided by the baccalaureate program student learner outcomes.

**NRS 451V: Nursing Leadership and Management** 3 credits  
Registered nurses with current licensure have a basic understanding of the role of the professional nurse. This course emphasizes further development of the professional nurse role. Critical management and leadership values, styles, and skills are a major focus. Particular attention is given to the identification of personal leadership styles and values. Importance is placed on development of effective management and leadership skills, with emphasis on effective communication.

**Nursing (NUR)**

**NUR 203: Introduction to Pharmacology** 3 credits  
This course has a twofold purpose, the first of which is to introduce basic pharmacological concepts and drug groups. These concepts include drug action, legal considerations, and evaluation of drug therapy. Physiological, psychological, and sociocultural concepts related to drug therapy are also presented. The second purpose of the course is to provide the pharmacological foundation necessary for safely administering drugs, monitoring the effects of therapy, and teaching clients about medications. This course is open to non-nursing majors with faculty signature. Co-requisite: One of the following: 1) NUR 206B; or 2) none.

**NUR 206A: Introduction to Nursing and Gerontology I** 3 credits  
This course emphasizes competence in nursing skills. Functional health patterns are used as the basis for assessment and nursing care of adult clients with emphasis on the aged. Communication, teaching, helping, problem solving, and leadership skills are introduced and applied as a framework for clinical practice. Prerequisite: One of the following: 1) Admission to the College of Nursing and NUR 207; or 2) none. Co-requisite: One of the following: 1) none; or 2) NUR 209.

**NUR 206B: Introduction to Nursing and Gerontology II** 3 credits  
This course emphasizes competence in nursing skills. Functional health patterns are used as the basis for assessment and nursing care of adult clients with emphasis on the aged. Communication, teaching, helping, problem solving, and leadership skills are introduced and applied as a framework for clinical practice. Prerequisite: One of the following: 1) NUR 206A; or 2) none. Co-requisite: One of the following: 1) none; or 2) NUR 203.

**NUR 207: Therapeutic Communication** 3 credits  
This course focuses on the development of introductory theoretical knowledge and interpersonal skills needed to interact effectively with adult clients in a variety of health care settings. Prerequisite: One of the following: 1) Admission to the College of Nursing; or 2) none.

**NUR 209: Health Assessment** 3 credits  
This course provides the systematic collection, validation, and communication framework for data that professional nurses use to make decisions about how to intervene, promote, maintain, or restore health of adult and aged clients. It emphasizes methods of
data collection, clinical reasoning, and the nursing process, along with supervised laboratory practice and selected diagnostic and screening tests. Upon completion, students demonstrate beginning knowledge and competence in the performance of adult health history taking and physical assessment by utilizing Gordon’s Functional Health Patterns Framework. Prerequisite: Admission to the College of Nursing, or special permission from faculty. Co-requisite: NUR 206A.

NUR 311: Adult Health Nursing I 6 credits
This course focuses on nursing care of adult hospitalized clients. Emphasis is placed on the analysis of assessment and the identification of nursing diagnoses and interventions for clients with acute, chronic, or terminal illnesses. Prerequisites: One of the following combinations: 1) NUR 206B; or 2) NUR 203 and NUR 206B.

NUR 312: Adult Health Nursing II 6 credits
This course focuses on nursing care of clients in the acute and critical care setting in collaboration with health team members. Emphasis is placed on the identification of nursing diagnoses and intervention for clients with acute, chronic, or terminal illnesses. Prerequisite: NUR 311.

NUR 313: Nursing Care of the Childbearing Family 6 credits
This course focuses on planning for health promotion in the normal and high-risk childbearing family. Emphasis is placed on family education, use of community resources, and alternatives to promote positive outcomes during the childbearing phase of family development. Prerequisite: NUR 312.

NUR 314: Family-Centered Child Health Nursing 6 credits
This course integrates theories from nursing, child development, and family development. These concepts are related to the planning of care for children, adolescents, and their families who are well or experiencing acute or chronic illnesses. Emphasis is placed on teaching and on community resources related to the child-rearing family. Prerequisite: NUR 312.

NUR 398*: Introduction to Nursing Research 3 credits
This writing-intensive course provides the use of research findings as a basis for improving clinical practice. Quantitative and qualitative research methodologies are presented. Emphasis is on the critical review of research studies and their applications to clinical practice. An overview of evidence-based practice is provided. Prerequisites: PSY 363 and NUR 206B, or permission of instructor.

NUR 411: Community Health Nursing 5 credits
This course focuses on community assessment and intervention with vulnerable groups and communities. Emphasis is placed on critical analysis and use of epidemiological data and functional health patterns to plan and intervene in areas of health promotion, screening, and rehabilitation with community groups. Prerequisites: NUR 313 and NUR 314.

NUR 412: Home Health Care Nursing 3 credits
This course focuses on the nursing care of acutely, chronically, and terminally ill clients of all ages and their families. Emphasis is placed on the integration of environmental, psychosocial, economic, cultural, personal, and family health concepts in the home setting. Creative problem solving, which enables a family to care for their family member’s health needs, is a significant element of this fundamental course. Prerequisites: NUR 313 and NUR 314.

NUR 413: Community Mental Health Nursing 5 credits
This course is focused on utilizing the nursing process in providing mental health care in the community setting and inpatient psychiatric setting with individuals, families, and community groups. Emphasis is placed on therapeutic communication and nursing care at primary, secondary, and tertiary levels of mental health intervention. Concepts of environment, group process, family therapy, interdisciplinary collaboration, and affective skills of critical thinking are integrated with the bio-psychosocial, spiritual, and cultural aspects of mental health nursing practice. Prerequisites: NUR 313 and NUR 314.

NUR 443: Management Concepts and Leadership Behaviors in Nursing 2 credits
Nursing management and leadership roles are expected in today’s changing health care agencies. Emphasis is placed on the interdisciplinary approach to planning nursing care for groups using selected standards. The course includes a critical examination of professional development and peer collaboration as well as the economic, legal, and political factors influencing health care. Prerequisite: NUR 456.

NUR 451: Nursing Leadership and Management 3 credits
This course emphasizes further development of the professional nurse role. Critical management and leadership values, styles, and skills are a major focus. Particular attention is given to the identification of personal leadership styles and values. Importance is placed on development of effective management and leadership skills with emphasis on effective communication.

NUR 456: Complex Care 6 credits
The focus of this course is the acute care and collaborative management of critically ill clients. Emphasis is placed on the recognition of subtle changes in assessment findings, the development of a plan of care in response to immediate and impending needs, the application of advanced nursing skills, and the nurturing of sound clinical judgment. Prerequisites: NUR 411, NUR 412, and NUR 413.

NUR 498*: Capstone 1 credit
This writing-intensive course integrates theories and concepts from liberal arts education into nursing practice through the formation of a clinical change project. Emphasis is on applying evidenced-based practice into the clinical setting. Prerequisites: NUR 411, NUR 412, and NUR 413.
NUR 498B*: Practicum in Nursing 3 credits

The practicum in nursing provides a selected clinical experience to optimize the transition to a professional career. Nursing care areas are chosen according to preceptor availability and student focus. A faculty member assists in planning, implementing, and evaluating the learning experience. A writing-intensive course. Prerequisite: NUR 456.

NUR 502: Theoretical Foundations for Nursing Roles and Practice 4 credits

This course examines nursing as a profession and a discipline and the individual nurse’s role as a member of the profession. The theoretical foundations for nursing practice and roles are explored and applied. Emphasis is placed on developing scholarly writing and presentation skills. Critical thinking skills are refined as students discuss and synthesize the literature that guides nursing practice with a special emphasis on caring, diversity, and spirituality.

NUR 504: Health Care Research Analysis and Utilization 4 credits

This course focuses on the critical analysis of nursing and health care research and its application to nursing education, nursing practice, and the delivery of health care services. Emphasis is placed on strategies to access current and relevant data, synthesize the information, and translate new knowledge to practice. Ethical issues in the design and conduct of research are addressed. Prerequisite: NUR 502.

NUR 508: Ethics, Policy, and Finance in the Health Care System 4 credits

This course utilizes health care policy as a framework to analyze how health is defined and health care is designed and delivered in the United States and around the world. Emphasis is placed on issues of cost, quality, access, disparities, and finance. The various roles of the master’s prepared nurse in the health care system are explored. Prerequisite: NUR 504.

NUR 640: Advanced Physiology and Pathophysiology 3 credits

This course focuses on advanced physiology, pathophysiology, and pharmacologic principles. This course will guide the Nursing Education student in interpreting changes in normal function that result in symptoms indicative of illness and the effects of select pharmacologic substances on that process. Evidence-based research provides the basis for determining the safe and appropriate utilization of medications and herbal therapies on human function. Appropriate education for various prescribed pharmacologic agents is incorporated. Prerequisite: NUR 508.

NUR 642: Advanced Physiology and Pathophysiology for Nurse Educators 3 credits

This Web-enhanced course focuses on the advanced physiology and pathophysiology principles. This course is used to guide the family nurse practitioner (FNP), clinical nurse specialist (CNS), and clinical nurse specialist education (CNS-ED) student in interpreting changes in normal function that result in symptoms indicative of illness. The emphasis is placed on the genetic, molecular, cellular, and organ system levels. Co-requisite: NUR 644.

NUR 640E: Adv. Health Assessment for Nurse Educators 3 credits

This course builds upon the student’s previous health assessment knowledge offering more advanced health assessment content to provide the foundation for the Advanced Professional Nursing role of Nurse Educator. This course emphasizes knowledge of physical assessment, including physical, psychosocial, spiritual health assessment, risk assessment, functional assessment, and physical examination in diverse populations. The student uses a systematic method of diagnostic reasoning and clinical decision-making to establish data that can be utilized in patient care or nursing education. An overview of appropriate protocols for performing health screening, as well as performing, and interpreting laboratory, radiographic, and other diagnostic data are included. These are based on best practices consistent with resource allocations. To maintain a nursing focus on patient responses to illness or the threat of illness, effective communication and client teaching is incorporated throughout the course. The importance of effective documentation and medical record keeping is included.

NUR 641E: Advanced Pathophysiology and Pharmacology for Nurse Educators 4 credits

This course focuses on advanced physiology, pathophysiology, and pharmacologic principles. This course will guide the Nursing Education student in interpreting changes in normal function that result in symptoms indicative of illness and the effects of select pharmacologic substances on that process. Evidence-based research provides the basis for determining the safe and appropriate utilization of medications and herbal therapies on human function. Appropriate education for various prescribed pharmacologic agents is incorporated. Prerequisite: NUR 508.

This course focuses on the three levels of prevention and comprehensive primary care management of adult health care problems of individuals and their families within a culturally and spiritually diverse environment, contextually within the health care delivery system. Advanced health assessment, advanced pharmacology, spirituality, and advanced physiology and pathophysiology principles are integrated with advanced nursing theory. Evidence-based research is utilized to develop comprehensive, cost-effective, least invasive, quality health care guidelines for adult health care problems. These guidelines are to include health promotion counseling, screening, and client education to optimize the client’s health. Emphasis is placed on critical thinking and diagnostic reasoning to guide clinical decision making. Management of client illness includes ordering diagnostic tests, prescribing pharmacologic and nonpharmacologic integrative healing therapies, collaborating with other health professionals and community agencies, and pursuing appropriate follow-up. A professional interpersonal relationship is to be learned between practitioner and patient. A collegial relationship is to be learned between practitioner and other allied-health professionals. Leadership opportunities in health economics and negotiating within the health care delivery system are provided. Students collaborate with faculty to select a community-based, adult health-focused, clinical site for completion of 150 clinical hours. Prerequisites: NUR 640, NUR 642, NUR 644, and NUR 646.

This Web-enhanced course focuses on the advanced pharmacotherapy principles and practices to enable the family nurse practitioner (FNP), clinical nurse specialist (CNS), and the clinical nurse specialist education (CNS-ED) student to prescribe and monitor the effects of medications and selected herbal therapy. Emphasis is on the pharmacodynamics of clients with common, acute, and chronic health problems in various stages of the lifecycle in diverse populations. Evidence-based research provides the basis for selecting effective, safe, and cost-efficient pharmacologic or integrative regimens. Appropriate client education as to various prescribed pharmacologic agents in incorporated. Legal requirements for prescriptive writing and dispensing authority are covered. Prerequisite: One of the following: 1) NUR 640; or 2) none. Co-requisite: NUR 642.

This course focuses on the advanced pharmacotherapy principles and practices to enable Nurse Educator students to monitor the effects of medications and selected herbal therapy. Emphasis is on the pharmacodynamics of clients with common, acute and chronic health problems in various stages of the life cycle in diverse populations. Evidence-based research provides the basis for selecting effective, safe but cost-efficient pharmacologic or integrative regimens. Appropriate client education as to various prescribed pharmacologic agents is incorporated. Prerequisite: NUR 640E & NUR 642E.

This course focuses on the development (or conversion) of educational programs to be delivered in an online format. Principles of curriculum development, teaching/learning theories, and implementation of evaluation strategies will be modified to the online learning environment. Prerequisite: NUR 645.

This course examines professional standards as a foundation for curriculum design in nursing education in all settings. It explores the nature of traditional academic education and nontraditional

*Campus/Off-site only | *Writing-intensive course | *Fulfills General Education requirement |
academic education, as well as continuing nursing education. This course also focuses on theories of teaching/learning, traditional and alternative instructional strategies, and nursing education in the classroom and clinical setting. The course incorporates the development of curriculum frameworks and learning activities for adult learners from diverse backgrounds. Strategies to enhance critical thinking are included. Prerequisite: NUR 645E.

**NUR 649: Curriculum Development** 3 credits

This course examines professional standards as a foundation for curriculum design in nursing education in all settings. It explores the nature of traditional, nontraditional, and continuing nursing education. Topics include the role of the faculty, curriculum design, its dimensions, objectives, and dynamics. The course includes curriculum frameworks that support adult learning, competencies, and learning experiences to achieve measurable outcomes, and a model for curriculum evaluation. Prerequisites: NUR 640E, NUR 642E, NUR 644E.

**NUR 649E: Nursing Education Seminar II** 4 credits

This course incorporates technology into the educational process from the use of personal technology to institutional technology. Students have the opportunity to develop (or convert) educational programs to be delivered in an online format. Principles of curriculum development, teaching/learning theories, and implementation of evaluation strategies will be modified to the online learning environment. This course also examines professional regulatory and accreditation standards as an evaluation framework for curriculum design in nursing education in all settings. Strategies to assess learning are included from the assignment evaluation to the program evaluation based on outcomes. Prerequisite: NUR 647E.

**NUR 651: Advance Practice Management of Pediatric and Adolescent Health Care Problems in Primary Care** 6 credits

This course focuses on the three levels of prevention and comprehensive primary care management of pediatric and adolescent health care problems of individuals, and their families within a culturally and spiritually diverse environment, contextually within the health care delivery system. Advanced health assessment, advanced pharmacology, and advanced physiology and pathophysiology principles are integrated with spirituality concepts and advanced nursing theory. Evidence-based research is utilized to develop comprehensive, cost-effective, least invasive, quality health care guidelines for pediatric and adolescent health care problems. These guidelines are to include health promotion counseling, client education, and appropriate screening to optimize the client’s health. Emphasis is placed on critical thinking and diagnostic reasoning to guide clinical decision making. Management of client illness includes ordering diagnostic tests, prescribing pharmacologic and nonpharmacologic integrative healing therapies, collaborating with other health professionals and community agencies, and pursuing appropriate follow-up. A professional interpersonal relationship is to be learned between practitioner and patient. A collegial relationship is to be learned between practitioner and other allied-health professionals. Leadership opportunities in health economics and negotiating within the health care delivery system are provided. The student will collaborate with faculty members to select a community-based, pediatric/adolescent health-focused, clinical site for completion of 150 clinical hours. Prerequisite: NUR 643.

**NUR 653: Diagnosis and Management of Acutely Ill Patients I** 3 credits

This course focuses on evidence-based theory and research related to acute illnesses. A unifying framework is presented to organize the care of the critically ill patient. The student synthesizes data from a variety of health resources related to the care of critically ill patients. Specific system focus is related to cardiovascular disorders, respiratory disorders, and endocrine disorders. Students make clinical judgments and decisions regarding appropriate recommendations and treatments related to symptom-focused presentation and implications related to alterations in different systems. Prerequisites: NUR 640, NUR 642, and NUR 644.

**NUR 654: Diverse Application of Advanced Practice Concepts** 3 credits

This course presents practice concepts that blend the function of the clinical nurse specialist with the FNP role for a futuristic vision for integration of these roles to include assessing and addressing the needs of client populations and nursing personnel across the continuum of care. Management concepts include case management, teaching of professionals, program planning, evaluation, peer review, broad-based consultation, marketing, business management, resource management, cost-effective use of formularies, and payment for services, including processing insurance claims. Prerequisite: One of the following: 1) NUR 652, 2) NUR 662, 3) NUR 675 and NUR 675C, or 4) NUR 643.

**NUR 655: CNS I – Theoretical Foundations** 6 credits

This course focuses on evidence-based theory and research related to acute illnesses. A unifying framework is presented to organize the care of the critically ill patient. The student synthesizes data from a variety of health resources related to the care of critically ill patients. Specific system focus is related to cardiovascular disorders, respiratory disorders, and endocrine disorders. Students make clinical judgments and decisions regarding appropriate recommendations and treatments related to symptom-focused presentation and implications related to alterations in different systems. Prerequisites: NUR 640, NUR 642, and NUR 644.

**NUR 655: CNS I – Theoretical Foundations** 6 credits

This course focuses on the theories, conceptual models, and research that are the basis of CNS practice. Building on advanced practice nursing theory, students engage in discussion of theoretical and empirical knowledge of illness and wellness—both of disease and nondisease etiologies—from the three spheres of influence, particularly the patient/client sphere. Advanced health assessment, advanced pharmacology, and advanced physiology and pathology principles are integrated along with professional/legal and spirituality concepts. Content includes:

- Theoretical foundations of CNS practice
- Phenomena of nursing concern, integrating health promotion
- Design and development of innovative nursing interventions
- Clinical inquiry/critical thinking using advanced knowledge
- Consultation, teaching, and coaching with focus on the individual/family/groups
- Measurement, outcome evaluation, including cost-effectiveness and evidence-based research focused on the patient/client sphere

The clinical experience takes place in the student’s chosen specialty area and integrates the theoretical concepts covered in the didactic portion of the course. Clinical component: 3 clinical credits. Clinical hours: 150.
NUR 656: Diagnosis and Management of Acutely Ill Patients II 4 credits
This course focuses on evidence-based theory and research related to acute illnesses. A unifying framework is presented to organize the care of the critically ill patient. The student synthesizes data from a variety of health resources related to the care of critically ill patients. Specific system focus is related to neurological disorders, renal/gynecological disorders, and emergency situations. Students make clinical judgments and decisions regarding appropriate recommendations and treatments related to symptom-focused presentation and implications related to alterations in different systems. Prerequisite: NUR 653.

NUR 657: CNS II – Influence Change in Health Care Systems 6 credits
This course focuses on the essential characteristics and competencies of the CNS, exploring the CNS roles of clinical leader, collaborator, change agent, consultant, educator, and researcher. Students discover how, in utilizing these roles, a CNS can influence the quality of care within health care systems. The course builds on the patient/client sphere of influence, focusing on the broader nurse/nursing practice and organizational/systems spheres of influence. Content includes:

- Influencing change
- Systems thinking
- Leadership for multidisciplinary collaboration
- Consultation, teaching, and coaching focused on groups
- Measurement, outcome evaluation including cost-effectiveness, and evidence-based research focused on the group/organization
- Technology, products, and devices development/evaluation

The clinical experience takes place in the student’s chosen specialty area and the above concepts are integrated in that specialty setting.

The clinical experience integrates the theoretical concepts covered in the didactic portion of the course. Clinical component: 3 clinical credits. Clinical hours: 150 credits. Prerequisite: NUR 655.

NUR 658: Scope of Practice, Documentation, and Billing 2 credits
This course focuses on professional and legal issues related to advanced practice nursing and includes APRN scope of practice, inpatient and outpatient documentation, and billing. Managing the acute care patient during periods of transition, such as admitting, transferring, and discharging, is also covered. This course provides a review of concepts related to collegial practice, including interprofessional and intraprofessional relationships within the health care delivery system. Prerequisites: NUR 640, NUR 642, and NUR 644.

NUR 659: Diagnosis and Management of Acutely Ill Patients III 4 credits
This course focuses on evidence-based theory and research related to acute illnesses. A unifying framework is presented to organize the care of the critically ill patient. The student synthesizes data from a variety of health resources related to the care of critically ill patients. Students make clinical judgments and decisions regarding appropriate recommendations and treatments related to symptom-focused presentation and implications related to alterations in different systems. Prerequisite: NUR 656.

NUR 660: CNS Internship/Teaching Practicum 4 credits
Students in the CNS with Education focus complete a culminating practicum experience that combines the experiences for NUR 663 (CNS Clinical Internship) and NUR 665 (Teaching Practicum). Clinical component: 4 clinical credits. Clinical hours: 200.

NUR 661: Advanced Practice Clinical Practicum 4 credits
In this culminating practicum experience, completed in person with a preceptor, students provide comprehensive health care to diverse clients across the life span. This clinical practice will afford students opportunity to refine their clinical decision management of common, acute, and chronic health problems. The course includes the application of clinical nurse specialist concepts such as case management, teaching of professionals, peer reviews, cost-effective use of formularies, coding for reimbursement. Online case study discussions analyzed by evidence-based practice guidelines using the SOAP format are required. Clinical requirement for this course: 4 clinical credits = 200 contact credits.

NUR 662: Advance Practice Management of Geriatric and Women’s Health Care Issues in Primary Care 6 credits
This course focuses on the three levels of prevention and comprehensive primary care management of geriatric and women’s health care issues (including care of the pregnant patient) of individuals and their families within a culturally and spiritually diverse environment, contextually within the health care delivery system. Advanced health assessment, advanced pharmacology, spirituality, and advanced physiology and pathophysiology principles are integrated with advanced nursing theory. Evidence-based research is utilized to develop comprehensive, cost-effective, least invasive, quality health care guidelines for geriatric and women’s health care problems. These guidelines are to include health promotion counseling, screening, and client education to optimize the client’s health. Emphasis is placed on critical thinking and diagnostic reasoning to guide clinical decision making. Management of client illness includes ordering diagnostic tests, prescribing pharmacologic and nonpharmacologic integrative healing therapies, collaborating with other health professionals and community agencies, and pursuing appropriate follow-up. A professional interpersonal relationship is to be learned between practitioner and patient. A collegial relationship is to be learned between practitioner and other allied-health professionals. Leadership opportunities in health economics and negotiating within the health care delivery system are provided. The student will collaborate with faculty.

*Campus/Off-site only | † Writing-intensive course | ‡ Fulfills General Education requirement |
members to select a community-based, geriatric and women’s health-focused, clinical site for completion of 150 clinical hours. Prerequisite: NUR 651.

NUR 663: CNS Internship 4 credits

A culminating practicum experience, completed in person with a preceptor, provides students with experiences in the three spheres of influence of CNS practice: patient/client, nurses and nursing practice, and organization/system within their specialty area. This clinical practice affords students opportunity to refine their clinical decision-making skills in differential illness diagnoses and treatments that require nursing interventions; to develop their CNS roles of clinical expert, leader, collaborator, consultant, educator, researcher and change agent; and to explore how their professional attributes, ethical conduct, and professional citizenship are integrated in CNS practice to affect outcomes within the spheres. The course includes the application of the core content specific to CNS practice identified in NUR 655 and NUR 657. Online case study discussions analyzed by evidence-based practice guidelines are utilized. Impact of the student CNS on nursing practice and system-level outcomes are identified.

Clinical component: 4 clinical credits. Clinical hours: 200 credits. Prerequisite: NUR 657.

NUR 664T: Advance Practice Management of Geriatric Issues in Primary Care 1.5 credits

This course focuses on the three levels of prevention and comprehensive primary care management of geriatric health care problems of individuals and their families within a culturally and spiritually diverse environment. Advanced health assessment, advanced pharmacology, and advanced physiology and pathophysiology principles are integrated with spirituality concepts and advanced nursing theory. Evidence-based research is utilized to develop comprehensive, cost-effective, least invasive, quality health care for geriatric clients. Care will include health promotion counseling, client education, and appropriate screening to optimize the client’s health. Emphasis is placed on critical thinking and diagnostic reasoning to guide clinical decision making. Management of client illness includes ordering diagnostic tests, prescribing pharmacologic and nonpharmacologic integrative healing therapies, collaborating with other health professionals and community agencies, and pursuing appropriate follow-up. Prerequisite: NUR 675. Co-requisite NUR 664C.

NUR 664C: Advance Practice Management of Geriatric Issues in Primary Care Clinical 1.5 credits

The student will collaborate with faculty members to select a community-based, geontological health-focused, clinical site for completion of 75 clinical hours. The clinical component for NUR 664T allows the student an opportunity to provide comprehensive health care to diverse clients in late age. Clinical hours are completed in person with a qualified preceptor (NP, DO, MD, DNM) and serve as the opportunity to demonstrate clinical skills, learn clinical decision-making skills, and learn the role of the advanced practice nurse in collaboration with experienced preceptors who serve as mentors. The clinical component of each course is accomplished during the same semester as the corresponding didactic course and is graded as Pass/Fail. Failure of a clinical course constitutes failure of the corresponding didactic course. Prerequisite: NUR 675. Co-requisite NUR 664T.

NUR 665: Teaching Practicum 3 credits

(3 clinical credits = 150 contact credits) A culminating practicum experience, completed in person with a nurse educator preceptor in a selected setting. This clinical practice will afford students the opportunity to refine educational expertise in the areas of assessment of learning needs, program/curriculum planning, implementation, and evaluation. The course includes needs of the adult learner, alternative learning methods including distance learning, and budget planning. Prerequisites: NUR 645, NUR 647, and NUR 649.

NUR 665E: Nursing Education Practicum 4 credits

This is a culminating practicum experience completed with a nurse educator preceptor in a selected setting. This clinical practicum affords students the opportunity to refine educational expertise in their selected areas of interest (e.g., assessment of learning needs, program/curriculum planning, implementation, and assessment/evaluation in either a traditional or nontraditional setting). This course offers opportunities for students to begin integrating the role of the nurse educator into their professional behaviors. Prerequisite: NUR 649E. This course may be taken concurrently with NUR 699.

NUR 667: Advance Practice Management of Women’s Health Issues in Primary Care 1.5 credits

This course focuses on the three levels of prevention and comprehensive primary care management of women’s health care issues (including care of the pregnant patient) for individuals and their families within a culturally and spiritually diverse environment, contextually within the health care delivery system. Advanced health assessment, advanced pharmacology, spirituality, and advanced physiology and pathophysiology principles are integrated with advanced nursing theory. Evidence-based research is utilized to develop comprehensive, cost-effective, least invasive, quality health care for women. Care includes health promotion counseling, screening, and client education to optimize the client’s health. Emphasis is placed on critical thinking and diagnostic reasoning to guide clinical decision making. Management of client illness includes ordering diagnostic tests, prescribing pharmacologic and nonpharmacologic integrative healing therapies, collaborating with other health professionals and community agencies, and pursuing appropriate follow-up. Prerequisite: NUR 675. Co-requisite: NUR 667C.

NUR 667C: Advance Practice Management of Women’s Health Issues in Primary Care Clinical 1.5 credits

Students collaborate with faculty members to select a community-based, women’s health-focused, clinical site for completion of 75 clinical hours. The clinical component for NUR 667 allows the student an opportunity to provide comprehensive health care to diverse clients across the lifespan. Clinical hours are completed in person with a qualified preceptor (NP, DO, MD, DNM) and serve as the opportunity to demonstrate clinical skills, learn clinical decision-making skills, and learn the role of the advanced practice...
reasoning to guide clinical decision making. Management of client illness includes ordering diagnostic tests, prescribing health. Emphasis is placed on critical thinking and diagnostic processes. Prerequisites: LDR 600, LDR 615, LDR 620, and LDR 625.

NUR 668: Advance Practice Management of Pediatric and Adolescent Health Care Problems in Primary Care 3 credits

This course focuses on the three levels of prevention and comprehensive primary care management of pediatric and adolescent health care problems of individuals and their families within a culturally and spiritually diverse environment. Advanced health assessment, advanced pharmacology, and advanced physiology and pathophysiology principles are integrated with spirituality concepts and advanced nursing theory. Evidence-based research is utilized to develop comprehensive, cost-effective, least invasive, quality health care for pediatric and adolescent health care problems. Care includes health promotion counseling, client education, and appropriate screening to optimize the client’s health. Emphasis is placed on critical thinking and diagnostic reasoning to guide clinical decision making. Management of client illness includes ordering diagnostic tests, prescribing pharmacologic and nonpharmacologic integrative healing therapies, collaborating with other health professionals and community agencies, and pursuing appropriate follow-up. Prerequisite: NUR 668C. Co-requisite NUR 668C.

NUR 668C: Advance Practice Management of Pediatric and Adolescent Health Care Problems in Primary Care Clinical 3 credits

Students collaborate with faculty members to select a community-based pediatric or adolescent clinical site for completion of 150 clinical hours. The clinical component for NUR 668 allows the student an opportunity to provide comprehensive health care to diverse clients across the lifespan. Clinical hours are completed in person with a qualified preceptor (NP, DO, MD, DNM) and serve as the opportunity to demonstrate clinical skills, learn clinical decision-making skills, and learn the role of the advanced practice nurse in collaboration with experienced preceptors who serve as mentors. The clinical component of each course is accomplished during the same semester as the corresponding didactic course and is graded as Pass/Fail. Failure of a clinical course constitutes failure of the corresponding didactic course. Co-requisite NUR 668.

NUR 670: Leadership in Health Care Organizations Practicum 4 credits

This course promotes the synthesis and application of knowledge and skills from the nursing core course and the leadership courses. Students identify a mentor and develop a relationship through which they examine the connection between theory and practice. Students engage in leadership activities (e.g., committees, projects, staff education, and quality improvement) and, through reflection and writing, analyze and evaluate leadership behaviors and processes. Prerequisites: LDR 600, LDR 615, LDR 620, and LDR 625.

NUR 671: Practicum I 4 credits

This course focuses on knowledge and skill acquisition to perform therapeutic interventions to stabilize acute and critical health problems, including suturing, line and tube insertion, and lumbar puncture. Students review diagnostic findings, including EKG, hemodynamic, radiological, and interventional studies. During this course, students initiate phase 1 of their evidence-based project. Combined total of Simulation and Clinical hours: 100. Prerequisite: NUR 653, NUR 656, and NUR 658.

NUR 672: Practicum II 4 credits

This course focuses on the application of evidence-based provision of care for complex acute and chronic illnesses of the acutely ill patient in a preceptored clinical setting. Throughout the course, students: 1) demonstrate comprehensive system-focused, symptom-specific assessments; 2) formulate differential diagnoses by priority considering potential mechanisms and development of management strategies; 3) utilize technical skills in the diagnosis and patient management; and 4) incorporate health promotion, health protection, and injury prevention measures into the plan of care within the context of the complex acute, critical, and chronic illness. During this course, students continue to develop their evidence-based practice project. Clinical hours: 200. Prerequisite: NUR 671.

NUR 673: Practicum III 4 credits

A culminating practicum experience is completed in person with a preceptor, to provide comprehensive health care to complex, acute, and critically ill patients. This course builds upon learning from NUR 672. Clinical practice affords students the opportunity to refine their clinical decision-making skills in advanced health assessment, clinical diagnosis, procedural skill acquisition, and care management of acute and chronically ill adults. Clinical experiences emphasize the physiological and psychosocial impact of acute and critical illness on patients, family, and community, and prepare the ACNP in the diagnosis and management of acute and life-threatening health problems. During this course, students complete their evidence-based practice project. Clinical hours: 200. Prerequisite: NUR 672.

NUR 675: Advance Practice Management of Adult Health Care Problems in Primary Care 3 credits

This course focuses on the three levels of prevention and comprehensive primary care management of adult health care problems of individuals and their families within a culturally and spiritually diverse environment. Advanced health assessment, advanced pharmacology, spirituality, and advanced physiology and pathophysiology principles are integrated with advanced nursing theory. Evidence-based research is utilized to develop comprehensive, cost-effective, least invasive, quality health care for adult health care problems. Care will include health promotion counseling, screening, and client education to optimize the client’s health. Emphasis is placed on critical thinking and diagnostic reasoning to guide clinical decision making. Management of client illness includes ordering diagnostic tests, prescribing pharmacologic and nonpharmacologic integrative healing therapies, collaborating with other health professionals and

*Campus/Off-site only | Writing-intensive course | Fulfills General Education requirement |
The student will collaborate with faculty members to select a community-based, adult or primary care clinical site for completion of 150 clinical hours. The clinical component for NUR 675 allows the student an opportunity to provide comprehensive health care to diverse clients across the lifespan. Clinical hours are completed in person with a qualified preceptor (NP, DO, MD, DNM) and serve as the opportunity to demonstrate clinical skills, learn clinical decision-making skills, and learn the role of the advanced practice nurse in collaboration with experienced preceptors who serve as mentors. The clinical component of each course is accomplished during the same semester as the corresponding didactic course and is graded as Pass/Fail. Failure of a clinical course constitutes failure of the corresponding didactic course. Prerequisites: NUR 640, NUR 642, NUR 644, and NUR 646. Co-Requisite: NUR 675.

NUR 681: Advanced Practice Practicum 2 credits
In this culminating practicum experience, students provide comprehensive health care to diverse clients across the lifespan. The course includes the application concepts such as case management, teaching of professionals, peer reviews, cost-effective use of formularies, and coding for reimbursement. Online case study discussions analyzed by evidence-based practice guidelines using the SOAP format are required. Prerequisite: NUR 664T, NUR 667, NUR 668, and NUR 675. Co-requisite: NUR 681C.

NUR 681C: Advanced Practice Clinical Practicum 2 credits
Students collaborate with faculty members to select a community-based primary or family health-focused clinical site for completion of 200 clinical hours. This clinical practice will afford students opportunity to refine their clinical decision management of primary health problems for diverse clients across the lifespan. Prerequisite: All prior coursework. Co-requisites: NUR 681 and NUR 699.

NUR 698: Evidence-Based Practice Project 3 credits
This course provides an opportunity to prepare an evidence-based practice (EBP) project proposal that addresses a problem, issue, or concern in professional practice. Students identify a problem amenable to research-based intervention; search literature; propose a solution; and develop a plan to implement the solution, evaluate its outcome(s), and disseminate the findings. Problems identified are those that are appropriate to students’ specialty tracks: nursing leadership, nursing education, clinical nurse specialist, and family nurse practitioner. This course must be taken after completion of specialty courses. Prerequisite: One of the following: 1) NUR 508 or 2) NUR 508 and NUR 649E.

Organizational Development (ORG)

ORG 805: The Nature and Dynamics of Organizations 3 credits
This course provides a broad overview of the major theoretical frameworks of organizational theory and organizational behavior. Topics include organizational structure, culture, organizational design and effectiveness, learning organizations, motivation, communication, and decision making.

ORG 810: Leading the New Organization 3 credits
Leadership styles and organizational challenges faced by 21st century leaders are largely unparalleled and radically different from what we have known. A major contributory factor is the rate of change in the environment, and there are no signs of abating. Leadership styles and organizational methods developed for use under stable conditions are no longer as effective; hence, there have emerged different and newer ways of organizing, and a resultant revolution and redefinition of the competencies, skills, and abilities needed for successful leadership in the new era.

ORG 815: Understanding Toxic Leadership 3 credits
This course analyzes why we are attracted to leaders who do not have the best interests of their followers (or organizations) at heart. These leaders often display a charisma and style that mask their real intentions, which are ultimately about creating dependency and promoting their own careers and agendas. The consequences of this dysfunctional leadership style can be devastating to both the organization and its stakeholders.

ORG 820: Organizational Governance and Accountability 3 credits
This course analyzes the reasons for the growing importance of organizational governance and accountability in both for-profit and not-for-profit organizations. Technology (Web 2.0), recent ethical scandals, financial debacles, and globalization have shifted the paradigm of governance. This course covers the new ways to build organizational governance and accountability.
ORG 825: Leading Value-Driven Organizations 3 credits
This course examines the rise of the value-driven organization, where the workplace is defined as something more than just a business contract between employer and employee. The phenomena of putting meaning into work and how this can support a responsive and adaptive organizational culture while driving competitive advantage is explored.

Professional Counseling (PCN)

PCN 300: Foundation of Drug Abuse and Human Behavior 3 credits
An overview of drug abuse and the effects of mood altering drugs on human behavior.

PCN 301: Foundation of Alcohol Abuse and Human Behavior 3 credits
An overview of alcohol abuse and the effects of alcohol on human behavior.

PCN 303: Professional Readiness: Legal, Ethical, Personal, and Professional Responsibilities in Counseling 4 credits
This course investigates legal practice and regulations, ethical reasoning, and ethical frameworks as they are applied to the professional practice of counseling. An awareness of one’s own values and performance measures related to counseling standards, professional development, personal well-being, professional practice, educational advancement, and professional codes of ethics is explored.

PCN 306: Culture and Diversity in Counseling Service and Practice 4 credits
This course examines the impact of cultural diversity on counseling, encourages the acknowledgement of diverse biases and beliefs, and provides an opportunity for students to demonstrate an appreciation of the contributions of diverse populations. Special attention is given to the treatment of diverse populations, including the poor, the mentally ill, the developmentally disabled, the traumatized or abused, the elderly, and persons with HIV/AIDS.

PCN 308: Group Counseling and Community Education 4 credits
This course is an introduction to the theory and dynamics of group interaction, including psycho-educational, support, and therapeutic context. The various stages and processes of group development are studied using both a conceptual and experimental approach. The course is intended to assist persons who will function as leaders in a variety of small group situations. Support and self-help groups are covered along with the ethical issues unique to group settings.

PCN 309: Case Management and Interventions in Counseling 4 credits
This course presents models and theories of case management, intake assessment, service planning and coordination, monitoring, documentation and use of technology, and termination of services. A continuum of interventions (i.e., prevention, treatment, maintenance, and aftercare) is addressed within the context of a spectrum of service settings and ethical and culturally appropriate responses. The course also presents a comprehensive introduction to crisis intervention. Models for assessing and responding to crises are presented. Topics such as medical and psychological traumas, post-traumatic stress disorder, and professional burnout are part of the curriculum. Special emphasis is given to disaster psychology, natural disasters, terrorism, school violence, and suicidology.

PCN 310: Behavioral Pharmacology 3 credits
An overview of the nervous system and the way that drugs affect the human body. Focus is on comparing different substances in terms of their neurological action, physiological dangers, and the effects of their usage on the individual and on society.

PCN 315: Medical and Physiological Aspects of Chemical Dependence and Substance Abuse for Counselors 4 credits
This course introduces the student to the relative aspects of anatomy, physiology, pharmacology, and diseases related to substance abuse and chemical dependency. Topics include examination of the major classes of psychoactive drugs, including those commonly subject to abuse, differences between psychoactive and psychotropic drugs, and identification of mental disorders that necessitate the need for psychotropics. The course also covers side effects of psychotropics; the mechanisms of antidepressants, neuroleptics, and antimanic drugs; and the pros and cons of adjunctive psychotherapies, including the addictive properties of some classes of prescribed medications.

PCN 345: Co-occurring Disorders, Mental Illness, and Substance Abuse 3 credits
An exploration of the issues, principles, and techniques involved in diagnosing and treating patients with coexisting mental illness and chemical dependency.

PCN 350: Group Therapy for Addicted Populations 3 credits
Focus on group dynamics and group process as they relate to chemical dependency. Exploration of group developmental stages, family intervention models, various counseling approaches/techniques, and their applications to therapeutic, education, and family groups.

PCN 405: Psychotherapy Models 3 credits
An overview of models of psychotherapy prevalent in counseling, with a focus on those most useful in the treating of chemical dependency.
PCN 420: Family Dynamics and Substance Abuse/Addiction 3 credits
Introduction to the dynamics of the disease of alcoholism and its effect on the family unit. Emphasis on the theories of alcoholism, the skills and knowledge necessary to treat families, family therapy theories, diagnosis of the alcoholic family, problems of children and adult children of alcoholics, treatment of spouses, evaluation of treatment, and prevention models.

PCN 426: Counseling Multicultural and Diverse Populations 3 credits
Exploration of implications of chemical use on multicultural and diverse populations. Emphasis on area influences as well as the impact of paraprofessional relationships.

PCN 430: Chemical Dependency and Substance Abuse: Evaluation, Documentation, and Comprehensive Treatment Planning 4 credits
This course addresses the methodologies associated with comprehensive screening, assessing, and documentation procedures along with the development and implementation of a comprehensive treatment plan that includes any necessary referrals or consultation for individuals with chemical dependency and substance abuse disorders. In addition to the processes described, students develop interpersonal communication skills necessary to address and discuss sensitive and confidential issues with the client, family members, and other service personnel required to fill any service gaps.

PCN 435: Chemical Dependency and Substance Abuse: Psychopathology and Psychotherapy Models 4 credits
This course is foundational for the addiction counselor. It provides a comparative examination of the major accepted approaches to alcohol and drug abuse counseling. The course bridges the gap between research and practice incorporating best practices into its curriculum. Case studies and role plays are used to help students develop primary counseling skills. In addition, this course provides foundation and experience specific to treating special populations (e.g., adolescents, GLBT, ethnic classes and diversity groups).

PCN 438: Addiction Counseling: Psychopathology, Evaluation, Counseling, and Treatment Planning 4 credits
The origins and trends of addictive behavior are covered, including substances, gambling, Internet, relationship addiction, and others. Understanding the origins of addictions, treatment options, and barriers to treatment is explored. Students also learn about addiction co-morbidity with mental health issues, as well as addictive patterns in minority and culturally diverse communities.

PCN 440: Family Therapy and Education in Addiction, Chemical Dependency, and Substance Abuse Counseling 4 credits
This course provides an overview of the field of family therapy with specific focus on the major models of family intervention, counseling skills and theoretical techniques, and application of counseling principles to the family setting. In addition to the various theories of family structure and process, guiding principles and strategies for assessing are presented, as are other techniques for engaging, connecting with, and educating families.

PCN 445: Psychopathology, Co-Occurring Disorders, and Dual Diagnoses in Counseling 4 credits
The course introduces the biological, psychosocial, and sociocultural etiological perspectives of psychopathology. Topics range from phobic disorder in children to psychological care for cancer patients to eating disorders in athletes. This course also explores concepts, definitions, and features of co-occurring mental disorders and substance-related disorders and addresses the intake process, diagnosis, counseling, and treatment planning as part of a team providing services to dual-diagnosed clients.

PCN 450: Self-Help Groups 3 credits

PCN 465: The Therapeutic Process and Ethics 3 credits
An overview of ethics, techniques, and therapeutic approaches used in working with persons with a substance abuse disorder.

PCN 480: Substance Abuse Practicum 3 credits
Opportunity for advanced students to use their developed knowledge and skills in an applied setting with supervision.

PCN 490: Practicum 4 credits
This course provides an opportunity for students to develop their counseling skills and to perform all the activities that a regularly employed professional counselor would be expected to perform in a supervised setting. The practicum involves 150 contact hours performed under the supervision of a faculty member and by an on-site supervisor approved by the college or university. Prerequisite: Completion of all other coursework with a grade of C or better.

PCN/MFT 500: Counseling Theories 3 credits
This course provides a comprehensive survey of the major counseling theories and principles. The coursework shall include the following theories: psychoanalytic, Adlerian, existential psychotherapy, behavioral, cognitive behavioral, person-centered, reality therapy/choice theory, and rational emotive behavioral therapy (REBT).

PCN 505: Professional Counseling Orientation and Ethics 3 credits
This course provides a broad understanding of professional counseling ethics, legal standards, and responsibilities. An important goal of this course is to help the student develop a high standard of ethical performance in their career as professional counselor.
PCN/MFT 509: Social and Cultural Diversity Issues in Counseling  3 credits
This course provides a broad understanding of issues and trends in a multicultural and diverse society. Studies in this area shall include the following: attitudes and behaviors based on such factors as age, race, religious preference, physical disability, sexual orientation, ethnicity and culture, family patterns, gender, socioeconomic status and intellectual ability; individual, family, group, and community strategies for working with diverse populations; and theories of multicultural counseling, theories of identity development, and multicultural competencies.

PCN/MFT 511: Introduction to Chemical Dependency Counseling  3 credits
This course provides a broad understanding of the stages, processes, and effects of chemical dependency, social and psychological dynamics of chemical dependency, and the professional’s role in prevention, intervention, and aftercare. This course will also explore theories of addiction, drug classification, assessment, and treatment.

PCN/MFT 515: Counseling Skills in the Helping Relationships  3 credits
This course provides a broad understanding of counseling processes, including characteristics and behaviors that influence the helping processes. Included are age, gender, ethnic differences, verbal and nonverbal behaviors, personal characteristics, and orientations. The development of counseling skills to include the following will be emphasized: interviewing, the development of therapeutic relationships, establishment of appropriate counseling goals, strategies, evaluation of client outcome, and successful termination of the counseling relationship.

PCN/MFT 518: Human Growth and Development  3 credits
This course provides an understanding of the nature and needs of individuals at all developmental levels. Theories of individual and family development, transitions across the life-span; theories of learning, theories of personality development; and strategies for facilitating optimum development over the life-span will be addressed.

PCN/MFT 520: Group Counseling Theory and Practice  3 credits
This course provides a broad understanding of group development, group dynamics, group counseling theories, and ethical standards. The course will also address group process components, appropriate selection criteria, developmental stage theories, group members’ roles and behaviors; group leadership styles and approaches.

PCN/MFT 521: Marriage and Family Therapy  3 credits
This course provides a broad understanding of the structure and dynamics of the family, which may include assessment and methods of marital and family intervention and counseling.

PCN/MFT 523: Tests and Appraisal in Counseling  3 credits
This course provides and introduction to basic tests and appraisal in counseling. Individual and group approaches to testing, assessment, evaluation, behavioral observations, computer-managed and computer-assisted methods will be addressed. The following statistical concepts will also be addressed: scales of measurement, measures of central tendency, and indices of variability, shapes and types of distributions, correlations, reliability, and validity.

PCN 525: Career Development and Counseling  3 credits
This course provides a broad understanding of career development and related life factors including the following: psychotherapy, career counseling techniques and processes, career development theories, decision-making models, issues of diversity, interrelationships between work and family.

PCN/MFT 527: Psychopharmacology and Addictions  3 credits
This course provides a broad understanding of psychopharmacology theories of drug abuse, addiction, and treatment. The student is introduced to the basic principles of pharmacology, anatomy, and physiology as applied to the major classes of psychoactive drugs of abuse/addiction. It also examines the effects of various drugs on human behavior. The course introduces drugs that are being developed to support drug treatment such as methadone, suboxone and neloxone. Emphasis is placed on basic principles of drug ingestion, distribution, elimination, dose response relationships, neurotransmitter chemicals, and synaptic activity.

PCN 529: Co-Occurring Disorders  3 credits
This course introduces students to psychiatric disorders in combination with an alcohol and/or drug abuse disorder or co-occurring disorder. This course will examine how the treatment needs of persons with a co-occurring disorder differ significantly from the treatment needs of persons with only an alcohol and/or drug abuse disorder or a psychiatric disorder.

PCN/MFT 531: Family Issues and Addictive Disorders  3 credits
This course examines the role of alcohol and/or drug addiction in family systems. Various modalities designed to intervene in the alcohol and/or drug addicted family system will be discussed. The treatment roles and responsibilities of addicted persons and their families will also be examined.

PCN 535: Counseling Chemical Dependency Adolescents  3 credits
This course provides an introduction to adolescent alcohol and drug abuse prevention and treatment techniques and interventions. Signs, symptoms, and patterns of adolescent alcohol and drug abuse/addiction will be examined. Students will also explore adolescent screening methods, and assessment tools.

- This course introduces research methods and basic statistical analysis, including the following: the importance of research, opportunities, and difficulties in conducting research. Research methods such as qualitative, quantitative, single-case designs, action research, and outcome-based research will be addressed.
- This course introduces the study of mental illnesses and the science of psychopathology. The goal is to provide counseling students a conceptual understanding of psychological and behavioral dysfunction that occur in mental illnesses. The course includes a survey of major psychiatric disorders and their causes.
- This course provides a conceptual framework for the use of assessment and diagnostic tools for the development of appropriate treatment interventions for a variety of behavioral health disorders. Included is an introduction to the use of the diagnostic tools—including the DSM-VI TR—and the integration of diagnostic and assessment information in the development of treatment plans.
- A pre-practicum or supervised field work experience under the supervision of a faculty member, which shall include 100 total hours of pre-practicum activities, of which a minimum of 40 hours shall be direct client contact hours. Prerequisites: Approval of all application requirements by the College of Health Sciences—Office of Field Experience; a GPA of 3.0 or better; proof of student professional liability insurance in the amount of $1 million, $3 million; and completion of a minimum of 24 credit hours in the program, including PCN 500, PCN 505, PCN 515, PCN 520, and PCN 610.
- Each supervised internship (3 credits each) provides an opportunity to accumulate 150 contact hours of required practicum experience. Students will use this experience to develop their counseling skills and to perform all the activities that a regularly employed professional counselor would be expected to perform in a supervised setting. The internship will be performed under the supervision of a faculty member and by an on-site supervisor approved by the college or university. Documentation of completed contact hours will be submitted directly to the COHS office of field experience for verification and tracking. Prerequisites: Completion of PCN 615; a GPA of 3.0 or better; and maintenance of student professional liability insurance in the amount of $1 million, $3 million.
- This course provides an overview of collaboration, consultation models, and problem-solving strategies in various behavioral health settings. The focus will be on the application of professional consultation services with diverse populations.

This course provides an overview of the effects of human behaviors, personalities, and group dynamics on relationships in various organizational settings. The focus will be on the application of organizational psychology strategies and interventions to resolve organizational issues and/or problems.

This course provides a broad understanding of theories of human motivation, including the motivations that underlie both maladaptive and adaptive behaviors. The focus will be on the understanding and application of motivation strategies and intervention with diverse populations.

This course provides a broad understanding of clinical supervision in a variety of behavioral health settings. Clinical supervisory relationships, models of supervision, supervisory assessment instruments, supervisory methods, interventions, and current research will be addressed.

This course provides a broad understanding of professional codes of ethics, the ethics of supervision, the legal standards, and responsibilities as they relate to leadership and supervision in behavioral health settings. An important goal of this course is to help the leaders develop a high standard of ethical performance in their careers.

**Physical Education (PED)**

**PED 103: Varsity Athletics—Fall/Winter** 1 credit

For athletes who compete on varsity intercollegiate athletic teams at Grand Canyon University. Each athlete may receive credit for this course once only.

**PED 104: Varsity Athletics—Spring** 1 credit

For athletes who compete on varsity intercollegiate athletic teams at Grand Canyon University. Each athlete may receive credit for this course once only.

**PED 121A: Weightlifting and Fitness** 1 credit

Instruction and practice in the skills and strategies of the sport. Activity selection is based on facility availability, instructor preference, and student input.

**PED 195: Lifetime Wellness** 2 credits

An introductory course in exercise and wellness. Emphasis is placed on the acquisition of knowledge about what fitness entails, self-evaluation of student's present fitness needs, and developing a personalized fitness program.

**PED 200: Lifetime Personal Wellness and Teaching of Fitness** 4 credits

This is an introductory course in exercise and wellness. Emphasis is placed on the acquisition of knowledge regarding what fitness...
entails, self-evaluation of each student’s present fitness needs, and development of personalized fitness programs. A special emphasis is placed on a review of nutritional principles and producing a personalized nutrition plan. Students also receive instruction and practice opportunities in the theoretical and practical aspects of flexibility, stretching, and weight training activities. This includes lesson planning, teaching techniques, evaluation, and proficiency in skills by means of lecture, demonstration, and participation.

**PED 246**: Instructional Strategies in Physical Education 3 credits

A course designed to prepare future physical education teachers, fitness instructors, and recreational leaders in the skills necessary to present physical education activities to groups. Included will be the development of lesson plans, course goals, and performance objectives that can be applied to the presentation of any skill or activity. A Writing-Intensive course. Prerequisite: Must be a Health, Exercise Science, and Physical Education major or minor.

**PED 247**: Teaching Strategy in Physical Education and Exercise Science 4 credits

This writing-intensive course is designed to prepare future physical education teachers, fitness instructors, and recreational leaders in the skills necessary to teach physical education activities to groups. Included is the development of lesson plans and course goals/performance objectives that can be applied to the teaching of any skill or activity. Becoming aware of the place of physical education and exercise science globally and perspectives on human diversity in all areas of sport and physical activity is included.

**PED 251**: Teaching of Team Sports and Individual Activities I 4 credits

This course is intended to provide students with the general technical and physical skills required to teach selected outdoor sports. Students learn how to plan and organize the team sports of soccer, flag football, and speedball for educational settings; conduct classes while ensuring participants’ health and safety; and work with a variety of age and skill levels. This course is also designed to acquaint students with knowledge and experience of outdoor living and outdoor leadership skills. The individual/group activities of camping, backpacking, orienteering, and desert survival skills are discussed and practiced. Field trips to outdoor facilities are taken. Prerequisite: PED 247.

**PED 252**: Teaching of Team Sports I 2 credits

Practice and skills in the sports of soccer, touch football, and team handball for majors and minors. Includes lesson plans, teaching techniques, evaluation, and proficiency in skills. Three credits per week. Prerequisite: PED 246 (may be taken concurrently).

**PED 262**: Teaching of Team Sports II 2 credits

Practice and skills in the sports of basketball, volleyball and softball for majors and minors. Includes lesson planning, teaching techniques, evaluation, and proficiency in skills. Three credits per week. Prerequisite: PED 246 (may be taken concurrently).

**PED 263**: Teaching of Team Sports and Individual Activities II 4 credits

This course is intended to provide the student with the general technical and physical skill required to teach selected sports. Students learn how to plan and organize the team sports of basketball, softball, and volleyball, and the individual/dual activities of tennis, golf, and badminton for educational settings. Students work with a variety of age and skill levels and conduct classes while ensuring participants’ health and safety. Prerequisites: PED 251.

**PED 282**: Teaching Individual Activities I 2 credits

Practice and skills in the activities of badminton and tennis are covered in this course for majors and minors. Includes lesson planning, teaching procedures, evaluation, and proficiency in skills. Three credits per week. Prerequisite: PED 246 (may be taken concurrently).

**PED 292**: Teaching of Individual Sports II 2 credits

Instruction in the theoretical and practical aspects of flexibility, stretching, and weight training activities. Includes lesson planning, teaching techniques, evaluation and proficiency in skills. Prerequisites: PED 195 and PED 246 (may be taken concurrently).

**PED 323**: Athletic Coaching: Baseball 3 credits

A study of the fundamentals, drill habits, team organization, offensive and defensive play, and coaching philosophy of baseball.

**PED 325**: Coaching Baseball: Theory and Practice 4 credits

This course is intended to introduce the profession of coaching baseball and to explore the issues of qualifications; player and coach development; coaching styles, philosophies, and objectives; motivation, team dynamics, and leadership; and sportspersonship. Special areas of emphasis include the fundamental skills and strategies of baseball, the application of sport-teaching fundamentals to skill and strategy presentation, conditioning, organizing practices and games, and player evaluation. The course also includes field experience—both on and off site—to integrate theory and skills with professional practice.

**PED 326**: Coaching Basketball: Theory and Practice 4 credits

This course is intended to introduce the profession of coaching basketball and to explore the issues of qualifications; player and coach development; coaching styles, philosophies, and objectives; motivation, team dynamics, and leadership; and sportspersonship. Special areas of emphasis include the fundamental skills and strategies of basketball, the application of sport-teaching fundamentals to skill and strategy presentation, conditioning, organizing practices and games, and player evaluation. The course also includes field experience—both on and off site—to integrate theory and skills with professional practice.
PED 327: Coaching Volleyball: Theory and Practice  4 credits
This course is intended to introduce the profession of coaching volleyball and to explore the issues of qualifications; player and coach development; coaching styles, philosophies, and objectives; motivation, team dynamics, and leadership; and sportspersonship. Special areas of emphasis include the fundamental skills and strategies of volleyball, the application of sport-teaching fundamentals to skill and strategy presentation, conditioning, organizing practices and games, and player evaluation. The course also includes field experience—both on and off site—to integrate theory and skills with professional practice.

PED 328: Coaching Softball: Theory and Practice  4 credits
This course is intended to introduce the profession of coaching softball and to explore the issues of qualifications; player and coach development; coaching styles, philosophies, and objectives; motivation, team dynamics, and leadership; and sportspersonship. Special areas of emphasis include the fundamental skills and strategies of softball, the application of sport-teaching fundamentals to skill and strategy presentation, conditioning, organizing practices and games, and player evaluation. The course also includes field experience—both on and off site—to integrate theory and skills with professional practice.

PED 329: Coaching Soccer: Theory and Practice  4 credits
This course is intended to introduce the profession of coaching soccer and to explore the issues of qualifications; player and coach development; coaching styles, philosophies, and objectives; motivation, team dynamics, and leadership; and sportspersonship. Special areas of emphasis include the fundamental skills and strategies of soccer, the application of sport-teaching fundamentals to skill and strategy presentation, conditioning, organizing practices and games, and player evaluation. The course also includes field experience—both on and off site—to integrate theory and skills with professional practice.

PED 331: Coaching Wrestling: Theory and Practice  4 credits
This course is intended to introduce the profession of coaching wrestling and to explore the issues of qualifications; player and coach development; coaching styles, philosophies, and objectives; motivation, team dynamics, and leadership; and sportspersonship. Special areas of emphasis include the fundamental skills and strategies of wrestling, the application of sport-teaching fundamentals to skill and strategy presentation, conditioning, organizing practices and games, and player evaluation. The course also includes field experience—both on and off site—to integrate theory and skills with professional practice.

PED 333: Athletic Coaching: Basketball  3 credits
A study of the fundamentals, drill habits, team organization, offensive and defensive play, and coaching philosophy in basketball.

PED 334: Athletic Coaching: Volleyball and Softball  3 credits
A study of the fundamental skills of volleyball and softball, and how each of these skills can be presented and effectively evaluated. Further study includes the dynamics of team structure, practice organization, conditioning, and coaching philosophy for these sports.

PED 337: Theory, Philosophy, and Principles of Coaching  4 credits
This course focuses on the basic theory and principles of how to coach sports. Special topics include the relationship of cognitive strategy, personality, and motivation to athletic success; the balance between competition and cooperation, positive and negative feedback, and anxiety, stress, and arousal; communication, goal-setting, and leadership skills of the coaching profession; participation of the child in sport; the Christian approach to coaching; and the psychology of sport.

PED 344: Physical Education for Special Populations  4 credits
This course is designed to develop methods and techniques of teaching the exceptional child in motor activities. Special topics include legislation that affects children with special needs, inclusiveness, the IEP, characteristics of motor functioning and development, behavior management techniques, and an overview of the types of special populations and their specific needs. Emphasis is also placed on the activities and programs to be included in curriculum and practice in leading activities and implementing programs.

PED 363: Physical Education for the Exceptional Child  3 credits
A course designed to develop methods and techniques of teaching the exceptional child in motor activities. Emphasis is also placed on the activities and programs to be included in the curriculum. Prerequisite: PED 246 (may be taken concurrently)

PED 403: Physical Education for the Elementary Grades  3 credits
A study of the development of a program of physical activities adapted to the school situation and to the individual needs of the child. Prerequisites: EXS 383 and four credits of Professional Activities.

PED 405: Elementary School Physical Education  4 credits
This course prepares students to teach physical education to elementary school students. Emphasis is placed on establishing the need for physical education in the schools, how to instruct elementary school children in the psychomotor domain, the subtleties of implementing a physical education program, and the teaching of the objectives of physical education to the school situation and to the individual needs of the child. Experiential teaching and peer review are included in the course.

*Campus/Off-site only | †Writing-intensive course | *Fulfills General Education requirement |
PED 413: Physical Education for the Secondary School 3 credits
Designed for individuals who plan to teach at the middle or high school level. Topics include classification of students, organization of classes, choice and selection of appropriate activities and materials, progression, and testing. Prerequisites: EXS 383 and four credits of Professional Activities.

PED 415: Secondary School Physical Education 4 credits
This course prepares students who desire to teach at the middle school or high school level. Topics include classifications of students, organization of classes, choice and selection of appropriate activities and materials, progression, and testing. The course also examines teaching styles, techniques of effective instruction, and implementing instructional activities that meet NASPE standards in areas such as promoting an active lifestyle, lifetime activity, inclusiveness, responsibility, cooperation, and diversity. Experiential teaching and peer review are included in the course.

PED 423: Organization and Administration of Physical Education and Athletics 3 credits
This course deals with administrative tasks and techniques for use in departments of physical education, athletics, and fitness or exercise centers. Topics include budget and finance; organizing tournaments; and business, administrative, and ethical decision-making in the exercise science setting. Designed for majors in exercise science. Prerequisite: PED 413 or instructor's approval.

PED 433: Theory of Coaching 3 credits
This course addresses the role of the coach in developing players beyond the basic skills of playing the game. It focuses on the Christian approach to coaching, intramural coaching, coaching styles, counseling athletes, and coaching under stress. This course applies to all coaching endeavors. Prerequisite: One athletic coaching class.

PED 497A: Internship in Physical Education A 1 credit
The first portion of a full semester internship. The internship provides an opportunity for students to practice principles learned in their functional area by working in an outside organization under the supervision of a practitioner. Prerequisite: Senior Status or Instructor's approval.

PED 497B: Internship in Physical Education B 2 credits
The second portion of a full semester internship. The internship provides an opportunity for students to practice principles learned in their functional area by working in an outside organization under the supervision of a practitioner. Prerequisite: Senior Status or Instructor's approval.

Philosophy (PHI)

PHI 101: Introduction to Philosophy (Retired) 3 credits
An introduction to the discipline of philosophy through a study of representative philosophic problems. Topics to be considered include: What can be known with certainty? What makes actions right? Are our choices free? Can God’s existence be proved?

PHI 103: Introduction to Philosophy and Ethics 4 credits
This course is an introduction to the field of philosophical worldviews and their application in ethical decision making, the search for truth, and ultimate reality. Topics include: God and the transcendent, worldviews, human nature, ethics, metaphysics, epistemology, morality, and relativism in a pluralistic world.

PHI 215: Introduction to Logic 3 credits
A study of the principles of correct reasoning with emphasis on distinguishing between good and bad arguments of various types.

PHI 222: Foundations of Critical Thinking 3 credits
This course seeks to build the foundations of reasoned and creative thinking through problem solving and analytical building of a “life philosophy.” It is a study in applied verbal logic and ethical belief systems that stresses constructive argument.

PHI 225: Introduction to Ethics 3 credits
An introductory study of some of the central concepts, procedures, and issues in the field of ethics, focusing on the nature of ethical thinking and how it applies to particular judgments about actions, character, and values. Topics to be considered include ethical relativism, morality and self-interest, the basis of moral obligation, moral virtues and vices, and the relevance of religious beliefs to morality.

PHI 303 ¹: Philosophy of Education 3 credits
A study of the historical, philosophical, and sociological influences that have shaped American education, the issues faced by educators today, and the challenges for the future that await persons now entering the teaching profession. The course is designed for students who have already committed themselves to a career in education or are exploring a career in education. Includes a first phase observation in the K-12 classroom. A Writing-Intensive course. Prerequisite: Sophomore status.

PHI 305: Ethical Thinking in the Liberal Arts 4 credits
This course considers the role that ethical thinking plays in the liberal arts. Topics are set in historic, literary, artistic, political, philosophical, religious, social, and scientific perspectives. The impact and contributions of leaders in these fields are also considered.

PHI 318: Faith and Reason 3 credits
An examination of the reasonableness of religious beliefs, especially beliefs, which are central to the Christian Faith. Topics include arguments for the existence of God, religious experience, the problem of evil, miracles, religious language, and life after death. Prerequisite: PHI 101.

PHI 322: Case Studies 3 credits
Practical application of skills taught in various logic and writing courses, but especially PHI 222. Students will analyze current debates within a variety of fields. They will research, write, and
present orally on these debates, with the objective of developing reasoned, philosophically based positions on the issues. Prerequisites: PHI 215, PHI 222.

**PHI 329: Biomedical Ethics** 3 credits
A study of the application of moral concepts and principles to issues arising in the health care professions. Topics include role conflicts, paternalism, truth telling, informed consent, human experimentation, abortion, euthanasia and the allocation of scarce resources.

**PHI 351: Christian Apologetics** 3 credits
The course is designed to evaluate the various methodological approaches to the defense of the Christian faith. It examines and encourages the formulation of a reasoned defense in response to religious, historical or scientific objections to the Christian faith from a post-modern worldview.

**PHI 463: World Religions** 3 credits
A study of the major contemporary religions of the world including both historical background and development, and current beliefs and practice with emphasis on basic religions: Hinduism, Jainism, Buddhism, Sikhism, Taoism, Confucianism, Shinto, Zoroastrianism, Judaism, Islam, and Baha’i.

**Physics (PHY)**

**PHY 101: Introduction to Physical Science (Retired)** 3 credits
A survey of physical science emphasizing applications of physical science to modern life. Co-requisites: PHY 101L

**PHY 101L: Introduction to Physical Science: Lab** 1 credit
A lab course designed to complement the physical principles covered in the PHY 101 lecture. Co-requisites: PHY 101.

**PHY 102: Introduction to Physical Science** 4 credits
This course introduces students to the scientific method. Students are expected to classify objects and materials based on physical and chemical properties, as well as develop an understanding of chemical reactions and flow of energy in a system.

**PHY 104: Earth and Space Science** 4 credits
This course is designed to develop students’ skills in the scientific method, develop the understanding of the properties of Earth and its materials, and appreciate Earth in relationship to other objects in space. Concepts include geological and atmospheric phenomena.

**PHY 107: Astronomy** 3 credits
A study of the principles and history of astronomy, the cosmos, the solar system, and celestial phenomena. Appropriate as an elective for non-science majors; designed to develop an appreciation and understanding of the natural laws of the universe. Co-requisite: PHY 107L

**PHY 107L: Astronomy: Lab** 1 credit
A lab course designed to complement the topics covered in the PHY 107 lecture. Co-requisites: PHY 107

**PHY 111: General Physics I** 3 credits
This course is a study of basic concepts of physics, including motion; forces; energy; the properties of solids, liquids, and gases; and heat and thermodynamics. The mathematics used includes algebra, trigonometry, and vector analysis. A primary course goal is to build a functional knowledge that allows students to more fully understand the physical world and to apply that understanding to other areas of the natural and mathematical sciences. Conceptual, visual, graphical, and mathematical models of physical phenomena are stressed. Students build critical thinking skills by engaging in individual and group problem-solving sessions. Prerequisites: MAT 250 or college algebra. Co-requisite: PHY 111L.

**PHY 111L: General Physics I: Lab** 1 credit
This course utilizes lab experimentation to practice concepts of physical principles introduced in the PHY 111 lecture course. Learners are able to perform the proper analysis and calculations to arrive at the correct quantifiable result when confronted with equations involving gravity, sound, energy, and motion. Prerequisite: MAT 250 or college algebra. Co-requisite: PHY 111.

**PHY 112: General Physics II** 3 credits
This course is the second in a 1-year introductory physics sequence. In this course, the basics of three areas in physics are covered, including electricity and magnetism, optics, and modern physics. The sequence of topics includes an introduction to electric and magnetic fields. This is followed by the nature of light as an electromagnetic wave and topics associated with geometric optics. The final topic discussed in the course is quantum mechanics. Prerequisite: PHY 111. Co-requisite: PHY 112L

**PHY 112L: General Physics II: Lab** 1 credit
This course utilizes lab experimentation to practice concepts of physical principles introduced in the PHY 112 lecture course. Some of the topics learners understand and analyze involve the relationship between electric charges and insulators/conductors, magnetism in physics, energy transformations in electric circuits, the relationship between magnetism and electricity, and how they relate to the medical industry. Prerequisite: One of the following: 1) none; or 2) PHY 111L. Co-requisite: PHY 112.

**Political Science (POS)**

**POS 100: Introduction to Political Science (Politics, Power and the Individual)** 3 credits
Reflection and analysis of basic questions: What is politics? How do institutions of our body politic affect the individual? How does the individual impact the “Goliath” that is government? More theoretical than Federal Government, and more practical than Political Thought.
POS 252: Federal Government 2 credits

POS 262: Arizona Government 1 credit

POS 296: Social Research 3 credits
Also JUS 296 and SOC 296. An exploration of the various methods used by social scientists to find answers to the questions posed by their subject matter. Includes basic terminology, concepts and practice using methods such as surveys, experiments, field research, and evaluation, as well as some unobtrusive methods. Prerequisite: SOC 101.

POS 300: Arizona/Federal Government 3 credits

POS 301: Arizona and Federal Government 2 credits
This course is a survey of Arizona history and government, as well as American government. It meets the teacher certification requirement for Arizona government and American government.

POS 323: International Relations 3 credits
A study of the history of international politics, contemporary world power structure, and international law and organization. Prerequisite: POS 100 or six (6) credits of history.

POS 335: Introduction to Political Thought 4 credits
This course explores the issues and concepts that are used to develop and critique political theories. Students are introduced to the classics of political thought as well as the more contemporary expressions of political thought.

POS 344: Political Thought 3 credits
Consideration of major political thinkers and thoughts from classical to modern times, gleaned from primary and secondary sources. The student will explore and critique belief systems such as socialism and libertarianism, and specific concepts such as freedom, rights, democracy, and communitarianism. Prerequisite: POS 100.

POS 345: Comparative Government 4 credits
In this course, students compare and contrast the various systems of government in Western and non-Western countries, while demonstrating a comprehension of political and diplomatic processes and how they affect localities, regions, and nations.

POS 363: Introduction to Probability and Statistics 3 credits
Also JUS 363, PSY 363, and SOC 363. A study of elementary theories of probability, distribution, and testing of statistical hypotheses. Practical experience is provided in the application of statistical methods. Prerequisite: MAT 120 or equivalent.

POS 370: Politics, Religion, and Ethics 3 credits
Integration of political premises within an ethical framework, generally, and with Christian principles, specifically. The student will also study the outcome of approaching the workings of government with other religious beliefs or their absence. Among the topics: Must a Christian obey the government? Should we support the welfare state or moral-based laws? Can a Christian be a politician? A Writing-Intensive course. Prerequisite: POS 100 or instructor’s approval.

POS 380: Comparative Governments 3 credits
Analysis of selected foreign governments, chosen for their differences in representative form, geographic and cultural distinctions, and maturity. The student will identify strengths and weaknesses, and discuss the relative moral worth of the paradigm between the state and the individual within each system. Prerequisite: POS 100.

POS 417: Constitutional History of the United States 3 credits
A study of the origin, development, interpretations, and amendments to the United States Constitution. Special emphasis is given to the interpretation of the Constitution by the courts. Prerequisites: Six (6) credits of history or political science, or instructor’s approval.

POS 479: Internship 4 credits
Placement of student in a public policy, party, campaign, or other related agency or organization to further the student’s integration of theory with practice. Prerequisites: Junior or senior status, and 15 credits of Political Science courses.

POS 498: Advanced Topics: Political Science 3 credits
An in-depth study of chosen topics such as Political Parties and Ideologies, Campaigns and Elections, Public Policy and Propaganda, and Issues of Death in Politics and Justice. A Writing-Intensive course. Prerequisite: Instructor’s approval.

POS 499: Independent Study 1–4 credits
This involves research, seminars, or readings on a special topic to be selected by the student and the faculty advisor are appropriate. This course may be taken for one, two, three or four credits, depending on the amount of time and work involved and may be repeated for up to four credits total credit per subject area unless specified otherwise in requirements for a major.

Public Safety Administration (PSA)

PSA 329: Public Safety Seminar 3 credits
An initial required, interdisciplinary course in the Public Safety Administration program is structured to offer tools to maximize academic learning performance throughout the program. The content of this course offers on-campus and online strategies, effectively organizes the academic degree plan, assesses prior
learning, and presents research methodologies by linking professional and academic experiences.

PSA 330: Group Dynamics 3 credits
This course examines how group behavior affects organizational effectiveness, decision-making, conflict resolution, and strategies for efficient group and task management within the public safety sector.

PSA 332: Political and Legal Systems 3 credits
Students will analyze and apply the legal system’s model for understanding governmental, legal, and operational problems via the application of systems theory.

PSA 337: Psychology of Professional Development 3 credits
This course provides an introduction to concepts related to human personality development, a review of theoretical positions underlying personality, and an examination of factors contributing to both normal and abnormal personality characteristics. It also establishes a basis of perspective for analyzing and understanding human behavior.

PSA 350: Managerial Communications 3 credits
This course examines personal and professional relationships through the use of effective verbal and non-verbal skills.

PSA 351: Public Safety and the Community 3 credits
This course examines the human and community services, in particular, law enforcement, fire protection, and emergency medical services, from theoretical and practical positions. A major focus will be the underlying philosophies, values, mission, planning, and development of programs and systems, as well as evaluating and altering them. The process of anticipating current and future challenges and the impacts of public policy, public opinion, and customer dynamics will also be explored.

PSA 360: Information Technology and Systems 3 credits
This course focuses on the organizational, management, and technology dimensions of information systems. Although many technologies are covered, it is not intended to be a technology class.

PSA 433\(^1\): Research Methodology 3 credits
This course helps students identify problems, review related literature, collect data, and measure objectives in the public safety environment. Students will apply analytical skills to public safety related research projects. A Writing-Intensive course.

PSA 435: Strategic Planning 3 credits
This course deals with the fundamentals and application of strategic analysis and planning in public safety.

PSA 438: Human Resource Management 3 credits
This course explores values and perceptions of groups that affect recruiting, training, retention, evaluation, and current legal issues in human resources.

PSA 439: Leadership in Public Safety 3 credits
This course focuses on motivation theory relating to individual and group functioning in public safety organizations. Leadership styles and their impact on performance are examined.

PSA 440: Ethics in Public Safety 3 credits
This course explores case issues and philosophies as they relate to accountability in the public safety environment.

PSA 460: Project Management 3 credits
This course addresses basic concepts in project management, emphasizing a balance between the technical aspects of project work. Topics include the emerging importance of project management, tools, and techniques to plan and schedule projects, the manager’s role in coordinating projects, and how managers need to be aware of cultural influences.

PSA 490: Organizational Development and Change 3 credits
The course provides an overview of approaches to organizational development with emphasis on the practical aspects of changing public safety organizations to improve effectiveness.

PSA 495: Public Safety Capstone 3 credits
This course provides a structured way to organize facts, information, and ideas from the academic major. Theoretical concepts from the major will be discussed by critically analyzing and evaluating ideas relating to a practical application process. Students will examine concepts of faith, belief systems, and sets of values and examine moral and ethical issues, including responsibility to individuals and communities.

Professional Studies Core (PSC)

PSC 410: Servant Leadership 4 credits
This course focuses on servant leadership and ethical leadership, explores how servant leadership is different from other styles of leadership, and examines how this connects to ethics, accountability, and being a responsible leader.

PSC 420: Organizational Behavior and Management 4 credits
Drawing upon real-world management situations, this course is a study of individual and group behavior in organizations through detailed coverage of the functions of management, individual differences/diversity, leadership, motivation, decision making, organizational design, and organizational change and development. Emphasis is placed on how an understanding of organizational behavior leads to effective management practice. Also MGT 420.

PSC 450: Project Management 4 credits
This course is a study of the unique challenges associated with managing projects as related to the overarching management framework of planning, organizing, leading, and controlling.

*Campus/Off-site only | ^ Writing-intensive course | *Fulfills General Education requirement |
Emphasis is placed on balancing competing priorities related to human resources, time constraints, and physical resources/materials. Additional focus is placed on managing and controlling project scope. Prerequisite: PSC 420.

**PSC 495: Action Research Project** 4 credits
This course provides a structured way for managers to take an overview and general management perspective. Emphasis is on a research project that synthesizes major elements of the professional studies program.

**Psychology (PSY)**

**PSY 101: General Psychology** 3 credits
This course is the foundation course in the science of behavior. It includes a study of the history of psychology, the brain, motivation, emotion, sensory functions, perception, intelligence, gender and sexuality, human development, learning psychopathology and therapy. Simple experiments constitute a basic part of the course.

**PSY 102: General Psychology** 4 credits
This course is a foundational study in the science of behavior, including an overview of the history of psychology and discussion of the brain, motivation, emotion, sensory functions, perception, intelligence, gender and sexuality, social psychology, human development, learning psychopathology, and therapy.

**PSY 225: Human Sexuality** 4 credits
This course focuses on the topic of human sexuality from a Christian perspective. Themes center on the biological, contextual, and socio-emotional aspects of sexuality. Topics include biological development, sexual communication, sexual morality, sexual behavior, cultural differences in sexual expression, sexual problems, sexually transmitted infections, contraception, conception and childbirth, research on sexuality, dating and mate selection, sexual coercion, sexuality in childhood/adolescence, and sexuality in the later years. By the end of this course, students should be able to demonstrate knowledge about the major themes, theories, and influences in the study of sexuality, and be able to apply course theory to real-world situations. Also SOC 225.

**PSY 255: Personality Psychology** 4 credits
This course is a study of the nature and causal determinants of human behavior, including the definition and scientific measurement of personality. Theories studied include the psychodynamic, neo-Freudian, trait and factor, cognitive, and behavioral theories. The Christian perspective on the nature of human personality is also explored. Prerequisite: PSY 102.

**PSY 315: Personality Psychology** 3 credits
A study of the nature and causal determinants of human behavior; this course focuses upon the definition, development and assessment of personality. Theories studied include psychodynamic, neo-Freudian, trait and factor, cognitive, and behavioral theories. The Christian perspective on the nature of human personality will also be explored. Prerequisite: PSY 101.

**PSY 324: Learning and Cognition** 3 credits
This course encompasses theoretical and empirical problems of human learning and cognitive behavior. The nature of learning processes, memory, auditory and visual perception, information processing, concept attainment, problem solving and other issues related to cognitive science will be explored. Prerequisite: PSY 101.

**PSY 327: Physiological Psychology** 3 credits
This course emphasizes the relationship between the brain and behavior. The role of genetic, neural, hormonal, physiological processes, sensation, perception, motivation, and learning will be discussed within the context of recent research. Prerequisite: PSY 101, BIO 101 or BIO 181.

**PSY 333: Psychology of Religion** 3 credits
Designed to help the student understand and relate to the mental processes involved in individual religious experience, this course gives special attention to the conversion experience, religious motivation, religious development, and the impact of group dynamics. Prerequisite: PSY 101.

**PSY 341: Lifespan Development** 3 credits
This course focuses on the topic of human development from a historical perspective. The course introduces the student to the development of human beings from conception to death. Attention is given to the physical, social, cognitive, personality, and moral developments of an individual. The course is designed to provide an understanding of the transitions of life from conception to death. May not be taken with prior credit in Child Psychology (PSY 353). Prerequisite: PSY 101.

**PSY 350: Social Psychology** 3 credits
Also SOC 350. This course is a study of social and group factors affecting individual behavior. Attention is given to the development of attitudes, leadership roles, group thinking, sources of conflict, altruism, attraction, effects of competition and cooperation, analysis and evaluation of propaganda techniques, and the influence of mass communication on social awareness and control. A Writing-Intensive course. Prerequisite: PSY 101 or SOC 101.

**PSY 351: Health Psychology** 3 credits
This course reflects psychology’s growing interest in health-related issues. Topics include physician adherence, stress and pain management, cardiovascular disease, cancer, chronic illnesses, using tobacco, alcohol and other drugs, proper nutrition, and exercise, among others. Prerequisite: PSY 101.

**PSY 352: Health Psychology** 4 credits
This course reflects psychology’s growing interest in health-related issues. Topics include physician adherence, stress and pain management, cardiovascular disease, cancer, chronic illnesses, using tobacco, alcohol and other drugs, proper nutrition, and exercise, among others. Prerequisite: PSY 102.

**PSY 353: Child Psychology** 3 credits
An analysis of prenatal, infant, and child development, this course reviews the physical, social, language and emotional
development of children. The synthesis and integration of personality, motivation, attachment, and play styles will also be discussed. May not be taken with prior credit in Lifespan Development (PSY 341). Prerequisite: PSY 101.

**PSY 354: Child Psychology 4 credits**

An analysis of prenatal, infant, and child development, this course reviews the physical, social, language, and emotional development of children. The synthesis and integration of personality, motivation, attachment, and play styles are also discussed. Prerequisite: PSY 102.

**PSY 356: Learning and Cognition 4 credits**

This course is designed to give students a basic understanding of thinking and learning, including problem solving, language and memory, intelligence and assessment, conditioning, motivation, and emotion. Practical applications in educational and other settings are discussed. Prerequisite: PSY 102.

**PSY 357: Lifespan Development 4 credits**

This is a course in developmental psychology with emphasis on the physical, social, cognitive, personality, and moral developments within an individual. The course is designed to provide an understanding of the transitions of life from conception to death. Prerequisite: PSY 102.

**PSY 363: Introduction to Probability and Statistics 3 credits**

Also JUS 363, POS 363, and SOC 363. This course focuses upon elementary theories of probability, distribution, and testing of statistical hypotheses. Practical experience is provided in the application of statistical methods. Prerequisite: MAT 120 or equivalent.

**PSY 369: Social Psychology 4 credits**

This course provides a study of social and group factors affecting individual behavior. Attention is given to the development of attitudes, leadership roles, group thinking, sources of conflict, effects of competition and cooperation, analysis and evaluation of propaganda techniques, and the influence of mass communication on social awareness and control. Also SOC 369. Prerequisite: PSY 102 or SOC 102.

**PSY 373: Adolescent Psychology 3 credits**

This course is an examination of the meaning and significance of adolescence; physical, cognitive, moral, and religious development; and the influence of culture, gender expectations, family, peers, and schools on adolescent behavior. Prerequisite: PSY 101.

**PSY 380: Introduction to Probability and Statistics 4 credits**

This course is a study of elementary theories of probability, distribution, and testing of statistical hypotheses. Practical experience is provided in the application of statistical methods. Prerequisite: Any MAT course 120 level or above.

**PSY 385: Human Sexuality 3 credits**

Also SOC 385. Taught from a Christian perspective, this course focuses on the areas of human sexual development across the life span, physical unity in marriage, pregnancy and childbirth, sexual orientation, common problems in sexual behavior, and sexual values and ethics.

**PSY 401: Psychology of Death and Dying 3 credits**

This course is a study of the process of grief and dying. The psychological adjustments of the individual, family, and professional are examined. The student examines his or her own attitudes, values, and beliefs pertaining to death and dying.

**PSY 414*: History and Systems of Psychology 3 credits**

This course is a study of the origins, developments, influences, changes, and current systems of thought and experimentation in psychology. A Writing-Intensive course. Prerequisites: PSY 101 and senior status.

**PSY 430: Industrial Psychology 3 credits**

The application of social and organizational psychological methods and principles to business and industry. Topics to be covered include human behavior at work, personnel selection and evaluation, motivation and job satisfaction, management philosophies, leadership, group dynamics, employee-management relationships, job evaluation, work and equipment design, working conditions, accident and human errors, and consumer psychology. Prerequisite: PSY 101.

**PSY 443: Fundamentals of Counseling and Guidance 3 credits**

This course is designed for future teachers, ministers, business persons, counselors or social workers. Emphasis is placed on the proper use of counseling models as a tool for guidance by persons in various occupations. Prerequisite: PSY 101.

**PSY 450: Experimental Psychology 4 credits**

This course is a lab course emphasizing both the theoretical and applied aspects of experimental design and research methodology. A variety of experiments are performed in areas such as learning, motivation, and perception. Prerequisites: Foundation courses and PSY 363.

**PSY 452: Experimental Psychology 4 credits**

This course is a laboratory course emphasizing both the theoretical and applied aspects of experimental design and research methodology. A variety of activities will be performed in such areas as learning, motivation, and perception. Prerequisite: PSY 380.

**PSY 460: Fundamentals of Counseling and Guidance 4 credits**

This course, which is designed for teachers, ministers, business personnel, and community agency workers, emphasizes the effective use of psychology as a tool for guidance by persons in various occupations. Prerequisite: PSY 102.

---

*Campus/Off-site only | *Writing-intensive course | *Fulfills General Education requirement |
PSY 466: Abnormal Psychology 3 credits
This course is designed to help students understand assessment of mental illness and prevent mental illness by developing a better awareness of the emotional, functional, and physiological factors influencing mental health. Prerequisite: PSY 101.

PSY 470: Abnormal Psychology 4 credits
This course is designed to help students recognize and understand mental illness through a better awareness of the emotional, functional, and physiological factors influencing mental health. This is a foundation course in the science of behavior and includes a study of the origin and development of abnormal behavior patterns and disorders. This course includes the symptoms, diagnoses, etiology, epidemiology, and treatment of various psychological disorders and syndromes. Prerequisite: PSY 102.

PSY 490: Senior Seminar: Psychology Through the Eyes of Faith 3 credits
This course focuses upon the integration of psychological learning and faith issues, relevant to graduate schools and related careers in psychology. Particular focus is given to how a Christian perspective impacts the type of questions posed in the discipline. Prerequisites: Senior status and Psychology major.

PSY 497: Internship in Psychology 1–4 credits
The student is placed with an agency or organization in the community to gain practical insights and experience to complement their classroom learning. Every effort is made to place students in a setting corresponding to their interests or career goals. This course may be repeated for credit. Prerequisites: Instructor's approval and 12 credits of Psychology.

PSY 498: Advanced Topics in Psychology 3 credits
Topics of interest to psychologists but not covered in depth in other courses will be considered. Examples of topics include Motivation and Emotion, Psychology of Humor, Psychological Testing, Gender, Sensation and Perception, and Developmental Psychopathology. Prerequisite: PSY 101 or instructor’s approval.

PSY 499: Independent Study 1–4 credits
This course involves research, seminars, or readings on a special topic to be selected by the student and the faculty advisor. This course may be taken for one, two, three or four credits, depending on the amount of time and work involved and may be repeated for up to four credits total credit per subject area unless specified otherwise in requirements for a major.

PSY 510: Contemporary and Ethical Issues in Psychology 4 credits
This course serves as the foundation for advanced graduate study in the field of psychology. Professional skill development, such as critical thinking, scholarly writing, and literature reviewing are covered, as well as contemporary ethical issues in the field of psychology, including issues in research, writing, psychotherapy, forensic psychology, and animal research.

PSY 520: Graduate Statistics 4 credits
This course provides a study of theories of probability, descriptive and inferential analyses of data, and testing of statistical hypotheses. Practical experience is provided in the application of statistical methods.

PSY 530: Social and Cultural Psychology 4 credits
This course is a study of social, group, and multicultural factors affecting individual behavior. Attention is given to the development of attitudes, leadership roles, group thinking, sources of conflict, altruism, attraction, effects of competition and cooperation, analysis and evaluation of propaganda techniques, and the influence of mass communication on social awareness and control.

PSY 550: Research Methods 4 credits
This course emphasizes both the theoretical and applied aspects of experimental design and research methodology at the graduate level, including qualitative, quantitative, and mixed designs.

PSY 560: Learning, Cognition, and Motivation 4 credits
This course offers advanced theory in human cognition and learning, including attention, memory, consciousness, decision making, problem solving, motivation, cognitive mapping, and schemata.

PSY 565: Industrial/ Organizational Psychology 4 credits
This course applies social and organizational methods and principles to business and industry. Topics include human behavior at work; personnel selection, evaluation, and training; motivation and job satisfaction; management philosophies; employee-management relationships; work and equipment design; working conditions; accidents and human errors; and consumer psychology.

PSY 570: Psychopathology 4 credits
This course offers students a deeper understanding of current issues in adult psychopathology, including axis 2 and co-occurring disorders. Students gain advanced knowledge of clinical assessment and treatment planning and engage in in-depth research in the field related to the symptoms, etiology, epidemiology, and treatment of psychological disorders.

PSY 575: Organizational Behavior and Development 4 credits
This course examines the theoretical foundations for organizational development and explores how organizations function. Topics include decision-making and group processes in organizations; conflict management; nature and design of effective organizations; power, influence, and politics; and organizational development.

PSY 575: Human Development 4 credits
This course in developmental psychology emphasizes the physical, social, cognitive, personality, spiritual, and moral developments within an individual. The course is designed to
provide an understanding of the transitions of life from conception to death.

**PSY 655: Strategies for Effective Leadership and Consultation** 4 credits

This course examines methods for achieving personal, group, and organizational goals through effective consulting and management strategies. Topics include trait, behavior, contingency, and contemporary theories of leadership; gender, cultural, and emotional issues in leadership; critical incidents, including stress, burnout, workplace violence, and work-family conflict; strategic planning; and group dynamics.

**PSY 660: Health Psychology** 4 credits

Using the biopsychosocial model of health, this course examines how biological, psychological, and social factors interact with health-promoting and illness-preventing behaviors. Personality factors and the medical community’s role in health promotion are also covered.

**PSY 665: Principles of Personnel and Human Resource Management** 4 credits

This course examines psychological principles related to personnel and human resource management in both physical and virtual work environments. Topics include personnel selection; performance appraisal; selection, affirmative action and equal opportunity decision making; design and evaluation of training programs; training methods and management development; the work environment; and psychological testing.

**PSY 695: Capstone Course** 4 credits

In this course, students complete a master’s research proposal by choosing an original topic and creating a proposal that addresses the literature review, the hypothesis, a method section, and discussion of hypothetical results.

### Reading Education (RDG)

**RDG 509: Reading: Foundation and Framework (Retired)** 3 credits

This course will examine the past trends in reading instruction in America and will address the effects of historical studies that impacted the evolution of reading instruction over the past half century. Attention will be focused on determining the core findings of important research studies and applying that knowledge to the reading profession. The national standards for the International Reading Association will be discussed as well, with the student ultimately creating an electronic portfolio based on those standards. This course meets the following professional standards for educators: IRA (1.1, 1.2, 1.3, 1.4, 5.2) and NBPTS (2, 4, 5).

**RDG 510: Curriculum and Instruction** 3 credits

The role of the teacher is to create meaningful learning experiences for the student. This course provides in-depth study of brain-compatible learning experiences. Course participants will learn about designing curriculum units and differentiating instruction for all students. Participants will use the skills associated with backward design, brain theory, and other learning theory principles. Additionally, participants will put into practice the skills of curriculum mapping and practical methods for differentiating learning in order to design a curriculum unit for a subject and grade level. The use of technology will be integrated. This course meets the national standards for the professional teacher competencies set by the International Reading Association (IRA). The IRA Standards addressed in this course are 1.1, 2.1, 2.2, and 2.3. Prerequisite: RDG 509.

**RDG 511: Corrective Reading Assessment** 4 credits

This course introduces participants to the barriers that prohibit students from learning to read. The course provides participants with a working knowledge of common reading difficulties. Participants are provided with informal diagnostic tools to diagnose common reading problems. They also investigate how to identify and implement a corrective action plan, as well as analyze and reflect on its results. Research-based intervention programs and guidelines for accessing appropriate resources to provide instructional support for students with reading difficulties are investigated in this process. This course meets the following International Reading Association (IRA) Standards: 1.1, 1.2, 1.3, 2.2, 2.3, 3.1, and 3.2.

**RDG 512: Reading and Writing: Elementary** 4 credits

This course is designed for students to acquire foundational knowledge related to elementary linguistic principles of the English language—the basics of phonetics, phonology, morphology, syntax, and new vocabulary—while addressing the issues related to the usage of standard and nonstandard varieties of English. That knowledge is then practically used as students investigate the assessment of elementary reading and writing problems. This course meets the following International Reading Association (IRA) Standards: 1.1, 1.2, 1.3, 1.4, 2.1, 2.2, 2.3, 3.1, 3.2, 3.3, 3.4, 4.1, 4.2, 4.3, 4.4, 5.1, and 5.2.

**RDG 513: Reading and Writing: Secondary** 4 credits

This course helps students to acquire foundational knowledge related to secondary linguistic principles of the English language—the basics of phonetics, phonology, morphology, syntax, and new vocabulary—while addressing the issues related to the usage of standard and nonstandard varieties of English. That knowledge will be practically used as students investigate the assessment of secondary reading and writing problems. This course meets the following International Reading Association (IRA) Standards: 1.1, 1.3, 2., 2.2, 2.3, 3, 3.1, 3.2, 3.4, 4.1, 4.2, 5.1, 5.2, 5.3, and 5.4.

**RDG 514: Reading in the Content Areas: Elementary** 4 credits

This course links reading skills across the curriculum through the use of instructional strategies and assessments. The use of textbooks, trade books, literature, and electronic texts are explored with a focus on strategies that are relevant in every elementary content area. This course meets the following International Reading Association (IRA) Standards: 1.1, 2.2, 2.3, 3.3, 4.1, 4.2, 5.1, 5.2, 5.3, and 5.4.

*Campus/Off-site only | Writing-intensive course | Fulfills General Education requirement |
RDG 515: Children, Adolescents, and Learning  3 credits
This course combines a study of learning (including both cognitive and behavioral perspectives), human development (childhood through adolescence), and assessment (traditional and performance; teacher-made and standardized). Course participants will apply course information practically to reading instruction. This course meets the following International Reading Association (IRA) Standards: 2, 3, and 5. Prerequisites: RDG 509 and RDG 510.

RDG 517: Reading in the Content Areas: Secondary  4 credits
This course links reading skills across the curriculum through the use of instructional strategies and assessments. The use of textbooks, trade books, literature, and electronic texts are explored with a focus on strategies that are relevant in every secondary content area. This course meets the following International Reading Association (IRA) Standards: 1.1, 2.2, 2.3, 3.3, 4.1, 4.2, 5.1, 5.2, 5.3, and 5.4.

RDG 521: Developmental and Corrective Reading Process  3 credits
The purpose of this course is to introduce participants to the barriers that prohibit students from learning to read. The course will provide participants with a working knowledge of common reading difficulties. Participants will be provided with informal diagnostic tools to diagnose common reading problems. Research-based intervention programs and guidelines for accessing appropriate resources to provide instructional support for students with reading difficulties will also be discussed. This course meets the following International Reading Association (IRA) Standards: 1.1, 1.2, 1.3, 2.2, 2.3, 3.1, and 3.2. Prerequisites: RDG 509 and RDG 510.

RDG 522: Developmental Learning and Assessments  4 credits
This course combines a study of learning (including both cognitive and behavioral perspectives), human development (childhood through adolescence), and assessment (traditional and performance, teacher-made and standardized). Course participants apply course information practically to reading assessment and instruction. This course meets the following International Reading Association (IRA) Standards: 1.1, 1.3, 2.2, 2.3, 3.1, 3.2, 3.4, and 5.

RDG 523: Instructional Leadership/Literacy Coaching  4 credits
Students acquire a repertoire of skills that enable them to function comfortably and effectively in a changing learning environment. The course provides teachers with an understanding of the complexity of being a leader in times of change. Students develop a vision of systemic change and demonstrate practical skills for ensuring smooth day-to-day operations within their school.

RDG 525: Literacy in a Multicultural Society  3 credits
Educators must be more effective in relating to persons of various cultures, promoting multicultural understanding, and facilitating maximal learning and personal development for all. This course is designed to develop understanding and appreciation of cultural differences (including values, attitudes, behaviors, abilities, and learning styles) present in both the general public and schools. Both theoretical constructs and practical applications of literacy in a multicultural society are emphasized. This course meets the following International Reading Association (IRA) Standards: 1.1, 5.1, and 5.4. Prerequisites: RDG 509 and RDG 510.

RDG 530: Foundational Theory and Research  4 credits
This course examines the past trends in reading instruction in America and addresses the effects of historical studies that impacted the evolution of reading instruction over the past half-century. Attention is focused on determining the core findings of important research studies and applying that knowledge to the reading profession, as well as examining effective research techniques that are used in those processes. Students conduct action research related to their job roles and evaluate and interpret research literature. Students evaluate theory, techniques, and design of scientific research. The national standards for the International Reading Association are incorporated as well, with students ultimately creating an electronic portfolio based on those standards. This course meets the following International Reading Association (IRA) Standards: 1.1, 1.2, 1.3, 1.4, 3.1, 3.3, 5.2.

RDG 535: Descriptive Linguistics and Phonics  3 credits
Classroom demographics in American schools are rapidly changing. Teachers are experiencing a growing need to familiarize themselves with the structure and use of the English language in order to respond to the increasing linguistic diversity in schools. As more schools focus on reading and writing across the curriculum, teachers of all disciplines need to become proficient at analyzing students’ linguistic abilities and developing content-specific strategies to ensure success in the classroom. This course provides foundational knowledge related to linguistic principles of the English language – the basics of phonetics, phonology, morphology, and syntax – while addressing the issues related to the usage of standard and non-standard varieties of English. This course meets the following International Reading Association (IRA) Standards: 1.1, 1.3, 2.2, 2.3, 3.1, 3.2, and 3.4. Prerequisites: RDG 509 and RDG 510.

RDG 540: Research Techniques and Procedures  3 credits
This course is designed to facilitate the development of research knowledge and skills in the education profession. The course will provide participants with a foundation for data-driven decision-making, change, and improvement. Course participants will conduct action research related to their job roles and evaluate and interpret research literature. Students will evaluate theory, techniques, and design of scientific research. This course meets the International Reading Association Standards 1.2, 3.1, 3.3, and 3.4, and the National Board of Professional Teaching Standards, proposition 4.4. Prerequisites: RDG 509, RDG 510, RDG 545, and RDG 535

RDG 545: Foundations, Cognition, and Literature  3 credits
The course focuses on using literature within a complete developmental literacy program from the emergent stage to the
adult proficiency level. Particular emphasis will be dedicated to the various genres that exist within the literature spectrum and how to utilize the different genres in order to meet specific instructional needs and literacy goals. Knowledge and skills will be developed to assist the student with applying the components of balanced literature-based literacy programs within their classroom or school setting. This course meets the following professional standards for educators: IRA (1.1, 1.2, 1.3, 2.2, 2.3, 4.1, 4.2, 5.3) and NBPTS (1, 2, 3, 4). Prerequisites: RDG 509 and RDG 510.

**RDG 580: Practicum in Reading**  
This course provides an in-depth study of the International Reading Association Standards by examining research-based approaches linking assessment and instruction. Teachers will learn to use a wide range of formal and informal assessment tools and methods to diagnose and assess reading and writing development, instruction, and assessment. Students will develop individual case studies. This course meets the following International Reading Association (IRA) Standards: 1.3, 1.4, 2.2, 3.1, 3.2, and 3.4. Prerequisites: RDG 509, RDG 510, RDG 545, RDG 535, RDG 540, RDG 521, RDG 525, RDG 515, RDG 583.

**RDG 581: Elementary Practicum**  
This course provides an in-depth study of the International Reading Association (IRA) Standards by examining research-based approaches linking assessment and instruction for elementary teachers. Teachers learn to use a wide range of formal and informal assessment tools and methods to diagnose and assess reading and writing development, instruction, and assessment. Students will develop individual case studies. This course meets the following IRA Standards: 1.3, 1.4, 2.2, 3.1, 3.2, and 3.4.

**RDG 583: Teaching Reading in the Content Areas**  
This course links reading skills across the curriculum through the use of instructional strategies and assessments. The use of textbooks, trade books, and electronic texts are explored with a focus on strategies that are relevant in every content area. This course meets the following International Reading Association (IRA) Standards: 1.1, 2.2, 2.3, 3.3, 4.1, 4.2, 5.1, 5.2, 5.3, and 5.4. Prerequisites: RDG 509, RDG 510, RDG 535, RDG 521, and RDG 525.

**RDG 585: Children and Young Adult Literature**  
The course focuses on using literature within a complete developmental literacy program from the emergent stage to the adult proficiency level. Particular emphasis is dedicated to the various genres that exist within the literature spectrum and how to utilize the different genres, including digital text, to meet specific instructional needs and literacy goals. Knowledge and skills are developed to assist students with applying the components of balanced literature-based literacy programs within their classroom or school setting. This course meets the following International Reading Association (IRA) Standards: 1.1, 1.2, 1.3, 2.2, 2.3, 4.1, 4.2, 5.3.

**RDG 586: Secondary Practicum**  
This course provides an in-depth study of the International Reading Association (IRA) Standards by examining research-based approaches linking assessment and instruction for secondary teachers. Teachers learn to use a wide range of formal and informal assessment tools and methods to diagnose and assess reading and writing development, instruction, and assessment. Students will develop individual case studies. This course meets the following IRA Standards: 1.3, 1.4, 2.2, 3.1, 3.2, and 3.4.

**Recreation (REC)**

**REC 313: Outdoor Recreation**  
A course designed to acquaint the student with the knowledge and experience of outdoor living and outdoor leadership skills. Camping, backpacking, and desert survival will be explored.

**REC 423: Recreation Administration and Supervision**  
A study of the supervisory and administrative techniques to be used in the recreation profession. Staff and volunteer supervision, policy development, public and community relations, and management theories will be examined. Prerequisites: REC 213 or instructor’s approval.

**REC 424: Recreation Facility Management**  
A study of financing, marketing, and legal issues concerning the management of recreation and park facilities. Coursework will include a study of bonds, risk management, and the pricing structures of recreational facilities. Prerequisite: REC 213 or instructor’s approval.

**REC 425: Recreation for Special Populations**  
A course designed to develop methods and techniques of leading therapeutic recreation activities in institutions. A Writing-Intensive course. Prerequisites: REC 213 or REC 215.

**REC 497A: Internship in Recreation A**  
The first portion of a full semester internship. The internship provides an opportunity for students to practice principles learned in their functional area by working in an outside organization under the supervision of a practitioner. Prerequisite: Senior Status or Instructor's approval.

**REC 497B: Internship in Recreation B**  
The second portion of a full semester internship. The internship provides an opportunity for students to practice principles learned in their functional area by working in an outside organization under the supervision of a practitioner. Prerequisite: Senior Status or Instructor's approval.

**REC 497C: Internship in Recreation C**  
The first portion of a full semester internship. The internship provides an opportunity for students to practice principles learned in their functional area by working in an outside organization under the supervision of a practitioner. Prerequisite: Senior Status or Instructor's approval.
**RES 615: Applied Research Development in Information Security** 3 credits

This course introduces students to the process of applied research proposal development. Students write and present a research proposal to evaluate the effectiveness of an information security best practice selected from one of the ten domains of the CBK.

**RES 616: Qualitative and Quantitative Analysis** 3 credits

In this course, students evaluate qualitative and quantitative methods of data analysis for solving information assurance problems and conducting information security-related field research.

**RES 811: Introduction to Advanced Graduate Studies and Scholarship** 3 credits

This course introduces students to the principal elements of research and scholarly writing. Learners explore approaches to synthesizing literature and the application of the major components of APA form and style, and learn to coordinate literature searches. Furthermore, they learn how to discern principal arguments, analyze research questions, and clearly identify the key scholarly attributes to journal articles and other sources of scholarly data. This course also introduces learners to the University’s overarching values and beliefs regarding research and the responsibility scholars have in continuing a tradition of contributing to an ever-growing body of knowledge.

**RES 855: Understanding and Interpreting Data** 3 credits

This course will provide exposure to the basic concepts and tools that leadership students and practitioners need in order to understand and analyze data and to utilize research findings in decision making and problem solving.

**RES 861: Analysis of Existing Research** 3 credits

A deep knowledge base of scholarly work is required for any student interested in making a meaningful contribution to his/her field. This course emphasizes the approaches used in comprehensively evaluating previously conducted research, learning how to weigh the merits of certain seminal works, and finding patterns in the research over time that have led the discipline to its current state. The learner is prepared after taking this course to coordinate a comprehensive and cogent literature view that demonstrates deep content knowledge and helps to identify gaps and tensions that exist in the current body of research. This exploration also helps the learner see the trends in methodology and approaches to research that have been conducted in the past as a means of informing future research initiatives. In a dissertation, this work is done in chapter 2 and learners leave the class ready to write this chapter. Prerequisite: RES 811.

**RES 862: Understanding Research and Methodology** 3 credits

In order to explore research findings, scholars must be clear in their explanation of the steps that were taken to gather the data. This course will examine the choices a scholar must make when choosing a methodology and the impact those approaches will have on the study and the results. The course will also review research methods and will discuss criteria to be considered in the choice of data collection methods, including the consideration of interactive methods for the collection of qualitative data (interview and focus groups), quantitative data (survey, experiment), and mixed methods. This course will provide exposure to the basic concepts and tools that leadership students and practitioners need in order to understand and analyze data and to utilize research findings in decision making and problem solving. Prerequisite: RES 861.

**RES 871: Developing the Formal Proposal** 3 credits

The best researchers know how to strategically define their research agenda with the necessary clarity to inform the scholarly community and to establish a blueprint for analysis and replication. In this course, learners focus on these issues by exploring development of chapter 1 of their dissertation proposal. Learners are asked to create a problem statement; identify research questions and/or hypotheses; identify the data required to answer those questions; summarize the methodology they will use to investigate the problem; and provide a discussion of the study’s significance and purpose, limitations/delimitations and assumptions, operational definitions, and an introduction to the problem as well as a summary of the chapter in order to demonstrate their understanding of effective research application. The development of this knowledge will result in the formation of the learner’s dissertation proposal. Prerequisite: RES 862.

**Residency (RSD)**

**RSD 801: Residency I: Identifying the Topic and Process** 2 credits

This residency orients students to the academic community. The nature of scholarly inquiry is discussed. Sessions address topics such as scholarly discourse, scholarly engagement, and membership in the scholarly community. Major streams of literature in leadership are discussed and areas of opportunity for future research are identified.

**RSD 851: Residency: Dissertation** 3 credits

This residency allows students to begin developing their skills as academic researchers. Residency sessions address topics such as research question development, design, item generation, subscale development and analysis, and basic hypothesis testing. Students have hands-on experience with quantitative and qualitative analysis software.
RSD 881: Residency: Presentation of Progress or Results 3 credits
This residency prepares students to present their scholarly work and to thoughtfully critique the work of others. Students orally present papers developed in their own classes and respond to questions from colleagues. Students are further prepared to become active members in academic communities by learning how to review papers and provide comments.

Secondary Education (SED)
SED 420N: Adolescent Literacy 3 credits
This course is designed to assist teacher candidates in understanding, evaluatig and promoting effective pedagogy in adolescent literacy. Emphasis will be on adolescents and fluency, vocabulary skills, literacy elements of narrative text, literary elements of expository text, evaluating adolescent literature for readiness and motivation, adolescent literature based pedagogy, critical literacy and strategies in promoting critical literacy. Practicum hours - 30. Prerequisites: Fingerprint Clearance, EDU 363N, SPE 325N, ESL 433N, SED 442N.

SED 430N: Critical Issues in Secondary Education 3 credits
This course will focus on contemporary issues that are hot topics in the field of secondary education. Students will explore various educational issues and will self-analyze their own positions as they develop a personal belief system about their role as a secondary education teacher. Practicum hours - 10. Prerequisites: Fingerprint Clearance, EDU 430N, and SED 452N.

SED 435: Adolescent Literacy 4 credits
This course is designed to assist teacher candidates in understanding, evaluating and implementing effective pedagogy in adolescent literacy. A graduate in adolescent literacy should be able to recognize and assess the defining elements of literacy, from decoding skills to higher level critical thinking applications. Subsequently, teachers should be able to understand, evaluate, and promote effective literacy pedagogy as it relates to the adolescent learner. Practicum hours: 30. Prerequisite: Fingerprint Clearance.

SED 442: Secondary Methods 3 credits
This course is designed to help teachers and prospective teachers of young adults find their own teaching styles and recognize the different learning styles of their students in order to make appropriate decisions about all aspects of the teaching act. Emphasis is given to teaching methodology that encourages problem-solving, active participation, and assessment. Practicum hours - 15. Prerequisites: Fingerprint Clearance.

SED 442N: Secondary Theory and Methods 3 credits
This course is designed to foster application of proven teaching and learning methodologies for both instructor and student in order to make appropriate decisions about all aspects of teaching. Major emphasis is given to planning instructional objectives, planning lessons, assessing objectives, and developing teaching methodology, which encourages problem-solving, active participation, and assessment. Practicum hours - 15. Prerequisites: Fingerprint Clearance.

SED 443: Secondary Curriculum Development and Assessment 3 credits
In this study of secondary school curriculum development, major emphasis is given to planning instructional objectives and lessons, assessing objectives, and developing a model curriculum. Practicum hours - 15. Prerequisites: Fingerprint Clearance and SED 442; SED 443 and SED 442 may be taken concurrently.

SED 443N: Secondary Curriculum Development and Assessment 3 credits
Various orientations to curriculum development and assessment are investigated and elements of model curricula are examined. Emphasis is given to understanding current structures and trends in high schools as these relate to curriculum and assessment. Course content is strategically planned to enable participants to make informed curriculum decisions to meet the needs of a diverse student population. This course focuses on the principles and practices involved in curriculum design. Participants will develop their own curriculum unit. Practicum hours - 15. Prerequisites: Fingerprint Clearance and SED 442N; SED 443N and SED 442N may be taken concurrently.

SED 444: Secondary Methods and Data Driven Pedagogy 4 credits
This course is designed to help teachers and prospective teachers of young adults find their own teaching styles and recognize the different learning styles of their students in order to make appropriate decisions about all aspects of the teaching profession. Emphasis is given to teaching methodology that encourages problem solving, active participation, and assessment. Course content is strategically planned to enable participants to make informed educational decisions about student learning based on data. This course focuses on the principles and practices involved in various models of educational assessment, evaluation, and testing. Practicum hours: 30. Prerequisite: Fingerprint Clearance.

SED 452: Learning Strategies Secondary School 3 credits
This course is designed to assist pre-service and in-service teachers in developing a broad range of reading (to include decoding), teaching, and learning strategies to effectively enhance the learning of middle and secondary school students. A major emphasis is given to utilization of these strategies in the midst of today’s socially and culturally diverse classrooms. Practicum hours - 30. Prerequisites: Fingerprint Clearance.

SED 452N: Reading and Learning Strategies for Middle and Secondary Schools 3 credits
This course is designed to assist pre-service and in-service teachers in developing and implementing a broad range of literacy strategies to effectively enhance the content area learning of middle and secondary school students. A major emphasis is given to utilization of these strategies in the midst of today’s socially diverse classrooms.
and culturally diverse classrooms. Practicum hours - 30. Prerequisites: Fingerprint Clearance.

**SED 454: Reading and Learning Strategies for Middle and Secondary Schools** 4 credits  
This course develops a broad range of reading (from decoding skills to higher level critical thinking applications), teaching, and learning strategies to effectively enhance the learning of middle and secondary school students. A major emphasis is given to utilization of these strategies in the midst of today’s socially and culturally diverse classrooms. Practicum hours: 20. Prerequisites: Fingerprint Clearance, EDU 215, and EDU 230.

**SED 455: Secondary Curriculum Development and Assessment** 4 credits  
In this study of secondary school curriculum development, major emphasis is given to planning instructional objectives and lessons, assessing objectives, and developing a model curriculum. Practicum hours: 30. Prerequisites: Fingerprint Clearance and SED 444.

**SED 462: Secondary Practicum** 3 credits  
Taken concurrently with SED 452. This is a school-centered experience designed to provide prospective teachers with intensive involvement in a middle or secondary school with students and classroom teachers. May be taken concurrently with SED 442/542c. Prerequisites: EDU 303. Co-requisite: Must be taken concurrently with SED 452.

**SED 480A: Student Teaching: Secondary School** 6 credits  
The semester includes seminars in classroom management, assessment and professional preparation, and curriculum development. The student is assigned to an approved school to serve as a student teacher for a semester under the supervision of an experienced teacher. Prerequisites: Admittance to the College of Education, completion of all secondary education coursework, and senior status.

**SED 480B: Student Teaching: Secondary School** 6 credits  
The semester includes seminars in classroom management, assessment and professional preparation, and curriculum development. The student is assigned to an approved school to serve as a student teacher for a semester under the supervision of an experienced teacher. Prerequisites: Admittance to the College of Education, completion of all secondary education coursework, and senior status.

**SED 480NA: Student Teaching: Secondary School** 6 credits  
Teacher candidates are required to fulfill a 16-week internship experience in a classroom with a certified, experienced teacher. The semester includes the opportunity to improve skills in classroom management, assessment and professional preparation, and curriculum development, and to utilize applicable content standards, Arizona Professional Teacher’s Standards, and Interstate New Teacher Assessment and Support Consortium Standards within the classroom. Prerequisites: One of the following combinations: 1) Admittance to the College of Education, completion of all secondary education coursework, and senior status; or 2) Successful completion of all courses in POS and content area; senior status; a 2.8 GPA; successful completion of state mandated basic skills and content area exams or Praxis I® (Basic Skills) and Praxis II® (Content Area); and approval and placement by Office of Field Experience. Arizona residents will be required to take the Arizona Educator Proficiency Assessments (AEPA). All paperwork for student teaching must be submitted by the due date the semester prior to student teaching.

**SED 480NB: Student Teaching: Secondary School** 6 credits  
This session is a continuation of Session A. Prerequisites for B: One of the following combinations: 1) Admittance to the College of Education, completion of all secondary education coursework, and senior status; or 2) SED 480NA.

**SED 482: Methods of Teaching Mathematics in Secondary Schools** 4 credits  
This course is designed to assist teacher candidates in understanding and ability to apply the methods and principles of effective instruction using mathematics in the secondary classroom. This course examines different learning modalities, instructional strategies, and the use of technology to help design and deliver effective lessons that are aligned to standards and increase student achievement. Practicum hours: 15. Prerequisites: Fingerprint Clearance and SED 444.

**SED 483: Methods of Teaching Science in Secondary Schools** 4 credits  
This course covers the methods of instruction, organization, and presentation of scientific content to secondary school students. Topics include curriculum, stockroom organization, lab safety and liability, visual aid preparation, computer use in the classroom, and research issues in education. Practicum hours: 15. Prerequisite: Fingerprint Clearance.

**SED 485: Methods of Teaching Social Studies in Secondary Schools** 4 credits  
This course examines different learning modalities, instructional strategies, and the use of technology to design and deliver effective social studies lessons that are aligned to standards and increase student achievement. Adolescent-based literacy and pedagogy are used to promote social studies content knowledge. Practicum hours: 30. Prerequisites: Fingerprint Clearance and SED 444.

**SED 523N: Adolescent Literacy** 3 credits  
This course is designed to assist teacher candidates in understanding, evaluating and promoting effective pedagogy in adolescent literacy. Emphasis will be on adolescents and fluency, vocabulary skills, literary elements of narrative text, literary elements of expository text, evaluating adolescent literature for readability and motivation, adolescent literature based pedagogy, critical literacy and strategies in promoting critical literacy. Practicum hours - 30. Prerequisites: Fingerprint Clearance, EDU 363N, SPE 325N, ESL 433N, SED 442N.

SED 553: Reading and Literacy Strategies for Middle and Secondary Schools  4 credits

This course is designed to develop a broad range of research-based reading methodologies to enhance the learning strategies of middle and secondary school students. A major emphasis is given to the use of reading strategies for culturally and socially diverse classrooms, including the use of literacy-based instruction in all content areas and the understanding, evaluating, and promoting effective pedagogy in adolescent literacy. The development and use of integrated and thematic approaches of instruction are addressed. Students are expected to observe and assist in a grade 7-12 classroom while taking this course. Practicum hours: 30. Prerequisite: Fingerprint Clearance.

SED 570N: Critical Issues in Secondary Education  3 credits

This course will focus on contemporary issues that are hot topics in the field of secondary education. Students will analyze various educational issues and will self-evaluate their own positions as they develop a personal belief system about their role as a secondary education teacher. Prerequisites: Fingerprint Clearance, EDU 520N, SED 552N.

SED 580A: Student Teaching Internship: Secondary I  6 credits

Students are required to fulfill an 8-week internship experience in a classroom with a certified teacher. This course must be taken immediately following SED 580B Secondary II Student Teaching.

SED 580B: Student Teaching Internship: Secondary II  6 credits

Students are required to fulfill an 8-week internship experience in a classroom with a certified teacher. This course must be taken immediately following SED 580A Secondary I Student Teaching.

SED 580NA: Student Teaching Internship: Secondary I  6 credits

Teacher candidates are required to fulfill a 16-week internship experience in a classroom with a certified, experienced teacher. The semester includes the opportunity to improve skills in classroom management, assessment and professional preparation, and curriculum development, and to utilize applicable content standards, Arizona Professional Teacher’s Standards, and Interstate New Teacher Assessment and Support Consortium Standards within the classroom. Prerequisites for A: All paperwork for student teaching must be submitted by the due date the semester prior to student teaching. One of the following combinations: 1) Successful completion of all courses in the Program of Study, a 3.0 GPA, and approval and placement by the Office of Field Placement and Certification; or 2) Successful completion of all courses in POS and content area; senior status; a 3.0 GPA; successful completion of state mandated basic skills and content area exams or Praxis I \(^a\) (Basic Skills) and Praxis II \(^b\) (Content Area ); and approval and placement by Office of Field Experience. Arizona residents will be required to take the Arizona Educator Proficiency Assessments (AEPA).

SED 580N-B: Student Teaching Internship: Secondary II  6 credits

This session is a continuation of Session A. Prerequisite for B: SED 580NA.

Sociology (SOC)

SOC 101: Introduction to Sociology (Retired)  3 credits

A general overview of the concepts, theories, and methods used by sociologists to describe and explain the effects of social structure on human behavior. Course stresses development of the sociological perspective in everyday life.

SOC 102: Principles of Sociology  4 credits

This course presents a survey of the concepts, theories, and methods used by sociologists to describe and explain the effects of social structure on human behavior. It emphasizes the understanding and use of the sociological perspective in everyday life.

SOC 220: Social Problems  4 credits

This course provides a survey of the various issues and problems faced by contemporary American society, including crime, drug abuse, sexual variance, poverty, overpopulation, and family relations. Emphasis is placed upon how these problems arise from and are perpetuated by modern social structure.

SOC 225: Human Sexuality  4 credits

This course focuses on the topic of human sexuality from a Christian perspective. Themes center on the biological, contextual, and socio-emotional aspects of sexuality. Topics include biological development, sexual communication, sexual morality, sexual behavior, cultural differences in sexual expression, sexual problems, sexually transmitted infections, contraception, conception and childbirth, research on sexuality, dating and mate selection, sexual coercion, sexuality in childhood/adolescence, and sexuality in the later years. By the end of this course, students should be able to demonstrate knowledge about the major themes, theories, and influences in the study of sexuality, and be able to apply course theory to real-world situations. Also PSY 225.

SOC 270: Contemporary American Families  3 credits

A survey of the important trends and issues facing families today. Emphasis is placed on establishing the existence and dimensions of the trends and analysis of the impact of these trends on individuals, couples, children and larger society. Legislative and political efforts to impact these trends will also be considered.

SOC 296: Social Research  3 credits

Also JUS 296 and POS 296. An exploration of the various methods used by social scientists to find answers to the questions posed by their subject matter. Includes basic terminology, concepts and practice using methods such as surveys, experiments, field research, and evaluation research, as well as some unobtrusive methods. Prerequisite: SOC 101.

our current culture. The history and present status of American immigration policy are also considered. Prerequisite: SOC 101 or instructor’s approval.

SOC 431: Social Work 3 credits
An overview of the training, tasks, and opportunities in the profession of social work. The student will be introduced to the skills, knowledge base, and functional role of the social worker. Exposure to various settings of social work practice will be provided. Prerequisites: SOC 101 and SOC 341.

SOC 440: Social Inequality and Stratification 3 credits
This course provides an inquiry into the dynamics of hierarchies of power, wealth, and prestige within and among human social systems, with particular attention to the causes and effects of marked inequality, especially with regard to the foundations and consequences of concentration of political and economic power.

SOC 483*: History of Social Thought 3 credits
A study of social thought from ancient to modern times with emphasis on 19th-and 20th-century thought. Emphasis is placed upon how current social theories have been influenced by, but are different from, earlier social thought. A Writing-Intensive course. Prerequisite: SOC 101 or instructor’s approval.

SOC 497: Internship in Sociology 1–4 credits
The student is placed with an agency or organization in the community to gain practical insights and experience to complement their classroom learning. Every effort is made to place students in a setting corresponding to their interests or career goals. May be repeated for credit. Prerequisite: Instructor’s approval and 12 credits of Sociology.

SOC 498: Advanced Topics in Sociology 3 credits
Topics of interest to sociologists but not covered in-depth in other courses will be considered. The content (topic) will change each time the course is offered, so it may be repeated for credit. Examples of topics might include: Women in America, Suicide, Third World Issues, Social Movements, Collective Behavior, Social Inequality and Stratification, Sociology of Religion, Sociology of Health and Illness, Sociology of Mental Illness, Juvenile Delinquency, or Aging. Prerequisite: SOC 101 or instructor’s approval.

SOC 499: Independent Study 1–4 credits
This involves research, seminars, or readings on a special topic to be selected by the student and the faculty advisor are appropriate. This course may be taken for one, two, three or four credits, depending on the amount of time and work involved and may be repeated for up to four credits total credit per subject area unless specified otherwise in requirements for a major.

Spanish (SPA)

SPA 101: Elementary Spanish I 3 credits
This course builds a foundation in the skills of listening, speaking, reading, and writing through the use of a text-workbook, classroom conversational practice, and outside cultural activities. Co-requisite: SPA 101L.

SPA 101L: Elementary Spanish I Lab 1 credit
A lab course designed to complement and support the principles learned in SPA 101. Co-requisite: SPA 101.

SPA 102: Elementary Spanish II 3 credits
Continuation of SPA 101. Prerequisite: SPA 101 or equivalent. Co-requisite: SPA 102L.

SPA 102L: Elementary Spanish II Lab 1 credit
A lab course designed to complement and support the principles learned in SPA 102. Co-requisite: SPA 102.

SPA 104: Elementary Spanish I 4 credits
This course builds a foundation in the language development skills of listening, speaking, reading, and writing. The course textbook is supported by an extensive workbook and online lab which allows students to hear Spanish spoken by native speakers. Students practice their spoken Spanish through face-to-face activities or by recorded wave files. Additionally students are prompted to growth in global awareness through participation in cultural events in their communities, reviewing movies set in Hispanic cultural settings, and reading books in English by Hispanic authors about Hispanic culture.

SPA 105: Elementary Spanish II 4 credits
This course is a continuation of SPA 104. Prerequisite: SPA 104 or equivalent.

SPA 201: Intermediate Spanish I 3 credits
This course further builds Spanish vocabulary and language structure. Oral practice, short compositions, textbook readings, and cultural activities are stressed. Prerequisite: SPA 102. Co-requisite: SPA 201L.

SPA 201L: Intermediate Spanish I Lab 1 credit
A lab course designed to complement and support the principles learned in SPA 201. Prerequisite: SPA 102. Co-requisite: SPA 201.

SPA 202: Intermediate Spanish II 3 credits
Continuation of SPA 201. Prerequisite: SPA 201 or instructor's approval.

SPA 202L: Intermediate Spanish I Lab 1 credit
A lab course designed to complement and support the principles learned in SPA 201. Prerequisite: SPA 201. Co-requisite: SPA 202.

SPA 311: Spanish Conversation 3 credits
This course helps the student to speak with fluency and standard pronunciation, to develop facility in the language, and to become conversant with culture, common expression, and everyday usage. Prerequisite: SPA 202 or instructor's approval.

*Campus/Off-site only | *Writing-intensive course | *Fulfills General Education requirement |
SPA 312*: Composition and Grammar (Retired)  3 credits
This course helps the student express a wide range of style in writing: description, narration, persuasion, comparison/contrast, and dialogue through careful drafting and editing of content, grammar, and orthography. A Writing-Intense course. Prerequisite: SPA 311 or instructor's approval.

SPA 319: Business and Professional Spanish  3 credits
For the students already conversant in Spanish, this course is designed to give specific vocabulary and terminology distinctive in particular careers and professions (Business, Education, Law, Medicine, Ministry, Public and/or Social Services). Prerequisite: SPA 311 or instructor's approval.

SPA 342: Introduction to Literature in Spanish (Retired)  3 credits
Introduction to literary concepts, terminology, and theory with application to poetic, dramatics, and prose texts. Will include some study of Hispanic culture. Prerequisite: SPA 312 or instructor's approval.

SPA 362*: Advanced Grammar and Composition  3 credits
A course designed to provide an extensive review of Spanish language. The development of self-correction skills will be encouraged through the study of model texts by Spanish authors. A Writing-Intense course. Prerequisite: SPA 312 or instructor's approval.

SPA 363: Spanish Civilization  3 credits
In this course, students study the history, geography, and people of Spain through a chronological view of the colonization and civilization of the peninsula until the present. Prerequisite: SPA 312 or instructor's approval.

SPA 373: Hispanic Civilization  3 credits
A study of the colonizing practices of Spain in the New World and their relevance to modern problems. Prerequisite: SPA 312 or instructor's approval.

SPA 383: Civilization of the Spanish Southwest  3 credits
This course provides a study of the development of Hispanic civilization in the Southwest United States from the 16th Century. Prerequisite: SPA 312 or instructor's approval.

SPA 413: Spanish Literature  3 credits
This course is designed to expand the student's knowledge of the literature and civilization of Spain. Prerequisite: SPA 342 or instructor's approval.

SPA 423: Hispanic Literature  3 credits
This course provides a survey of Hispanic literature from the Colonial period to the present, emphasizing literary periods, style, and text analysis. Prerequisite: SPA 342 or instructor's approval.

SPA 493: Contemporary Issues  3 credits
This course is designed to discuss and analyze contemporary events and issues in the Spanish-speaking world. Specific topics to be announced each offering. Prerequisite: SPA 311 or instructor's approval.

Special Education (SPE)

SPE 226*: Educating the Exceptional Learner  4 credits
This writing-intensive course is a survey of the unique learning needs of exceptional students. Special focus is given to the referral process, appropriate instructional modifications and accommodations for exceptional students, hot topics and trends, and IDEA law. Practicum hours: 15. Prerequisite: Fingerprint Clearance.

SPE 325*: Educating Learners With Diverse Needs  3 credits
This course is a survey of the unique learning needs of exceptional students. Special focus will be given to the referral process, appropriate instructional modifications and accommodations for exceptional students, and IDEA law. A Writing-Intense course. Practicum hours – 15. Prerequisites: Fingerprint Clearance and PSY 101.

SPE 325N: Educating Learners With Diverse Needs  3 credits
Emphasis will be placed on definitions, etiology, characteristics, and prevalence of various exceptionalities; laws and litigation protecting the rights of students with special needs and their families; current issues affecting persons with special needs; social perceptions, assessment, inclusion, transition; and basic curriculum accommodations and supportive services for teaching students with special needs in the general classroom. Practicum hours—15. Prerequisites: Fingerprint Clearance.

SPE 329: Special Education Foundations and Framework (Retired)  3 credits
This course orients teacher candidates to the field of special education. The National Board for Professional Teaching Standards and Council for Exceptional Children Standards, which guide special education research practices, are also discussed. It includes an introduction to creating a professional portfolio. Prerequisites: No Fingerprint Clearance necessary.

SPE 329N: Special Education Foundations and Framework  3 credits
This course orients teacher candidates to the field of special education. The National Board for Professional Teaching Standards and Council for Exceptional Children Standards, which guide special education research practices, are also discussed. It includes an introduction to creating a professional portfolio. Prerequisites: No Fingerprint Clearance necessary.

SPE 330: Special Education Foundations and Framework  3 credits
This course orients teacher candidates to the field of special education. The National Board for Professional Teaching Standards and Council for Exceptional Children Standards, which guide special education research practices, are also discussed. It includes an introduction to creating a professional portfolio. Prerequisites: No Fingerprint Clearance necessary.

SPE 330N: Special Education Foundations and Framework  3 credits
This course orients teacher candidates to the field of special education. The National Board for Professional Teaching Standards and Council for Exceptional Children Standards, which guide special education research practices, are also discussed. The course includes an introduction to creating a professional portfolio. Practicum hours: 15. Prerequisite: Fingerprint Clearance.
SPE 340N: Special Education in Litigation and Law 3 credits
Participants examine legal issues, recent court decisions, and current law relating to special education. Special attention is given to compliance, student and parent rights, local state and district policies and procedures, and advocacy through community organizations.

SPE 350: Special Education Litigation and Law 4 credits
Participants examine legal issues, recent court decisions, and current law relating to special education. Special attention is given to compliance, student and parent rights, local state and district policies and procedures, and advocacy through community organizations. No Fingerprint Clearance necessary.

SPE 351: Characteristics of Mental Retardation and Strategies to Teach Individuals With MR 4 credits
The focus of this course is to provide the teacher candidate in special education with knowledge of MR, including the history with attention to law and litigation, definition, causes, and characteristics of MR in children and adults. The impact of MR on the lives of individuals and necessary support systems for quality of life are investigated and assessment techniques and effective teaching strategies are addressed. Understanding and mastery of methods appropriate for meeting the educational needs of elementary and secondary students with MR are emphasized. Effective teaching strategies for planning, implementing, and evaluating instruction based on appropriate assessment for elementary and secondary students with MR in special and regular education classes are investigated, planned, implemented, and evaluated based on appropriate assessment. Particular attention is given to the structure and details of the lesson plans necessary to meet the individual needs of students with MR. Practicum hours: 20. Prerequisites: Fingerprint Clearance, SPE 226, and SPE 330.

SPE 352N: Characteristics of Mental Retardation and Strategies to Teach Individuals With MR 3 credits
The focus of this course is to provide the teacher candidate in special education with knowledge of MR, including the history with attention to law and litigation, definition, causes, and characteristics of MR in children and adults. The impact of MR on the lives of individuals and necessary support systems for quality of life are investigated and assessment techniques and effective teaching strategies are addressed. Understanding and mastery of methods appropriate for meeting the educational needs of elementary and secondary students with MR will be emphasized. Effective teaching strategies for planning, implementing, and evaluating instruction based on appropriate assessment for elementary and secondary students with MR in special and regular education classes are investigated, planned, implemented, and evaluated based on appropriate assessment. Particular attention will be given to the structure and details of the lesson plans necessary to meet the individual needs of students with MR. Practicum hours – 15. Prerequisites: Fingerprint Clearance, SPE 329N, and SPE 325N.

SPE 354N: Characteristics of Learning Disabilities and Strategies to Teach Individuals With LD 3 credits
The focus of this course is to provide the teacher candidate in special education with advanced knowledge of LD, including the history with attention to law and litigation, definition, causes, and characteristics of learning disabilities in children and adults. The cognitive processes of students with and without learning disabilities are compared, unsubstantiated explanations and false claims relating to LD are investigated, and assessment techniques and effective teaching strategies are addressed. Effective teaching strategies for planning, implementing, and evaluating instruction based on appropriate assessment for elementary and secondary students with LD in special and regular education classes are investigated, planned, implemented, and evaluated based on appropriate assessment. Particular attention will be given to the structure and details of the lesson plans necessary to meet the individual needs of students with LD. Teacher candidates will actively participate in a class for students with LD. Practicum hours - 15. Prerequisites: Fingerprint Clearance, SPE 329N, and SPE 325N.

SPE 355: Characteristics of Students With Learning Disabilities 3 credits
This course is designed to provide the prospective special education teacher with advanced knowledge of the etiology of learning disabilities by discussing diagnostic techniques and related remedial practices. Prerequisites: SPE 325, EDU 303.

SPE 356N: Characteristics of Emotional/Behavioral Disabilities and Strategies to Teach Individuals With EBD 3 credits
The focus of this course is to provide the special education teacher candidate with advanced knowledge of ED, including the history with attention to law and litigation, definition, etiology, types, and characteristics of students with emotional and behavioral disorders. Teacher candidates will investigate theories and models of emotional and behavioral disorders and related treatments. Assessment techniques and the factors involved in a diagnosis of behavior and emotional disorders are also addressed. Effective and specific individual and group behavior management models, programs, strategies, and interventions for elementary and secondary students with EBD in special and regular education classes are investigated, planned, implemented, and evaluated based on appropriate assessment. Particular attention will be given to the structure and details of the behavior management plan necessary to meet the individual needs of students with ED. Practicum hours – 15. Prerequisites: Fingerprint Clearance, SPE 329N, and SPE 325N.

SPE 357: Characteristics of Emotional/Behavioral Disabilities and Strategies to Teach Individuals With EBD 4 credits
The focus of this course is to provide the special education teacher candidate with knowledge of EBD, including the history with attention to law and litigation, definition, etiology, types, and characteristics of students with emotional and behavioral disorders. Teacher candidates investigate theories and models of...
emotional and behavioral disorders and related treatments. Assessment techniques and the factors involved in a diagnosis of behavior and emotional disorders are also addressed. Effective and specific individual and group behavior management models, programs, strategies, and interventions for elementary and secondary students with EBD in special and regular education classes are investigated, planned, implemented, and evaluated based on appropriate assessment. Particular attention is given to the structure and details of the behavior management plan necessary to meet the individual needs of students with EBD. This course teaches characteristics and uses of diagnostic instruments that can be used to identify, evaluate, and assess learning needs of students with emotional/behavioral disabilities. Practicum hours: 20. Prerequisites: Fingerprint Clearance, SPE 226, and SPE 330.

SPE 358: Characteristics of Students With Physical and Health Impairments and Strategies to Teach Individuals With PHI 4 credits

This course provides students with knowledge of physical and other health impairments and the impact of these disabilities on the lives of individuals. Teacher candidates investigate means to enhance individuals’ quality of life through participation in home, school, and community activities. Special attention is given to accessibility to appropriate curricula, modifications and adaptations, and effective instructional strategies to meet individual needs. This course teaches characteristics and uses of diagnostic instruments that can be used to identify, evaluate, and assess learning needs of students with physical and health impairments. Practicum hours: 20. Prerequisites: Fingerprint Clearance, SPE 226, and SPE 330.

SPE 359: Characteristics of Learning Disabilities and Strategies to Teach Individuals With LD 4 credits

The focus of this course is to provide teacher candidates in special education with knowledge of LD, including the history with attention to law and litigation, definition, causes, and characteristics of learning disabilities in children and adults. The cognitive processes of students with and without learning disabilities are compared, unsubstantiated explanations and false claims relating to LD are investigated, and assessment techniques and effective teaching strategies are addressed. Effective teaching strategies for planning, implementing, and evaluating instruction based on appropriate assessment for elementary and secondary students with LD in special and regular education classes are investigated. Particular attention is given to the structure and details of the lesson plans necessary to meet the individual needs of students with LD. This course teaches characteristics and uses of diagnostic instruments that can be used to identify, evaluate, and assess learning needs of students with LD. Practicum hours: 20. Prerequisites: Fingerprint Clearance, SPE 226, and SPE 330.

SPE 371N: Education of Students With Physical and Health Impairments 3 credits

This course provides students with knowledge of physical and other health impairments and the impact of these disabilities on the lives of individuals. Students investigate means to enhance individuals’ quality of life through participation in home, school, and community activities. Special attention is given to accessibility to appropriate curricula, modifications and adaptations, and effective instructional strategies to meet individual needs. Practicum hours: 15. Prerequisites: Fingerprint Clearance, SPE 329N, and SPE 325N.

SPE 435N: Diagnosis and Assessment in Special Education 3 credits

This capstone course in special education is designed to incorporate issues in collaboration and communication and to synthesize the special education process from assessment to delivery of instruction (i.e., evaluation, eligibility, placement, and instructional practice). Specific skill development includes assessing students with disabilities, completing special education forms, conducting meetings and conferences with parents and school professionals. A school-based practicum provides participants with experiences in standardized testing and case studies, problem-solving meetings, cooperative team planning, and inclusion processes. Practicum hours – 15. Prerequisites: Fingerprint Clearance, SPE 325N, and EDU 303N.

SPE 448B: Student Teaching in Special Education: Cross Categorical 6 credits

Students demonstrate mastery of the standards of the National Board Certification for Teachers of Students with Exceptional Needs in special education classrooms. The experience includes assessing, planning, and teaching lessons; managing behavior; and collaborating professionally. Prerequisites: Required special education courses for certificate, 2.50 GPA, and senior status.

SPE 448NB: Student Teaching in Special Education: Cross Categorical 6 credits

Teacher candidates demonstrate mastery of the Arizona Professional Teacher’s Standards and Council for Exceptional Children International Standards for Entry into Professional Practice in teaching students with disabilities for one semester. Under the direction of a certified special educator, the experience includes assessing, planning, and teaching lessons; managing behavior; and collaborating professionally. Prerequisite: EED 480NA.

SPE 510: Strategies to Teach Individuals With Learning Disabilities 4 credits

The focus of this course is to provide advanced knowledge of learning disabilities (LD), including the history with attention to definitions, causes, and characteristics of LD in children and adults. The cognitive processes of students with and without LD are compared, unsubstantiated explanations and false claims relating to LD are investigated, and assessment techniques and effective teaching strategies are addressed. Effective teaching strategies for planning, implementing, and evaluating instruction based on appropriate assessment for elementary and secondary students with LD in special and regular education classes are investigated, planned, implemented, and evaluated based on appropriate assessment. Particular attention is given to the structure and details of the lesson plans necessary to meet the individual needs of students with LD. Practicum hours: 15.
SPE 512: Assessment in Special Education for Certified Special Educators 4 credits

The focus of this course centers on various types of assessment used to diagnose students with special needs. Specific focus is placed on the validity, reliability, instrumentation, and disaggregation of assessment scores to determine instruction and placement decisions. Additional focus is on assessment of culturally and/or linguistically diverse students. Current assessment trends are discussed. Practicum hours: 15.

SPE 513: Strategies to Teach Individuals With Emotional/Behavioral Disabilities 4 credits

This course familiarizes students with historical and current trends associated with emotional and behavioral disorders (EBD). Causes, assessment, and appropriate interventions for students with EBD are discussed along with current over- and under-representation across populations. Practicum hours: 15.

SPE 514: Strategies to Teach Individuals With Mental Retardation 4 credits

The focus of this course is to provide advanced knowledge of mental retardation (MR), including the history with attention to law and litigation, definition, causes, and characteristics of MR in children and adults. The impact of MR on the lives of individuals and necessary support systems for quality of life are investigated, while assessment techniques and effective teaching strategies are addressed. Understanding and mastery of methods appropriate for meeting the educational needs of elementary and secondary students with MR are emphasized. Effective teaching strategies for planning, implementing, and evaluating instruction based on appropriate assessment for elementary and secondary students with MR in special and regular education classes are investigated. Particular attention is given to the structure and details of the lesson plans necessary to meet the individual needs of students with MR. Practicum hours: 15.

SPE 522: Classroom Management for Students With Special Needs 4 credits

This course discusses the characteristics and effective implementation of various behavior modification strategies. Positive Behavior Support (PBS) and Functional Behavioral Assessment (FBA) are discussed.

SPE 523: Special Education Program Development and Funding 4 credits

Students demonstrate understanding of principles and processes of special education program development by designing, implementing, and evaluating programs for students with special needs. Further discussion focuses on policies, practices, and issues related to special education finance at the local, state, and federal levels, including sources, legal mandates, and budgeting.

SPE 525: Educating Learners With Diverse Needs 3 credits

Emphasis will be placed on definitions, etiology, characteristics, and prevalence of various exceptionalities; laws and litigation protecting the rights of students with special needs and their families; current issues affecting persons with special needs; social perceptions, assessment, inclusion, and transition; and basic curriculum accommodations and supportive services for teaching students with special needs in the general classroom. Practicum hours – 15. Prerequisite: Fingerprint Clearance.

SPE 525N: Educating Learners With Diverse Needs 3 credits

Emphasis will be placed on definitions, etiology, characteristics, and prevalence of various exceptionalities; laws and litigation protecting the rights of students with special needs and their families; current issues affecting persons with special needs; social perceptions, assessment, inclusion, and transition; and basic curriculum accommodations and supportive services for teaching students with special needs in the general classroom. Practicum hours – 15. Prerequisite: Fingerprint Clearance.

SPE 526: Educating Learners With Diverse Needs 4 credits

Emphasis is placed on definitions, etiology, characteristics, and prevalence of various exceptionalities; laws and litigation protecting the rights of students with special needs and their families; current issues affecting persons with special needs; social perceptions, assessment, inclusion, and transition; and basic curriculum accommodations and supportive services for teaching students with special needs in the general classroom. Practicum hours: 15.

SPE 527: Inclusion and Collaborative Practices 4 credits

This class emphasizes practical applications of skills and strategies needed to fulfill the roles and responsibilities of educators in meeting the needs of learners with disabilities in the general education classroom. Course content focuses on strategic instruction, behavior interventions, and the development and application of modifications and/or accommodations for diversity.

SPE 529: Special Education: Foundations and Framework 3 credits

This course orients teacher candidates to the field of special education. The National Board for Professional Teaching Standards and Council for Exceptional Children Standards, which guide special education research practices, are also discussed. It includes an introduction to creating a professional portfolio.

SPE 529N: Special Education: Foundations and Framework 3 credits

This course orients teacher candidates to the field of special education. The National Board for Professional Teaching Standards and Council for Exceptional Children Standards, which guide special education research practices, are also discussed. It includes an introduction to creating a professional portfolio. Prerequisite: No Fingerprint Clearance necessary.

SPE 530N: Effective Collaborative Processes 3 credits

In this course, emphasis is placed on practical applications of skills and strategies that are needed to fulfill the roles and responsibilities of educators and meet the needs of learners with disabilities in the general education classroom. Course content focuses on strategic instruction, behavior interventions, and the development and application of modifications and/or accommodations for diverse learners. Collaborative models and
Students become skilled at applying modifications and adaptations available through various types of assistive technology. Utilization of assistive technology across the curriculum and for a variety of purposes is discussed.

SPE 535: Assessment and Diagnosis in Special Education 3 credits

This capstone course in special education is designed to incorporate issues in collaboration and communication and to synthesize the special education process from assessment to delivery of instruction (i.e., evaluation, eligibility, placement, and instructional practice). Specific skill development includes assessing students with disabilities, completing special education forms, and conducting meetings and conferences with parents and school professionals. A school-based practicum provides participants with experiences in standardized testing and case studies, problem-solving meetings, cooperative team planning, and inclusion processes. Practicum hours – 15. Prerequisites: SPE 529, SPE 525, One of more areas of disability: SPE 545 and SPE 596, or SPE 555 and SPE 576, or SPE 565 and SPE 586, or SPE 571, as well as SPE 535, and SPE 572.

SPE 535N: Assessment and Diagnosis in Special Education 3 credits

This capstone course in special education is designed to incorporate issues in collaboration and communication and to synthesize the special education process from assessment to delivery of instruction (i.e., evaluation, eligibility, placement, and instructional practice). Specific skill development includes assessing students with disabilities, completing special education forms, and conducting meetings and conferences with parents and school professionals. A school-based practicum provides participants with experiences in standardized testing and case studies, problem-solving meetings, cooperative team planning, and inclusion processes. Practicum hours – 15. Prerequisites: SPE 529N, SPE 525N, Characteristics and Strategies courses for MR, LD, or ED.

SPE 536: Diagnosis and Assessment in Special Education 4 credits

This capstone course in special education is designed to incorporate issues in collaboration and communication and to synthesize the special education process from assessment to delivery of instruction (i.e., evaluation, eligibility, placement, and instructional practice). Specific skill development includes assessing students with disabilities, completing special education forms, and conducting meetings and conferences with parents and school professionals. A school-based practicum provides participants with experiences in standardized testing and case studies, problem-solving meetings, cooperative team planning, and inclusion processes. Practicum hours: 15. Prerequisite: Fingerprint Clearance.

SPE 539: Educational Implications for Students With Physical and Health Impairments 4 credits

This course provides students with knowledge of physical and other health impairments with related discussions on how these disabilities impact an individual’s life. Students investigate means to enhance individuals’ quality of life through participation in home, school, and community activities. Special attention is given to accessibility to appropriate curricula, modifications, and adaptations. Section 504 plans are discussed. Practicum hours: 15.

SPE 540: Special Education Litigation and Law 3 credits

Participants examine legal issues, recent court decisions, and current law relating to special education. Special attention is given to compliance, student and parent rights, local state and district policies and procedures, and advocacy through community organizations. Prerequisites: SPE 529 and SPE 525.

SPE 540N: Special Education Litigation and Law 3 credits

Participants examine legal issues, recent court decisions, and current law relating to special education. Special attention is given to compliance, student and parent rights, local state and district policies and procedures, and advocacy through community organizations.

SPE 545: Characteristics of Students with Mental Retardation 3 credits

The focus of this course is to provide the prospective special education teacher with advanced knowledge of MR, including the history with attention to law and litigation, definition, causes, and characteristics of MR in children and adults. The impact of MR on the lives of individuals and necessary support systems for quality of life are investigated and assessment techniques and effective teaching strategies addressed. Participants will actively participate in a class for students with MR. Prerequisites: SPE 529 and SPE 525.

SPE 546: Management and Strategic Instruction Practices for Students With Special Needs 4 credits

This course discusses the characteristics and effective implementation of various behavior modification strategies. Positive Behavior Support (PBS) and Functional Behavioral Assessment (FBA) are discussed.

SPE 548A: Student Teaching: Cross-Categorical I 6 credits

Students demonstrate mastery of the standards of the National Board Certification for Teachers of Students with Exceptional Needs in classrooms for students with disabilities, including assessing, planning and teaching lessons, managing behavior, and collaborating professionally. This is an 8-week experience that must be taken immediately preceding SPE 548B Student Teaching II.

SPE 548B: Student Teaching: Cross-Categorical II 6 credits

Students demonstrate mastery of the standards of the National Board Certification for Teachers of Students with Exceptional Needs in classrooms for students with disabilities, including assessing, planning and teaching lessons, managing behavior, and
collaborating professionally. This is an 8-week experience that must be taken immediately following SPE 548A Student Teaching I.

**SPE 548NA: Student Teaching: Cross-Categorical**

**Session A** 6 credits

Teacher candidates demonstrate mastery of the Arizona Professional Teacher’s Standards and Council for Exceptional Children International Standards for Entry into Professional Practice in teaching students with disabilities for one semester. Under the direction of a certified special educator, teacher candidates will assess students with disabilities, plan and teach lessons, manage behavior, participate in IEP meetings, design and implement a behavior management program, and conduct a case study. The setting in which student teaching is conducted must have at least 3 of the following disability categories represented: emotional disability, learning disability, mental retardation, physical impairment, and/or health impairment. Prerequisites for A: Successful completion of all courses in POS and content area; senior status; a 3.0 GPA; successful completion of state mandated basic skills and content area exams or Praxis I® (Basic Skills) and Praxis II® (Content Area); and approval and placement by Office of Field Experience. Arizona residents will be required to take the Arizona Educator Proficiency Assessments (AEPA). All paperwork for student teaching must be submitted by the due date the semester prior to student teaching.

**SPE 548NB: Student Teaching: Cross-Categorical**

**Session B** 6 credits

This session is a continuation of Session A. Prerequisite for B: SPE 548NA.

**SPE 550: Special Education Finance** 3 credits

Participants investigate the policies, practices, and issues relating to special education finance at the local, state, and federal levels, including sources, legal mandates, and budgeting. Prerequisites: Required courses for Certification in Special Education. Prerequisites: SPE 529 and SPE 525.

**SPE 550N: Special Education Finance** 3 credits

Participants investigate the policies, practices, and issues relating to special education finance at the local, state, and federal levels, including sources, legal mandates, and budgeting. Prerequisites: Required courses for Certification in Special Education.

**SPE 552N: Characteristics of Mental Retardation and Strategies to Teach Individuals With MR** 3 credits

The focus of this course is to provide teacher candidates in special education with advanced knowledge of mental retardation (MR), including the history with attention to law and litigation, definition, causes, and characteristics of MR in children and adults. The impact of MR on the lives of individuals and necessary support systems for quality of life are investigated, and assessment techniques and effective teaching strategies are addressed. Understanding and mastery of methods appropriate for meeting the educational needs of elementary and secondary students with MR are emphasized. Effective teaching strategies for planning, implementing, and evaluating instruction based on appropriate assessment for elementary and secondary students with MR in special and regular education classes are investigated. Particular attention is given to the structure and details of the lesson plans necessary to meet the individual needs of students with MR. Practicum hours: 20. Prerequisites: Fingerprint Clearance, SPE 529N, and SPE 525N.

**SPE 553: Characteristics of Mental Retardation and Strategies to Teach Individuals With MR** 4 credits

The focus of this course is to provide teacher candidates in special education with advanced knowledge of mental retardation (MR), including the history with attention to law and litigation, definition, causes, and characteristics of MR in children and adults. The impact of MR on the lives of individuals and necessary support systems for quality of life are investigated, and assessment techniques and effective teaching strategies are addressed. Understanding and mastery of methods appropriate for meeting the educational needs of elementary and secondary students with MR are emphasized. Effective teaching strategies for planning, implementing, and evaluating instruction based on appropriate assessment for elementary and secondary students with MR in special and regular education classes are investigated. Particular attention is given to the structure and details of the lesson plans necessary to meet the individual needs of students with MR. Practicum hours: 20. Prerequisites: Fingerprint Clearance, SPE 529N, and SPE 525N.

**SPE 554N: Characteristics of Learning Disabilities and Strategies to Teach Individuals With LD** 3 credits

The focus of this course is to provide the prospective special education teacher with advanced knowledge of learning disabilities (LD), including the history with attention to law and litigation, definition, causes, and characteristics of learning disabilities in children and adults. The cognitive processes of students with and without learning disabilities are compared, unsubstantiated explanations and false claims relating to LD investigated, and assessment techniques and effective teaching strategies are addressed. Effective teaching strategies for planning, implementing, and evaluating instruction based on appropriate assessment for elementary and secondary students with LD in special and regular education classes are investigated, planned, implemented, and evaluated based on appropriate assessment. Particular attention will be given to the structure and details of the lesson plans necessary to meet the individual needs of students with LD. Teacher candidates will teach lessons in a class for students with LD. Practicum hours – 15. Prerequisites: SPE 529N and SPE 525N.

**SPE 555: Characteristics of Students With Learning Disabilities** 3 credits

The focus of this course is to provide the prospective special education teacher with advanced knowledge of learning disabilities (LD), including the history with attention to law and litigation, definition, causes, and characteristics of learning disabilities in children and adults. The cognitive processes of students with and without learning disabilities are compared, unsubstantiated explanations and false claims relating to LD investigated, and assessment techniques and effective teaching strategies addressed. Participants will actively...
Disabilities and Strategies to Teach Individuals With LD. Prerequisites: SPE 529 and SPE 525.

SPE 556N: Characteristics of Emotional/Behavioral Disabilities and Strategies to Teach Individuals With EBD 3 credits

The focus of this course is to provide the special education teacher candidate with advanced knowledge of ED, including the history with attention to law and litigation, definition, etiology, types, and characteristics of students with emotional and behavioral disorders. Teacher candidates will investigate theories and models of emotional and behavioral disorders and related treatments. Assessment techniques and the factors involved in a diagnosis of behavior and emotional disorders are also addressed. Effective and specific individual and group behavior management models, programs, strategies, and interventions for elementary and secondary students with EBD in special and regular education classes are investigated, planned, implemented, and evaluated based on appropriate assessment. Particular attention will be given to the structure and details of the behavior management plan necessary to meet the individual needs of students with EBD. Practicum hours – 15. Prerequisites: SPE 529N and SPE 525N.

SPE 557: Characteristics of Learning Disabilities and Strategies to Teach Individuals With LD 4 credits

The focus of this course is to provide teacher candidates in special education with advanced knowledge of learning disabilities (LD), including the history with attention to law and litigation, definition, causes, and characteristics of LD in children and adults. The cognitive processes of students with and without learning disabilities are compared, unsubstantiated explanations and false claims relating to LD are investigated, and assessment techniques and effective teaching strategies are addressed. Effective teaching strategies for planning, implementing, and evaluating instruction based on appropriate assessment for elementary and secondary students with LD in special and regular education classes are investigated. Particular attention is given to the structure and details of the lesson plans necessary to meet the individual needs of students with LD. Teacher candidates teach lessons in a class for students with LD. Practicum hours: 20. Prerequisites: SPE 522 and SPE 526.

SPE 558: Characteristics of Emotional/Behavioral Disabilities and Strategies to Teach Individuals With EBD 4 credits

The focus of this course is to provide special education teacher candidates with advanced knowledge of emotional/behavioral disabilities (EBD), including the history with attention to law and litigation, definition, etiology, types, and characteristics of students with EBD. Teacher candidates investigate theories and models of EBD and related treatments. Assessment techniques and the factors involved in a diagnosis of EBD are also addressed. Effective and specific individual and group behavior management models, programs, strategies, and interventions for elementary and secondary students with EBD in special and regular education classes are investigated, planned, implemented, and evaluated based on appropriate assessment. Particular attention is given to the structure and details of the behavior management plan necessary to meet the individual needs of students with EBD. Practicum hours: 20. Prerequisites: SPE 522 and SPE 526.

SPE 560: Special Education Program Development 3 credits

Participants will demonstrate understanding of principles and processes of special education program development by designing, implementing, and evaluating programs for students with special needs. Prerequisite: All required courses for Certification in Special Education.

SPE 560N: Special Education Program Development 3 credits

Participants demonstrate understanding of principles and processes of special education program development by designing, implementing, and evaluating programs for students with special needs. Prerequisites: Required courses for Certification in Special Education.

SPE 565: Characteristics of Students with Emotional Disabilities 3 credits

The focus of this course is to provide the prospective special education teacher with advanced knowledge of ED, including the history with attention to law and litigation, definition, etiology, types, and characteristics of students with emotional and behavioral disorders. Students will investigate theories and models of emotional and behavioral disorders and related treatments. Assessment techniques and the factors involved in a diagnosis of behavior and emotional disorders are also addressed. Students will actively participate in a class for students with emotional and behavioral disabilities. Prerequisites: SPE 529 and SPE 525.

SPE 570: Action Research in Special Education 3 credits

Participants collaboratively engage in identifying personally significant and relevant problems in special education, reviewing the literature, designing and implementing research methodology, and evaluating results. Plans for further research are identified. Prerequisites: SPE 529, SPE 525, and SPE 535.

SPE 570N: Action Research in Special Education 3 credits

Participants collaboratively engage in identifying personally significant and relevant problems in special education, reviewing the literature, designing and implementing research methodology, and evaluating results. Plans for further research are identified.

SPE 571: Educational Implications for Students With Physical and Health Impairments 3 credits

This course provides teacher candidates with knowledge of physical and other health impairments and the impact of these

*Campus/Off-site only | Writing-intensive course | Fulfills General Education requirement |
disabilities on the lives of individuals. Teacher candidates investigate means to enhance individuals' quality of life through participation in home, school, and community activities. Special attention is given to accessibility to appropriate curricula, modifications and adaptations, and effective instructional strategies to meet individual needs. Practicum hours – 15. Prerequisites: SPE 529 and SPE 525.

**SPE 571N: Educational Implications for Students With Physical and Health Impairments** 3 credits

This course provides students with knowledge of physical and other health impairments and the impact of these disabilities on the lives of individuals. Students investigate means to enhance individuals’ quality of life through participation in home, school, and community activities. Special attention is given to accessibility to appropriate curricula, modifications and adaptations, and effective instructional strategies to meet individual needs. Practicum hours – 15. Prerequisites: Fingerprint Clearance, SPE 529N, and SPE 525N.

**SPE 572: Philosophical and Social Issues in Education (Retired)** 3 credits

Participants will investigate historical, philosophical, and sociological influences that have shaped American education and current issues and future challenges facing educators. Activities include interviews and observations in the school and community. Each participant will create a personal philosophy of education.

**SPE 573: Educational Implications for Students With Physical and Health Impairments** 4 credits

This course provides teacher candidates with knowledge of physical and other health impairments and the impact of these disabilities on the lives of individuals. Teacher candidates investigate means to enhance the quality of life of individuals through participation in home, school, and community activities. Special attention is given to accessibility to appropriate curricula, modifications and adaptations, and effective instructional strategies to meet individual needs. Practicum hours: 15. Prerequisites: Fingerprint Clearance, SPE 522, and SPE 526.

**SPE 576: Strategies for Teaching Students With Learning Disabilities** 3 credits

This course is designed to advance the special educator’s understanding and mastery of methods appropriate for meeting the educational needs of elementary and secondary students with LD. Effective teaching strategies for planning, implementing, and evaluating instruction based on appropriate assessment are explored. Participants become skilled at applying modifications and adaptations available through current low-tech and high-tech assistive devices designed to address individual needs for appropriate education. Prerequisites: SPE 529, SPE 525, Characteristics and Strategies courses for MR, LD, ED, or P/HI, SPE 535.

**SPE 586: Strategies for Teaching Students With Emotional Disabilities** 3 credits

This course is designed to advance the special educator’s understanding and mastery of methods appropriate for meeting the educational needs of elementary and secondary students with ED. Effective and specific individual and group behavior management models, programs, strategies, and interventions for elementary and secondary students with ED in special and regular education classes are investigated, planned, implemented, and evaluated based on appropriate assessment. Particular attention will be given to the structure and details of the behavior management plan necessary to meet the individual needs of students with ED. Participants will teach behavior in a class for students with ED. Prerequisites: SPE 529, SPE 525, and SPE 565.

**SPE 590: Assistive Technology in Special Education** 3 credits

Participants become skilled at applying modifications and adaptations available through current low-tech and high-tech assistive devices designed to address individual needs for appropriate education.

**SPE 590N: Assistive Technology in Special Education** 3 credits

Participants become skilled at applying modifications and adaptations available through current low-tech and high-tech assistive devices designed to address individual needs for appropriate education.

**SPE 595N: Global Issues in Special Education** 3 credits

Participants explore special education programs and issues in countries throughout the world and establish direct communication with special educators worldwide.

**SPE 596: Strategies for Teaching Students With Mental Retardation (MR)** 3 credits

This course is designed to advance the special educator's understanding and mastery of methods appropriate for meeting the educational needs of elementary and secondary students with MR. Effective teaching strategies for planning, implementing, and evaluating instruction based on appropriate assessment are explored. Participants become skilled at applying modifications and adaptations available through current low-tech and high-tech assistive devices designed to address individual needs for appropriate education. Particular attention will be given to the structure and details of the lesson plans necessary to meet the individual needs of students with MR. Prerequisites: SPE 529, SPE 525, SPE 545.
Systems Management (SYM)

SYM 180: Computer Application Modules 1 credit
Basic studies of applications of electronic data processing. Modules include
A  Word Processing
B  Beginning Spreadsheets
J  Accounting Applications (Prerequisite: ACC 211)
L  Presentation Graphics

SYM 301: Principles of Information Systems 3 credits
This introductory course covers the fundamental principles of information systems; integrates topics of management, organization, information, technology, and the systems approach; and emphasizes the planning, design, and implementation of information systems to aid decision-making.

SYM 302: Database and Decision Support Systems 3 credits
This in-depth examination of database systems and the various computer-based support systems that are used to aid decision-making examines database systems, decision support systems, expert systems, and group decision support systems. Emphasis is on appropriate application and implementation. Quantitative and qualitative decision-making models and tools will be covered. Prerequisite: SYM 301.

SYM 303: Systems Analysis and Design 3 credits
This course discusses systems thinking and behavior as they apply to business environments. An overview of modeling and simulation will be discussed in terms of gaining insights into business issues, emphasizing the benefits of using these tools in areas where effective decision-making is critical. Students will be expected to complete several individual modeling and simulation projects using a higher level, object-oriented (drag and drop) simulation application. No programming experience is required. Prerequisite: SYM 301.

SYM 304: Designing Business Web Pages 3 credits
Student will learn to design and evaluate web pages for business applications. Considerations regarding internal organization and external user needs are discussed, along with evaluations of existing Internet Web sites. Types of available software applications are also considered. This is a hands-on course where students will be required to design simple sites on an individual basis and interconnected sites on a teaming basis. Prerequisite: SYM 301.

SYM 305: Business Programming 3 credits
This course focuses on the analysis of business problems to design and implement the software component of an information system. Emphasis is placed on structured design and programming. Includes an introduction to visual programming languages. Prerequisite: SYM 301.

SYM 306: Data Communications and Networking 3 credits
This course focuses on the concepts, architectures, components, protocols, and standards for message movement within information networks. Involves extensive use of the network design process to develop detailed understanding regarding the integration of business and information technology perspectives. Prerequisite: SYM 301.

SYM 501: Applied Business Probability and Statistics 3 credits
This course is designed for students who have not had statistics in their undergraduate work or for those who desire a refresher in mathematics. Topics covered include the theory and application of basic mathematic rules, algebraic formulae and manipulations, graphing, probability principles, and descriptive and inferential statistics.

SYM 506: Applied Business Probability and Statistics 4 credits
The purpose of this course is to prepare students in mathematical, probability, and statistical concepts for their upcoming studies in quantitative methods. The course is intended for those students who have not had any prior statistical education, although students who have had statistics should also consider taking the course as a refresher.

SYM 603: Information Systems 3 credits
Students examine managerial issues associated with the application of information systems in business settings. Beginning with an analysis of the broad meaning and nature of information and systems, the focus narrows specifically to computer technologies, configurations, and applications as tools to benefit business environments and then expands to the Internet and World Wide Web as they apply to strategic global enterprise systems.

SYM 633: Fundamentals of Six Sigma 3 credits
This course provides students with an overview of the history of quality programs, the six sigma methodology (commonly known as DMAIC), and introductory process measurement and improvement tools including process mapping, data collection, Pareto analysis, and identifying root cause. Successful completion of the course results in initial progress towards Six Sigma Green Belt certification.

SYM 634: Advanced Six Sigma 3 credits
This course focuses on Six Sigma process improvement. Students are instructed in the most common techniques of analyzing and improving business processes within the Six Sigma framework. Key topics include defining capability, determining sigma level, verifying root cause, conducting regression analysis, calculating COPQ, and developing control plans. Successful completion of the course is designed to result in fulfilling the requirements for Six Sigma Green Belt certification. Prerequisite: SYM 633.

SYM 635: Applied Six Sigma 3 credits
This course covers advanced problem solving using the Six Sigma methodologies. The course provides instruction on the first three
SYM 653: Business Programming Management  3 credits
This course will focus on the analysis of business problems and information management issues to design and implement the software component of an organizational information system. Emphasis is placed on structured design and programming that includes an introduction and examination of visual programming languages.

SYM 654: Database Management System  3 credits
This course is an examination of managerial issues associated with managing and securing data and information within an organization. Topics emphasized include database system types, decision support systems and framing, database administration, and database applications.

SYM 655: Data Communications and Network Management  3 credits
This course is an examination of managerial issues associated with the movement of information within an organizational network. Topics emphasized include architectures, protocols, policies, security management, and network management organization.

Teacher Leadership (TCH)

TCH 517: The Engaged Mind  4 credits
To better understand thinking, an educator must research current knowledge of the human mind and learn to assess a student's ability to think. This course addresses all five core propositions of the National Board for Professional Teaching Standards (NBPTS).

TCH 518: Collegial Coaching  4 credits
This course examines collegial coaching as a staff development model used to increase student learning, facilitate discussions among colleagues, and build trusting relationships among teachers. Students reflect on current practices or expand, refine, and build new skills by utilizing peer coaching. Students explore the interactive process of coaching between teaching professionals to share successful practices, problem-solve, and reduce isolation among teachers. Special emphasis is placed upon peer mentoring and the support of new teachers in their practice.

TCH 524: Current Classroom Methods and Strategies  4 credits
A growing body of research shows that teacher effectiveness is the single most important school-based influence on student achievement. Today's educator responds to complex and diverse needs of students in each classroom. This course provides the foundations for instructional design along with the tools for instructional planning. The alignment of curriculum standards to instruction and assessment is a major focus. Upon completion of this course, students have established a wide repertoire of methods and strategies that are research-based and easily modified to today's complex classroom.

TCH 525: Introduction to PLC  4 credits
This course examines the research, rationale, and realities associated with the movement toward professional learning communities in schools. Students explore the history of professional learning communities, the research upon which they are based, the characteristics that differentiate them from other collaborative models, and their relationship to a variety of school reform initiatives. Special emphasis is placed upon what can be learned from previous implementations of the professional learning communities' framework and how future models may be developed that are more meaningful and effective.

TCH 526: Teaching, Learning, and Collaborative Structures in a Professional Learning Community  4 credits
This course examines the shift in emphasis from teaching to learning and the role of the teacher as designer and facilitator in professional learning communities. Students explore the impact of shared instructional leadership and the importance of collaboration and teamwork.

TCH 531: Instructional Leadership  4 credits
Students acquire a repertoire of skills that enable them to function comfortably and effectively in a changing learning environment. The course provides teachers with an understanding of the complexity of being a leader in times of change. Students develop a vision of systemic change and demonstrate practical skills for ensuring smooth day-to-day operations within their school.

TCH 535: Legal Issues in Education  4 credits
Teachers need to recognize potential legal issues, make informed judgments and decisions, and seek administrative and legal counsel, when necessary. This course provides teachers with a basic understanding of the legal principles directing the American school system, along with the legal case origins determining current classroom guidelines.

TCH 536: Classroom Engagement and Management  4 credits
This course is designed to allow the prospective teacher the opportunity to learn techniques involved in the successful engagement and management of a learning environment. Major emphasis is given to the establishment of a realistic discipline plan to manage student behavior, as well as engagement and management techniques and strategies to maximize instructional time, classroom procedures, and physical space. Also EDU 536.

TCH 547: Data-Informed Decision Making for School Improvement  4 credits
This course provides participants with a wide range of strategies to facilitate the process of school improvement through evidence-based inquiry. Students utilize systematic processes to describe the existing environment and areas of weaknesses in order to facilitate and promote continuous and sustainable school improvement through innovation and change.

This course is designed to provide the theoretical foundation and framework of action research. Special emphasis is placed on an examination of the basic principles of qualitative research methodologies, which lead to the design and implementation of a peer-supported action research project.

This course orients students to the program, the technology challenges in today’s classroom, and the national standards guiding them. It includes an introduction to creating a professional portfolio. All of the listed objectives meet the International Society for Technology in Education Standards for Teachers. Prerequisite: Teaching experience – 3 years.

This course provides in-depth study of brain-compatible learning experiences, designing curriculum units, and differentiating instruction for all students. Participants will use the skills of backward design, brain theory, other learning theory principles, curriculum mapping, and practical methods of differentiating learning to design a curriculum unit for a subject and grade level. The use of technology will be integrated in the course curriculum from the beginning. This course meets the International Society for Technology in Education (ISTE) Standard 2. Prerequisite: TEC 509.

This course takes an objective look at dual language instruction, examining its different parts in a social environment. It also includes basic definitions and theoretical frameworks for thinking about bilingual education. This is packaged into an extensive, up-to-date coverage of timely issues such as using technology for communicative language teaching; using technology to teach oral communication skills, reading, and writing; teaching thinking and inquiry-based learning with English language learners; the relationships among culture, community, and diverse learners; and using computers for assessment in second language teaching. This course meets the International Society for Technology in Education (ISTE) Standards called NETS for Teachers. The objectives meet all of Section 6 of the National Education Teaching Standards (NETS). Prerequisites: TEC 509 and TEC 510.

This course introduces learners to NETS standards for students and teachers; digital citizenship and responsibility; legal and ethical use guidelines; and transitioning instruction to integrate technology. This course also addresses portfolio use professionally and with students. Technology dispositions, expectations, and guidelines are emphasized for being a 21st century educator.

Participants will investigate various learning theories and how these theories are contributing to technology enhanced educational practices. The most current issues facing educational technology will be addressed in a threaded discussion format as well as through classroom discussion and journal or online article research. As the one-computer classroom is a prevalent condition in many school districts, teachers will learn strategies for fully utilizing this source with the entire class. This course meets the International Society for Technology in Education (ISTE) Standard 5. Prerequisites: TEC 509 and TEC 510.

Emphasis of this class is placed on the sophisticated integration of software into teaching. Subjects include utilizing advanced word processing and database applications in the classroom, publishing software as teaching tools for interactive learning, and using Web freeware as a viable alternative in schools. This course encompasses the development of a final project that incorporates different technology uses.

The focus of this course is to provide learners with instructional strategies using theories of brain compatible learning, multiple intelligences, emotional IQ, personality profiles to match learning styles and basic exploration of how to integrate instruction and curriculum with these theories, and the use of current technologies.

In this course, students examine steps for planning, creating, and managing digital stories and presentations using software and tools for a variety of platforms. Attention is given to the use of digital Web software, use of media forms, and slideshows for instruction. Student activities tied to academic content standards and legal and ethical issues of displaying information on the Web are addressed.

This course facilitates the development of research knowledge and skill in practicing education professionals who must be knowledgeable, skilled, and adept in evaluating and interpreting research literature related to their job roles. Course content provides a basis for decision-making, change, and improvement and includes theory, techniques, design, and evaluation of research. This course meets the International Society for Technology in Education (ISTE) Standard 2. Prerequisites: TEC 509 and TEC 510.

Course participants apply an understanding of design principles in visual communication theory. They incorporate multiple intelligences and constructivist theories into an interactive environment. Attention is given to manipulation of images, social

*Campus/Off-site only | Writing-intensive course | Fulfills General Education requirement |
TEC 545: Multimedia Instructional Strategies  3 credits
This course focuses on the effective use of multimedia in classroom instruction. Participants will learn to evaluate multimedia, select appropriate multimedia, and match instruction to multimedia resources. Prerequisites: TEC 509 and TEC 510.

TEC 546: Assessment and Technology  4 credits
Participants explore various technology-based assessment tools used for formative and summative assessments. Students use tools to make data-driven decisions to drive curriculum and differentiate instruction. The content of this course includes use of digital media for progress monitoring or as assessment tools and creating and using alternative assessments.

TEC 551: Multimedia Instructional Strategies  4 credits
This course focuses on the effective use of multimedia in classroom instruction. Participants learn to select and evaluate appropriate multimedia resources, and correlate instruction to multimedia resources. This course addresses curriculum mapping and using backward design to unwrap the NETS standards.

TEC 555: Design of Print-Based Media  3 credits
This course provides the educator with the necessary knowledge and tools to create print media that can be used in their educational setting. Participants will develop and apply an understanding of the design principles of proximity, alignment, repetition, and contrast. These principles will be interwoven into discussions, class activities, group activities, and independent work. Participants will produce four projects – a layered graphic, a flyer, a newsletter, and a brochure – that have an educational theme or communicate an educational concept, program, or event. This course meets the International Society for Technology in Education (ISTE) Standard 3. Prerequisites: TEC 509 and TEC 510.

TEC 560: Interactive Design for the Classroom  3 credits
The purpose of this course is to introduce students to the design of interactive classroom lessons and activities by integrating multiple intelligences and constructivist learning theories in multimedia and web design. This course meets the International Society for Technology in Education (ISTE) Standard #2. Prerequisites: TEC 509 and TEC 510.

TEC 565: Distance Learning  3 credits
The purpose of this course is to introduce students to the design of interactive lessons and activities for distance education. The course defines distance education, including history, theories, and practical applications. This course meets International Society for Technology in Education (ISTE) Standards 1 and 3. Prerequisites: TEC 509 and TEC 510.

TEC 571: Distance Learning in Education  4 credits
The purpose of this course is to expand students' knowledge of lesson preparation and activities, as well as basic curriculum development and design principles, for distance education. The course explores distance education including history, theories, and practical applications. A variety of online facilitation techniques are explored in this course.

TEC 580: Practicum in Technology  3 credits
This mentored practicum experience encourages a cooperative arrangement among the key stakeholders. Upon completion, the candidate possesses an understanding of the complexity of being a leader in school and classroom technology use and training, ranging from development of a vision for technology support to demonstrating practical skills ensuring smooth day-to-day technology integration in teaching. The internship meets the following International Society of Technology Education (ISTE) Standards. Prerequisites: TEC 509, TEC 510, TEC 525, TEC 535, TEC 540, TEC 545, TEC 555, TEC 560, and TEC 565.

TRE 125: Introduction to the Theatre  4 credits
This course introduces the study of theatre history, dramatic structure, dramatic literature, period styles, production elements, design aspects, and a chronological survey of plays. It includes the study of theory of theatre and drama as well as appreciation and analysis of live theatrical performance.

TRE 130: Stagecraft  4 credits
This course is the study of set and prop construction. Practical application of construction techniques is gained through theatre productions.

TRE 145: Acting I  4 credits
This course identifies principles of pantomime and dramatic action designed to establish the proper relationship of the voice to the body and its functions in the interpretation of character. It is designed to help develop physical presence and facility in the actor, vocalist, teacher, athlete, and other persons involved in public performance.

TRE 245: Fundamentals of Theatrical Design  4 credits
This course is a detailed study of the art and craft of designing and executing stage make-up. Topics include two-dimensional, three-dimensional, and special effects make-up. Students may also design and supervise make-up for Grand Canyon University Theatre productions. This course includes a comprehensive study of the major periods of costume history and the process of designing costumes for the theatre.
TRE 253: Acting II 4 credits
This is an advanced acting course emphasizing scene study and textual analysis, allowing students to concentrate on the method and technique of building a character. Prerequisite: TRE 145.

TRE 325*: Theatre History I: Greek to Restoration 4 credits
This writing-intensive course is an in-depth study of the history and development of theatre from early Greece to the English Restoration.

TRE 330*: Theatre History II: 18th Century to Present 4 credits
This writing-intensive course is an in-depth study of the history and development of theatre from 18th century through modern times.

TRE 335: Dramatic Literature I 4 credits
This course is a comprehensive study of the major periods and forms of dramatic literature dating from early Greece to the Restoration.

TRE 339: Dramatic Literature II 4 credits
This course is a comprehensive study of the major periods and forms of dramatic literature dating from the Restoration to the present.

TRE 361: Valley Theatre Tour 3 credits
A study of Valley theatres and their productions. Students will study dramatic criticism as well as attend productions and evaluate the performances.

TRE 439: Stage Direction 4 credits
This course is a study of theories and techniques of interpreting and directing plays through lectures and demonstrations. Students are required to participate in laboratory projects in directing one-acts or scenes from full-length plays.

TRE 475: Stage Lighting and Design 4 credits
This course concerns the art of designing lighting and scenery for the theatre. Students will actively participate in designing Grand Canyon University Theatre productions and classroom projects. Prerequisite: TRE 130.

Teaching English to Speakers of Other Languages (TSL)

TSL 531: Foundations of Instruction for English Language Learners 4 credits
This course provides the historical, sociological, political, and legal foundations of instructional programs for English language learners in the United States. This framework serves as a basis for understanding, comparing, and evaluating current language models and prototypes. This course also introduces students to primary theories of language learning and current methodologies and practices.

TSL 534: Methods of Teaching English and Grammar to Speakers of Other Languages 4 credits
In this course, students are instructed in immersion strategies, English language development strategies, and numerous research-based methodologies in current practice. Students examine ways of organizing the classroom for optimal language learning, including especially cooperative learning. In the course setting, they also develop, practice, and assess language lessons that align with state and national standards for teaching English language learners.

TSL 536: English Linguistics 4 credits
This course familiarizes students with the fundamentals of linguistic theory, including the morphological, phonological, and syntactic structure of the English language. Other topics introduced are pragmatics, semantics, sociolinguistics, historical linguistics, and first and second language acquisition. Although emphasis is placed on descriptive analysis of the English language, examples and illustrations from several language systems are used.

TSL 537: Teaching a Second Language in the Content Areas 4 credits
The purpose of this course is to equip students with an awareness and sensitivity to the complexity and content-specific nature of language in curricular areas such as science, mathematics, and social studies. Students examine ways to integrate second language acquisition research (implications for teaching of comprehension, reading, and writing); literacy; and content area instruction in elementary, middle school, and high school settings. Students create content-based language lessons that address a variety of learner proficiencies and cultural experiences.

TSL 539: Curriculum Development and Assessment 3 credits
Teachers must be course developers as well as designers of instruction for daily and weekly lessons. In this course, students compare numerous syllabus types such as grammatical, text-based, and content-based. They also fully examine assessment for the purposes of identification, placement, and instructional delivery. They subsequently design and fully develop the materials for a language unit that aligns with the state and national standards and current assessment practices.

TSL 540: Curriculum Development and Assessment 4 credits
Teachers must be course developers as well as designers of instruction for daily and weekly lessons. In this course, students compare Sheltered Immersion Observation Protocol (SIOP) and Understanding by Design (UbD). They also fully examine assessment for the purposes of identification, placement, and instructional delivery. They subsequently design and fully develop the materials for a language unit that aligns with the state and national standards and current assessment practices.

This course offers background understanding of how SLA research informs language teaching. It examines the interaction between SLA research findings and the teaching of listening and reading. This course gives attention to instructional models that have proven successful with students from diverse linguistic, cultural, racial, ethnic, economic, and intellectual backgrounds. It presents the major goals, principles, and concepts of multicultural education, including multiple perspectives in culture and history and understanding cultural and individual differences in teaching and learning.

The focus of the course is to prepare classroom teachers to critically read published research on the teaching of reading to speakers of other languages, to integrate those findings with personal experience in order to make reflective instructional decisions, and to participate in pedagogical research and theory building. Using the knowledge acquired during the course, students develop a study team to improve instructional practices based on research findings. The study team implements strategies and provides feedback and data on the application of the research findings.

This course is designed to provide opportunities to develop and strengthen skills necessary to enhance the undergraduate experience. It provides positive reinforcement of successful learning strategies and assistance with adaptation to the academic environment.
environment. Topics address three areas of student development: life management skills, academic skills, and campus and learning community awareness.

**UNV 105: Writing Experience I** 3 credits
A course for students whose SAT or ACT scores indicate their need for a review of writing skills and strategies. UNV 105 reviews fundamentals such as grammar and sentence structure, as well as basics of topic selection, brainstorming activities, reading critically, and outlining. Students will begin with simple writing tasks, but will progressively increase from single paragraph construction to the five-paragraph model.

**UNV 110: Writing Experience II** 3 credits
A course for students whose SAT or ACT scores indicate need for a review of writing skills and strategies. UNV 110 reviews fundamentals such as grammar and sentence structure, as well as the basics of topic selection, brainstorming activities, reading critically, and outlining. Students will begin with simple writing tasks, but will progressively increase from single paragraph construction to writing college-level papers.

**UNV 150: Origins of Western Consciousness and Community** 4 credits
This is a survey course focusing on the origins of Western thought from an interdisciplinary perspective. Students cover topics related to myth, logic, rhetoric, symbol, aesthetics, politics, citizenship, ethics, and the philosophy of the good life.

**UNV 200: History of Ideas** 4 credits
This course is an introduction to the history of Western ideas and aesthetics—from the age of Classicism, through Christianity, the Renaissance, the Reformation, the Enlightenment, Romanticism, Modernism, and Globalism—designed to provide students with a better understanding of how modern Western worldviews are informed by historical human thought and events. These views are further examined in light of the aesthetics of their ages, especially through literature, visual art, architecture, and music that reflect the thoughts and feelings of the movements.

**UNV 300: Study Abroad** 1–16 credits
On demand. This program enables students to be enrolled at Grand Canyon University while undertaking studies in another country or with CCCU. Credits for this program vary depending on the number of credits involved and the chosen course of study. Prerequisite: Approval of Director of Center for International Education or appropriate college dean.

**UNV 303: University Success** 4 credits
This course is designed to address four major areas of a student's development: life management skills, academic skills, campus and community awareness, and personal and spiritual growth. This course is designed to provide opportunities to develop and strengthen skills necessary to enhance the college experience. Topics include the values of higher education, programming the mind for success, building interpersonal relationships, making the grade, decoding the professors, finance and time management, degree and campus planning, effective communication, confidence and leadership, health and fitness, stress management, keeping faith, and others.

**UNV 304: Science and the Christian Faith** 3 credits
This course encourages reflection on the relationship between science and the Christian faith. The first unit provides an historical survey of Christian perspectives on science. The second unit focuses on contemporary understandings of science, and practical issues such as genetics, environmental ethics and medical ethics. Prerequisite: BIB 103, BIB 113, or BIB 123.

**UNV 305: The Christian Mind** 3 credits
This course examines the historical development of the Christian worldview and challenges students to consider the problems facing humanity in the 21st Century from a Christian perspective. Prerequisite: BIB 103, BIB 113, or BIB 123.

**UNV 310: Theological Ideas in Christian Art: A Historical Survey** 3 credits
The study of major theological themes along with aesthetic principles as they apply to Christian artistic expression across the ages.

**UNV 315: Introduction to Interdisciplinary Studies** 4 credits
This course introduces concepts and methods of interdisciplinary study and critical analysis of contemporary vocational and cultural trends.

**UNV 320: Foundations of Interdisciplinary Studies** 3 credits
Introduces concepts and methods of interdisciplinary study critical analysis of contemporary vocational and cultural trends

**UNV 325: Applied Interdisciplinary Studies** 3 credits
An online course where students gain practical knowledge and apply interdisciplinary coursework as it applies to real world settings. Group projects required.

**UNV 350: Applied Interdisciplinary Studies** 4 credits
This is an online course where students gain practical knowledge and apply interdisciplinary coursework as it applies to real world settings. This capstone project is required. Prerequisites: UNV 315, SOC 369, INT 454.

**UNV 490: International Studies Senior Seminar** 3 credits
On demand. This is the capstone course for the International Studies major. Study is designed to bring the knowledge obtained in interdisciplinary courses into focus for the person who plans to work in an international relations field. Prerequisite: Senior status.

**UNV 498: Advanced Topics in Faith and Disciplines** 3 credits
On demand. A repeatable, interdisciplinary seminar that deals with advanced topics in faith and academic disciplines. It equips
students with critical and broad perspectives on important issues in science, society, and the Christian faith. Prerequisite: A UNV or HON 300-level course or instructor’s approval.

Creative Arts in Worship (WOR)

WOR 201: Introduction to Worship 3 credits
This course examines the biblical and historical roots of worship, explores the articulators of worship, and helps guide the participants in the development of pastorally sensitive, personally effective, and theologically sound worship services. The course will combine lecture, discussion, worship experience, and student-led worship. Prerequisite: None.

WOR 301: Arts and Worship 3 credits
This course explores the use of the creative and performing arts as modes of communicating God’s acts in history and life in the context of Christian worship. The course will combine lecture, discussion, worship experience, and student-led worship. Prerequisite: WOR 201.

WOR 302: Personal Worship Planning 3 credits
This course focuses on the development of private devotional worship and its necessity as a base for leading public corporate worship. Prerequisite: WOR 201.

WOR 303: Planning Corporate Worship 3 credits
This course examines how worship brings the congregation into God’s presence through various elements of expression. This seminar style course combines lecture, discussion, worship experience, student-led worship, and process-oriented peer-review. Prerequisite: WOR 201.

WOR 401: Worship Leading Seminar 3 credits
This course focuses on developing the leadership skills of those responsible for guiding corporate worship. Prerequisite: WOR 201.

WOR 475: Issues in Contemporary Worship Ministry 3 credits
Examining current movements, trends, leaders, and perspectives affecting worship and worship styles in the United States and around the world is imperative to becoming an effective worship leader. Topics will include efforts being made in the local church, regional church, and national ministries to establish unique worship programs. Contemporary worship and classical worship styles will be discussed and defined. Particular attention will be given to understanding worship through the eyes of the audience as well as the leader.
